

FIGURE 12

## 5.0 TRAFFIC OPERATIONS ANALYSIS

Kimley-Horn's analysis of traffic operations in the site vicinity was conducted to determine potential capacity deficiencies in the 2022 and 2040 development horizons at the identified key intersections and access driveways. The acknowledged source for determining overall capacity is the current edition of the *Highway Capacity Manual (HCM)*<sup>2</sup>.

### 5.1 Analysis Methodology

Capacity analysis results are listed in terms of Level of Service (LOS). LOS is a qualitative term describing operating conditions a driver will experience while traveling on a particular street or highway during a specific time interval. It ranges from A (very little delay) to F (long delays and congestion). The City of Glenwood Springs has adopted LOS D as the minimum acceptable level of service for all movements and approaches when evaluating intersection operations. **Table 2** shows the definition of level of service for signalized and unsignalized intersections.

**Table 2 – Level of Service Definitions**

| Level of Service | Signalized Intersection<br>Average Total Delay<br>(sec/veh) | Unsignalized Intersection<br>Average Total Delay<br>(sec/veh) |
|------------------|-------------------------------------------------------------|---------------------------------------------------------------|
| A                | ≤ 10                                                        | ≤ 10                                                          |
| B                | > 10 and ≤ 20                                               | > 10 and ≤ 15                                                 |
| C                | > 20 and ≤ 35                                               | > 15 and ≤ 25                                                 |
| D                | > 35 and ≤ 55                                               | > 25 and ≤ 35                                                 |
| E                | > 55 and ≤ 80                                               | > 35 and ≤ 50                                                 |
| F                | > 80                                                        | > 50                                                          |

Study area intersections were analyzed based on average total delay analysis for signalized and unsignalized intersections. Under the unsignalized analysis, the level of service (LOS) for a two-way stop-controlled intersection is determined by the computed or measured control delay and is defined for each minor movement. Level of service for a two-way stop-controlled intersection is not defined for the intersection as a whole. Level of service for a signalized and four-way stop controlled intersection is defined for each approach and for the intersection.

<sup>2</sup> Transportation Research Board, *Highway Capacity Manual*, Sixth Edition, Washington DC, 2016.

## 5.2 Key Intersection Operational Analysis

Calculations for the level of service at the key intersections for the study area are provided in **Appendix D**. The existing year analysis is based on the lane geometry and intersection control shown in **Figure 3**. The existing peak hour factors were utilized in the intersection operational analysis. Sidra software was used to evaluate the roundabout intersection at SH-6 and Mel Ray Road, while Synchro traffic analysis software was used to analyze the unsignalized key intersections and access driveways for level of service.

### Donegan Road and Chapparral Circle/Project Access

The Donegan Road and Chapparral Circle intersection is a three-leg T-intersection with stop control on the southbound Chapparral Circle approach. The movements at this intersection currently operate acceptably with LOS A during the morning and afternoon peak hours. With construction of this project, a south leg is proposed as a project access. It is recommended that the south leg have one lane for shared movements and a R1-1 STOP sign installed on the northbound approach. Throughout 2040, all movements at this intersection are anticipated to operate acceptably with LOS B or better. **Table 3** provides the level of service results.

**Table 3 – Donegan Road and Chapparral Circle/Project Access LOS Results**

| Scenario                            | AM Peak Hour    |     | PM Peak Hour    |     |

### Donegan Road and Mel Ray Road

The intersection of Donegan Road and Mel Ray Road is a four-leg intersection with stop control on all approaches. This intersection currently operates acceptably with LOS A during the morning and afternoon peak hours. With the existing lane configuration and control, this intersection is anticipated to continue to operate acceptably with LOS B or better during the peak hours throughout 2040. **Table 4** shows the level of service results at this intersection.

**Table 4 – Donegan Road and Mel Ray Road LOS Results**

| Scenario                     | AM Peak Hour    |     | PM Peak Hour    |     |
|------------------------------|-----------------|-----|-----------------|-----|
|                              | Delay (sec/veh) | LOS | Delay (sec/veh) | LOS |
| 2021 Adjusted Existing       | 7.8             | A   | 7.9             | A   |
| 2022 Background              | 8.4             | A   | 9.2             | A   |

### SH-6 and Donegan Road

The intersection of SH-6 and Donegan Road is a three-leg intersection with stop control on the southbound approach. The movements at this intersection all currently operate acceptably with LOS C or better during the morning and afternoon peak hours. With the existing lane configurations and control, the movements at this intersection are all expected to continue to operate acceptably during the peak hours in 2022 with or without the addition of project traffic. By 2040, the southbound approach at this intersection may degrade to operate with LOS E during the afternoon peak hour with or without the addition of project traffic. In order to provide acceptable operations, it is recommended that an eastbound left turn lane and an eastbound acceleration lane from the southbound left turn be constructed at this intersection to facilitate two-stage left turn movements. Based on CDOT Access Code standards, the eastbound left turn lane should provide a length of 50 feet plus a 145-foot taper while the left turn acceleration lane should provide a length of 235 feet plus a 145-foot taper. The through lane transitions should be 320 feet long based on the 40-mph speed limit and a 12-foot wide lane. With this improvement, the movements at this intersection are expected to operate acceptably with LOS C or better during the peak hours throughout the 2040 horizon. **Table 5** shows the level of service results at this intersection.

**Table 5 – SH-6 and Donegan Road LOS Results**

| Scenario                              | AM Peak Hour       |     | PM Peak Hour       |     |

# Eastbound left turn lane and eastbound acceleration lane from southbound left turn

### **Center Drive/Project Access and Storm King Road**

The Center Drive and Storm King Road intersection is a four-leg intersection with stop control on the eastbound and westbound Center Drive approaches. The movements at this intersection currently operate acceptably with LOS D or better during the morning peak hour and LOS B or better during the afternoon peak hour. With construction of this project, the east leg of this intersection is proposed to be an access to the 480 Donegan development. With or without the addition of the project, the westbound approach at this intersection is anticipated to operate with LOS E during the morning peak hour in 2022. It is believed that all-way stop control would be appropriate at this intersection based on the proximity to the school, traffic volume projections, number of pedestrian crossings, and operational requirements. With all-way stop control and the existing lane configurations, this intersection is expected to operate acceptably with LOS B during the peak hours throughout the 2040 horizon.

It is recommended that R1-1 "STOP" signs be installed on the northbound and southbound Storm King Road approaches of this intersection. Further, R1-3P "ALL WAY" plaques should be placed below the stop signs on all four approaches. It is recommended that orange flags be temporarily affixed to the new STOP signs on northbound and southbound Storm King Road to warn drivers of the change in traffic control. **Table 6** shows the level of service results at this intersection.

**Table 6 – Center Drive/Project Access and Storm King Road LOS Results**

| Scenario                              | AM Peak Hour       |      | PM Peak Hour       |     |

# All Way Stop Control

### SH-6 and Storm King Road

The intersection of SH-6 and Storm King Road is a three-leg T-intersection with stop control on the southbound Storm King Road approach. The movements at this intersection all currently operate acceptably with LOS C or better during the morning and afternoon peak hours. With construction of this project, the movements at this intersection are anticipated to continue to operate acceptably with LOS C or better during the peak hours throughout the 2040 horizon. **Table 7** shows the level of service results at this intersection.

**Table 7 – SH-6 and Storm King Road LOS Results**

| Scenario                            | AM Peak Hour       |     | PM Peak Hour       |     |

### SH-6 and Mel Ray Road

The SH-6 and Mel Ray Road intersection is a two-lane roundabout with access to SH-6, Mel Ray Road, and the I-70 Westbound Ramps. This intersection currently operates acceptably with LOS B during the morning peak hour and LOS D during the afternoon peak hour. With or without construction of this project, this roundabout is anticipated to operate poorly during the afternoon peak hour with LOS F in 2022. If future volumes are realized, this roundabout should be further studied by CDOT. However, it should be noted that a conservative COVID adjustment factor as well as traffic volume growth rate were applied. Also, this intersection is likely built to the ultimate configuration. **Table 8** shows the level of service results at this intersection. Detailed results of the operational analysis are also provided in **Appendix D**.

**Table 8 – SH-6 and Mel Ray Road LOS Results**

| Scenario                     | AM Peak Hour    |     | PM Peak Hour    |     |
|------------------------------|-----------------|-----|-----------------|-----|
|                              | Delay (sec/veh) | LOS | Delay (sec/veh) | LOS |
| 2021 Adjusted Existing       | 11.8            | B   | 26.0            | D   |
| 2022 Background              | 13.8            | B   | 58.9            | F   |

| 2040 Background              | 18.2            | C   | 90.0            | F   |
| 2040 Background Plus Project | 24.8            | C   | 112.0           | F   |

### Donegan Road and Storm King Road

The intersection of Donegan Road and Storm King Road is a three-leg T-intersection with stop control on the northbound Storm King Road approach. The movements at this intersection all currently operate acceptably with LOS A during the morning and afternoon peak hours. With construction of this project, the movements at this intersection are anticipated to continue to operate acceptably with LOS B or better during the peak hours throughout the 2040 horizon. **Table 9** shows the level of service results at this intersection.

**Table 9 – Donegan Road and Storm King Road LOS Results**

| Scenario                                                                     | AM Peak Hour       |        | PM Peak Hour       |        |

### 5.3 CDOT Access Permit Analysis Need

The threshold for requiring an access permit along CDOT roadways occurs when project traffic is anticipated to increase the existing access traffic volumes by more than 20 percent. Based on traffic projections, the addition of project traffic on the north leg of the SH-6 and Mel Ray Road intersection is anticipated to increase existing access traffic volumes by more than 20 percent during the peak hour; therefore, it is believed that an access permit will be required by CDOT for this approach in association with this project. Since the Mel Ray Road and SH-6 intersection is a roundabout, turn lanes are not anticipated to be required in addition to the existing roundabout configuration.

Neither the Storm King Road at SH-6 nor the Donegan Road north leg at SH-6 are anticipated to increase traffic volumes by more than 20 percent; therefore, access permits are not anticipated to be needed at these two intersections in association with this project. Of note, the project traffic added to the north leg of Storm King Road at SH-6 is anticipated to have an increase of 13.0 percent, while the project traffic added to the north leg of Donegan Road at SH-6 is anticipated to increase by 13.1 percent. Although, if improvements are constructed at SH-6/Donegan Road as recommended in the future to include an eastbound left turn lane and an eastbound acceleration lane from the southbound left turn, a CDOT Access Permit will likely be needed.

### 5.4 Vehicle Queuing Analysis

A vehicle queuing analysis was conducted for the study area intersections. The queuing analysis was performed using Synchro presenting the results of the 95<sup>th</sup> percentile queue lengths. Results are shown in the following **Table 10** with calculations provided within the level of service operational sheets of **Appendix D**.

**Table 10 – Turn Lane Queuing Analysis Results**

DNE = Does Not Exist; C = Continuous Lane; \* = Constructed to Maximum Possible Length

As shown in the table representing the queuing results, it is recommended that the new south leg to provide access to this 480 Donegan project at the intersection of Donegan Road and Chapparral Circle be constructed with a minimum throat depth to accommodate one vehicle, or 25 feet. The current site plan provides approximately 125 feet at this location; therefore, this throat depth is sufficient to accommodate exiting project traffic.

The southbound approach at Donegan Road and SH-6 intersection may have queues longer than available. As stated previously, an eastbound left turn lane and an eastbound acceleration lane to accept the southbound left turn may need to be constructed by 2040 at the SH-6 and Donegan Road intersection. The eastbound left turn lane should provide a length of 50 feet plus a 145-foot taper while the left turn acceleration lane should provide a length of 235 feet plus a 145-foot taper. This improvement will provide a shorter southbound approach queue length.

## **5.5 Bicycle and Pedestrian Access**

Bicycle and pedestrian access evaluations were conducted for the area surrounding the proposed 480 Donegan project. There are designated bicycle lanes on both sides of Donegan Road east of Soccer Field Road. There are sidewalks along the south side of Donegan Road from Storm King Road to approximately 575 feet west of Storm King Road. Sidewalks exist on both sides of Donegan Road from Soccer Field Road to Orchard Lane. To the east of Orchard Lane, a sidewalk exists on the north side of Donegan Road. Sidewalks exist on both sides of Storm King Road and on the north side of State Highway 6 within the project area. RFTA Routes Hogback and Ride Glenwood Spring have one stop along State Highway 6 just to the west of Mel Ray Road. Crosswalks are currently provided at the roundabout intersection of State Highway 6 and Mel Ray Road.

In the future, bicycle lanes are proposed in both directions, eastbound and westbound, along Donegan Road. A bicycle lane is also proposed in the northbound direction along the full length of Storm King Road. Further, a bicycle lane is proposed south of Center Drive along Storm King Road in the southbound direction. However, it is believed sufficient space is not available north of Center Drive to include a southbound bicycle lane along Storm King Road. Likewise, sidewalk connections will be provided to the east along the south side of Donegan Road to provide a connection from this development to the existing sidewalk for a continuous pedestrian access.

## **5.6 Improvement Summary**

Based on the results of the intersection operational and vehicle queuing analysis, the key intersection recommended improvements and control are shown in **Figure 13** for 2022 and **Figure 14** for 2040.

## 6.0 CONCLUSIONS AND RECOMMENDATIONS

---

Based on the analysis presented in this report, Kimley-Horn believes 480 Donegan will be successfully incorporated into the existing and future roadway network. The proposed project development resulted in the following recommendations and conclusions:

- Access to the site will be provided by two proposed full movement driveways. One access is proposed on the south side of Donegan Road to align with Chapparal Circle and the other access is proposed along the east side of Storm King Road to align with Center Drive. It is recommended that the access aligning with Chapparal Circle have a single exiting lane to Donegan Road and operate with stop control with a R1-1 “STOP” sign installed for the northbound exiting driveway approach.
- It is recommended that all-way stop control be provided at the intersection of Center Drive/Access and Storm King Road with development of the project. New R1-1 “STOP” signs should be installed on the northbound and southbound Storm King Road approaches of this intersection. Further, R1-3P “ALL WAY” plaques should be placed below the stop signs on all four approaches. It is recommended that orange flags be temporarily affixed to the new STOP signs on northbound and southbound Storm King Road to warn drivers of the change in traffic control.
- The threshold for requiring an access permit along CDOT roadways occurs when project traffic is anticipated to increase the existing access traffic volumes by more than 20 percent. Based on traffic projections, the addition of project traffic on the north leg of the SH-6 and Mel Ray Road intersection is anticipated to increase existing access traffic volumes by more than 20 percent during the peak hour; therefore, it is believed that an access permit will be required by CDOT for this approach at the Mel Ray Road and SH-6 intersection in association with this project. Access permit are not anticipated to be required at the SH-6/Storm King Road or SH-6/Donegan Road intersections based on the traffic volume threshold; although, if improvements are constructed at SH-6/Donegan Road as recommended for the future to include an eastbound left turn lane and an eastbound acceleration lane from the southbound left turn, a CDOT Access Permit will likely be needed.

- Based on an operational need in 2040 with or without the addition of project traffic, it is recommended that an eastbound left turn lane and an eastbound acceleration lane from the southbound left turn be constructed at the State Highway 6 and Donegan Road intersection. Based on CDOT Access Code standards, the eastbound left turn lane should provide a length of 50 feet plus a 145-foot taper while the left turn acceleration lane should provide a length of 235 feet plus a 145-foot taper. The through lane transitions around this new left turn lane should be 320 feet long based on the 40-mph speed limit and a 12-foot wide lane.
- Any on-site improvements should be incorporated into the Civil Drawings and conform to the standards of the City of Glenwood Springs, CDOT, and the Manual on Uniform Traffic Control Devices (MUTCD) – 2009 Edition.

 Checked by \_\_\_\_\_ Date \_\_\_\_\_ Sheet No. 1 of 1

## TRIP GENERATION MANUAL TECHNIQUES

ITE Trip Generation Manual 10th Edition, Fitted Curve Equations

Land Use Code - Multifamily Housing (Mid-Rise) (221)

Independant Variable - Dwelling Units (X)

$$X = 340$$

T = Average Vehicle Trip Ends

### Peak Hour of Adjacent Street Traffic, One Hour Between 7 and 9 a.m. (Series 200 Page 74)

$$\ln(T) = 0.98 \ln(X) - 0.98$$

$$\ln(T) = 0.98 * \ln(340.0) - 0.98$$

Directional Distribution: 26% ent. 74% exit.

T = 114 Average Vehicle Trip Ends

30 entering 84 exiting

$$30 + 84 = 114$$

### Peak Hour of Adjacent Street Traffic, One Hour Between 4 and 6 p.m. (Series 200 Page 75)

$$\ln(T) = 0.96 \ln(X) - 0.63$$

$$\ln(T) = 0.96 * \ln(340.0) - 0.63$$

Directional Distribution: 61% ent. 39% exit.

T = 143 Average Vehicle Trip Ends

87 entering 56 exiting

$$87 + 56 = 143$$

### Weekday (Series 200 Page 73)

$$(T) = 5.45*(X) - 1.75$$

$$(T) = 5.45 * 340 - 1.75$$

Directional Distribution: 50% ent. 50% exit.

T = 1852 Average Vehicle Trip Ends

926 entering 926 exiting

$$926 + 926 = 1852$$

### Peak Hour of Generator, Saturday (Series 200 Page 79)

$$(T) = 0.42*(X) + 6.73$$

$$(T) = 0.42 * 340 + 6.73$$

Directional Distribution: 49% ent. 51% exit.

T = 150 Average Vehicle Trip Ends

72 entering 77 exiting

$$72 + 77 = \text{not ok}$$

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: US HCM 6.

Delay Model: HCM Delay Formula (Geometric Delay is not included).  
Queue Model: HCM Queue Formula.  
Gap-Acceptance Capacity: Traditional M1.  
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: US HCM 6.

Delay Model: HCM Delay Formula (Geometric Delay is not included).  
Queue Model: HCM Queue Formula.  
Gap-Acceptance Capacity: Traditional M1.  
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: US HCM 6.

Delay Model: HCM Delay Formula (Geometric Delay is not included).  
Queue Model: HCM Queue Formula.  
Gap-Acceptance Capacity: Traditional M1.  
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: US HCM 6.

Delay Model: HCM Delay Formula (Geometric Delay is not included).  
Queue Model: HCM Queue Formula.  
Gap-Acceptance Capacity: Traditional M1.  
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: US HCM 6.

Delay Model: HCM Delay Formula (Geometric Delay is not included).  
Queue Model: HCM Queue Formula.  
Gap-Acceptance Capacity: Traditional M1.  
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: US HCM 6.

Delay Model: HCM Delay Formula (Geometric Delay is not included).  
Queue Model: HCM Queue Formula.  
Gap-Acceptance Capacity: Traditional M1.  
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: US HCM 6.

Delay Model: HCM Delay Formula (Geometric Delay is not included).  
Queue Model: HCM Queue Formula.  
Gap-Acceptance Capacity: Traditional M1.  
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: US HCM 6.

Delay Model: HCM Delay Formula (Geometric Delay is not included).  
Queue Model: HCM Queue Formula.  
Gap-Acceptance Capacity: Traditional M1.  
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: US HCM 6.

Delay Model: HCM Delay Formula (Geometric Delay is not included).  
Queue Model: HCM Queue Formula.  
Gap-Acceptance Capacity: Traditional M1.  
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

Site Level of Service (LOS) Method: Delay & v/c (HCM 6). Site LOS Method is specified in the Parameter Settings dialog (Site tab).

Roundabout LOS Method: Same as Sign Control.

Vehicle movement LOS values are based on average delay and v/c ratio (degree of saturation) per movement.

LOS F will result if v/c > 1 irrespective of movement delay value (does not apply for approaches and intersection).

Intersection and Approach LOS values are based on average delay for all movements (v/c not used as specified in HCM 6).

Roundabout Capacity Model: US HCM 6.

Delay Model: HCM Delay Formula (Geometric Delay is not included).  
Queue Model: HCM Queue Formula.  
Gap-Acceptance Capacity: Traditional M1.  
HV (%) values are calculated for All Movement Classes of All Heavy Vehicle Model Designation.

COUNTY OF GARFIELD  
STATE OF COLORADO

THE SITE IS WITHIN ZONE 'C' OF FEMA FIRM 0800711043C WHICH ARE 'AREAS OF MINIMAL FLOODING'.

DEVELOPMENT SUMMARY:

Gross Site Area: 12.29 AC (535,352.4 SF)

LAND USES:

RESIDENTIAL 402,320 GSF +/-  
CLUBHOUSE (RESIDENTIAL OFFICE/AMENITY) 9,600 GSF +/-  
CLUBHOUSE (RESIDENTIAL RESTAURANT/PUB) 2,000 GSF +/-  
TOTAL GROSS SQUARE FOOTAGE= 413,920 GSF +/-

Proposed Dwelling Units (DU): 360 DU

NOTE: FINAL BUILDING GROSS SQUARE FOOTAGES ARE CONCEPTUAL AND SUBJECT TO REFINEMENT AT THE TIME OF MAJOR SITE PLAN REVIEW.

DEVELOPMENT CRITERIA:

DEVELOPMENT DENSITY

Maximum Gross Residential Density: 29.29 dwelling units/acre

Maximum Gross Non-Residential FAR/Density: 0.022 FAR or 944 GSF/acre

COMMON OPEN SPACE

Minimum Required: 2.46 AC (20% of the Gross Site Area)  
Area Provided: 2.52 AC (20.5% of the Gross Site Area)

SETBACKS

Minimum Building Setback from Public Streets:

Donegan Road 25 feet from street right-of-way  
Storm King Road 20 feet from street right-of-way

Minimum Building Setback from Private Streets:

Center Drive 10 feet from property line

Minimum Building Setback Internal to the Property

Face of Garage 3 feet from cartway  
Abutting Properties 30 feet from property line  
Building to Building 20 feet from main building face

Minimum Surface Parking Setback from Public Streets:

Donegan Road 30 feet from street right-of-way  
Storm King Road 30 feet from street right-of-way

Minimum Garage Setback from Public Streets:

Donegan Road 30 feet from street right-of-way  
Storm King Road 25 feet from street right-of-way

Minimum Side or Rear Parking Setback

Abutting Properties 10 feet from lot line

Notes:

- Setbacks are measured from the face of the building to the existing public street right-of-way, edge of driveway or from abutting property lines.
- Permitted setback encroachments from public streets include the following:
  - Front porches, stoops and balconies may encroach six (6) feet into the setback.
  - Porches, slabs, patios, walks and steps may encroach into setback by any amount provided all components of the encroachment are no greater than 36 inches above ground level.
  - Building roof eaves and other incidental architectural features may encroach 18 inches into setback.
  - Other exceptions to structures within a setback shall comply with Glenwood Springs Development Code.

BUILDING HEIGHT

Maximum Building Height:

Residential Buildings 55 feet  
Ancillary Buildings 35 feet  
Freestanding Garages 25 feet

PARKING

Minimum Required Parking:

| Residential                | Quantity | Rate      | Required Spaces |
|----------------------------|----------|-----------|-----------------|
| Dwelling: Live-Work        | 13 DU    | 1.0 SP/DU | 13 Spaces       |
| Dwelling: Townhouse        | 20 DU    | 1.5 SP/DU | 30 Spaces       |
| Dwelling: Multifamily      | 327 DU   | 1.5 SP/DU | 491 Spaces      |
| Guest Parking <sup>1</sup> | 347 DU   | 1.0 SP/DU | 70 Spaces       |
|                            | Subtotal |           | 604 Spaces      |

| Non-Residential (Clubhouse) | Quantity | Rate          | Required Spaces |
|-----------------------------|----------|---------------|-----------------|
| Restaurant                  | 2,000 SF | 1 SP/200 SF   | 10 Spaces       |
| Office & Amenity            | 9,600 SF | 1 SP/1,000 SF | 10 Spaces       |
|                             | Subtotal |               | 20 Spaces       |

TOTAL REQUIRED 624 SPACES

Note:

- Guest Parking applies to Dwelling: Townhouse and Multifamily

Proposed Parking:

| On-site Parking      |     |                     |
|----------------------|-----|---------------------|
| Surface Parking Lot  | 478 | Spaces              |
| Center Street        | 14  | Spaces              |
| Freestanding Garages | 16  | Spaces              |
| Integral Garages     | 66  | Spaces              |
| Subtotal             | 574 | Spaces <sup>2</sup> |

| Off-site Parking on Public Streets |    |                     |
|------------------------------------|----|---------------------|
| Donegan Street                     | 41 | Spaces              |
| Storm King Road                    | 10 | Spaces              |
| Subtotal                           | 51 | Spaces <sup>2</sup> |

TOTAL PARKING PROVIDED: 625 SPACES

Notes:

- On-site parking includes 14 accessible parking spaces.
- Off-site parking accounts for 8.2% of total parking provided.

Designated Snow Storage:

Snow storage concept locations shown on the PUD plan. Final snow removal and storage plan will be determined for the Major Site Plan submittal.

**RE:** 214 Center Drive/480 Donegan  
Annexation and Zoning Submission

Dear Trent:

214 Center Drive, LLC (“Applicant”) hereby submits applications for the annexation, and zoning (collectively, the “Application”) of the property currently known as 214 Center Drive, Glenwood Springs, Parcel Number 218506100042 (the “Property”). The Property comprises 15.82 acres and is owned by Glenwood Partnership, LLLP (“GP”). Applicant’s affiliate, Commercial Development Services Group, LLC, is under contract to purchase the vacant portion of the Property consisting of 12.29 acres (the “Vacant Parcel”) and will be developing the land after purchase. A duly-noticed neighborhood meeting regarding the proposed annexation of the Property and development of the Vacant Parcel was held on July 1, 2020. Applicant submits and will be pursuing the Application with GP’s approval.

## II. EXISTING CONDITIONS AND UTILITIES

The Property is located in unincorporated Garfield County immediately to the north of the Glenwood Springs Mall and is zoned Commercial Limited. The western Property boundary is adjacent to Storm King Road, its northern boundary is adjacent to Donegan Road, and the eastern boundary abuts six residential lots accessed from Mel Ray Road. Approximately 3.53 acres of the Property are developed with two commercial buildings and related improvements used for office and flex-warehouse space (the “Developed Parcel”). A playground also exists just north of the private road (Center Drive) that provides access to the Property off of Storm King Road. The balance of the Property is a vacant, irrigated field. Submitted herewith is a report from Applicant’s engineer, Sopris Engineering, LLC, that describes, among other things, the existing utilities that serve the Property and future utility needs.

## III. SUMMARY OF PROPOSED DEVELOPMENT OF VACANT PARCEL

As noted in the recent market study conducted by Greater Roaring Fork Region Municipal and Organizational Partnership and Applicant’s own independent market study, there appears to be a notable lack of housing available in the Glenwood Springs market. Accordingly, Applicant intends to develop the Vacant Parcel as a primarily residential development with residential, residential amenity, and commercial components. Applicant feels the Vacant Parcel is uniquely positioned for such development seeing as it is only a quarter mile north of the Interstate 70 interchange, making new housing units easily accessible to employment centers throughout the valley. It is also within close walking distance to shopping, restaurants, and schools. The Developed Parcel will remain unchanged as no new development is proposed at this time.

The residential component of the proposed Vacant Parcel development will consist of 360 dwelling units distributed among eleven buildings and three types of housing—townhouse, multi-family, and live/work units. At that unit count, the density of the project would be 29.29 units/acre, which is less than the other apartment complexes recently approved by the City. The entire development will be operated as a rental apartment complex. Under Applicant’s current plan, there will be 95 studio units, 13 live/work units, 110 1-bedroom units, 94 2-bedroom units, 28 3-bedroom units, and 20 townhouse units. The residential buildings range in height from two to or four stories. On-site parking will consist of uncovered surface parking, free-standing garages, and internal garages. Applicant is also proposing to construct additional on-street parallel parking on Donegan Road and Storm King Road, which will provide parking for development residents and the public.

Applicant is aware of the need for affordable housing in the City and therefore intends to participate in the City’s affordable housing program. The rents for approximately ten percent of each housing type except for the live-work units will be deed-restricted to not exceed the maximum rent established by CHFA for 120% AMI in Garfield County. A breakdown of the affordable units is below:

- a. Studio units (95 total units): 5 units restricted to 100% AMI, 6 units restricted to 120% AMI;
- b. 1-Bedroom multi-family units (110 total units): 6 units restricted to 100% AMI, 6 units restricted to 120% AMI;

- c. 2-Bedroom multi-family units (94 total units): 5 units restricted to 100% AMI, 5 units restricted to 120% AMI;
- d. 3-Bedroom multi-family units (28 total units): 1 unit restricted to 100% AMI, 2 units restricted to 120% AMI; and
- e. Townhomes (20 total units): 2 units restricted to 120% AMI
- f. **Total units in development: 360; Total deed-restricted units: 38 units**

The non-residential component of the development will consist of a central clubhouse that includes residential amenities such as a workout facility, meeting rooms, and a lounge area as well as the leasing and administrative office for the complex. The clubhouse will also include a full-service restaurant/pub that will be open to the public and have indoor and outdoor seating. The clubhouse building is planned to be approximately 11,600 square feet. For reference, Applicant anticipates the restaurant to be similar to the Kitchen at Ironbridge. There will also be a pool and spa at the clubhouse, which will be for resident-use only and centrally located within the development as indicated on the illustrative concept plan.

Plans showing conceptual landscaping and general architectural styles anticipated for the Vacant Parcel are included with the Application. Note that all such renderings are conceptual only at this point and are subject to change and refinement at the time of major site plan review.

#### IV. ANNEXATION

Enclosed with the Application is an annexation petition to signed by GP, the current owner of the Property. The petition asks City Council to annex the entire Property as it currently exists. Once annexed, Applicant will pursue subdivision of the Property into two lots as shown on the conceptual subdivision plat provided herewith concurrently with major site plan review of the PUD portion of the Property. No platted street will be included in the petition, and the entire width of the private street located on the Property will be annexed. Per the annexation map, there will be no issue meeting the 1/6<sup>th</sup> contiguity requirement for annexation.

There have been no attempts to annex the Property, or any portion thereof, by petition or election within the last twelve months. Considering the location of the Property and the proposed development thereof described below, Applicant believes that a community of interests exists between the City and the Property and that integrating the Property into the City and surrounding development is feasible and desirable. Because the Property is more than 10 acres, an annexation report to be prepared by the City will be required unless the City and Garfield County agree that the report may be waived. C.R.S. § 31-12-108.5(1).

Include among the Application materials is a draft Annexation Agreement. No pre-annexation agreement is needed here because the developed portion of the Property is already served with City water, and no City services will be extended to or utilized on the Vacant Parcel unless and until the Property is annexed and the land is developed. The draft Annexation Agreement addresses issues such as impact fee payment, water rights dedications, and anticipated off-site improvement work. As explained in the engineer's report, Applicant and GP have sufficient Reynolds & Cain ditch shares to dedicate to the City to cover the irrigation needs and consumptive uses on the Vacant Parcel and Developed Parcel. Applicant and GP propose that a portion of those shares be leased back to the Property owners to allow for continued raw water irrigation of the Property. Since the Developed Parcel

is commercial and is already served by City water, the standard impact fees and dedications would not apply to that portion of the Property. Applicant's affiliate has agreed to participate in the City's affordable housing programs and is therefore requesting that the impact fees and dedications for the Vacant Parcel be reduced as provided in Section 070.040.120 of the Municipal Code. Applicant and GP look forward to working with the City to refine the Annexation Agreement.

According to Section 070.060.040.(d) of the City's Municipal Code, annexation plans must conform to state statute, be consistent with the Comprehensive Plan, and include enough information to allow the City to evaluate whether and to what extent the annexation will impact the health, safety, and welfare of the City. As described above, the proposed annexation and the petition for the same satisfy applicable state statutory requirements for annexation. Included with the Application are conceptual engineering plans, an engineering report, a traffic study, and other information related to the impacts of the proposed development of the Vacant Parcel that will allow the City to analyze the impacts of the development on City resources. The impacts of annexation of the Developed Parcel will be minimal seeing as it is already served by City water, receives sanitary sewer service from the West Glenwood Springs Sanitation District, and will not generate any new traffic or use of City streets than has occurred since the Property was developed.

The Future Land Use Map that is part of the City's Comp Plan designates the Property as Mixed-Use and within the Urban Growth Boundary. A mixed-use designation "allows for a variety of uses including commercial, retail, office, restaurant, entertainment and multi-family housing co-existing through design either in a horizontal or vertical fashion." The proposed development of the Vacant Parcel, both alone and combined with the existing development on the Developed Parcel, is consistent with this description. The variety of housing types, restaurant, office space available in the live/work units and on the Development Parcel, and open space areas throughout the property make for a cohesive and workable addition to the City.

Annexing and developing the Property as proposed is consistent with several of the community goals and visions articulated in the Comp Plan. For one, the annexation will direct development to a location that is easy and cost effective to serve. Since the Property is essentially an infill area, all of the infrastructure and services necessary to serve the Property already exist in the immediate vicinity of the Property, including easy access to bus transportation. And the proposed bike lanes on Storm King Road and Donegan Road will add an improved transportation choice for new and existing residents in the area. Annexing the Property will also provide much-needed housing opportunities for a variety of residents, especially considering the affordable housing component of the development. Moreover, annexing the Property will maintain the "small town" character of the City by integrating the new housing with surrounding neighborhoods, providing residents of the development a large, central common area where they can walk, talk, engage, and be active, and offering the public to a place to dine and be social, which is currently lacking in the subject part of the City.

As stated in the Comp Plan, secondary commercial areas such as the Glenwood Springs Mall area are the primary locations for additional growth, including housing and employment uses as they will have minimal impact on the City's older, more established traditional neighborhoods. For that reason, the Comp Plan envisions secondary commercial areas "redevelop into mixed-use neighborhoods with a significant housing component." Indeed, the Comp Plan expressly envisions that the mall and the properties immediately to the north of it (i.e., the Property) "be integrated and

redeveloped into a mixed-use community including a significant component of medium to high density residential uses with an internal system of sidewalks and community spaces thus creating a center focal point for the west end of town.” The annexation and proposed development of the Property squarely meet this vision. Finally, the City’s overall annexation position set forth in the Comp Plan indicates that the City encourages and supports the annexation of the property north of the Glenwood Springs Mall to facilitate a compatible/coordinated mixed-use development. The proposed annexation is therefore consistent in numerous ways the City’s Comp Plan and its annexation policies.

## V. PROPOSED ZONING

Upon annexation, the Property must be zoned according to the City’s zoning provisions. Applicant is proposing PUD zoning for the Vacant Parcel since it will include residential and commercial components. A PUD plan showing the proposed layout of the Vacant Parcel and the development standards including, height, setback, density, and parking requirements is submitted with the Application. Commercial District (CO) zoning under the City code is proposed for the Developed Parcel. As indicated on the Lot 1 Proposed Zoning plan, the existing development of the Developed Parcel meets all of the dimensional standards of the CO District except for the front yard setback—the western building on the site is more than the maximum distance from Storm King Road. Additionally, the principal uses on the site—office, warehousing, and a preschool—are all permitted uses in the CO district.

The review criteria applicable to rezoning and PUD rezoning are set forth below, along with Applicant’s response to each:

- a. **The rezoning is consistent with the City’s comprehensive plan and the purpose of the Code:** As explained in the Annexation section of this letter, the Comp Plan contemplates mixed-use development of the property north of the Glenwood Springs Mall. The higher density residential and non-residential components proposed in the PUD plan for the Vacant Parcel, individually and coupled with the commercial-only use of the Developed Parcel, achieve the type of mixed-use development contemplated in the Comp Plan. The housing, transportation, and infill goals met by the proposed development also bring the proposed zoning of the Property in line with the Comprehensive Plan.
- b. **The rezoning is consistent with the proposed purpose statement of the proposed zoning district:** The CO district is intended to, among other things, accommodate general commercial uses with some limited residential uses and to provide a transition between mixed-use and/or residential districts. Zoning the Developed Parcel CO will achieve this purpose in that the existing uses on the parcel are all permitted under the proposed zoning designation. It will serve as a transition between the mall which is commercial-only and the Vacant Parcel which will include both residential and non-residential components. This criteria does not apply to the proposed PUD zoning as there is no purpose statement associated with PUD zoning.
- c. **Substantial changes in the subject area warrant a zoning change:** The Property is currently located in unincorporated Garfield County. If the Property is annexed, it will

come under the City's jurisdiction. The annexation marks a substantial change to the Property seeing as state statute requires that the Property be zoned under the City code within 90 days of annexation.

- d. **The intensity of development in the new zoning district is not expected to create significantly adverse impacts to surrounding properties or the neighborhood:** Zoning the Developed Parcel CO will not create adverse impacts to surrounding properties or neighborhoods because (i) the zoning designation will not result in a change in intensity or type of use from what is currently existing on that portion of the Property, and (ii) the uses allowed under the existing County zoning (CL) are similar to those allowed in the City's CO zone district.

Similarly, the PUD zoning proposed for the Vacant Parcel will not adversely affect the surrounding neighborhood. While the Vacant Parcel is currently undeveloped, it is not subject to a conservation easement or otherwise restricted as open space. As such, development of the Vacant Parcel has always been an option, whether under the County's jurisdiction or the City's. The parking requirements in the proposed PUD plan meet the City's parking requirements, ensuring that parking impacts on surrounding neighborhoods will be mitigated. The traffic generated by the development under the densities and uses proposed will be successfully incorporated into the existing and future roadway network in the area. The required common open space will allow residents to enjoy the outdoors and other residential amenities on-site, reducing impacts to surrounding areas. Required landscaping will also create a buffer between the development and neighboring properties.

- e. **The PUD zoning addresses a unique situation, provides substantial benefit to the City, or incorporates innovative design, layout, or configuration resulting in quality over what could have been accomplished through strict application of a base zoning district or other standards of this Code:** The PUD plan incorporates a design, layout, and configuration for development of the Vacant Parcel that could not be accomplished through strict application of the City's residential or mixed-use zoning regulations. Specifically, the PUD plan contemplates residential density and maximum building heights that are not achievable under the City Code, yet are contemplated in the Comp Plan. That is, the Comp Plan states that secondary centers such as the one at issue here may be redeveloped with buildings up to 4-5 stories. Incorporating these elements into the proposed PUD plan allows for the higher-density residential development envisioned in the Comp Plan at an achievable cost and in a manner the leaves more open space within the development.
- f. **The PUD Plan meets all applicable standards of this Code not expressly modified by the PUD application:** While a summary of the development proposed for the Vacant Parcel is provided with this Application for context, a development permit application has not yet been submitted. As such, whether development of the Vacant Parcel will meet all applicable standards of the Code not modified by the PUD will be evaluated at the time of major site plan approval. The proposed PUD Plan does state, however, that all development standards in the City code not modified by the PUD will apply to development within the PUD going forward.

- g. The PUD Plan includes varied types of housing and densities:** The proposed PUD plan for the Vacant Parcel includes three types of housing: multi-family apartment buildings, townhouses, and live-work units. Since the site is not divided into individual districts, density is determined for the parcel as a whole but is divided between residential and non-residential uses.

## **VI. SUBMITTAL DOCUMENTS**

Applicant submits the following as its Application:

1. Land Use Application form and fee payment (via credit card)
2. Submittal letter
3. Proof of Ownership
4. Annexation Map
5. Annexation Petition
6. Draft Annexation Agreement
7. Improvement Survey Plat
8. Traffic Study
9. Engineer Report from Sopris Engineers
10. Engineering and Architectural Plans including:
  - a. Lot 1 Proposed Zoning plan
  - b. Lot 2 PUD Plan
  - c. Conceptual Plat
  - d. Conceptual Utility Plan
  - e. Conceptual Grading Plan
  - f. Offsite Drainage Plan
  - g. Conceptual Onsite Drainage Plan
  - h. Illustrative Concept Plan And Site Massing
  - i. Conceptual Open Space And Landscape Framework Plan
  - j. Conceptual Architectural Renderings (conceptual renderings only—subject to change)

Please contact us if you need additional information or have questions regarding this letter or any of the Application materials. Applicant requests that the Application be considered by the Planning & Zoning Commission at its March 23, 2021. We look forward to working with the City as we proceed through the application process.

Sincerely,  
GARFIELD & HECHT, P.C.

## Memorandum

To: Trent Hyatt, Senior Planner  
From: Hannah Klausman,  
Senior Planner, Housing Commission Liaison  
Date: February 19, 2021  
Re: Planning Item 09-20, R2 Partnership LLC  
480 Donegan Development

Please see the following staff comments on the proposed 480 Donegan Development.

### Community Housing

The Draft Annexation agreement includes Affordable Housing Components in Section 5. According to the agreement the developer proposes 17 units restricted to 100% AMI, and 18 units restricted to 120% AMI, for an average of 109%. Staff recommends that the affordable housing units meet the standards of proposed Ordinance No. 1, Series 2021 as summarized below, which include a maximum 100% AMI averaged across all deed restricted units.

On February 18, 2021 City Council reviewed Ordinance No. 1, Series 2021 an Inclusionary Housing Code Amendment ordinance. The ordinance requires a second reading and public hearing before final approval.

The requirements of the proposed draft ordinance would apply to all residential and mixed-use developments proposing the construction of ten (10) or more new dwelling units, or the creation of ten or more residential lots. All new residential subdivisions and all new multi-family residential developments shall set aside lots or units for community housing as set forth in this Section.

- a) Twenty (20%) percent of the total residential units shall be deed restricted for Resident Occupied Community Housing.
- b) Ten (10%) percent of the total residential units shall be deed restricted to limit the average Initial Sales Price to no greater than that which is affordable to Households earning no more than 100% AMI; or to limit the Community housing rental unit rental prices in accordance with guidelines established by the City and generally set at rates that are affordable to Households with incomes no higher than 80-100% AMI, averaged over the total required deed restricted units.

Staff recommends conformance with the requirements as included as part of the annexation process.

# 480 DONEGAN

Please add PUD to the title.

## ANNEXATION AND ZONING SUBMISSION CIVIL PLANS: 01/26/2021

**Other Comments**  
1. Have geologic hazards been analyzed for the site? While a full report may not be necessary at this point, it would certainly be good to know if any are applicable. Please add a the following statement (or similar) to the cover sheet and address any known hazards, if applicable. "Hazards to note are \_\_\_\_\_. A final Geologic Hazard Report will be submitted upon application of a development permit."  
2. Please add the a FEMA floodplain statement (example below) with the following info: community map number, date and indicate whether the site is located within a designated floodplain.  
Geologic hazards disclosure. "This property is subject to geologic hazards per the adopted mapping by the City of Glenwood Springs.  
3. Please add Public Facilities Statement (i.e. A note shall be placed on the site plan that makes reference to the public facility requirements for the installation and construction and/or contributions.)  
4. The Annexation Agreement notes that the development will enter into an affordable housing deed-restriction consistent with the terms and conditions of Subsection 070.040.120 (b)(1). This voluntary program allows for the developer to exit the program at any time. Because this is an annexation, staff believes that it should be clear that the affordable housing will be deed restricted for the full 30 years, rather than being subject to the market conversion provision in the code related to the voluntary program.  
5.The development standards of the code require off-site circulation improvements including bikeways, sidewalks proportional to the traffic demands and impacts generated to and along the street by the proposed development, and the improvements will be within the County ROW. The parkland dedication proposed for the bikeway is not identified on the Rivertrail Master Plan, and thus may not be included as part of the required parkland dedication. The Parkland Dedication fees discussed in Section 8 should not be reduced for these improvements.  
6. Per Title 080, system improvement fees would still be charged for the Change in use. Whenever the use of any structure changes, as such change in use would be defined in Title 070 so that a larger number of EQR units or proportions of EQR units would become assessable in accordance with the classifications set forth in Section 080.060.020, there shall be charged to and paid by the owner of such structure the system improvement fee for the EQR units attributable to the usage increase caused by the change in use.

PUD DEVELOPMENT STANDARDS:

DEVELOPMENT DENSITY

Maximum Gross Residential Density: 30.00 dwelling units/acre  
Maximum Gross Non-Residential: 14,000 GSF

USES

Permitted Uses

Multi-Family Dwelling  
Townhouse Dwelling  
Live-Work Dwelling  
Residential Amenities (Workout facilities, business center, meeting spaces)  
Restaurant  
Administrative or Professional Office  
Park/Playground/Open Space  
Art Studio  
Home Occupation

Prohibited Uses

Adult and child care facilities  
Adult entertainment establishments  
Maintenance and repair services, including automotive repair  
Marijuana establishments  
Commercial laundry and dry cleaning  
Recreational vehicle park  
Industrial Uses

Uses Requiring Special Review Use Permit

Any use not listed as a permitted or prohibited use

Note: The definitions set forth in the Glenwood Springs Municipal Code will apply to the above list of uses.

COMMON OPEN SPACE

Minimum Required: 20% of the Development Site Area

LOT AREA

Lot Area: No Minimum  
Landscape Area: 15% of Development Site Area

SETBACKS

**Minimum Building Setback from Public Streets:**  
Donegan Road 25 feet from street right-of-way  
Storm King Road 20 feet from street right-of-way

**Minimum Building Setback from Private Streets:**  
Center Drive 10 feet from property line

**Minimum Building Setback Internal to the Property**  
Face of Garage 3 feet from driveway  
Abutting Properties 30 feet from property line  
Building to Building 20 feet from main building face

**Minimum Garage Setback from Public Streets:**  
Donegan Road 30 feet from street right-of-way  
Storm King Road 25 feet from street right-of-way

**Minimum Side or Rear Parking Setback**  
Abutting Properties 10 feet from lot line

Notes:

- Setbacks are measured from the face of the building to the existing public street right-of-way, edge of driveway or from abutting property lines.
- Permitted setback encroachments from public streets include the following:
  - Front porches, stoops and balconies may encroach six (6) feet into the setback.
  - Porches, slabs, patios, walks and steps may encroach into setback by any amount provided all components of the encroachment are no greater than 36 inches above ground level.
  - Building roof eaves and other incidental architectural features may encroach 18 inches into setback.
  - Other exceptions to structures within a setback shall comply with Glenwood Springs Development Code.

BUILDING HEIGHT

**Maximum Building Height:**  
Residential Buildings 55 feet  
Ancillary Buildings 35 feet  
Freestanding Garages 25 feet

PARKING

Minimum Required Parking:

**Residential**  
Dwelling: Live-Work 1.0 SP/DU  
Dwelling: Townhouse 1.5 SP/DU  
Dwelling: Multifamily 1.5 SP/DU  
Guest Parking<sup>1</sup> 1.0 SP/5 DU

**Non-Residential**  
Restaurant 1 SP/200 SF  
Office & Amenity 1 SP/1,000 SF

Note:

- Guest Parking applies to Dwelling: Townhouse and Multifamily Uses Only
- Off-site parking areas shall not account for more than 10% of total provided parking

OTHER

Snow Storage Areas:

- Snow may be stored in landscape areas and parking areas provided that accumulated snow does not restrict access and circulation and is not stored in a manner to obscure sight lines at driveways, sidewalks, or other access points to public or private rights-of-way or fire lanes.
- No minimum amount of additional snow storage area is required. Up to ten (10) percent of the required off-street parking spaces and one hundred (100) percent of those parking spaces in excess of those required under this PUD may be used as snow storage.
- Public rights-of-way shall not be used for snow storage.

Application of City of Glenwood Development Standards: Unless modified by this PUD, the Development Standards set forth in the Glenwood Springs Municipal Code, as amended from time to time, shall apply to this PUD.

Applicant should consider off site bike/ped improvements to connect proposed infrastructure to the existing City network approximately 630 feet to the east.

While I understand why this may not

I am concerned regarding the management/control of onstreet parking for use by the project in this area due to proximity to the school. Has any progress been made with the school in terms of shared parking during the daytime hours. I would think the traffic analysis would need to address the feasibility of this option.

I would add a note regarding future connectivity to redevelopment if/when applicable and add ped connections to this location

Please clarify how building height is measured. Code standard is midpoint of pitched roof to the adjacent grade. I think it may be beneficial to call out height maximums for street frontages and would recommend lower height for Storm King and Donegon Roads. I think you will receive push back on the proposed maximum which exceeds every zone district in the Code other than M2 which allow 60 feet by special review

We may need to better understand the traffic expectations for this use.

Should this indicate 72 guest spaces for the number of units? Please clarify and/or revise total required as is needed.

Please clarify if this is clubhouse space. You may be able to argue that there is not a need for separate parking for said use since it is a neighborhood amenity not open to the public.

Please call out the actual areas you believe is available for snow storage

PROPOSED DEVELOPMENT SUMMARY:

Gross Site Area: 12.29 AC (535,352.4 SF)

LAND USES:

RESIDENTIAL (INCLUDING LIVE-WORK) 402,320 GSF +/-  
CLUBHOUSE (RESIDENTIAL OFFICE/AMENITY) 9,600 GSF +/-  
CLUBHOUSE (RESTAURANT/PUB) 2,000 GSF +/-  
TOTAL GROSS SQUARE FOOTAGE= 413,920 GSF +/-

Proposed Dwelling Units (DU): 360 DU  
Proposed Residential Density: 29.29 DU/AC  
Proposed Lot Coverage: 127,751 GSF (23.8% of the Development Site Area)  
Common Open Space Area Provided: 2.51 AC (20.4% of the Development Site Area)  
Landscape Area Provided: 1.84 AC (15% of the Development Site Area)

Minimum Required Parking:

|                            | Quantity | Rate        | Required Spaces   |
|----------------------------|----------|-------------|-------------------|
| Dwelling: Live-Work        | 13 DU    | 1.0 SP/DU   | 13 Spaces         |
| Dwelling: Townhouse        | 20 DU    | 1.5 SP/DU   | 30 Spaces         |
| Dwelling: Multifamily      | 327 DU   | 1.5 SP/DU   | 491 Spaces        |
| Guest Parking <sup>1</sup> | 347 DU   | 1.0 SP/5 DU | 70 Spaces         |
| <b>Subtotal</b>            |          |             | <b>604 Spaces</b> |

|                            |          |               |                   |
|----------------------------|----------|---------------|-------------------|
| Non-Residential Restaurant | 2,000 SF | 1 SP/200 SF   | 10 Spaces         |
| Office & Amenity           | 9,600 SF | 1 SP/1,000 SF | 10 Spaces         |
| <b>Subtotal</b>            |          |               | <b>20 Spaces</b>  |
| <b>TOTAL REQUIRED</b>      |          |               | <b>624 SPACES</b> |

- Guest Parking applies to Dwelling: Townhouse and Multifamily Uses Only
- Off-site parking areas shall not account for more than 10% of total provided parking

Proposed Parking:

**On-Site Parking**  
Surface Parking Lot 478 Spaces  
Center Drive 14 Spaces  
Freestanding Garages 16 Spaces  
Integral Garages 66 Spaces  
**Subtotal** 574 Spaces<sup>1</sup>

**Off-Site Parking on Public Streets**  
Donegan Street 41 Spaces  
Storm King Road 10 Spaces  
**Subtotal** 51 Spaces<sup>2</sup>

**Total Parking Provided: 625 Spaces**

Notes:

- On-site parking includes 14 accessible parking spaces.
- Off-site parking accounts for 8.2% of total parking provided.

NOTE: FINAL BUILDING GROSS SQUARE FOOTAGES, DESIGN, AND SITE LAYOUT/CONFIGURATION ARE CONCEPTUAL AND SUBJECT TO REFINEMENT AT THE TIME OF MAJOR SITE PLAN REVIEW.

GENERAL PLAN NOTES:

## A row of four modern townhouses with gabled roofs and large windows, set against a backdrop of trees and a golf course. The townhouses feature a mix of light grey, white, and dark red siding. Each unit has a prominent front entrance and large windows that glow with warm interior lighting. The scene is framed by lush green trees and a well-maintained lawn in the foreground.

Other Comments

1. I am slightly concerned with the limited number of perspective drawings/renderings provided. I understand the issues with providing elevations for each and every building at this stage but worry the Planning and Zoning Commission and City Council will desire to incorporate more design restrictions and understanding in the PUD. Minimally, I would provide additional concept/perspective renderings (i.e. looking southwest from the northeast corner of the property/Donagan Road, east view from Storm King Road, north view from the mall site, west view from the existing homes along Mel Ray Road. It would be great to see a typical elevation (one site possibly) that explains materials proposed for each building.

2. For any design standards not addressed, I would make a statement as to whether or not the intent is to meet the multi-family residential design standards of the Code.

**Re:** 09-20 480 Donegan Annexation Review

Please see the following engineering comments for the 480 Donegan Road Pre-Annexation Document Review. Engineering will not review this application again unless a response to these comments are provided.

**General comments:**

1. Is there an agreement with the mall for the emergency access? This should not be included as a part of the approval process unless an agreement can be provided. The City cannot grant access across private property.

**Traffic Report Comments:**

**New Comments:**

2. The traffic analysis assumes that the entire development is Multi-Family Housing (Mid Rise). Please provide the pages from the 10<sup>th</sup> Edition of the trip Generation Manual that justifies this assumption and shows the calculations used. The 8<sup>th</sup> Edition that the engineering department has does not include Multi Family Housing and (221) is not consistent with Multi Family Housing. It would seem that this development should be considered with 240 (Mid-Rise) Apartments and 20 (rented) Townhomes. If any of these units are proposed to be sold, this should be considered. Additionally, the public restaurant trip generation is not considered.
  - a. The housing distribution is:
    - i. 13 Live-Work Units
    - ii. 95 Studio Units
    - iii. 110 1-Bedroom Units
    - iv. 94 2-Bedroom Units
    - v. 3-Bedroom Units
    - vi. 20 Townhomes
  - b. This development includes a 2000 SF Restaurant.
3. External trip Distribution percentages are not provided for many segments of roadway in Figure 8. i.e. Storm King Rd, Mel Rey Road, west Donegan Road, and Hwy 6 from Storm King Road to Mel Rey Road.
4. Daily Traffic Volumes are not provided for many segments of roadway in Figure 9. i.e. Storm King Rd, Mel Rey Road, west Donegan Road, and Hwy 6 from Storm King Road to Mel Rey Road.

**Comments on Draft Annexation that were not addressed:**

*Additional commentary from this review (02/19/2021) is provided in italics.*

5. The growth rate of Hwy 6 seems low. It could be assumed that the Mall could bring in addition retailers, or Ami's Acres in the County could expand/redevelop. *The city has also recently received a referral for the development of*

a new Mobile Home Park past Ami's Acres. Figure 7 is inconsistent with the surrounding growth. How come Hwy 6 from Storm King Rd to Mel Rey Road DECREASES from the 2020 Existing Adjusted Volumes – Figure 5 (9500 DTV) to the 2040 Background Traffic Volumes – Figure 7 (8300 DTV) while surrounding roadways/intersections increase? The figures are inconsistent:

Figure 4 (Existing Volumes): HWY 6 DTV = 6,600

Figure 5 (2020 Existing Adjusted Volumes): HWY 6 DTV = 9,500

Figure 6 (2022 Background Traffic Volumes): HWY 6 DTV = 7,700 (**Lower than the 2020 adjusted volumes**)

Figure 7 (2040 Background Traffic Volumes): HWY 6 DTV = 8,300 (**Lower than the 2020 adjusted volumes**)

6. Pedestrian Counts also seem low (0).
  - a. Storm King/HWY 6 intersection: There are employees and residents of the surrounding area that do bike or ride the bus and would interact with this intersection.
  - b. The 114 Exit (Mel Rey/HWY 6): There are absolutely pedestrians and cyclists that utilize this intersection with the number of bus users and the installation of the RRFBs in 2017. Counts for the SUP with CDOT to install the RRFBs were completed that showed the use of this intersection by peds/bikes.
  - c. Donegan Road: This section of Donegan Road is not developed with bike lanes or sidewalk, however many students walk/bike this section of roadway to and from the Two Rivers School. Future projections should also consider an increase in use as this is identified in the City of Glenwood Springs Long Range Transportation Plan as a bicycle route that also provides access to trails up Mitchell Creek Road.
7. Please justify your directional distribution numbers.
  - a. *This was not addressed in the new submittal. Why would 5% of the entering/existing traffic be heading west on Highway 6? What generator would create a distribution to this intersection?*
  - b. *It seems that the distribution might be closer to 50/50 for both entrances, not 75/25.*
  - c. *External Trip Distribution is not provided for many segments of roadways.*
8. Counts were done on August 26<sup>th</sup> ahead of the local school openings. School traffic in these areas is significant. Recount both pedestrians and turning movements at these intersections:
  - d. Storm King and SH6
  - e. Mel Ray and SH 6
  - f. Storm King and Donegan
  - g. Mel Ray and Donegan
  - h. Storm King and Center Drive
9. PM peak hour at Storm King May coincide with the end of the school day at Two Rivers. Count the peak to coincide with the school to check.
10. SH 6 and Storm King Road LOS improve from the 2022 to 2040 analysis. Why? *Are the LOS tables revised to consider the adjusted counts? This particular issue was not addressed and still shows a LOS improvement...*

#### **Plan Comments:**

##### **Comments on Draft Annexation that were not addressed:**

11. See the attached plan comments and markups.
12. Sidewalk and bike improvements should extend to Mel Ray Road.
13. Existing pedestrian crossings along Storm King Road should be improved. The ramps should be upgraded to meet ADA/PROWAG requirements with detectable warnings. *The City prefers the installation of directional ramps.*

14. The engineer should review the City's Municipal and Engineering Standards before re-submittal. Many notes and design items are not compliant with these requirements. It is not City's staff's responsibility to be the engineer's QA/QC.
  - a. Legends should match plans.
  - b. Utilities have many potential conflicts, along with design items that are not compliant with the City's Engineering Standards.
  - c. Proposed easements should be identified.

**General Requirements:**

**At the time of Development Plan Submittal:**

15. A Preliminary Drainage Report will be required. Drainage should meet both City of Glenwood Engineering Standards and CDOT stormwater standards (whichever is more stringent). The final discharge is to CDOT ROW and the drainage report will need to be reviewed and approved by CDOT.
16. A Preliminary Geotechnical Report will be required.
17. A Preliminary Traffic Report will be required.

**At the time of Construction Document Submittal:**

18. All final/stamped reports shall be submitted.
  - a. Landscaping plans should include utilities and proposed contours on a background layer for verification of clearances. Often these items are completed after the civil work is completed and they fill in drainage areas or plan directly on top of utilizes.
  - b. Landscape plans should also include sight triangles to verify sight distances.
19. CDOT Access Permitting. Access permits include both traffic and stormwater.
20. Retaining Walls will require engineered design and structural calculations. The City may refer these documents out for review as necessary.
21. Stormwater facilities will require a maintenance agreement and plan.
22. Plan and Profiles should be supplied for the private utility mains.
23. Provide S.U.E. plan per Colorado Law CRS 9-1.5-102 requirements or provide a stamped letter determining why this is not a Subsurface Utility Engineering-Required Project.

**Before Construction:**

24. Any work within the Right of Way shall require appropriate ROW permitting though the City or County. With the ROW permit, the following documents should be submitted:
  - a. Any SUE documents necessary.
  - b. A plan of work to take place in the ROW, with patching shown that meets the requirements of the jurisdiction.
  - c. Traffic Control Plans, as appropriate.
25. The site will require a Grading Permit. With the grading permit, the following documents should be submitted:
  - d. Any SUE documents necessary.
  - e. Final Stamped Drainage Report.
  - f. Final Stamped Civil Documents.
  - g. Final Geotechnical Report.

- h. Disturbance over one (1) acre will require a CDPHE Construction Stormwater Discharges Permit. As this development is over one acre, this permit is required, and any State approval should be submitted prior to the issuance of a Grading Permit.
  - i. The City of Glenwood Springs is required to sign as the Responsible Official for all CDPHE CDPS permitting. The permit documentation should be submitted to the City of Glenwood Springs Engineering Department a minimum of three (3) weeks in advance of submittals to the State.

**Permit Closeout and Issuance of Certificate of Occupancy Requirements:**

- 26. Before engineering completes a walk-through of the subject property
  - a. Draft As-Built plans should be submitted.
  - a. Applicable Stamped Certification Letters:
    - i. Any engineered retaining walls. Letter certifying that the walls were constructed per plan or that address any changes to the design during construction, stamped by a Colorado Licensed Professional Engineer.
    - i. Drainage improvements. Letter certifying that the drainage was constructed per plan or that addresses any site changed, stamped by a Colorado Licensed Professional Engineer.
  - b. Test results for all improvements in the ROW shall be submitted. These should include all testing/backfill associated with any walls that support public facilities.
- 27. Engineering Approval to release the CO will not be provided until the final documents/files are supplied.
  - b. Final As-builts with and Improvement Survey Plat (ISP) should be provided in an AutoCAD, PDF, and Mylar form.
  - c. Certification Letters can be supplied electronically (PDF).
  - d. All easement dedications shall be completed.
  - e. Maintenance Agreement for any water quality and detention facilities.

GENERAL PLAN NOTES:

## LOT 1 DESCRIPTION

A TRACT OF LAND SITUATED IN SECTION 6, TOWNSHIP 6 SOUTH, RANGE 89 WEST OF THE 6TH P.M. BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT ON THE NORTH LINE OF THE GLENWOOD SPRINGS MALL SUBDIVISION  
WHENCE THE WITNESS CORNER TO THE S1/4 CORNER OF SECTION 34, TOWNSHIP 5 SOUTH, RANGE 89 WEST OF THE 6TH P.M. BEARS N 38°40'53" E 853.45  
FEET SAID POINT OF BEGINNING ALSO BEING THE SOUTHEAST CORNER OF THAT PARCEL DESCRIBED AS PARCEL C IN BOOK 1205 AT PAGE 589 IN THE OFFICE  
OF THE GARFIELD COUNTY CLERK AND RECORDER;  
THENCE ALONG THE EAST LINE OF SAID PARCEL C N 2° 44' 00" E 345.39 FEET;  
THENCE DEPARTING SAID EAST PARCEL LINE ALONG THE ARC OF A NON TANGENT CURVE TO THE LEFT HAVING A RADIUS OF 36.91 FEET AND A CENTRAL  
ANGLE OF 69° 23' 41", A DISTANCE OF 44.71 FEET (CHORD BEARS S 56° 33' 02" E 42.02 FEET)  
THENCE S 85° 36' 58" E 73.64 FEET;  
THENCE S 62° 12' 11" E 28.26 FEET;  
THENCE S 86° 38' 35" E 118.97 FEET;  
THENCE S 87° 50' 32" E 192.99 FEET;  
THENCE S 2° 20' 01" W 101.69 FEET;  
THENCE S 41° 37' 24" E 167.89 FEET TO A POINT ON THE NORTH LINE OF SAID GLENWOOD SPRINGS MALL SUBDIVISION;  
THENCE ALONG THE NORTH LINE OF SAID GLENWOOD SPRINGS MALL S 47° 42' 00" W 125.06 FEET;  
THENCE CONTINUING ALONG SAID NORTH LINE N 87° 18' 00" W 476.98 FEET TO THE POINT OF BEGINNING.

↳ Don't need to show on Util plan

The diagram illustrates a cross-section of a utility trench with various underground utilities and their corresponding surface markers. The utilities are arranged in a trench, with their horizontal positions indicated by colored lines and their vertical positions by a central vertical line. The surface markers are represented by colored dots or symbols above the trench.

ANNEXATION AND ZONING SUBMISSION

NOT FOR CONSTRUCTION

Trent L. Hyatt  
Senior Planner  
City of Glenwood Springs  
101 W. Eighth Street  
Glenwood Springs, CO 81601

**RE: REFERRAL COMMENTS**

Trent, As per your request, below are Garfield County Community Development referral comments on R2 Partnership Annexation and Rezoning, Triumph Bell-Rippy and BLD Glenwood Meadows projects. Please do not hesitate to reach out to us if you have any questions or comments.

**09-20 R2 Partnership Annexation and Rezoning (214 Center Drive, LLC)**

- This application will need to be reviewed by Garfield County Road and Bridge Department for additional comments on impacts to County Roads. In addition to any comments generated by their review, Garfield County Community Development is very concerned with the introduction of significant traffic volume onto predominantly lower density residential areas. Donegan and Melray Road are not designed for the proposed traffic volume or impacts on pedestrians and cyclists. The additional traffic will have a negative impact on the character of the surrounding neighborhood. Consideration needs to be given to finding an alternative to a main entrance on Donegan Road (acknowledging that most traffic utilizing this access will also be using Mel Ray Road) along with providing safe pedestrian and bicycle infrastructure along all impacted roads to alleviate potential conflicts and provide for safe routes for those accessing Two Rivers Community School, Glenwood Middle School and transit services. Preserving a primary access through the mall property should be considered to coincide with any future mall development.
- Annexation should include or address Donegan Road and its status as being accepted into the City Street System.
- Density of the proposed development (29 units/acre) is very inconsistent with surrounding single family residential areas (4 – 5 units/acres) including the Western Hills Subdivision.
- Refinements to the site plan to include townhouse lower density (two story) uses along the entire northern frontage on Donegan Rd. should be considered to create a transition in density to the adjoining single family residential and mitigate impacts of the new development on the streetscape, view planes, and adjoining neighborhoods.

108 Eighth Street, Suite 401  
Glenwood Springs, Colorado 81601  
(970) 945-8212

- Bike lanes need to be included on all affected roadways including off-site connections to existing bike and pedestrian trails/sidewalks/paths.
- The project appears to be under parked and in particular the live work component does not appear to have adequate off-street parking.
- Storm water drainage improvements warrant careful engineering including assurances for ongoing maintenance of detention facilities.
- There are currently no 4 story structures in the vicinity, because of the surrounding residential neighborhoods, consideration should be given to reduce the maximum height of buildings. Taller structures should be sited toward the mall side of the property away from Mel Ray Road.
- Expanding the affordable housing component should be considered as part of the annexation provisions/agreements.
- Expanding the diversity of use types to include more townhomes, duplexes, and small lot single family units (cluster homes) should be considered to address other affordable housing demand.
- Connections to schools and transit are an important consideration along with other multi-modal transportation elements including pedestrians and bikes.

#### **50-20 TRIUMPH-BELL RIPPY**

- No additional comments other than to note the issues with homeless encampments on adjoining properties continue to be a concern.

#### **60-20 BLD (GLENWOOD MEADOWS LLC)**

- Staff concurs with City Staff comments on traffic impacts, infrastructure/sanitation issues, development thresholds/entitlement, including the number of proposed units.
- Staff supports the inclusion of units that are truly attainable housing in the city.
- Impacts on adjacent open space trails need to be addressed including existing developer commitments to ongoing maintenance. Given the high number of units recently developed and now proposed at Glenwood Meadows, consideration should be given to requiring developer provided expansion/support to existing trail systems in the vicinity.
- Maintenance concerns related to storm water detention facilities above the site need to be addressed.

Thank you for your consideration of our comments.

Regards,

Sheryl L. Bower, AICP  
Garfield County  
Community Development Director

**Subject:** City of Glenwood Springs Land Use Referral in West Glenwood

Hi Wyatt: I've attached referrals from the City of Glenwood Springs for a project on Donegan Rd., just behind the Glenwood Springs Mall. I'm not sure if the city has already been in contact with you but it appears that there may be impacts on County Roads. If you have already dealt with this issue I apologize for the redundancy.

We did send referral comments to the city last week indicating that they need to contact you if they haven't already. I've included an excerpt from their email below with the link to the application and the Planner's contact information. Please give me or Sheryl a call if you have any questions.  
Thanks. Glenn.

November 13, 2020

Updated 2-9-2021

General Comments as follows:

- All internal streets, waterlines, irrigation, electric services, and storm sewer are private. City will maintain ownership of main line electric and fire hydrants; easements will need to be granted for access to the lines and around the lines and hydrants as noted.
- All Fire hydrants must have a 15' easement centered around the hydrant and a utility easement centered on leads and valves. City will require an access easement to the hydrant locations. City will own and maintain all fire hydrants, leads and valves.
- There are no notes, contacts, or lot information on the cover sheet.
- Most of these sheets should be two sheets not one so that that information can be read at a reasonable scale.
- All services that are to be used for combined Fire/Domestic water must be designed and constructed to NFPA24 requirements and will be considered private.
- How will buildings be metered? One large meter or multiple smaller ones? Future designs should show riser room detail with proposed meter layout.
- Raw water irrigation. Need to see a formal proposal. What are the rights associated with the land? If raw water is intended to be used for irrigation domestic water will not be allowed for irrigation purposes to avoid a possible cross connection hazard.
- All publicly/private owned water infrastructure must meet the requirements of the City's engineering standards.
- The city does not provide sanitary sewer for this project. West Glenwood is the provider.
- Public/Private Demarcation points will be all tie-in points for this project downstream of the valve.
- Will the parking along Donegan and Storm King Road be public parking and who will maintain that parking?

Plat Sheet:

- Easements shown on and adjacent to the lot 1 and 2 property should be labelled.
- Label all property lines with B&D's as normally would be on plat.
- Were rebar and caps located on the property boundary? These should be shown on the plat.
- Label all coordinate and datum information, point of beginning on the map and tie point to main corner.

Existing Conditions:

- Drain elevation and size on north side of Lot 1 labelled.
- There is at least one CMP crossing Donegan coming to this lot, review any crossings and label them for size and elevations.

- Show all underground utilities on the property. There are several gas and power items that have lines running to them, but no line work completed.

#### Utility Plan:

- We do not recommend waterlines to turn corners at 90-degree angles unless they have to at a tee connection.
- The overhead power along Donegan Road and the east property line will need to be undergrounded and connection vaults added for service feeds.
- Internal electrical line looping will need to be coordinated with GES and an easement dedicated for the primary line.
- 2 proposed tie-ins on south side of property behind mall is believed to be AC Pipe all tie-ins must be done with a tee “hot taps” will not be allowed
- There is an existing water stub on the south side of the property that ties directly to the 8” mall parking lot line. The City cannot verify if this is a 8” or 6” stub due to lack of information on the original plan set. Owners to verify size of stub. If the stub is an 8” it can be used for the development, if it is a 6” stub-out then it will need to be abandoned properly and a new stub installed to feed the property.

- Lots of water sanitary and storm crossings. Separation must meet City/CDPHE requirements profiles must be included in future designs. If separation can't be achieved sleeving or encasement will be required
- Engineering's comments are generally in conformance with Public Works.
- Owner will be responsible for cost associated with the electric line extension and or relocation through the ROW/property and all infrastructure for the new development.
- Owner will be responsible for all work involving new electric construction. Final service/transformer and line layout/site planning will need to be coordinated with the City of Glenwood Springs Electric Department.
- Overhead lines adjacent to the property will be undergrounded.

- The Electric estimated fee proposal will be paid in full prior to any work commencing. Any additions to the proposal will be due at time of completion of work or any saving will be refunded at time of completion of work.
- Developer to supply a Load Calculation form to the City of Glenwood Springs Electric Department.
- If the owner would like City broadband contractor to install a 2" electrical conduit adjacent to the main electrical run to be swept up at pedestal locations for Broadband installation. Fiber to be brought to builds at service locations shown on plans.

Thank you,

Matthew Langhorst  
City of Glenwood Springs, Director of Public Works

## Development Review Comments

Linda DuPriest, AICP

02/21/2021

### **09-20 R2; 480 Donegan**

Following are questions/issues concerning the off-site improvement obligations, specifically the bicycle and pedestrian facilities:

#### **1) Bike lanes on north and south side of Donegan, with parallel parking on the south side**

- Door Zone bike lane - Placing a bike lane right next to parallel parking places bicyclists in the hazardous “door zone” and does not meet current best practices for bike facility design. This hazard can be mitigated if the bike lane is extra wide, or if a buffer is striped between the bicycle space and the car parking area.
- What width of bike lane has been scoped for this section of Donegan?
- In addition, a bike lane placed adjacent to parallel parking in this section is inconsistent with the bike lane along the rest of Donegan. There is no other spot along Donegan where bicyclists are positioned within a Door Zone.

**Recommendation:** The applicant should be required to hire a bicycle facility design specialist and also work closely with the City to make sure this new bike lane utilizes the current best practices in bicycle facility design to ensure the Door Zone issues are mitigated. Since designing it correctly could require additional roadway right-of-way, the City should require a stringent review process for the roadway scoping and design. If the Door Zone issues cannot be mitigated with the available right-of-way, and the parallel parking must remain, the bicycle facility along the south side of Donegan should be a shared-use path to accommodate both pedestrians and bicyclists instead of a bike lane plus sidewalk, and should be designed to connect seamlessly with the bike lanes at the west and east limits of the property.

#### **2) Bike lanes on the east and west side of Storm King south of Center Drive**

- Will these lanes continue all the way to Hwy 6?
- What is the planned width?
- Is parallel car parking currently allowed on either side of Storm King in this section?

**Recommendation:** Again, as above, it is critical to utilize current best practices in bike facility design, and the applicant should be required to hire a bike facility design specialist and work closely with the City on approval.

#### **3) Widening the east side of Storm King Drive north of Center Drive to add a northbound bike lane, parallel parking and a detached 6 ft sidewalk.**

- If the road is going to be widened anyway, why is a bike facility being included only on the east side? It is inconsistent, and against best practices of bicycle network design to provide bike facilities along these two key roads, which will include multifamily housing,

but leave it out in just one section on one side of the road. All options should be explored, including participation from the City, to resolve this network inconsistency.

- This section will present the same Door Zone problem as #1 above, by placing a bike lane adjacent to parallel parking. The same stringent design process must be applied to this situation as above by bringing on a bicycle design specialist trained in Door Zone issues.

**Recommendation:** As above, From the very beginning of the roadway scoping process, the applicant should be required to bring in a bicycle facility and network design specialist to resolve these issues.

Text from Annexation Agreement:

8. Off-Site Improvement Obligations. As an element of the City's approval of (i) the Petition, (ii) the PUD zoning application, and (iii) acceptance of this Agreement, the CDSG has agreed to design and, upon approval of the City Engineer, construct certain improvements to the surrounding street system, namely (a) installing a bike lane the north and south sides of Donegan Road for the length of the Property, (b) installing parallel parking and a detached 6-foot sidewalk on the south side of Donegan Road, (c) striping bike lanes on the east and west side of Storm King Road south of Center Drive, (d) widening the east side of Storm King Drive north of Center Drive to add a northbound bike lane, parallel parking, and a detached 6 foot wide sidewalk, and (e) improving said streets in connection with the foregoing work. The improvements described in this Section 8 shall be completed prior to or contemporaneously with the issuance of a final and permanent certificate of occupancy for the first building to be constructed within the PUD portion of the Property. Parkland dedication fees required in connection with development of the PUD portion of the Property shall be reduced by the total actual costs incurred by CDSG to install the improvements discussed in this Section 8.

---

Trent,

I have reviewed the plan set tonight and it doesn't appear that the WGSD will have any problems with our plant capacity in serving this PUD project. However, I will be talking to our superintendent, Josh Hamel to see if he has any major concerns that would change our answer.

We will be in touch with you, before this Friday with an official WGSD letter stating our position.

On a personal note, Architectural Sheet A2.0 (attached) is a view from my front lawn. Before my wife sees how tall the Townhomes are proposed, could you please explain how the City measures the building height maximum here of 30'?

The Grading Plan shows: a FG of 38'(Sth side); a FF1 of 38.2'; a FF2 of 50.2'(12' is odd, unless it's split-level); Donegan Road is 48.1'. It appears the only way they can stay under  $38.2' + 30' = 68.2'$  is to have a flatter roof...or a split-level. Correct?

Thank you,

Jerry Law, P.E  
President, WGSD Board

---

Trent,

The developers and the engineer for this project did reach out to the District regarding their development in September 2020. Please see the attached 9/14/2020 Minutes.

It appears the District is waiting for more information from the developer/engineer before going forward with a Can & Will Serve Letter.

Please note that I have copied Josh Hamel (District Superintendent) and Jerry Law (President of the Board of Directors) on this email. Jerry and Josh, please scroll down to Item 2 of Trent's email.

Thank you,

**Kelly Mullane, District Administrator**

West Glenwood Springs Sanitation District

51 Riverine Rd.

Glenwood Springs, CO 81601

tel 970.618.5147

[wgssanitation@gmail.com](mailto:wgssanitation@gmail.com)

digester next month as they've had a diffuser rail break off. They will be repairing and cleaning the digester at that time.

Gilstrap Lift Station. A new Barnes pump has been installed in the Gilstrap Lift Station. So far, it's been running great; no emergency calls or rags plugging up the system in the past three weeks. Josh purchased the pump from Munro for \$5,697. The Board suggested he purchase another for a spare. Josh said he'd think about it. He'd like to get two new pumps for the Devereux Lift Station, but the flow through that station is fairly low so he will wait awhile on that.

Ponderosa Circle and Cedar Crest. Asphalt milling will begin this week, followed by paving later in the week or early next week for Ponderosa Circle. Josh thanked Jerry Law for taking the lead on this project by getting it organized and running. He continued that the Cedar Crest project should be 100% complete this week. There is a manhole at the bottom of the hill that Gould Construction is going to replace for the District (approximately \$7,000) and the District will perform the abandonment work itself. Beth McCaffery, owner of 30 Cedar Crest Dr., has a manhole at the bottom of her property that has always been an issue for the District. Beth has a large tree by the manhole, which causes the manhole to become engulfed with roots. Staff frequently jets roots out of the manhole. Beth believes the jetting is causing her tree to wither and asked Josh if the District would pay her \$400 to have her tree trimmed back. Josh and Pete took a couple hours of their time and trimmed Beth's tree for her since she has been a good customer.

## 5. GLENWOOD SPRINGS APARTMENTS

John Petaisto and Paul Schirmer attended the meeting via phone conference to discuss their conceptual plans for the Glenwood Springs Apartments project located on the 12½ acres behind the Glenwood Springs Mall. The property is owned by Floyd Diemoz. Paul informed the Board that they are in the early stages of designing. In the Spring, they had a density study done and started the annexation process with the City of Glenwood Springs. The project currently proposes 418 units (98 studio apts., 139 1-bedroom apts., 167 2-bedroom apts. and 14 3-bedroom apts.) and a common area with a swimming pool. This equates to approximately 33 units/acre. They have recently switched architectural firms and are now working with HCM Architects, out of Denver. This is the same architectural firm that designed Two Rivers Community School. HCM is presently reconfiguring some of the initial design. Paul continued that they plan to restart the annexation process with the City next month and to restart neighborhood meetings to receive feedback from interested parties. They are also moving forward with identifying infrastructure issues and other situations. John P. stated that they are looking for two items from the District now: 1) a Can & Will Serve Letter; and, 2) determining if the District's system can carry the capacity of the additional flow added by this project. The District should be able to carry the flow, but the Board felt more details on the project were needed. The District Rules & Regulations require 1 EQR per unit. The Board is aware that the City of Glenwood Springs calculates EQR values for multi-family units differently. Sopris Engineering will need provide flow information calculated on 1 EQR per unit. Jerry Law noted Storm King Rd. has a fair slope for lines. The plant is rated for 600,000 gpd. Per Josh, the average daily flow in 2019 was

263,000 gpd. However, there were a few days in June 2019 where the flow was as high as 400,000 gpd. Josh doesn't want flows from this project to trigger a plant expansion for the District. Sonny commented that the CDPHE looks at flows over several months, not days, so the District shouldn't be in the position of starting to plan for a plant expansion. Josh suggested the developers connect their private sewer service lines in several areas as opposed to just one. This would allow them to shut down part of the system if they had any issues. He recommended dividing the property in half by east and west. The eastern half could possibly be best routed to the District lines behind the Mall. It was noted that the Diemoz property already has a sewer line, but it is a private line belonging to Floyd Diemoz; not the District. Paul and John P. will need to contact Floyd to discuss if his private line should be inspected and accepted by the District. The District has an 8' line in Storm King Rd. and north of the Mall and a 12" line in Highway 6 & 24. Paul has not yet closed on this property. The Board thanked John P. and Paul for their time.

6. ATTORNEY'S REPORT

Attorney. Jim had nothing new to report.

7. ADMINISTRATOR'S REPORT

Health Insurance Renewal. Kelly informed the Board that it's Health Insurance renewal time. The deadline for renewals is Friday, 10/16/2020. The Medical PP06, which all employees are currently on, is increasing 5.5% (\$32) per month. The Medical HD2800, which is one of the District's options but is not currently used by anyone, is increasing 3.5% (\$17) per month. There are no increases for Dental and Vision plans. Even though rates are increasing, the CSD/CEBT Trustees approved a dividend that will be payable in February 2021. The amount will be based on the June 30, 2020, unrestricted surplus as determined by the annual independent financial audit and will be based on the June 20, 2020, enrollment figures.

Accounts Payable. Kelly presented the current accounts payable to the Board. **Jerry Law moved to approve the accounts payable in the sum of \$90,174.18 but to hold the CTL Thompson check until their engineer has replied back to the District regarding the hours on the invoice, the motion was seconded by Jerry Olp, and the motion to approve the accounts payable was unanimously approved by a vote of 4 to 0.**

8. OTHER BUSINESS

None.

There being no further business to come before the Board, the meeting was adjourned at 5:55 p.m.

|          | Plan C1.1        | 1      | Label % of total Site on all areas in summary                                                                                                                                                                                                                                                                                                                                                                                   | SE w/HCM    | % of total areas are included in summary.                                                                                                                                                                                                                                                                                                   |
|          | Plan C1.2        | 1      | I am concerned regarding the management/control of onstreet parking for use by the project in this area due to proximity to the school. Has any progress been made with the school in terms of shared parking during the daytime hours. I would think the traffic analysis would need to address the feasibility of this option.                                                                                                | 480 Donegan | The Applicant added to available parking spaces, residential guest parking generally does not conflict with the school use. Residential and guest parking will be privately managed. On-street parking will be monitored between Monday to Friday during the school day to prevent residential and guest parking from using public streets. |
|          | Plan C1.2        | 2      | Applicant should consider off site bike/ped improvements to connect proposed infrastructure to the existing City network approximately 630 feet to the east.                                                                                                                                                                                                                                                                    | SE          | Proposed Bike/Pedestrian Improvements extend to Soccer Field Road as shown on C3.0 and C3.1                                                                                                                                                                                                                                                 |
|          | Plan C1.2        | 3      | Please call out the actual areas you believe is available for snow storage                                                                                                                                                                                                                                                                                                                                                      | SE          | Area is noted on plan. The snow storage will be detailed for Major Site Plan                                                                                                                                                                                                                                                                |
|          | Plan C1.2        | 4      | I would add a note regarding future connectivity to redevelopment if/when applicable and add ped connections to this location                                                                                                                                                                                                                                                                                                   | SE          | A future connectivity note and draft sidewalk connectivity has been added to plan.                                                                                                                                                                                                                                                          |
|          | Plan C1.2        | 5      | Is public use of the bar/resturant anticipated in the traffic report? Please Clarify                                                                                                                                                                                                                                                                                                                                            | KH          | The resturant is included in the updated traffic report.                                                                                                                                                                                                                                                                                    |
|          | Plan C1.2        | 6      | Please clarify if this is clubhouse space. You may be able to to argue that there is not a need for separate parking for said use since it is a neighborhood amenity not open to public                                                                                                                                                                                                                                         | HCM         | The Office and Amenity space is intended for the residential community only. Applicant revised parking requirements to exclude these uses, see Sheet C1.2.                                                                                                                                                                                  |
|          | Plan C1.2        | 7      | Should this indicate 72 guest spaces for the number of units? Please clarify and/or revise total required as is needed.                                                                                                                                                                                                                                                                                                         | HCM         | The The Glenwood Springs Municipal Code does not require guest parking for Live/Work units, see Table 030.1: Table of Allowed Uses. The Applicant applied guest parking to townhouse and multifamily uses per Table 030.1: Table of Allowed Uses.                                                                                           |
|          | Plan C1.2        | 8      | We may need to better understand the traffic expectations for this use.                                                                                                                                                                                                                                                                                                                                                         | HCM         | The Applicant applied the required parking ratio per The Glenwood Springs Municipal Code to the Live-Work uses. The impact of Live-work units on traffic is included in the updated traffic report.                                                                                                                                         |
|          | Plan C1.2        | 9      | Please clarify how building height is measured. Code standard is midpoint of pitched roof to the adjacent grade. I think it may be beneficial to call out height maximums for street frontages and would recommend lower height for Storm King and Donegon Roads. I think you will receive push back on the proposed maximum which exceeds every zone district in the Code other than M2 which allow 60 feet by special review. | HCM         | The Applicant added a note to define how building height is measured. The Applicant revised the Maximum Building Height Table, on Sheet C1.2 to address building height for each building, with particular attention to building height along Donegan Road.                                                                                 |
|          | Plan C1.2        | 10     | What else is included in this number other than the clubhouse and restaurant?                                                                                                                                                                                                                                                                                                                                                   | HCM         | The maximum gross non-residential floor area provides space for the clubhouse, including residential amenity, support space and storage and restaurant. The non-residential floor area will be refined prior to Major Site / Architectural Plan Submission.                                                                                 |

|    |      |            |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                  |                                                                                                                                                                                                                                                                                                           |

| 25 |      | Plan C3.0  | 3  | Bike lane on Center Drive?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 480 Donegan      | The Applicant will not provide bike lanes on Center Drive to preserve existing trees. The private street speed limits will be low and sections will be designed for low speeds considering pedestrian and bicycle safety.                                                                                 |
| 26 |      | PLAN LA1.0 | 1  | While a full landscaping plan is not required, I recommend adding a representative chart identifying the total amount of landscape and hardscape areas expressed in square feet and as a percentage of the total lot area. For parking areas, note square footage of landscaped area and as a percentage of the parking area; include total number of required and provided trees, shrubs, and perennials per the Code.                                                                                                                                                                                                                                                                                                                 | HCM              | The Applicant provided a chart to identify the quantity of landscape areas required per Article 070.040. The calculations are shown on Sheet LA3.0. This information will be refined with more detail at the time of Major Site/Architectural Plan submission.                                            |
| 27 |      | PLAN LA1.0 | 2  | I would add cross section views which depict mature representations of the various landscaping buffer areas                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | HCM              | The Applicant provided typical sections to describe landscape buffers, see Sheet LA 4.0.                                                                                                                                                                                                                  |
| 28 |      | Plan A1.0  | 1  | These residential photos are not representative of west Glenwood.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | HCM              | The Applicant revised and expanded the precedent images to address local conditions, see Sheet A1.0 and design vision, see Sheet A1.1.                                                                                                                                                                    |
| 29 |      | Plan A1.0  | 2  | Please call out which proposed building each of these pics are representative of.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | HCM              | On Sheet A1.1 the Applicant categorized precedent images to relate to proposed building types.                                                                                                                                                                                                            |
| 30 |      | Plan A2.0  | 1  | I am slightly concerned with the limited number of perspective drawings/renderings provided. I understand the issues with providing elevations for each and every building at this stage but worry the Planning and Zoning Commission and City Council will desire to incorporate more design restrictions and understanding in the PUD. Minimally, I would provide additional concept/perspective renderings (i.e. looking southwest from the northeast corner of the property/Donegan Road, east view from Storm King Road, north view from the mall site, west view from the existing homes along Mel Ray Road. It would be great to see a typical elevation (one site possibly) that explains materials proposed for each building. | HCM              | The Applicant enlarged the views and provided an additional perspective view to help explain the architectural character. The Applicant identified materials on illustrations, see Sheets A2.0- A2.3. Architectural elevations will be developed at the time of Major Site/Architectural Plan submission. |
| 31 |      |            | 2  | For any design standards not addressed, I would make a statement as to whether or not the intent is to meet the multi-family residential design standards of the Code.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                  | The Applicant intends to meet the multi-family residential design standards of The Glenwood Springs Municipal Code Article 070.040.080 Residential Site and Building Design, if criteria was not modified by PUD standards listed on Sheet C1.2.                                                          |
| 32 |      | Plan A2.0  | 3  | Revise typo of Center Drive                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | HCM              | The Applicant corrected typo.                                                                                                                                                                                                                                                                             |
| 33 |      | Email      | 4  | Applicant should consider installing improvements to Mel Ray Road to accommodate bicycles and pedestrians in some form or fashion, understanding that the existing right-of-way width will affect what improvements can be done                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 480 Donegan      | Applicant is willing to discuss this concept but will need to further evaluate existing conditions and feasibility of proposed improvements                                                                                                                                                               |

The current plan can only be designed for the current condition.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 101 |           | 2         | Annex should include Donegan Road                                                                                                                                                                                                                                                                                                              | SE                | The applicant will comply with annexation conditions as directed by the City.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 102 |           | 3         | Density of the proposed development (29 units/acre) is very inconsistent with surrounding single family residential areas (4 - 5 units/acres) including the Western Hills Subdivision. Density much higher than adjacent                                                                                                                       | HCM & 480 Donegan | The Glenwood Springs Comprehensive Plan, revised 2014, identifies this property for mixed-use development (see Map 2.1 Future Land Use-North Portion of City, page 21 of Comprehensive Plan). The description of Mixed-use includes multi-family (see page 29 of Comprehensive Plan). The Applicant's plan through design provides a transition between existing single-family and existing commercial uses on the mall site. Proposed two-story buildings are placed adjacent to existing single-family and taller multi-family adjacent to the mall site. The proposal provides a horizontal mix of land uses across properties between Donegan Road and Route 133. |
| 103 |           | 4         | Refinements to the site plan to include townhouse lower density (two story) uses along the entire northern frontage on Donegan Rd. should be considered to create a transition in density to the adjoining single family residential and mitigate impacts of the new development on the streetscape, view planes, and adjoining neighborhoods. | HCM & 480 Donegan | The Applicant is providing two-story walk-up apartments and townhouses to match the scale and height of proposed townhouses along Donegan Road. These buildings provide height and scale transitions to the adjoining neighborhood.                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 104 |           | 5         | Include bike lanes on all roads, extending offsite                                                                                                                                                                                                                                                                                             | 480 Donegan       | Pedestrian and Bike improvements are proposed on the streets adjacent to the property and extending east on Donegan.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

No revisions to ROW are proposed.                                                                                                                                                                                           |
| 134 |                                                                                                                                                                                                                        |           | If not possible shared bike/ped trail on south side                                                                                                                                                                                                                       | 480 Donegan       | The applicant studied this option but this provides crossing concerns at intersections, requires westbound bikes cross traffic at two locations, and also introduces close bike/pedestrian interaction. Maintaining bike lanes consistent with the existing street is a better solution. |
| 135 |                                                                                                                                                                                                                        |           | Can bike lanes continue all the way to 6?                                                                                                                                                                                                                                 | SE                | It appears bike lane striping could be added south of the site. This item requires City staff direction.                                                                                                                                                                                 |
| 136 | 2 in part                                                                                                                                                                                                              |           | What is the planned width of bike lanes                                                                                                                                                                                                                                   | SE                | 4 foot wide as dimensioned on plan and in section on C3.0                                                                                                                                                                                                                                |
| 137 |                                                                                                                                                                                                                        |           | Parallel car parking exist on Storm King?                                                                                                                                                                                                                                 | SE                | No parking exists on Storm King. The proposed parking lines up with the change to residential                                                                                                                                                                                            |
| 138 |                                                                                                                                                                                                                        |           | Required to hire bike facility design specialist                                                                                                                                                                                                                          | 480 Donegan       | The applicant has revised the proposed section after discussion with the Traffic Engineer. Further coordination with City Staff will occur for Major Site Plan.                                                                                                                          |

|     |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                            |             |                                                                                                                                                                                                             |
|-----|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 139 | 3 in part | If the road is going to be widened anyway, why is a bike facility being included only on the east side? It is inconsistent, and against best practices of bicycle network design to provide bike facilities along these two key roads, which will include multifamily housing, but leave it out in just one section on one side of the road. All options should be explored, including participation from the City, to resolve this network inconsistency. | 480 Donegan | Further discussion with the City is required on this item. Impacts to existing uses requires discussion with Two Rivers School to determine if adding a bike lane on the west side of the road is possible. |
| 140 |           | This section will present the same Door Zone problem as #1 above, by placing a bike lane adjacent to parallel parking. The same stringent design process must be applied to this situation as above by bringing on a bicycle design specialist trained in Door Zone issues.                                                                                                                                                                                | 480 Donegan | Further disussion is required as noted in the comment above.                                                                                                                                                |

RE: 480 Donegan, Glenwood Springs, CO – Annexation & Zoning Submission  
SE Job # 30017

Paul,

Sopris Engineering, LLC (SE) has prepared the following Engineering Letter for the Annexation & Zoning Submission for the proposed 480 Donegan Subdivision (site) in Glenwood Springs, CO.

The subject property is located directly north of the West Glenwood Mall, north of State Highway 6, east of Storm King Road, south of Donegan Road, and west of the residential units along the west side of Mel Ray Road. The current parcel area is approximately 15.82 acres which will be subdivided into two Lots. Lot 1 is the 3.53 acre developed site in the southwest corner, which has two office buildings and associated parking. Lot 2 is the remaining 12.29 acre parcel which is currently undeveloped open pasture land.

The existing office building development on Lot 1 will remain unchanged with this development. The proposed Lot 2 will be a 360 unit multi-family residential project with a club house. The proposed improvements are shown on the civil plans included with this application.

### **Existing Conditions**

SE has prepared an Improvement Survey Plat (ISP) of the subject property which is included in the application. For the ISP, SE researched the referenced Title Commitment to show easements on and off site that benefit or encumber this property.

Note the existing access easement shown on the mall property as it benefits this property. Refer to the access section below for more information on the mall access.

Note also that a recorded easement document for the existing utilities along the east property line was not found. This easement will be included on the Major Site Plan during the development approval process.

### **Access**

The site has two existing access to Storm King Road which will be maintained. Lot 1 has an existing access at the south west corner of the site. No improvements are proposed to this access. Lot 1 and Lot 2 will share the Center Drive access to Storm King Road, which is the existing street on the north side of Lot 1. In coordination with Lot 1, the island at the Center Drive intersection will be lengthened to the east and the first parking intersection on the south side will be modified to allow for right in turning movements only. This change will improve the traffic flow on Lot 1 and at the Center Drive intersection with Storm King Road.

Lot 2 has a second primary access connection to Donegan Road across from Chaparral Circle.

Note that Storm King Road and Donegan Road are in the County, not in the City Limits. The current Annexation plan does not annex these roads. Further discussion will need to occur with the County to determine if Storm King and Donegan along the project frontage will be annexed or not. As currently proposed, an updated driveway permit will be required for Center Drive, and a new driveway permit for the Lot 2 access at Chapparral will be obtained.

In addition to the primary access locations, an emergency and pedestrian access to the south to the mall is proposed at the SE corner of Lot 2. This development is only proposing pedestrian and emergency access because a street section does not exist on the mall property within the described easement location, and because traffic from the site is served by the primary access locations. Pedestrian access is provided within the existing access easement to the transit stop on State Highway 6 (near the southeast corner of the mall property).

Kimley Horn has prepared a traffic study for the proposed development. The study has identified that a CDOT Access Permit will be necessary at the north leg of the I-70 roundabout interchange known as the Mel Ray Road and Highway 6 intersection. No improvements are necessary at the two primary CDOT intersections adjacent to the site. Refer to the traffic study for more information. It is our understanding that the Mel Ray Road right-of-way at Highway 6 is owned and maintained by Garfield County. SE will coordinate a CDOT access permit submittal with Garfield County and the City of Glenwood Springs during the development approval process.

### **Emergency Access**

The site will have good emergency access from Storm King Road, Donegan Road, and from the mall at the SE corner of Lot 2. The internal streets and parking access aisles have been designed to provide access to all fire trucks and other emergency vehicles. SE will coordinate with the Glenwood Springs Fire District during the Major Site Plan approval process to discuss access, staging, and fire protection hydrant and connection requirements.

### **Offsite Street Improvements**

During the preliminary review and coordination with the City, bike lane and pedestrian connectivity comments were received. The following offsite street improvements are proposed;

Donegan Road: Bike lanes will be added in both directions. Parallel parking and a detached 6 foot wide sidewalk are proposed on the south side of the road. Crosswalk and handicap ramps will be added at each intersection on the south side of the road.

Storm King Road, south of Center Drive: The existing street width provides for two vehicle lanes plus bike lanes. The street will be striped to delineate the lanes. Crosswalk and handicap ramps will be added at each intersection on the east side of the road along the length of the 480 Donegan site frontage.

Storm King Road, north of Center Drive: The existing street section includes parallel parking on the west side that is used by the Two Rivers school for bus parking. The street section will be widened on the east side to include a north bound bike lane, parallel parking, and a detached 6 foot wide sidewalk. Note that a southbound bike lane is not proposed at this time as this would require replacement of the west curb and gutter. The street slope in this section is 5-6% down to the south. With the moderate slope down, bikes and cars can share the lane down to Center Drive. The speed of the bikes will be comparable to the vehicles, and this provides an acceptable solution until the west side of the street is redeveloped. The street will be striped to delineate the lanes. Crosswalk and handicap ramps will be added at each intersection on the east side of the road.

### **Parking**

Refer to the conceptual PUD plans sheet C1.1 and C1.2 for concept parking layout and breakdown by type. Lot 1 has a total of 112 parking spaces with 4 handicap parking spaces. Lot 2 parking is summarized on Sheet C1.2 and will be further detailed for Major Site Plan.

## **Grading & Drainage**

The grading and drainage concept will comply with the City of Glenwood Springs code requirements. The proposed onsite street and parking improvements will be treated for water quality. The increased storm water runoff will be detained to the pre-development existing rate, or the existing storm sewer capacity will be calculated and will not be exceeded. Offsite runoff which flows onsite will be routed through the site. SE will prepare a detailed grading and drainage plan and report for the Major Site Plan submittal. The concept grading and drainage plans are included in the concept site plan set.

The drainage criteria for the City of Glenwood Springs are detailed in Chapter 4 of the Engineering standards. In summary, development is required to provide for water quality treatment, and development shall '*detain for the minor and major storm event up to the point that the stormwater system downstream can accommodate*'.

### **Offsite:**

SE has walked the drainage areas above and below Lot 2, researched storm water as-builts and reviewed old drainage reports. From this research we have prepared a preliminary drainage model in order to understand drainage impacts and to approximate the storm water infrastructure necessary. As described below, the majority of the offsite storm water runoff flows around Lot 2 in Storm King Road and Mel Ray Road. The small drainage basin directly north of Lot 2 will be routed through Lot 2. Offsite drainage is shown on Sheets C4.0.

The drainage basins above Lot 2 are complicated by the existing streets and residential development. Prior to development, the drainage basins followed the natural topography. With development, the storm water runoff flows around structures down to the streets. Each street has a local high point. The storm water runoff flows east and west in drainage channels and in the curb & gutter. There is evidence of reactionary drainage infrastructure including low berms and walls on the downstream side of the street. These apparently have responded to flood events to divert flow around individual properties. The majority of storm water above Lot 2 ends up in the streets which generally direct storm water east and west.

West of Lot 2 and north of Donegan Road, storm water runoff flows down to Donegan Road and then is carried east in the street curb section to the intersection with Storm King Road. If the curb does not have capacity, the storm water will overtop and flow south through residential properties and the Two Rivers Community School. The offsite storm water runoff from this point will flow down Storm King Road following existing patterns. Storm water from this part of the offsite basin doesn't enter the subject site.

East of Lot 2 and north of Donegan Road, storm water flows down to the Donegan Road and Mel Ray Road intersection which is east of Lot 2. A large offsite basin extends to the north, northeast up to an elevation of 9,200+/- . With the existing residential development, the exact storm water runoff pattern is not readily discernible. Storm water runoff from this basin does appear to concentrate at Mel Ray Road. During larger storm events some storm water runoff may reach the east end of Lot 2. With development Lot 2 will accommodate storm water runoff along the east end. This matches the existing condition.

Directly north of Lot 2, the offsite storm water is limited to the runoff from the residential lots directly adjacent to Donegan Road or the residential lots above that. As noted above, the streets above Lot 2 consistently direct runoff east and west. Runoff that hits Donegan Road generally appears to stage up to the crown of Donegan Road and sheet flow south on to the subject site. Donegan Road has local high and low points with very flat grades east and west.

The existing office buildings on Lot 1 in the Southwest corner of the overall site are modeled as offsite drainage. Storm water runoff is directed to curb inlets and storm sewer pipe which flows to the south to connect to existing storm sewer infrastructure on the north side of the mall.

South of the site, SE has reviewed drainage as-builts provided by the developer of the Lot 1 office buildings. The as-builts detail the storm sewer infrastructure on Lot 1 and on the north side of the mall. Two 24" storm sewer pipes were extended to service the subject property, in accordance with an agreement with the mall property to allow the development on Lot 1 and Lot 2 to connect to the storm drain system.

On the mall property, roof runoff and parking lot runoff is directed to curb inlets and storm sewer pipes which increase in size as runoff flows to the west. The storm sewer turns south in a manhole adjacent to Storm King Road and flows in a 42" pipe (per the as-builts) to the northeast corner of the intersection Storm King Road and Highway 6. The storm sewer pipe then turns to the west under Highway 6 and tees into the 72" Mitchell Creek culvert approximately 20' downstream of the 72" upstream pipe inlet. SE has confirmed the alignment of the storm sewer in the field and also confirmed pipe sizes where possible.

#### **Onsite Existing:**

The existing site generally slopes down from north to south at moderate slopes. Two concrete storm sewer inlets extend to Lot 2; one at the west central portion of Lot 2 north of the existing office building development, and the second at the east central portion on the south side of Lot 2. The existing site appears to be in good condition with no evidence of flooding or erosion.

#### **Developed Site:**

Storm water runoff will be routed on the surface via sheet flow and in drainage swales, and then will be routed in storm sewer pipes to underground detention systems. The storm water runoff will be detained to bleed off to the existing storm sewer at the pre-development rate or the existing storm sewer capacity will be calculated and will not be exceeded. The drainage system will meet the requirements of the Engineering Standards.

Lot 2 will provide water quality treatment for the street and parking improvements. Roof runoff and storm water runoff from landscape and park areas are not contaminated by hydrocarbons and will have separate storm sewer pipes that bypass the water quality treatment to flow direct to the detention system.

Water Quality treatment may include a variety of treatment options. Rain gardens and treatment swales will be used if possible. Treatment may implement water quality treatment manholes, similar to ADS Barracuda manholes, which are described as vortex hydrodynamic separators. The Barracuda manholes are designed to remove at least 80 percent of Total Suspended Solids (TSS) while capable of carrying 100 percent of the design peak flow. Water quality treatment may also utilize sand treatment vaults.

As described above, offsite storm water runoff from Donegan Road and the residential area directly north of the site enters the site. This storm water runoff will be captured in storm inlets constructed within Donegan Road, and will be routed through the site maintaining the historic flow path. The east portion of the runoff will flow to the drainage swale along the east property line. The majority of the runoff will be collected in storm inlets and will be routed in storm sewer pipes to the existing storm sewer infrastructure south of the site.

The drainage and water quality plan, calculations and preliminary details will be provided for the Major Site plan submittal.

## Utilities

The existing site utilities are shown on existing condition base map. Based on our research to date it is our understanding that all utilities have capacity and will serve the proposed site. Will serve letters have been requested and letters received are included in the appendix to this report. Proposed utility improvements are discussed here and will be detailed for the Major Site Plan submittal. Concept utility improvements are shown on Sheet C2.0.

## Water System

The City of Glenwood Springs water system currently serves Lot 1. Lot 2 will also be served by the city potable water system. The city water main lines exist on the south, west, and north side of Lot 2. There are several existing water service tees at several locations on the south side of Lot 2. SE has coordinated with the Public Works department and has received a will serve letter from the City for water service to this site. The will serve letter notes the City is updating a water model to determine if the offsite water mains have capacity. The estimate of Lot 2 water usage is summarized in Table 1 below.

| TABLE 1 - WATER USAGE SUMMARY        |         |       |          |                |         |         |        |
|--------------------------------------|---------|-------|----------|----------------|---------|---------|--------|
| Unit Type                            | # Baths | SF+/- | # Units  | EQR/Unit*      | # EQRs  | GPD/EQR | GPD    |
| -Studio                              | 1       | 416   | 110      | 0.250          | 27.500  | 350     | 9,625  |

| -Spa                                 |         |       | 4500     | 0.2/500 GAL    | 1.8     | 350     | 630    |
| Subtotal =                           |         |       |          |                | 11.4    |         | 3,367  |
| TOTAL =                              |         |       |          |                | 90.3    | TOTAL = | 30,982 |

\*Multi Family EQRs calculated per GW EQR schedule 'Greater of 0.25 EQR per bedroom or 0.06 EQR per 100 square feet, not to exceed 1.00 EQR'.

Note this site will use Reynolds & Cain ditch water for irrigation water. Per the Glenwood Springs code EQR schedule 'When outside irrigation will be exclusively from a raw water source the EQR value as determined through this Section will be reduced by fifty percent (50%) for water only. The reduction of 50% for the residential uses is shown in Table 1 above. We understand from discussions with City Staff that this reduction will need to be discussed further.

The proposed connection locations, onsite water mains, water services and fire hydrants are shown on Sheet C2.0. Four connections to the existing water system are currently proposed, which provide for redundancy and increased flows onsite and offsite. SE will coordinate fire hydrant locations and preliminary building water service sizes during the Major Site Plan process.

## Sanitary Sewer

Lot 1 is currently served by the West Glenwood Sanitation District (WGSD). Lot 2 will also be served by the WGSD. The existing sewer main on the north side of the mall is owned and maintained by the WGSD. This main line extends from the mall to the south central portion of Lot 2. SE coordinated the development concept with WGSD staff and also attended a WGSD board meeting on September 14<sup>th</sup>. WGSD staff has indicated their treatment plant has capacity to serve Lot 2. SE calculated that the existing sanitary sewer line north of the mall has capacity to serve Lot 2. Our calculations and assumptions will be confirmed with the Sanitation District.

There is also an existing private sanitary sewer main line which extends onsite from the WGSD main line through Lot 1. This line has been TV inspected, and the WGSD has indicated that this line is in good condition to be added to the district.

The proposed connection locations, onsite sanitary sewer mains, and services are shown on C2.0. The estimate of sewer usage for Lot 2 is summarized in Table 2 below. SE will continue to coordinate the sanitary service connection and EQR rate with the WGSD.

| TABLE 2 - SEWER USAGE SUMMARY |          |               |               |                |               |
|-------------------------------|----------|---------------|---------------|----------------|---------------|
| Multi Family                  | # Units  | EQR/Unit      | # EQRs        | GPD/EQR        | GPD           |

## Electric:

Lot 1 is currently served by the City of Glenwood Springs electric department. City electric mains exist on the north, south, and east side of Lot 2. SE has coordinated with the Public Works department and has received a will serve letter from the City for electric service to this site. In our coordination with Public Works personnel, the existing overhead three phase electric adjacent to Donegan Road on the north side of Lot 2 will be buried with development.

The concept electric main lines and transformers to serve Lot 2 are shown on C2.0. The locations and infrastructure details will be coordinated further during the Major Site Plan process and as electrical building demands are completed by others.

**Fiber Optic:**

City of Glenwood Springs fiber optic lines exist adjacent to Lot 2, the Public Works department has provided a will serve letter for fiber optic service. Per the utility locates performed for the ISP, fiber lines exist along the east and south property line, and extend onsite on the south side of Lot 1 to serve the existing onsite office buildings. The proposed fiber optic alignment is not shown specifically on sheet C2.0. We anticipate the alignment will generally follow the electric alignment onsite. SE will continue coordination with Public Works to determine the existing fiber line locations and the proposed alignment onsite.

**Telephone/Cable:**

SE has had limited communication with telephone and cable. The ISP utility locates show that communications utilities are directly adjacent to Lot 2. The telephone and cable alignments are not shown specifically on sheet C2.0. We anticipate the alignments will generally follow the electric alignment onsite.

**Natural Gas:**

SE has coordinated and received a will serve letter from Black Hills Energy for natural gas service for this site. Existing gas lines are on the north, west, and south sides of Lot 2. The concept natural gas main lines to serve Lot 2 are shown on C2.0. SE will coordinate the connection locations, main lines, and services with Black Hills Energy as the design progresses.

**Irrigation Water**

SE has walked the existing irrigation system for this site with the current property owner. The existing site has irrigation water rights from the Reynolds and Cain Ditch. An existing pump station is north of Lot 2 on the piped main ditch alignment. A 6" pressurized irrigation line and a gravity line extend to the existing site under Donegan Road to the north property line.

The proposed Lot 1 uses this irrigation system to irrigate the existing landscape areas onsite. The existing irrigation system also irrigates the landscape area in the Storm King Road right-of-way that adjoins this property. The table below summarizes the irrigated area on Lot 1.

The development on Lot 2 will use a portion of the total raw water shares associated with this property. SE has performed a preliminary analysis and estimate that the shares will be adequate to provide raw water irrigation to this site. We have calculated the approximate irrigation area based on the current site plan and have estimated the flow rate necessary to irrigate this site. The irrigation calculations are included in Table 3 below.

| <b>Lot 1 - Irrigation Summary</b>   |        | <b>Lot 2 - Irrigation Summary</b>   |         |
|-------------------------------------|--------|-------------------------------------|---------|
| Irrigation Area (SF)=               | 42,170 | Irrigation Area (SF)=               | 157,000 |
| Irrigation Area (AC)=               | 0.97   | Irrigation Area (AC)=               | 3.60    |
| Peak Irrigation depth/day (in) =    | 0.25   | Peak Irrigation depth/day (in) =    | 0.25    |
| Peak Irrigation depth/day (ft)=     | 0.0208 | Peak Irrigation depth/day (ft)=     | 0.0208  |
| Volume (CF/day) =                   | 879    | Volume (CF/day) =                   | 3,271   |
| Volume (gpd) =                      | 6,572  | Volume (gpd) =                      | 24,467  |
| Irrigation period (hr)              | 8      | Irrigation period (hr)              | 8       |
| Irr flow rate (gph)                 | 821    | Irr flow rate (gph)                 | 3,058   |
| Irr flow rate (gpm)                 | 13.69  | Irr flow rate (gpm)                 | 50.97   |
| Assumed irrigation efficiency       | 75%    | Assumed irrigation efficiency       | 75%     |
| Adjusted, Final Irr flow rate (gph) | 1,095  | Adjusted, Final Irr flow rate (gph) | 4,078   |
| Adjusted, Final Irr flow rate (gpm) | 18.26  | Adjusted, Final Irr flow rate (gpm) | 67.97   |

SE will detail the proposed irrigation system as the Lot 2 plan develops. The pump station will be evaluated and will be used until demands exceed the pump ability or the pump needs to be replaced. The pump station will also be relocated and upgraded as necessary to meet the build out demands. Irrigation water flowing in the gravity line will be eliminated with development as flood irrigation will no longer be needed.

In our discussions with the Lot 1 owner, we anticipate this irrigation system will be shared for the entire site, and an agreement for maintenance will be in place. Additional irrigation details will be provided for the Major site plan submittal.

### **Conclusion**

The proposed site has good access to Storm King Road and Donegan Road which provides direct access to the arterial road network. The traffic study demonstrates good levels of service are maintained on the road network and at the CDOT access intersections. The offsite drainage generally flows around Lot 2. Storm water runoff that enters Lot 2 will be routed around and through the site. Lot 2 will provide water quality and detention before connecting to the storm sewer pipes that directs flow direct to Mitchell Creek and the Colorado River. The existing utilities are directly adjacent and adequate to service Lot 2 and will be extended to serve the proposed site

If you have any questions or need any additional information, please call.

### SPECIAL WARRANTY DEED

**GLENWOOD PARTNERSHIP**, a Colorado general partnership, Grantor, for good and valuable consideration, in hand paid, hereby sells and conveys to **GLENWOOD PARTNERSHIP LLLP**, a Colorado Limited Liability Limited Partnership, Grantee, whose legal address is 214 Center Drive, Glenwood Springs, Colorado 81601, the following real property in the County of Garfield and State of Colorado, to wit:

SEE EXHIBIT "A" ATTACHED HERETO AND  
INCORPORATED HEREIN BY THIS REFERENCE;

with all its appurtenances, and warrants the title to the same against all persons claiming under the Grantor.

NO DOCUMENTARY FEE REQUIRED: Deed given to reflect name change in connection with conversion of the general partnership to a limited liability limited partnership. Consideration less than \$500.00.

EFFECTIVE the 18<sup>th</sup> day of July, 2000.

GLENWOOD PARTNERSHIP, a  
Colorado General Partnership

K:\DK\Diemoz-ESWD.htm

Parcel No. 1:

All of the following described real property situate in Lot Two of Section 6, T. 6 S., R. 89 W., 6th P.M., in the County of Garfield and State of Colorado, to-wit:

Beginning at a point on the northerly right-of-way line of U.S. Highway No. 6 & 24, 359.25 feet, N. 87°16' W. of a point on said Northerly right-of-way line from whence the witness corner for the South Quarter Corner of Section 34, T. 5 S., R. 89 W., 6th P.M., bears N. 03°34' W. 1423.68 feet; thence N. 02°44' E. 1339.59 feet to a point on the southerly right-of-way fence line of the County Road, said point being 559.58 feet, S. 89°52' W. of a point on the Southerly right-of-way line of the County Road from whence the witness corner for the South Quarter Corner of said Section 34, T. 5 S., R. 89 W., 6th P.M., bears N. 80°11' W. 358.5 feet; thence S. 89°52' W. 342.73 feet along the Southerly right-of-way fence line of the County Road; thence S. 02°44' W. 1322.45 feet to the Northerly right-of-way line of U.S. Highway No. 6 & 24; thence S. 87°16' E. 342.30 feet along the Northerly right-of-way line of U.S. Highway No. 6 & 24, to the point of beginning, containing 10.459 acres of land, more or less.

Parcel No. 2:

All of the following described real property situate in Lots 1 and 2 and the NW $\frac{1}{4}$ SE $\frac{1}{4}$  of Section 6, T. 6 S., R. 89 W., 6th P.M., in the County of Garfield and State of Colorado, to-wit:

All that portion of the lands described in that certain warranty deed recorded as Document No. 200114 in Book 306 at Page 138 of the records in the office of the Clerk and Recorder, Garfield County, Colorado, lying Easterly of the following described line: Beginning at a point on the Northerly right-of-way line of U.S. Highway No. 6 & 24, 359.25 feet, N. 87°16' W. of a point on said Northerly right-of-way line from whence the witness corner for the South Quarter Corner of Section 34, T. 5 S., R. 89 W., 6th P.M., bears N. 03°34' W. 1423.68 feet; thence N. 02°44' E. 1339.59 feet to a point on the Southerly right-of-way fence line of the County Road, said point being 559.58 feet, S. 89°52' W. of a point on the Southerly right-of-way line of the County Road from whence the witness corner for the South Quarter Corner of Section 34, T. 5 S., R. 89 W., 6th P.M., bears N. 80°11' W. 358.5 feet, containing 20.0 acres of land, more or less.

After recording return to: Schenk Kerst & deWinter  
302 8th St., Ste. 310, Glenwood Springs, CO 81601

Parcel No. 3

A parcel of land situate in Section 6, Township 6 South, Range 89 West of the 6th Principal Meridian, County of Garfield, State of Colorado, being more particularly described as follows:

Beginning at a point whence the South Quarter Corner of Section 34, Township 5 South, Range 89 West of the 6th Principal Meridian bears N. 42°07'49" E. 861.67 feet; thence N. 02°44'00" E. 603.42 feet to the South right of way line of County Road No. 130; thence N. 89°50'00" E. 15.01 feet along said South right of way line of County Road No. 130; thence departing said County Road right of way line on a course bearing S. 02°44'00" W. 604.17 feet; thence N. 87°18'00" W. 15.00 feet to the point of beginning containing 9052 square feet or 0.208 acres more or less.

Parcel No. 4

A tract of land extending along the northerly boundary of the Glenwood Springs Mall Subdivision pursuant to the plat thereof recorded in the office of the Clerk and Recorder of Garfield County, Colorado as Reception No. 316244 (Mall) described as follows:

Commencing at the northeast corner of the Mall; thence along the north boundary thereof 605.36 feet; thence northerly 195 feet; thence easterly 605.36 feet on a line parallel to the northerly boundary of the Mall; thence southerly 195 feet on a line parallel to the westerly boundary of the tract herein described to the point of beginning.

TOGETHER WITH any and all water and ditch rights appurtenant to the above described Parcels.

EXCEPTING THEREFROM the following described Parcels A, B and C:

Parcel A

A parcel of land situate in Section 6, Township 6 South, Range 89 West of the 6th Principal Meridian, County of Garfield, State of Colorado being more particularly described as follows:

Commencing at the S $\frac{1}{4}$  corner of Section 34, Township 5 South, Range 89 West of the 6th Principal Meridian; thence S. 87°11'46" E. 670.12 feet to the point of intersection of the west line of the Mel-Ray Subdivision, County of Garfield, State of Colorado and the south right-of-way line of County Road No. 100; thence along the west line of said Mel-Ray Subdivision S. 01°52'00" W. 575.96 feet to the true point of beginning; thence continuing along said line S. 01°52'00" W. 183.95 feet to a point of intersection where the north line of the Glen Theatre, Inc. property intersects the west line of said Mel-Ray Subdivision; thence along the north line of the Glen Theatre, Inc. property N. 87°18'00" W. 536.20 feet to the northwest corner of said property; thence along the west line of said property S. 01°53'00" W. 623.25 feet to the north right-of-way line of U.S. Highway No. 6 & 24; thence along said north right-of-way line the following course N. 87°16'00" W. 246.80 feet; thence N. 02°44'00" E. 718.54 feet; thence S. 87°18'00" E. 67.23 feet; thence N. 47°42'00" E. 125.06 feet; thence S. 87°18'00" E. 615.36 feet to the true point of beginning, containing 6.499 acres more or less.

Parcel B

A parcel of land situate in Section 6, Township 6 South, Range 89 West of the 6th Principal Meridian, County of Garfield, State of Colorado, being more particularly described as follows:

Beginning at a point whence the S $\frac{1}{4}$  corner of Section 34, Township 5 South, Range 89 West of the 6th Principal Meridian bears N. 42°07'49" E. 861.66 feet; thence S. 87°18'00" E. 454.75 feet; thence S. 02°44'00" W. 718.54 feet to a point on the north right-of-way line of U.S. Highway 6 & 24; thence along said north right-of-way line the following course N. 87°16'00" W. 454.75 feet; thence N. 02°44'00" E. 718.28 feet to the point of beginning, containing 7.500 acres more or less.

EXHIBIT "A"  
Page 4 of 4

Parcel C

A tract of land to be used for roadway, drainage and utility purposes situate in Section 6, Township 6 South, Range 89 West of the 6th Principal Meridian, County of Garfield, State of Colorado, being more particularly described as follows:

Beginning at a point whence the South Quarter Corner of Section 34, Township 5 South, Range 89 West of the 6th Principal Meridian bears N.  $39^{\circ}44'28''$  E. 833.81 feet; thence N.  $02^{\circ}44'00''$  E. 605.64 feet to the South right of way line of County Road No. 130; thence S.  $89^{\circ}50'00''$  W. 60.08 feet along said South right of way line of County Road No. 130; thence departing said County Road right of way line on a course bearing S.  $02^{\circ}44'00''$  W. 602.64 feet; thence S.  $87^{\circ}18'00''$  E. 60.00 feet to the point of beginning, containing 36250 square feet or 0.832 acres more or less.

After recording return to: Schenk Kerst & deWinter  
302 8th St., Ste. 310, Glenwood Springs, CO 81601

## PETITION FOR ANNEXATION

The undersigned Petitioner, in accordance with The Municipal Annexation Act of 1965, Article 12, Title 31, C.R.S., as amended, hereby petitions the City Council of the City of Glenwood Springs, Colorado, for annexation to the City of Glenwood Springs that certain real property more particularly described in Exhibit A (the "Property"), which Exhibit is attached hereto and made a part hereof by reference. In support of this Petition, the Petitioner alleges that:

1. Petitioner is Glenwood Partnership, LLLP, a Colorado limited liability limited partnership. The purpose of this Petition is to enable Petitioner to obtain municipal services within the municipal boundaries of the City of Glenwood Springs.

2. Petitioner alleges that it is the landowner—as that term is defined in the Municipal Annexation Act—of 100% of the Property described in Exhibit A as of the date of this Petition.

3. It is desirable and necessary that the Property be annexed to the City of Glenwood Springs, Colorado.

4. The requirements of C.R.S. §31-12-104 and §31-12-105, as amended, exist or have been met as set forth and shown herein.

5. As provided in C.R.S. § 31-12-104, not less than one-sixth (1/6) of the perimeter of the area proposed to be annexed is contiguous with the City of Glenwood Springs.

6. A community of interest exists between the Property proposed to be annexed and the City of Glenwood Springs.

7. The Property proposed to be annexed is urban or will be urbanized in the near future.

8. The Property proposed to be annexed is integrated with or is capable of being integrated with the City of Glenwood Springs.

9. No land in the Property sought to be annexed which is held in identical ownership, whether consisting of one tract or parcel of real estate or two or more contiguous tracts or parcels of real estate, has been or shall be divided into separate parcels without the written consent of the landowner(s).

10. No land in the Property sought to be annexed which is held in identical ownership and comprising twenty (20) or more acres and having an assessed valuation for ad valorem tax purposes in excess of \$200,000.00 has been included in the area without the written consent of the landowner(s).

11. The entire width of any portion of a platted street or alley to be annexed within the Property is included.

12. The proposed annexation will not result in detachment of the Property from any school district or attachment to another district.

13. The Property to be annexed is not presently a part of any incorporated city, city and county, or town; nor have any proceedings been commenced for annexation of part or all of the Property to any other municipality; nor has any election for annexation of such Property or substantially the same Property to the City of Glenwood Springs been held within the twelve (12) months immediately preceding the filing of this Petition.

14. The annexation of the Property proposed to be annexed will not have the effect of extending the boundary of the City of Glenwood Springs more than three (3) miles in any direction from any point of the City of Glenwood Springs municipal boundary in any one (1) year.

15. The signers of this Petition comprise more than fifty percent of the landowners and own more than fifty percent of the Property, exclusive of public streets and alleys and any land owned by the City of Glenwood Springs.

16. The affidavit of the circulator of this Petition stating that each signature hereon is the signature of the person whose name it purports to be is attached to this Petition and made a part hereof by this reference.

17. Attached hereto and incorporated herein by reference are four (4) copies of an annexation map in the form required by C.R.S. §31-12-107(1)(d) and containing:

- a) a written legal description of the boundaries of the area proposed to be annexed;
- b) a map showing the boundary of the area proposed to be annexed;
- c) within the annexation boundary map, a showing of the location of each ownership tract in unplatted land and, if part or all of the area is platted, the boundaries and the plat numbers of plots or lots and blocks; and
- d) next to the boundary of the area proposed to be annexed, a drawing of the contiguous boundary of the annexing municipality and the contiguous boundary of any other municipality abutting the area proposed to be annexed.

18. Each person signing this Petition for Annexation represents that he or she has full authorization to execute this Petition on behalf of the Petitioner.

19. The notary executing this Petition states that each signature herein is the signature of the person whose name it purports to be.

20. Petitioner reserves the right to withdraw this petition and its signature therefrom at any time prior to the recordation of the annexation map.

21. The mailing address of the Petitioner is as follows: 214 Center Drive, Glenwood Springs, Colorado 81601.

WHEREFORE, Petitioner requests that the City of Glenwood Springs approve the

annexation of the Property into the City.

PETITIONER

RANGE 89 WEST OF THE 6TH P.M.  
CITY OF GLENWOOD SPRINGS, COUNTY OF GARFIELD, STATE OF COLORADO.

SHEET 1 OF 2

**NOTES**

- 1) Date of Survey: October 7-28, December 15-18, 2020 & January 5, 8, 14, 2021
- 2) Date of Preparation: October - December 2020 & January 2021.
- 3) Basis of Bearing: A bearing of N 89° 49' 59" E along the south east section line of Section 34, established by the found monuments.
- 4) This survey does not constitute a title search by Sopris Engineering, LLC (SE) to determine ownership or easements of record. For all information regarding easements, rights of way and/or title of record, SE relied upon the Title Report prepared by Land Title Guarantee Company, Order No. AB563014094-2, Effective Date, January 10, 2020 and documents and plats of record as shown in the Source Documents, herein.
- 5) Basis of elevation: Project based on Global Position System (GPS) observations from the Continuous Operating Reference Station (CORS) GSC1 utilizing the Continental United States 2012 geoid model (GEOID 12A) CONUS and based the 1988 North American Vertical Datum (NAVD88) and a vertical shift of -4.22 feet as calculated by the North American Vertical Datum Conversion (VERTCON) an online service provided by a subsidy of the National Oceanic Atmospheric Administration (NOAA). Which established all elevations shown heron. Placement benchmarks to be set as requested.
- 6) The linear unit used in the preparation of this plat is the U.S. survey foot as defined by the United States Department of Commerce, National Institute of Standards and Technology.

**Subject:** New Slogan - Glenwood Springs the Community of Apartment Living!

Dear All!

My points:

- With all of your planned developments, you will have a **surplus of inventory - empty apartments** (Lofts, 6 Canyons, under construction at the former site of the Buffalo Valley, behind Walmart, where Rivers Restaurant stands and now west Glenwood)
- Where are the jobs to provide income to pay the rents? Blue collar? **Hourly? Is that what builds a solid community?**
- A study presented April 1, 2019 was based on **numbers from 2017**. It is now 2020 and we have had a pandemic. **Are your numbers accurate?**
- From what I read, **growth over the next 10 years is in the group of 65 yo+ -** we do not live in apartments.
- You will make Glenwood a cheap bedroom community.
- What **new department** will you create to inspect, monitor and deal with tenant issues?
- How will you beef up police and fire?
- Did you take into account that the **Hispanic Culture**, with larger families, prefer to keep all of the family under one roof?
- Will you **monitor unit occupancy?**

Slow down and think. This mass construction of apartments will turn Glenwood into a bedroom community comprised of families stacked in tacky apartments. Is this what Glenwood is about and what the founding fathers had in mind? I think not.

Ty Sparks  
Resident since 1970

PS Where is it written that if you cannot afford to live somewhere the community must bend so that you can? I live where I can afford.

**Subject:** Planning for wildfire mitigation

Hello ,

I am a long time resident of the Valley . Have lived in West Glenwd having moved from Aspen to the Oasis Creek area in 1985. The view from my father's property overlooked the uncrowded and undeveloped areas that then comprised West Glenwood . Looking back in my minds eye 25 years ago , it is still hard to conceive of the exponentially explosive growth and churning pace of development . Still , those many years ago I had hoped that the surely city would be engaged in thoughtful planning . Population density and growth has now spilled over . I am a senior woman who has lived for twenty years and counting in the Orchard Lane townhomes. Now it is hard for me to even find a safe place to walk my dog and play a game of fetch with him in West Glenwood . The cherished little oasis of green grass or fields here and there have simply vanished . The pocket park along Mitchel Creek called Gregory has been virtually commandeered by the Two Rivers school often holding their outdoor education classes there. The Two Rivers Park , oh we used to enjoy that park too. It now suffers overuse with ever more tourists understandably crowding into it. The new , recently built "river walk" transformed a lovely natural rivers edge beach in which my dog romped and played . It became instead a man made walkway which now a dangerous situation for young children and dogs in that the natural beach was manipulated into something that is not natural at all and affords no transition from the built up walk wall to natural sloping beach . There was very little environmental sensitivity involved in that project . The Iron mountain entertainment and spa facilities destroyed the riparian terrain in those areas as well . Nothing in West Glenwood currently exists as an assessable open space. Oh yes the Meadows trails are jk great . But they are not open , assessable fields that any child could fly a kite in . That's incongruous for a city whose residents identify themselves as " outdoor " oriented . West Glenwood is a portion of the city that is rated very high in potential danger from fire threat . A person might dare to think that Glenwood along with New Castle , would have aggressively and smartly planned for green spaces to act as protective buffer zones for our ecologically vulnerable and fragile mountain community. Especially since the threat is something we've lived with every summer for a very long time.

We living in West Glenwood remember well the fires of Coal Seam and Storm King , We lived through the feeling of being trapped in the exits even way back then . West Glenwd's density has now reached a critical mass. Year after year we have faced the threat of wildfire by the seat of our pants. Glenwds 2020 population is roughly 10,000 lives by now . Our small area of West Glenwood therefore stands to represent 4,000 of those 10, 000 people in all the city if a very large development proposal by an out of state developer goes through at the West Glenwood Pasture .

West Glenwood has similar issues to those in nearby New Castle with outside developers wanting to cram hundreds of more people into small spaces with seemly no proportional attention or planning for emergency evacuation in wildfire situations . West Glenwood has only two avenues of escape . Due to the population increase over the last ten years, daily congestion has increased to a point where we seriously need to update, revise and be educated for our emergency evacuation plans . As a community we must revisit how much more development our town and infrastructure can safely accommodate. We can't afford to build additional roads and developers don't want to do it...We desire LESS density, more open space, and an updated safety plan keeps everyone informed as to evacuation procedures . WE NEED BE ASSURED THAT WE WILL NOT BE TRAPPED.

It seems readily apparent that addressing the value of having open space had been far too late in coming to the intentions of Garfield county. True , that ten short years ago they were at last begun . Were they ever consulted, much less comprehensively implemented ? I wonder at times why these studies even got done and then seemingly ignored . It would seem they were treated as just an esoteric "suggestion". Does anything matter if it doesn 't somehow involve recreation or some other economic interest ? I want to know why other considerations such as :

safety , quality of life , with livable and well planned -for spaces are somehow not considered valuable and practical as well?

My plea In writing this letter is for better , more progressive and forward looking planning and regulation for West Glenwood . If development occurs that it be compatible , with the local environs that are studied and well understood . It's seems in light of this , that it is irresponsible for the economic engine to keep churning unabated in pursuit of "the economy"- as if nothing else holds value at all .

My home is here In Glenwood . I do not intend to leave. My way of life feels very threatened by uncontrolled growth , and lack of planning for that growth . There comes a time when the quality and safety of life should be considered a very practical and essential part of effective city planning and zoning . That time is well past due . I live in the very shadow of Storm King . I hope that the brave firefighters that fought for our town and died defending it , did not die as it's only defenders . One would think that a vigorous and meaningful plan for mitigating a repeat of wildfire disaster would exist in PLANNING and ZONING for open spaces that act as buffer zones. We need in meaningful and sustainable plans . How much longer can we simply rely on sheer luck, timing , and the way the wind blows during fire season ? We can no longer simply applaud the heroic efforts of firefighters and emergency personnel and then act in ways that seem as if we take their efforts and our luck for granted . Surely there are many good and involved people in leadership making sincere and non -political efforts to form a caring community. I beg for the city planners developers and leadership to work together as effectively and as heroically as firefighters do. Please provide updated PLANNING AND ZONING that would better protect West Glenwood's vulnerabilities . Keep our businesses safe and our quality of life livable and breathable by reconsidering the vital contributions of open space. It's way past time to be see that overdevelopment is simply exploitation and no longer conscionable for our West fGlenwood community that is yalready under threat by the proposed massive expansion of the RMR limestone quarry, a short mile away as the bird flies . We need space to live and breathe clean air . We deserve for our concerns to at long last be addressed .

Sincerely ,  
Bobbie Meriwether

**Cc:** Ann Stephens  
**Subject:** Proposed Development by R2 Partnership LLC

As long-standing members of the West Glenwood community, we are writing to express our opposition and concerns regarding the development of the 12.5-acre property at 214 Center Drive currently under contract with R2 Partnership LLC. After meeting with the developer last week we believe the Pre-Annexation meeting will be held in approximately two months' time (late September/early October).

We recognize the Roaring Fork Valley may have a housing need, but to bring in 418 units, 1300 tenants with 650 parking spaces to such a neighborhood is a concern for us on many levels.

### 1. Safety

The wildfire on August 5, 2020, just west of Ami's Acres at approximately mile marker 111, has again shown us the reality of what happens in West Glenwood during even a small wildfire. Our home is on Ponderosa Circle just off Donegan Road and we witnessed first-hand how quickly the traffic congestion occurred shortly after the emergency alert. The I-70 traffic, and almost every road in West Glenwood, was gridlocked and remained gridlocked till long after 10 pm.

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." West Glenwood has many roads leading to **A SINGLE ROAD - Highway 6**. Also, Highway 6 cannot allow safe evacuation of all the residents of West Glenwood. Depending on the location of the fire, emergency vehicles may block off one or more roads to enable their access to the fire, which further restricts evacuation.

To add another 1,300 residents to West Glenwood, which according to the Census Department, had almost 3,100 residents in 2018 would be utterly catastrophic. Not only do all of these residents need to evacuate safely, but there are elderly residents (12% of our population) who may need assistance, families with young children, as well as two schools and daycare facilities.

### 2. Impact on Traffic

To add another 1,000 vehicles to our streets will bring about a traffic nightmare of Californian proportions and will turn West Glenwood into a parking lot. COVID has dramatically reduced traffic, and any traffic studies done at this time will not reflect the reality of this area. We urge you to consider this at the Pre-Annexation meeting when it comes to your department.

### 3. Proximity to Two Rivers School

Currently, the developers plan to have an exit immediately opposite the school. Even if they move the street to somewhere else on Storm King, congestion and safety concerns for our young children is inevitable.

### 4. Green space

Glenwood residents value the beauty of the land and recognize the importance of green space; we will be losing yet another precious piece of land for our environment and the wildlife. Bike paths exist around town coming almost to this piece of property for both tourists and residents to recreate and enjoy this valley. Many tourists bike past the pasture to visit the area's Fish Hatcheries.

If there has been one thing our world has learned through COVID it is that no matter how economically stable you are, how fiscally responsible you are, how much you plan for the future, you are nothing if you don't protect your people and that is what we are asking the City of Glenwood to do - to protect its current population and keep its residents safe. We strongly urge the City Planning Office to reject the application to annex this property.

**Subject:** Issues of the 111 Fire and the West Glenwood pasture development plan

Civic leaders of Glenwood Springs:

I'm the owner of High Tails Dog & Cat Outfitters in West Glenwood Springs. On Wednesday, August 5th, we received a pre-evacuation order at around 3:30 shortly after the 111 Fire got rolling. We immediately began to prepare and load supplies and gear and organize our vehicles to be able to transport to safety all the dogs in our care at that time. Their owners came as soon as they could to retrieve their pets, but many were delayed by traffic, with the last dog picked up just before 8. Although one westbound lane of I-70 opened up shortly after six, no one was able to move in any direction by then. Highway 6 was a parking lot from Mitchell Creek Rd to the 114 roundabout. By the time I left, after 8, all side streets were completely gridlocked as well. It dawned on us that if the fire had continued to bear down on us, we would not have been able to go anywhere.

Because I live off of Donegan east of the Mall, I took Mitchell Creek Rd to Donegan where I joined the stationary line, sitting alongside the disputed pasture behind the mall. I couldn't help thinking about how much worse the jam would have been if 1300 more people and 600+ vehicles were in place, all under the same order to be ready to evacuate, all striving to be able to leave. It was impossible not to recall the horrific images of the Paradise Fire, another bottleneck from which there were not enough possible exits, and the people and animals who roasted to death in their cars or on foot, unable to outrun the flames.

Several years ago I participated in a few planning sessions after a fire in the same general area had exposed serious weaknesses in the ability to move people out of this area. It is hemmed in by geography and unmitigated by sufficient infrastructure. We talked about organizing for responsible traffic flow control, but as far as I know, nothing much came of it. But that was before the summer when California burned, obliterating whole towns. When massive loss of life clearly indicated the future for such places (like ours) as the climate warms and extreme weather events and overcrowding-without-sufficient-safety-resources increase.

We need to sober up. If we learn nothing else from the current pandemic, it should be clear to everyone that precautionary planning - not just talk, but provision of resources and designation of responsible entities for accessing and distributing them in emergencies -- is not a luxury but an absolute necessity. Allowing an imperative of "growth" to trump everything is living beyond our means.

One obvious measure we should take is to organize, equip, train and empower a civilian volunteer traffic corps. We live in an area where fires, floods, mud slides and blizzards frequently paralyze our mobility. There are recognized choke points where one traffic control officer could significantly ease congestion and keep emergency response routes open. This is no job for the police, since even in a gridlocked and panicky situation, law enforcement has its own necessary role. Volunteer fire departments could be a model for such a cadre of people trained and tasked with handling traffic needs in a crisis.

Finally, on the pasture development proposition: About the only thing everyone agrees on in relation to the Covid-19 pandemic is that once the crisis is past, nothing will be the same as it was before. The Valley housing report of just a year ago needs to be set aside until a "new normal" situation can be evaluated. What does it mean for our communities that out of state ultra-wealthy people are moving here to live in their second homes, or buying up properties as fast as they can? They are thinking of their own safety. But they have resources to take care of themselves wherever they primarily reside, better than the low-wage "essential workers" who risk much to serve them. We should ask ourselves if we are really willing to sacrifice what remains of our quality of life in our communities, or be forced to leave because of rising real estate prices (followed by property taxes.) I think it would be prudent, and also a statement of community solidarity, to place a moratorium on development for a period of time long enough to allow us to recognize emerging trends and changes and take deliberate and appropriate action.

But let's find new ways to deliberate together what we want our communities to be, before fear, greed and recklessness make that discussion moot.

---

I am in receipt of the flyer that circulated regarding this development. I am opposed to such a dense development with little to no concern on the surrounding area. First, the traffic congestion in West Glenwood with the Mall, Dealerships, multiple schools and businesses is already at capacity in my opinion. Second, the idea of another high density development in this area is not reasonable. The last project by Climate Control required numerous variations that were granted with little to no regard for reasonableness on height, parking and density. This seems like the same thing. Third, you are placing 1300 tenants next to two schools that will add a large volume of traffic at the worst times for children safety. Finally, I am surprised that the city council would consider this. At one point it was expected that this land would be completely or partially a park area. Why does the South Glenwood and downtown area from Two Rivers to the south get multiple parks and recreation sites and West Glenwood gets a small virtually non-usable park (McGregor Park) but yet almost half of the kids live in this area. Residents have been begging for more options in West Glenwood for decades, more ball fields, basketball courts, picnic areas, etc. but instead of doing this, the city council decides to update a commercial rafting pull out that is used by a small minority of the community. Please consider what you are doing on this. You are adding 1300 residents with most likely 1/3 of them being kids without any type of recreational outlet that was desperately needed prior to this. If this development was offset by 50% of it going to ballfields, recreational options, I would reconsider. Thank you.

Troy Gordon

**Sent:** Monday, August 17, 2020 9:45 AM  
**To:** Gretchen E Ricehill  
**Subject:** Proposed West Glenwood Pasture Development

Dear Ms. Ricehill:

We are writing to you regarding the Proposed West Glenwood Pasture Development.

We have lived in west Glenwood since 1971 and have seen many changes over the years. While change is inevitable, we feel that the above proposal is dangerous to the residents in west Glenwood, primarily because of the very real possibility of needing to evacuate and this summer is a case in point.

The danger of fire has occurred in West Glenwood twice (1994 & 2002) and we have had to evacuate. In 2002, we were stuck in bumper to bumper traffic on the frontage road while the fire roared our way just across the river. With the fire moving faster than the traffic, we finally drove on the bike path to make our way to north Glenwood and then across the bridge. And, this year, we were very fortunate that the fire fighters could extinguished the 111 fire before it was out of control and threatened residents in West Glenwood.

Since the 2002 fire, the population in west Glenwood has grown substantially along with the accompanying increase in traffic. New homes and apartments have been built which have added additional population and cars. The new bridge is a beautiful accomplishment but it doesn't move traffic across the river at a significantly faster pace than the old bridge did.

The potential increase of another 1,300 tenants and 650 more cars to the already overcrowding of the area is dangerous and ill advised.

In our opinion, a better use for the pasture would be its development as a park for West Glenwood. Currently the only park in West Glenwood is the small Gregory Park by Mitchell Creek.

Sincerely,

Leon and Rachel Garot

**Subject:** Proposed West Glenwood Pasture Development. Section 6, Township 6, South Range 89

Dear Ms. Ricehill and Mr. Baumann,

I am very concerned about the proposed development of the Pasture land behind the old Glenwood Springs Mall.

I think it endangers all of our lives in West Glenwood to add to the population here when already when there is a disaster, there is a huge traffic problem. Allow me to be specific. I live at the very end of Mountain Shadow Dr. and I am disabled.

We recently were put under prevacuation for the 111 fire in Canyon Creek 3 miles from the West Glenwood Exit. I called my help who lives in Glenwood. It took her 20 minutes to get here and a half hour to get home because of the congestion of traffic on the highway, Midland and the frontage road. It took my housemates 3 hours to get here from Thunder River Market. When they finally got to the neighborhood, they said there were random cars everywhere parked and moving because the highway was shut down. Thank God, we did not have to evacuate. I really feel we would not have gotten out of here,

Please do not add more population to the existing infrastructure that already is inefficient in an emergency.

Thank You for your consideration,  
Sincerely,  
Deborah : "Jessi" Hastings

**Subject:** West Glenwood Pasture Development to Apartments  
**Date:** Tuesday, August 18, 2020 1:13:01 PM

---

Hi Gretchen,

I am writing this to you as a West Glenwood resident located at 0010 Ponderosa Circle. I first and foremost want to acknowledge that there is definitely a need for housing in this community, But, I also want to express my concerns about the development and the density of the apartments proposed.

If you drove by this area yesterday or today, we already have traffic and parking concerns since the Two Rivers Foundation School has returned to full operations. The teachers and staff are having to park along Donegan (including in front of this proposed development). The school buses are parked along Storm King Road leaving room for only one car to pass by at a time. Now, add an additional 1-2 vehicles per unit at this development and we have 500 - 800 vehicles to add to the congestion at school drop off and pick up times, which coincide with leaving for work in the mornings. The safety of these children that walk from our neighborhood to both the Two Rivers Foundation School and the Glenwood Springs Middle School is a definite issue.

Our roads (Donegan & Ponderosa) have been torn up for weeks just adding a larger sewer/water line to accommodate this development and it is not even approved yet. What other infrastructure will have to be modified in order to handle the number of apartments and people this will bring? And, in the end, who is paying for the road work, sewer and water upgrades, etc.? City taxpayers?

And, with the fires burning at the present time, and having to evacuate twice in the past, we would have a very difficult time moving that amount of vehicles and people out of this area in a quick manner. It was a nightmare before in 1994 and 2002 and we didn't have the amount of cars and people living in West Glenwood that we now have, This development would exacerbate this 10-fold.

I also work in the Glenwood Business Center and would be entering and exiting the same entryway and exit that this new development would be using. It is hard at the present time to get in this business center when the cars are lined up dropping children off at the school, let alone the additional cars from the development.

I also have my office facing this open field and it has been very nice to observe the geese, rabbits, horses, and other wildlife come through and have a place to reside. No more green space?

The noise level, the lighting, and other issues are definitely a concern as well. If it were a business that closes in the evenings, it would not be so bad, but that many people and vehicles in that small area, I tend to believe the noise level will be a lot higher.

There are other concerns as well, but this touches on the major ones and I hope you consider a downsizing approach when considering this development. Our small little area over here cannot handle this big of a project.

Concerned Citizen,

Lynette Brickell

---

Good Evening,

We received a notice on our door recently in regards to the West Glenwood Pasture Development proposal and we would like to ask one question please. Why are we eliminating green space when there is a mall right in front of this open space that could be converted into apartments and already has a parking lot? According to the Post Independent article from January 9, 2020, over a dozen tenants have abandoned the mall since 2015, leaving the majority of the shopping center's once lively storefronts dark. As of 2018, the mall contributed only a small portion, 3.7%, to sales taxes.

We appreciate your time listening to our concerns and hope to come to a better solution than eliminating green space.

**From:** Valorie Guanella Erion <mverion@sopris.net>  
**Sent:** Thursday, September 10, 2020 11:53 AM  
**To:** Gretchen E Ricehill  
**Subject:** Proposed Development by R2 Partnership

Dear Ms. Ricehill:

I am not a resident of Glenwood Springs, rather a resident of Garfield County. However, my husband works in Glenwood and has been very impacted during his commute due to the wildfires, as nearly all down valley commuters have been. I am in Glenwood several days a week shopping and running errands. It's not just an inconvenience to be caught in the gridlock, it's dangerous during a fire. This development is just a very bad idea. Open space is in short supply in our area and there won't be any more coming in the future, please preserve what little slice we have left. I share the validity of the points outlined below. Please reject the application to annex this property.

I am writing to express my opposition to the development of the 12.5-acre property at 214 Center Drive currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley, in general, may have a housing need, but to bring in 418 units, 1300 tenants with 650 parking spaces to such a rural neighborhood is a concern for me on many levels.

### **1. Safety**

I'm confident that the recent wildfires in South Canyon and Glenwood Canyon have demonstrated the need for wise decisions to be made as you plan a strong and safe community for all residents of Glenwood Springs. Shortly after the South Canyon wildfire, the residents of West Glenwood saw firsthand how quickly gridlock occurred, leaving almost every road impassable until late into the evening.

To add another 1,300 residents to the current 3,100 residents of West Glenwood would be utterly catastrophic. Not only do all of these residents need to evacuate safely, but there are elderly and disabled residents who may need assistance, families with young children, as well as two schools and many daycare facilities. We are not talking IF a wildfire will happen again in Glenwood Springs but WHEN.

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." West Glenwood has many roads leading to **A SINGLE ROAD - Highway 6**. Highway 6 cannot allow for the safe evacuation of all the residents of West Glenwood as it stands today. Depending on the location of the fire, emergency vehicles may block off one or more roads to enable access to a fire or flood area, which would further restrict evacuation efforts.

### **2. Impact on Traffic**

The addition of another 1,000 vehicles to our streets will create a traffic nightmare of overwhelming proportions and will turn West Glenwood into a parking lot. COVID has dramatically reduced traffic, and any traffic study done during these "safer at home" months will not reflect the reality of this area. We urge you to consider this at the Pre-Annexation meeting when it comes to your department.

### **3. Proximity to Two Rivers School**

Currently, the developers plan to have an exit immediately opposite the school. Even if they move the street to somewhere else on Storm King, congestion and safety concerns for our young children, their parents, and our teachers are inevitable.

### **4. Green Space**

Glenwood residents value the beauty of the land and recognize the importance of green space; we will be losing yet another precious piece of land for our environment and wildlife. This pasture also affords West Glenwood with a good measure of protection against the spread of wildfires. Bike paths exist around town coming almost

to this piece of property for both tourists and residents to recreate and enjoy this valley. Many tourists bike past the pasture to visit the area's Fish Hatcheries.

I urge you in the City Planning Office to protect its current population, preserve the small amount of open space that west Glenwood currently has, and help keep its residents safe by rejecting the application to annex this property.

---

Dear City Council, Officials, Mayor, and Fire Marshall,

Community. What does that word mean to you? Is it thought of as individuals sharing common interests and goals, or simply people living in the same place? No matter the answer, those who have called Glenwood Springs their home for years, decades or a lifetime deserve to be heard, and listened to.

The 111 Fire on Aug. 5 posed many challenges for local citizens, along with those passing through. I reside on Mel Rey Road, off the roundabout. The traffic that flooded Mel Rey wrapped around to Donegan, down Storm King, up Mitchell Creek, and back to Highway 6 leaving us residents out here feeling trapped. What would we have done should we have needed to evacuate?

On July 2nd a couple neighbors and I got together to create a Facebook group to share information about a 418 unit apartment complex being proposed in West Glenwood by a developer out of Cincinnati, OH. (To learn more find us at <https://www.facebook.com/groups/203281687630716> ) To the county and city officials who've met with the developer privately, did the thought of natural catastrophes cross your mind when you recommended more units than the amount originally proposed?

In my research for this Facebook page I found a Community Wildfire Protection Plan dated April 2007. Despite it being an older document, the content is valuable to all in this moment. Figure 2 has much of West Glenwood at a Hazard Rating of Very High to Extreme. On page 29, a high priority recommendation was made to educate citizens on proper escape routes. Was this ever enacted?

Vulnerable communities should look to examples like the socio-ecological mitigation approach Montecito County used to successfully fight the Thomas Fire. As a 38 year old Glenwood Springs native, I plan to live out my days here. But what I hope for are leaders that value common interests and goals and that work hard to achieve them — representatives that seek smart growth solutions that encapsulate a true sense of community.

Lacy King  
Glenwood Springs

P.S. I wrote this Letter to the Editor the day before the Grizzly Creek Fire was started. My feelings are even more heightened now. As a GWS native, the daughter of one of the CDOT engineers on the Glenwood Canyon project, and someone who loves this place we call home, I am begging you to hear the pleas of your constituents. Please deny R2 Partnerships proposal until accurate studies can be obtained and safety measures are in place. This is the time to rebuild our community, not divide it. The future is in your hands.

**Subject:** Proposed West Glenwood by R2 Partnership

Dear City of Glenwood and Glenwood Springs Fire Marshall:

I am reaching out to you to express my opposition to any further development in Glenwood Springs until you have actually done your homework. It appears that you lack any concept of growth and how to do so safely. As a city, you seem to allow as many occupants as possible in a dwelling without regard to first responders need to access the property in the event of an emergency (Minter Avenue). The city also does not seem to wish to enforce occupancy codes or care. All you are doing is putting lives in danger not to mention the stretch on the existing sewer and water systems.

It is with this thought that I am writing to express my dismay at what could turn into a 400 unit disaster in west Glenwood. (Especially since Stepp wants the former mall parking lot to house the homeless). Clearly, safety has not been considered. The round-about is a disaster and cannot manage more traffic. Second, where is this projected growth coming from? Are your numbers current? (The Greater Roaring Fork Regional Housing Study was released in April of 2019 based upon 2017 numbers – what has changed in 2020?) Where are the jobs to support the rents? Are ALL current rental units rented? How will you monitor occupancy?

The bottom line is that projected growth is of the 65 and older demographic – hardly apartment dwellers. Glenwood Springs growth has been less than 1% since 2018 so how do you justify this apartment complex and that apartment complex? You will create a community of empty apartments – is that Glenwood Springs?

I think greed is the underlying component here as well as a liberal thought process. I would love to live on Park Avenue in New York! Do I? No – I cannot afford it. Why does this town have to bend to cater to those that cannot afford to live here? Your apartments will not solve problems of a housing shortage. You will only create over-occupancy and unsafe living conditions endangering lives of the occupants and first responders. Not to mention the creation of many empty units because rents are just too high vs wages.

If you want to address any issue, come with a SOLID plan based on upon real numbers and not numbers that you “desire” to see.

**Subject:** Apartment Development

Dear All:

I hope that saw in today's paper that SkiCo is laying off 50 employees. It may not seem like many but how many of those employees were candidates for Glenwood's apartments? Did you read that SkiCo is not projecting a wonderful winter? Which means services associated with tourism will decline (which means jobs, wages, taxes etc.) Again, are these your tenants?

I do not think we have truly seen the fall-out from Covid. Even SkiCo is seeing it. Why do you think Glenwood is immune? Yes Aspen does have some growth but it is with the WEALTHY home buyers and clearly they will never be renting apartments in Glenwood. Maybe you think all those homeowners need babysitters and housekeepers? Should Glenwood's future be built on the backs of hourly employees? If you do, there is no future for this town.

I urge CAUTIOUS evaluation on ALL proposed mass housing projects. The numbers you are using are flawed and do not reflect our new landscape. THINK ABOUT what is truly needed and the goal of our community. Why is housing our problem? Engage Aspen, Basalt, El Jebel, Willetts, Carbondale and Eagle in this discussion. You are operating in a bubble that just might burst.

Thank you.

Ty Sparks

Dear Gretchen,

My name is Lisa. I have lived on Chaparral Circle for 53 years. There are a few of us true locals that still live out here in what we feel is our slice of heaven. Slowly the city of Glenwood Spring has slithered their way out here. Most of us out here have enjoyed being in the county. As a child I spend many hours in the pasture exploring and learning about nature from Adolf Diemoz the original owner of the pasture. There are many reasons I am against this development. First problem, fire evacuation, has been brought front and center with the recent fire in south canyon. I called dispatch and requested that the roads to west Glenwood be closed to commuter traffic. That request fell on deaf ears. Our streets were bumper to bumper with cars. If we had been ordered to evacuate we could not even get out of our driveways. This new development would be adding approximately 800-1000 cars to our neighborhood. Traffic, what can I say about the hell that the roundabouts are in the morning and evenings. These new residents won't be getting on I-70 to head to work. They will be going right onto Hwy 82 causing even more problems for Glenwood Springs. Density of the project is another huge issue. We are a single family home neighborhood. The developer mentioned in a recent meeting that his original plan was 350 units and someone with the city told him that he could do 418. Who would do this to us? The Six Canyon monstrosity is a quarter of the size of this new planned development and it isn't even full of residents. The height of this development is of concern also. I know that the city of Glenwood allows four stories. I ask you to stand on Donegan and envision what the current residents will be looking at. Definitely not the beautiful scenery that they have had the pleasure of enjoying all these years. The city also only requires 1.5 parking places per unit. This is ridiculous. Where do you think all the excess cars are going to park? Glenwood already has a HUGE parking problem. The overflow parking on Center Drive is already outrageous! The developer says he has many studies to do. I don't believe that the studies will be accurate with Covid going on. Kids aren't in school so there are no parents driving them out here. Many people are still required to work from home. I know that many people want the pasture to stay open space. I realize that that is nothing but a dream. I just hope that we the residents in of west Glenwood have a say in what happens. Thank you for listening and hoping that we can have face to face meeting regarding this project.

**Subject:** Proposed West Glenwood Pasture Development  
**Date:** Thursday, September 17, 2020 9:47:20 PM

---

Dear City of Glenwood Springs Planning Office,

I am writing to you to let you know my concern over the Proposed West Glenwood Pasture Development. I live in West Glenwood at 580 Mel Ray Road.

The reason why I am concerned so much is for the amount of traffic in the 2 roundabouts in West Glenwood. The roundabout by the West Glenwood mall, Highway 6 and Mel Ray are extremely busy. At rush hour between 4-6:00pm it is particularly hard to enter the roundabout because there is so much traffic. Sometimes I have to "gun it" just to get in after waiting for several minutes. With a possible 1300 more people in West Glenwood using the same roundabout it will be next to impossible to enter it safely. I am wondering if the city has done a traffic count at this roundabout.

Another reason I am concerned is for evacuation purposes. During the 111 fire that happened in August I-70 westbound was closed. Traffic was backed up and stopped on I-70, Highway 6, Donegan, Midland, Devereaux and Wulfsohn Road for hours even after I-70 reopened. During this time I had to pick up my son from work on Devereaux Road. I needed to cross both roundabouts to go from Mel Ray to Devereaux and back again. There was no traffic control to go north/south. Police were not controlling the backed up east/west traffic. The roundabout were at a gridlock and stopped with traffic. It took about an hour to pick him up when typically it would take 10 minutes round trip. What if we truly needed to evacuate? Then you add 1300 more people with a possible 650 more cars. That is scary.

In conclusion, I am against the West Glenwood Pasture Development because of the extra traffic it will bring. It will be extremely hard to enter the roundabouts in West Glenwood with the additional people and cars. If we needed to evacuate it would be next to impossible.

Sincerely,  
Stephanie Lemkau

---

I am writing in regard to the West Glenwood Pasture Development.

Safety is my number one concern. This proposed project lands right between two schools. This stretch of Donegan, between Two Rivers Community School and Glenwood Springs Middle School, is already scary enough to be a pedestrian on. During the bridge closure, I biked this stretch to and from work on a daily basis. Just a single car coming down this part of Donegan can force pedestrians/bicyclist off the paved road, as there are not bike lanes or sidewalks, like there are on the more eastern part of Donegan. Adding more traffic to this section of Glenwood could potentially be dangerous, especially when you consider school traffic. If we are being honest, Storm King isn't a breeze either. With the TRCS buses that are parked in the street, most hours of the day, this is a tight stretch of road, as well. Putting so many housing units right on the corner of the worst part of Donegan and Storm King seems to be very irresponsible.

Secondly, our roundabouts are already overwhelmed. We have so much traffic funneling from up and down the valley. People are only getting more and more selfish and impatient, driving recklessly to get to their destination. Living in West Glenwood, I use the roundabout multiple times a day. Multiple times a week I am cut off from drivers that are in the "I-70 only" lane. Sometimes you can tell they are just new to the area, or just unaware, and did not notice the **3 signs** that indicate what lane they are in. However, most of the time when you get cut off, it's from someone that just wants to bypass the line of cars that are waiting their turn to get into the roundabout. I truly feel adding more cars to this dynamic is only creating a more dangerous, daily situation.

What may be more frightening, is knowing that many impatient drivers will want to bypass the roundabout all together. This would only add that much more traffic to this stretch of Donegan. People looking for the quickest route, and overwhelming the pedestrians on this less than accommodating section of Donegan. Impatient and distracted drivers could be a very serious addition to our narrow, pedestrian filled West Glenwood.

Lastly, I'm sure you've heard plenty about the concerns on if or when West Glenwood would need to evacuate. Each time South Canyon shuts down, this part of the town (along with Blake Avenue) becomes a parking lot, with every selfish person looking to "get ahead," only to add to the congestion. The day to day safety, especially so close to schools, is higher on my list.

We need some one to say enough is enough in Glenwood. We have added two very large housing additions to Glenwood the past few years. Why do we need more tiny and unaffordable units? We have way too much traffic funneling through our tiny, narrow valley on a daily basis. Our current infrastructure can barely support the traffic between tourists and locals just trying to get to their up valley jobs. It takes very little to shut down our town, so adding more housing in a tight spot of Glenwood does not add up. Watching these housing units go up only makes it harder and harder to love the feeling of this small western slope town.

I just think the safety risk is much too high for our small community and would like these matters to be taken into full consideration when the final decision is made.

Thank you for your time,

Jacque McMillan  
West Glenwood Springs Resident

**ORDINANCE NO. 08**

Series of 2021

**AN ORDINANCE OF THE CITY OF GLENWOOD SPRINGS,  
COLORADO, ANNEXING \_\_\_\_\_ PROPERTY TO THE  
CITY.**

**WHEREAS**, the City of Glenwood Springs (“Glenwood Springs” or the “City”) is a home-rule municipality organized pursuant to Article XX of the Colorado Constitution and with the authority of the Glenwood Springs Home Rule Charter; and

**WHEREAS**, GLENWOOD PARTNERSHIP LLLP, a Colorado limited liability limited partnership (“Owner”) is the owner of certain real property currently located in unincorporated Garfield County, Colorado, more particularly described on **Exhibit A** attached hereto and incorporated herein (the “Property”); and

**WHEREAS**, COMMERCIAL DEVELOPMENT SERVICES GROUP, LLC, a Delaware limited liability company (“CDSG”) is under contract to purchase a portion of the Property and develop that portion as mixed-use, multi-family housing development; and

**WHEREAS**, C.R.S. §§31-12-101, *et seq.*, authorizes the City and Owner to enter into an Annexation Agreement; and

**WHEREAS**, the portion of the Property to be retained by Owner is currently developed for office and warehouse purposes; and

**WHEREAS**, Owner desires to annex the Property and connect it to the City of Glenwood Springs and has filed a Petition for Annexation (“Petition”) to do the same; and

**WHEREAS**, the City desires to annex into its boundaries a the Property currently located in unincorporated Garfield County (the “Annexation Parcel”, as described on **Exhibit A**); and

**WHEREAS**, the Annexation Parcel is not solely a public street or right-of-way, and is eligible for annexation in accordance with Article II, Section 30 of the Colorado Constitution, and sections 31-12-104 and 31-12-105, C.R.S.; and

**WHEREAS**, the Glenwood Springs City Council finds that it is necessary and desirable to annex the Annexation Parcel into the City to permit the development of the area in accordance with the City Code; and

**WHEREAS**, the City Council therefore desires to annex the Annexation Parcel into the City by the ordinance, in accordance with C.R.S. §§ 31-12-106 and 31-12-501.

**NOW, THEREFORE, IT IS ORDAINED BY THE CITY COUNCIL OF THE CITY OF GLENWOOD SPRINGS, COLORADO, THAT:**

**Section 1.** The recitals above are hereby adopted as findings.

**Section 2.** The City Council find and determines that the Annexation Parcel is eligible for annexation in accordance with Section 30(1)(c) of Article II of the Colorado Constitution and C.R.S. §§ 31-12-104(1)(a), 31-12-105, and 31-12-106(3), in that the proposed annexation:

- (a) Would not divide any lands held in identical ownership;
- (b) Is less than twenty acres and, as such, does not implicate C.R.S. § 31-12-105(1)(b);
- (c) Is for territory for which no annexation proceedings have been commenced for annexation into another municipality;
- (d) Would not result in the detachment of area from any school district and the attachment of the same to another school district;
- (e) Would not result in the extension of the City's geographic boundary more than three miles in any direction from any point of the current boundary; and
- (f) Is property for which not less than one-sixth the perimeter is contiguous with the current City boundary.

**Section 3.** The City Council does hereby annex the Annexation Parcel to be included in the corporate boundaries of the City of Glenwood Springs.

**Section 5.** The City Clerk shall promptly complete all filings required of the City to be made by the provisions of Section 31-12-113, C.R.S.

NOTES

- 1) Date of Survey: October 7-28, December 15-18, 2020 & January 5, 8, 14, 2021
- 2) Date of Preparation: October - December 2020 & January 2021.
- 3) Basis of Bearing: A bearing of N 89 49'59" E along the south east section line of Section 34, established by the found monuments.
- 4) This survey does not constitute a title search by Sopris Engineering, LLC (SE) to determine ownership or easements of record. For all information regarding easements, rights of way and/or title of record, SE relied upon the Title Report prepared by Land Title Guarantee Company, Order No. AB563014094-2, Effective Date, January 10, 2020 and documents and plats of record as shown in the Source Documents, herein.
- 5) Basis of elevation: Project based on Global Position System (GPS) observations from the Continuous Operating Reference Station (CORS) GSC1 utilizing the Continental United States 2012 geoid model (GEOID 12A) CONUS and based the 1988 North American Vertical Datum (NAVD88) and a vertical shift of -4.22 feet as calculated by the North American Vertical Datum Conversion (VERTCON) an online service provided by a subsidiary of the National Oceanic Atmospheric Administration (NOAA). Which established all elevations shown heron. Placement benchmarks to be set as requested.
- 6) The linear unit used in the preparation of this plat is the U.S. survey foot as defined by the United States Department of Commerce, National Institute of Standards and Technology.

## CITY COUNCIL STRATEGIC GOALS

- 1. Provide Efficient and Responsive City Government**
- 2. Preserve and Improve Infrastructure**
- 3. Protect and Preserve Our Quality of Life**
- 4. Generate Sustainable Economic Development**
- 5. Ensure Public Safety**

74

74

## 2022 BUDGET OVERVIEW

- **Balanced General Fund**
- **Projected sales tax revenues**
  - \$21.5 million across all funds
  - Equal to the revised 2021 forecast
  - Up 12.5% vs. 2019
  - Up 17.9% over 2020
- **No COLA raises because salary survey adjustments were implemented early**
- **No increase in health insurance premiums from 2021 rates**

75

75

## 2022 BUDGET OVERVIEW

- **Available Reserves:**
  - \$8.4 Million General Fund (39.0%)
  - \$2.6 Million Capital Projects
  - \$3.3 Million A&I
- **Additional FTEs:**
  - Lead Lifeguards (2)
  - Parks Employees (2)
  - Construction Inspector
  - Neighborhood Services Specialist
- **2022 Budget Meets all FAB Recommendations**

76

76

## 2022 MAJOR INITIATIVES

### 1. Provide Efficient and Responsive City Government

- Investment in staff retention with salary study implementation
- Professional Development reinstated in department budgets
- \$315,000 ERP Implementation Phase 3 - Utility Billing
- \$332,500 Server/ Switch Upgrades and PC replacement cycle
- Improvements to Streets and SWAT facilities and equipment

77

77

## 2022 MAJOR INITIATIVES

### 2. Preserve and Improve Infrastructure

- \$6,945,233 in Street Improvements, Including:
  - 6<sup>th</sup> Street
  - South Midland
  - 27<sup>th</sup> St and Grand Ave Underpasses in Partnership with RFTA
  - Red Mountain South
  - Devereux Bridge Deck Repairs
  - Blake Avenue – 23<sup>rd</sup> to 26<sup>th</sup>

*\*(Does not include any South Bridge spending...but we might)*

78

78

## 2022 MAJOR INITIATIVES

### • 2. Preserve and Improve Infrastructure, (cont.)

- \$2,206,047 in Trail Improvements
  - Devereux Trail Extension (with Iron Mtn and CDOT Funding)
  - 6th Street Bike Path Rebuild
  - LoVa Trail (Grant Funded)
  - Retaining Wall on Rio Grande (Reimbursed by RFTA)

79

79

## 2022 MAJOR INITIATIVES

### 2. Preserve and Improve Infrastructure (cont.)

- \$6,285,000 in Improvements to our Electric System
  - EOC
  - Cardnell Substation
  - Mitchell Creek Reclosers
- \$850,000 in Broadband Investment
  - Bucket Truck
  - Construction Contract
  - Network Equipment

80

80

## 2022 MAJOR INITIATIVES

### 2. Preserve and Improve Infrastructure (cont.)

- \$5,007,000 in Water System Improvements
  - North Glenwood System
  - Fluoride System Upgrade
  - Red Mountain South Phase 2
  - Roaring Fork Pump Station
  - Water Treatment Plant Filter Insulation
- \$975,000 in Wastewater System Improvements
  - Lift Station 11,000
  - WW Plant 10-year Maintenance Program
  - Pipe Lining and Manhole Rehabilitation

81

81

## 2022 MAJOR INITIATIVES

### 3. Protect and Preserve Our Quality of Life

- Tennis Court Resurfacing
- Improvements at 3 Mile, Axtel and Two Rivers Parks
- Arts Center and Community Center Improvements
- 9<sup>th</sup> Street Parking Garage Repairs
- Comprehensive Plan
- Contribution to Detox Facility

82

82

## 2022 MAJOR INITIATIVES

### 4. Generate Sustainable Economic Development

- USDA Microloan Program
- Collaboration with DDA and Chamber on Retail Gaps
- Broadband Service Expansion
- URA
- RFQ for Affordable Housing and Ad-hoc Housing Committee
- 6th and Laurel Improvements

83

83

## 2022 MAJOR INITIATIVES

### 5. Ensure Public Safety

- I-70 Access Line Breaks (3)
- Replacement Fire Engine
- Improvements to Fire Stations
- Increased Reserve for West Glenwood Station Replacement
- Police K-9
- Firearms, Safety, and Training Equipment
- 3 Replacement Police Cruisers
- Ongoing Downtown Security

84

84

## 2022 BUDGET SCHEDULE

- Public Hearing October 21<sup>st</sup>
- Council Adoption Vote November 4<sup>th</sup>
- Appropriation Vote December 2<sup>nd</sup>

85

85

# THE END

86

86

**City Council**  
**STAFF REPORT**  
**City of Glenwood Springs**  
**October 7, 2021**

**Agenda Item:** Airport Capital Needs and Funding

**Action Requested:** Direction on Funding Airport communication system and Jet-A fuel tank.

**Department:** City Administration

**Presented By:** Debra Figueroa, City Manager

**Background Info:** The airport needs two capital improvements that are high priority;

**(1) UNICOM communications system (\$100,000)**

A UNICOM (Universal Communications) station or an aeronautical advisory station, is an air-ground communication facility operated by a non-air traffic control airports to provide advisory services to pilots such as weather conditions and runway conditions. The UNICOM also provides NOTAMs (Notices to Airmen) advising pilots of safety conditions that may affect their ability to land, maintenance or other work on or adjacent to the runway, airport closures, and service closures.

The Glenwood Springs Municipal Airport's UNICOM has needed replacement for several years and finally died a few weeks ago. Because the Municipal Airport is not FAA regulated and classified as a "small airport" staff are able to continue operations by issuing NOTAMs by handheld radio until a replacement UNICOM can be installed.

Quote from Potomac is \$97,949 for the system. Installation and electrical hookup will bring the total to just under \$100,000. Lead time for delivery is about 2 weeks and installation will take one day.

**(2) the Jet-A fuel tank (300,000)**

The fuel delivery system is insufficient for its purpose and does not meet code requirements. It needs to be moved and upgraded. If Council wants to fund these improvements staff is suggesting the \$200,000 shortfall be loaned to the Airport Enterprise Fund from the Capital Projects Fund and paid back in full before year-end 2023.

**Issues:** Replacement of the UNICOM was presented in the 2022 budget packet. However, the failure of the current system necessitates replacement as soon as possible. Manual NOTAMs by handheld is a temporary fix until a new system can be installed.

The cash fund balance in the Airport Fund is currently \$196,000.

**Staff Recommendation:** Staff recommends replacing the replacing the Unicom Communications System in 2021 and bringing the Jet Fuel system up to code in 2022.

**City Council**  
**STAFF REPORT**  
**City of Glenwood Springs**  
**October 7, 2021**

**Agenda Item:** Resolution 2021-25 - A Resolution Approving the Glenwood Springs Public Art Master Plan

**Action Requested:** Approval of Resolution 2021-25 approving the Glenwood Springs Public Art Master Plan

**Department:** Parks & Recreation

**Presented By:** Brian Smith, Recreation Director

**Background Info:** During the process to create the "Tubing the Colorado" sculpture in 2018-2019, the Arts and Culture Board identified the need for a comprehensive approach to public art, including the process to put out calls for art/artists.

In November 2019, the City of Glenwood Springs selected Ohio-based Designing Local to develop a comprehensive Public Art Plan to develop policies and procedures for acquiring, commissioning and placing new art.

During the public engagement process, community stakeholders were contacted to share their vision for public art in Glenwood Springs and a Designing Local representative toured our city to get a firsthand glimpse of our public art and feel for the culture of Glenwood Springs. Input to the public art plan during the past year also took place via additional stakeholder interviews and online surveys.

The resulting plan addresses preservation and restoration of the city's existing public artwork portfolio, assessment of the public art collection for gaps and opportunities, a process for decommissioning art, and ideas for additional public art initiatives. The Public Art Program as envisioned would be funded by a percentage of project costs for private development and a percent of the costs of publicly funded Capital Improvement Projects.

Following the adoption of this resolution, staff will bring code changes through the process for the implementation of the plan separately. Most of the changes would be proposed to be contained within Title 090 Public Lands. Because there is a component of the recommendations to include an exaction on developers, the code changes in Title 070 would be reviewed by Planning Commission before the Ordinance would come to City Council. The first review of the ordinance at Planning and Zoning Commission would be in October.

The Art Plan anticipates that the City Council will annually set aside one percent of publicly funded capital improvement projects, including roads, streetscape projects, fire and police stations, parks, city facilities and utility projects, when there are visual elements of the project above ground, for public art. All capital construction projects would qualify except for regular road maintenance, underground infrastructure, and underground utility projects with no above-ground components, and the South Bridge project.

Private developers subject to the Common Open Space requirements would also be required to provide public art on site or pay a fee in lieu. On site art would be valued in an amount not less than 1 percent of the total construction costs and the cash in lieu would be a contribution of 80 percent of that 1 percent. Artwork must be located in an exterior place defined as any place, public or private, outdoor and exterior to buildings or structures and exposed to public view, including, but not limited to, buildings, and green spaces.

Construction cost would mean actual cost of any construction project with an estimated construction cost of fifty thousand dollars or more, excluding, however, engineering and administrative costs, costs of fees and permits and indirect costs, such as interest during construction, advertising and legal fees.

**Issues:** NA

**Staff Recommendation:** Adoption of Resolution 2021-25.

**RESOLUTION 2021-25**

**A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF  
GLENWOOD SPRINGS, COLORADO, APPROVING THE  
GLENWOOD SPRINGS PUBLIC ART MASTER PLAN.**

**WHEREAS**, the City of Glenwood Springs (“Glenwood Springs” or the “City”) is a home-rule municipality organized under Article XX of the Colorado Constitution and with the authority of the Glenwood Springs Home Rule Charter; and

**WHEREAS**, in 2019 the City selected Ohio-based Designing Local to develop a comprehensive Public Art Plan for Glenwood Springs; and

**WHEREAS**, the goals of the planning effort to shape policies for acquiring, commission and placing new art in the community; and

**WHEREAS**, the public was invited to provide feedback to the development of a Public Art Plan;

**WHEREAS**, the Glenwood Springs Public Art Master Plan 2021 is attached as **Exhibit A** (the “Public Art Master Plan”); and

**WHEREAS**, the Glenwood Springs City Council finds and believes it is in the interest of the City to adopt the Public Art Master Plan attached as **Exhibit A**; and

**WHEREAS**, the Public Art Master Plan will be on file with the Parks and Recreation Department.

**NOW, THEREFORE, IT IS RESOLVED BY THE CITY COUNCIL OF THE CITY OF  
GLENWOOD SPRINGS, COLORADO, THAT:**

**Section 1.** The above recitals are hereby incorporated as findings by the City Council of the City of Glenwood Springs.

**Section 2.** The City Council of the City of Glenwood Springs hereby adopts the Public Art Master Plan attached as **Exhibit A**.

## DRAFT RESOLUTION 2021-XX

**A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF GLENWOOD SPRINGS, COLORADO, APPROVING THE GLENWOOD SPRINGS PUBLIC ART MASTER PLAN.**

**WHEREAS**, the City of Glenwood Springs (“Glenwood Springs” or the “City”) is a home-rule municipality organized under Article XX of the Colorado Constitution and with the authority of the Glenwood Springs Home Rule Charter; and

**WHEREAS**, in 2019 the City selected Ohio-based Designing Local to develop a comprehensive Public Art Plan for Glenwood Springs; and

**WHEREAS**, the goals of the planning effort to shape policies for acquiring, commission and placing new art in the community; and

**WHEREAS**, the public was invited to provide feedback to the development of a Public Art Plan;

**WHEREAS**, the Glenwood Springs Public Art Master Plan 2021 is attached as Exhibit A (the “Public Art Master Plan”); and

**WHEREAS**, the Glenwood Springs City Council finds and believes it is in the interest of the City to adopt the Public Art Master Plan attached as Exhibit A; and

**WHEREAS**, the Public Art Master Plan will be on file with the Parks and Recreation Department; and

**NOW, THEREFORE, IT IS RESOLVED BY THE CITY COUNCIL OF THE CITY OF GLENWOOD SPRINGS, COLORADO, THAT:**

**Section 1.** The above recitals are hereby incorporated as findings by the City Council of the City of Glenwood Springs.

**Section 2.** The City Council of the City of Glenwood Springs hereby adopts the Public Art Master Plan attached as **Exhibit A**.

INTRODUCED, READ AND PASSED THIS 7TH DAY OF OCTOBER 2021.

## DRAFT PUBLIC ART ORDINANCE

### 090.080 – PUBLIC ART PROGRAM

#### 090.080.010 – Definitions.

- a. “Arts and Culture Board” means the board as stated in 020.020
- b. “Art or artwork” means works in any permanent medium or combination of media produced by a professional practitioner in the arts. For the purposes of this chapter, the terms art and artwork do not include performing or literary arts such as dance, music, drama, or poetry.
- c. “Artist” means a practitioner of the creative arts, generally recognized as such by critics and peers, with a body of work including commissions, exhibitions, sales, publications, and collections. For the purposes of this document, “artist” shall not include persons primarily working in the professional fields of architecture, engineering, design, or landscaping.
- d. “Art Master Plan” means the Public Art Master Plan of the City of Glenwood Springs, Colorado, as it exists or may be amended. The Public Art Master Plan shall provide a process for the systematic selection of pieces of art and locations of art to be included in public spaces. The Public Art Master Plan shall be filed with the Parks and Recreation Department.
- e. “Construction cost” means actual cost of any construction project with an estimated construction cost of fifty thousand dollars or more, excluding, however, engineering and administrative costs, costs of fees and permits and indirect costs, such as interest during construction, advertising and legal fees.
- f. “Glenwood Springs Public Art Collection” means all works of art owned by the City of Glenwood Springs, Colorado.
- g. “Board” means the Glenwood Springs Arts and Culture Board of the City of Glenwood Springs, Colorado.
- h. “Board Member” means a member of the Glenwood Springs Arts and Culture Board.
- i. “City” means the City of Glenwood Springs, Colorado.
- j. “Deaccession” means a procedure for the withdrawal of an artwork from the Glenwood Springs Public Art Collection and the determination of its future disposition.
- k. “Public Art” means a work of art that is visible and accessible to the public for a minimum of 40 hours per week. Public art may include sculpture, painting, installations, photography, video, works of light or sound, or any other work or project determined by the Arts and Culture Board to satisfy the intent of this Chapter, provided, however, that none of the following shall be considered public art for the purposes of satisfying the requirements of this Chapter:
  - i. Objects that are mass produced of standard design, such as banners, signs, playground equipment, benches, statuary, street or sidewalk barriers, or fountains;
  - ii. Reproduction, by mechanical or other means, of original works of art, except as incorporated into film, video, photography, printmaking or other derivative works as approved by the Arts and Culture Board;

- iii. Decorative, architectural, or functional elements that are designed by the building architect or landscape architect as opposed to an artist commissioned for this purpose; or
- iv. Landscape architecture or gardening, except where these elements are designed by an artist and are an integral part of a work of art.
- l. "Public Art Acquisition Account" means a separate, special fund as part of the City's overall finances into which public art donations and funding are deposited, transferred and used for acquisition, commissioning, exhibition and conservation of public art as recommended by the Arts and Culture Board and approved by the City Council
- m. "Public Art Program" means the Public Art Program of the City of Glenwood Springs, Colorado established by this chapter.
- n. "Public Art Plan" means the annual work plan developed by the Arts and Culture Board with staff, detailing the public art projects and funding levels recommended for the upcoming year.
- o. "Public Space" means any area or property (public or private) which is accessible or visible to the general public a minimum of 8 hours per business day.
- p. "Publicly Owned Land" means any land open to the public and managed by the City of Glenwood Springs, Colorado.
- q. "Relocation" means a procedure for the movement of an artwork from one location to another.

#### 090.080.020 – Purpose

The purpose of this article is to set forth policies and procedures for acquiring, commissioning and placing new public art and the management, maintenance, preservation and restoration of historical artwork within the city's public art program.

#### 090.80.030 – The Glenwood Springs Public Art Program

- a. Public art may be acquired by the City and featured on publicly owned land for the visual enjoyment
  - b. of residents and visitors.
- The Glenwood Springs Public Art Program shall operate pursuant to the policies and procedures set forth in the Public Art Master Plan and adopted by resolution of the City Council.
- c. The Glenwood Springs Public Art Collection shall consist of artwork selected through an open, equitable, and competitive process.
  - d. The City Manager shall designate a City employee to serve as the Public Art Coordinator to oversee and administer the Public Art Program.

#### 090.080.040 – Funding.

- 1. The Public Art Program shall be funded by a percentage of project costs for private development and a percent of the costs of publicly funded Capital Improvement Projects.
- 2. The City Council will annually set aside one percent of publicly funded capital improvement projects, including roads, streetscape projects, fire and police stations, parks, city facilities and utility projects, when there are visual elements of the project above ground, for public art.
  - a. All capital construction projects qualify except the following
    - i. Regular road maintenance, underground infrastructure, and underground utility projects with no above-ground components.
    - The South Bridge project.

Projects subject to the Common Open Space requirements within Section 070.040.040 shall provide public art on site or pay a fee in lieu through one of the following means:

- a. On-site Artwork.
  - i. The developer of the property shall submit documentation evidencing the escrow of funds for a work of art valued in an amount not less than one (1) percent of the total construction costs.
  - ii. Submit an application for approval of the work of art.

- iii. The required amount may be discounted by 10 percent if a Garfield County based artist is used. The city will maintain a list of pre-qualified artists in order to assist developers in identifying artists.
  - iv. Artwork must be located in an exterior place defined as any place, public or private, outdoor and exterior to buildings or structures and exposed to public view, including, but not limited to, buildings, and green spaces.
- b. Cash in Lieu.
  - i. The developer may contribute an amount equal to 80 percent of the one (1) percent of the total construction costs for deposit to the Art in Public Places Fund.
- c. On-site Artwork and Cash in Lieu
  - i. In the event that the developer of the property opts to install on site artwork that is valued less than the 1 percent of the total construction costs, the developer shall submit documentation evidencing the escrow of funds for the value of the work of art, up to \$100,000.00, and contribute 80 percent of the balance of the one (1) percent of the total construction costs for deposit in the Art in Public Places Fund.
  - ii. Artwork must be located in an exterior place defined as any place, public or private, outdoor and exterior to buildings or structures and exposed to public view, including, but not limited to, buildings, and green spaces.
- d. Funding from the Percent for Art in Private Development and Percent for Art Capital Improvement Projects will be deposited into the Public Art Acquisition Account and will be used for acquisition, commissioning, exhibition and conservation of public art as recommended by the Arts and Culture Board and approved by the City Council. Fees in lieu paid into this fund may not be used for the general expenses of the City.
- e. Funds designated for public art may be used on artist fees, artwork fabrication and installation, acquisition or relocation of existing works of art, required permits and insurance during the fabrication and installation of artwork, informational and/or promotional materials and public events directly related to artwork, and curators and contracted services.

090.080.050: Acquisition and Deaccession

- a. Acquisition. The City may acquire artwork for the Glenwood Springs Public Art Collection by commission, purchase, donations, contributions or grants from private entities, other public agencies, or philanthropic sources and the Arts and Culture Board will make recommendations to
  - b. City Council pertaining to all acquisitions.
- Deaccession.
- 1. Except for situations requiring emergency removal, public art shall not be deaccessioned or removed without review and approval by the Arts and Culture Board.
  - 2. Upon consideration of deaccession or removal of public art, the Arts and Culture Board shall hold one or more public meetings to gather community feedback on the proposed deaccession or removal.

# 03.

## PUBLIC ART POLICY

### 1. Introduction

In order to establish a strong Public Art Program, the City of Glenwood Springs will adopt this overall policy which includes: Roles & Responsibilities; Work Plan; Use of Funds; Acquisition; Collection Management; Donation; and Maintenance.

#### DEFINITIONS

For the purposes of this policy, the following terms, phrases, words and their derivation shall have the meaning given herein:

**Artist** means a practitioner of the creative arts, generally recognized as such by critics and peers, with a body of work including commissions, exhibitions, sales, publications, and collections. For the purposes of this document, "artist" shall not include persons primarily working in the professional fields of architecture, engineering, design or landscaping.

**Public Art Master Plan or Plan** when used herein shall mean the Public Art Master Plan of the City of Glenwood Springs, Colorado, as it exists or may be amended. The Plan shall provide a process for the systematic selection of pieces of art and locations of art to be included in public spaces.

**Public Art Coordinator** when used herein shall mean the Public Art Program Coordinator as determined by the City of Glenwood Springs.

**Public Art Program** when used herein shall mean the Public Art Program of the City of Glenwood Springs, Colorado.

**City** when used herein shall mean the City of Glenwood Springs, Colorado.

**Public Art, Art or Artwork** when used herein shall mean public art, art, artwork or work of art means an original physical work created or produced by an Artist. Artwork may be free-standing or integrated with the work of other design professionals into a building or site. Artwork may be new or may be an existing work of art. Artwork may include, but is not limited to:

1. Sculpture: Free-standing, wall supported or suspended; kinetic, electronic; in any material or combination of materials.
2. Murals or portable paintings: in any material or variety of materials.
3. Fiber works, neon, glass, mosaics, photographs, prints, calligraphy, earthworks, any combination

of forms of media, including light, sound, literary elements, film, holographic images, and video systems; hybrids of any media and new genres.

4. Furnishings or fixtures, including, but not limited to gates, railings, lighting, street lights, signage, seating, if created by artists as unique elements or limited editions.
5. Artistic or aesthetic elements of the overall architecture or landscape design if created by a professional artist or a design team that includes a professional visual artist. Such design elements may include pools, paths, benches, planters, and fixtures and vegetative materials where designed by a professional visual artist and/or are an integral part of the artwork by the artist.
6. Temporary artwork or installation that serve the purpose of providing community and educational outreach.

The following are, per the Ordinance, not considered artwork for the purposes of Public Art funding:

1. Art objects which are mass produced or are of standard manufacture, such as playground equipment, fountains, statutory elements, signage, maps, corporate logos or other functional elements, unless incorporated into an artwork by an artist commissioned for that purpose.
2. Reproductions, by mechanical or other means, of original artwork, except in the case of limited editions controlled by the artist, cast sculpture, film, video, photography, printmaking, or other media arts.
3. Decorative, ornamental, architectural, or functional elements which are designed by the building architect as opposed to elements created by an artist commissioned for that purpose.
4. Services or utilities necessary to operate and maintain an artwork over time.

**Public Space** when used herein shall mean any area or property (public or private) which is accessible or visible to the general public a minimum of 8 hours per business day.

**Publicly Owned Land** when used herein shall mean any land open to the public and managed by the City of Glenwood Springs, Colorado.

**Glenwood Springs Public Art Collection** when used herein shall mean all works of art owned by the City of Glenwood Springs, Colorado.

## 2. Roles and Responsibilities

This section outlines the general roles and responsibilities of residents, City staff and elected officials in the development, funding and implementation of the City of Glenwood Springs's Public Art Program ("Public Art Program").

The Public Art Program will be led by the City of Glenwood Springs and administered through the Parks and Recreation Department in partnership with other departments and outside community groups. The Mayor and City Council will retain ultimate responsibility for the program. Day-to-day responsibility for the program will ultimately reside with the Parks and Recreation Director for the City with or whoever is designated by the City Manager to be the Public Art Coordinator. The Coordinator will be a city staff member and have an oversight role for all of the public art projects that are executed within the city. The Coordinator will collaborate with city staff or outside contractors in order to execute projects, particularly within the Recreation and Parks, Transportation, and Communications Departments.

### **Glenwood Springs City Council & Mayor**

The Glenwood Springs City Council has adopted an ordinance establishing the Glenwood Springs Public Art Program. As the community's elected officials, the Mayor and Council members are ultimately responsible for the outcomes of the Public Art Program.

The Glenwood Springs City Council has the following responsibilities:

- Review and approve the annual Public Art Work Plan as prepared by staff and approved by the Arts & Culture Board, including annual appropriations for public art.
- Confirm appointments to the Arts & Culture Board.
- Give final approval to public art selections, placement, and funding.

### **Arts & Culture Board**

The Glenwood Springs Arts & Culture Board (ACB) is committed to promoting awareness, access, and appreciation of the fine, performing, and practical arts for the City of Glenwood Springs. The ACB believes that a healthy arts and culture environment lends itself to a vibrant and forward-thinking community and enriches the local economy. As mortar binds building blocks, it is the ACB's mission to bring people together and encourage meaningful connection through the arts.

The commission consists of eight (8) members, at least five (5) of which are residents of the City, three (3) of which may reside outside of the City, and one (1) of which being a youth representative under the age of eighteen (18) or not having completed his or her final year of high school. Those representatives residing outside of the City must reside within the 81601 postal zip code area, own real property or a business within the City, or attend school within the City.

The Arts & Culture Board has the following responsibilities:

1. Act principally in an advisory capacity to Glenwood Springs staff and the Glenwood Springs City Council in any matter pertaining to public art.
2. Present an annual report of Board activities.
3. Advise and make recommendations to the City pertaining to, among other things, policies and procedures as identified in the Administrative Guide; artist selection juries and process; commission and placement of artworks; and maintenance and removal of artworks.

**Public Art Coordinator**

The City Manager will designate one Parks and Recreation staff member to oversee citywide public art activities and implement the Public Art Program. As the public art fund grows, the Public Art Coordinator will see an increase in the time and work needed to implement the Public Art Program. Additional staff resources or outside consultants may be required in order to assist in implementing projects, particularly those of larger scale. Responsibilities include:

1. Work with various departments to develop potential projects for inclusion in the annual work plan.
2. Coordination with other city planning efforts.
3. Present an annual work plan to City Council.
4. Coordinate with Arts & Culture Board to ascertain advice on any matter pertaining to public art including:
  - annual work plan
  - artist selection juries and process;
  - purchase of artworks;
  - commission and placement of artworks; and
  - public art programming;
5. Present an annual report of public art activities.
6. Coordinate the hiring of an outside consultant or agency to administer public art projects as needed.
7. Ensure various city departments are following the City's Public Art Policy.

**City Staff**

City staff members, particularly department heads, should look for opportunities to include public art in capital improvement projects (CIP) throughout the city, particularly in locations identified as priorities in this plan. Overall public art responsibilities include:

1. Explore opportunities to include public art in existing CIP projects.
2. Coordinate with the Public Art Coordinator for inclusion of projects within the annual work plan and report.

### **3. Work Plan**

#### **What is a Public Art Work Plan?**

The Public Art Work Plan is an annual document that outlines what projects will be initiated in the coming fiscal year, as well as projects that will be in process during that fiscal year. The work plan is one of the most crucial elements of the public art program as it creates a roadmap for the year and allows for the input of community members, elected officials, and others who care deeply about public art in Glenwood Springs.

The Public Art Coordinator will develop the Plan in consultation with staff, City Council and Mayor, and will submit it to the Mayor and City Council as part of the annual budget for its review and approval.

The following steps will be taken to develop the Public Art Work Plan:

1. Work with City Departments to determine availability of funds for the upcoming year.
2. Identify projects to be paid for by identified funding including acquisition and maintenance.
3. Develop a draft Public Art Work Plan that will include locations, goals, and budgets for public art projects and programs for staff review.
4. Present the Plan to City Council as part of the City budget approval.
5. Integrate feedback from City Council to determine the final Work Plan.

## 4. Use of Funds

Funding for the Glenwood Springs Public Art Program may come from Glenwood Springs' Capital Improvement Project Budget or through other sources as deemed appropriate by the City, as well as from grants and/or contributions from private entities, other public agencies, or philanthropic sources.

### Uses of Funds

The public art funds may be spent for:

- Calls for Entry, RFQ's/RFP's, concept designs, maquettes, juror stipends, and other costs related to competitions and commissions
- Artist fees including travel stipends and expenses related to travel;
- Artwork fabrication and installation;
- Acquisition of existing works of art;
- Relocation of existing or commissioned works of art;
- Required permits and insurance during the fabrication and installation of the artwork;
- Informational/promotional materials and public events directly related to the artwork;
- Artwork appraisal;
- Art related community events;
- Staffing and services of an Arts Administrator;
- Curators and contracted services.

The public art funds may not be spent for:

- Mass produced work, with the exception of limited editions controlled by the artist.
- Professional graphics, unless designed or executed by an artist or used in the development of collateral material.
- Decorative, ornamental or functional elements that are designed by a project's architect or other designer.
- Routine maintenance exceeding more than 10% of the annual budget.
- Purchase of existing works of art outside of the selection process.

## 5. Acquisition

This policy establishes the practices for acquiring artworks. The policy creates a thorough and transparent process for acquiring artwork and favors open ended selection processes in order to ensure artistic excellence in the City's Public Art Collection.

### **Process for Selecting an Artist or Artist Team**

Selecting the artist is one of the most important steps in commissioning public art. An open, equitable, competitive process that inspires the artist and engages the community can be an enriching experience and lead to more creative and exciting public art.

#### **Goals of the Selection Process**

- To satisfy the goals of the project site through an appropriate artist selection.
- To further the mission and goals of the Public Art Program.
- To select an artist or artists whose existing public artworks or past collaborative design efforts have demonstrated a level of quality and integrity.
- To identify an approach to public art that is suitable to the goals and demands of the particular project.
- To select an artist or artists who will best respond to the distinctive characteristics of the site and the community it serves.
- To select an artist or artists who can work successfully as members of an overall project design team.
- To ensure that the selection process represents and considers the interests of all parties concerned, including the public.
- To ensure, on average, the demographics of the artists and selection committees are reflective of Glenwood Springs' population.

### **Artist Selection Methods for Commissioning New Artwork**

#### **Open Competition**

In an Open Competition, any artist may submit their qualifications or proposal, subject to any requirements established by the Artist Selection Committee. The Requests for Qualifications (RFQs) or Requests for Proposals (RFPs) should be sufficiently detailed to permit artists to determine whether their art is appropriate for consideration. Open Competition allows for the broadest range of possibilities for a site and brings in new, otherwise unknown, and emerging artists.

#### **Limited or Invitational Competition**

In a Limited Competition, or Invitational, several pre-selected artists are invited by the Artist Selection Committee to submit their qualifications and/or proposals. This method may be appropriate when the City is looking for a small group of experienced artists, when there is a limited time frame, or if the project requirements are so specialized that only a limited number of already identified artists would be eligible. It is possible that this list of artists would come from a pre-qualified list.

#### **Direct Selection**

On occasion, artists may be chosen directly by the Artist Selection Committee. Direct selection may be useful on projects where an urgent timeline, low budget, or where very specific project requirements exist. It is possible that this artist would come from a pre-qualified list. Approval of the City Council and the City Manager must be secured to utilize this selection method.

### **Direct Purchase**

Some projects require the purchase of a specific artwork due to the exacting nature of the project or a very limited project timeline. In this case, the work must be “one-of-a-kind” and not mass-produced or off the shelf. It is possible that this artwork would come from an artist on a pre-qualified list. Approval of City Council and the City Manager must be secured to utilize this selection method.

### **Pre-Qualified Artist Lists**

The City may decide to develop a pre-qualified pool of artists from which it can choose artists for Limited Competition, Direct Selection and Direct Purchase. This pool would be developed based on a comprehensive review of artist qualifications. This list could be updated annually or bi-annually, depending on the frequency of new projects.

## **Artist Selection Methods for Commissioning Existing Artwork**

### **Competitions**

In competitions, the City may put out an open call to artists for a possible inclusion in an exhibition at a predetermined site. The competition, which may or may not take the form of a temporary exhibit may feature existing artworks. Each selected artist may receive a stipend and understand the City may purchase one or more pieces of artwork at the conclusion of the exhibit to be placed in public locations around Glenwood Springs.

### **Artist Selection Process**

Once an Artist Selection method is determined, a selection process will be established. A jury of recognized experts will make recommendations for selected artists to create site-specific artwork or will make recommendations for selected artwork to be exhibited.

If the budget for a single piece of artwork is \$50,000.00 or more, a selection panel must be formed.

## **ARTIST SELECTION PROCESS**

### **Purpose and Responsibilities**

The artist selection process will interpret and review artist’s proposals based on the selection criteria.

The goals of the selection process are as follows:

- To satisfy the goals of a specific project or site through an appropriate artist selection.
- To further the mission and goals of the Public Art Program.
- To select an artist or artists whose existing public artworks or past collaborative design efforts have demonstrated a level of quality and integrity.
- To identify an approach to public art that is suitable to the goals and demands of the particular project.
- To select an artist or artists who will best respond to the distinctive characteristics of the site and the community it serves.
- To select an artist or artists who can work successfully as members of an overall project design team.
- To ensure that the selection process represents and considers the interests of all parties concerned, including the public, the arts community and the City department(s) involved.

## **ARTIST SELECTION COMMITTEE**

### **Membership of Selection Committees**

Membership will be recommended by the City Manager and approved by the Arts & Culture Board. The members of the selection panel (panelists) will be representative of the community demographic and will

consist of at least five but no more than nine members from the list below:

- Members of Arts & Culture Board;
- Artist or arts administrator;
- Design professionals

City of Glenwood Springs' project **manager** who may appoint the project architect or project landscape architect in their stead; and

- A member of the project steering committee if one has been appointed

### **Conflict of Interest**

Committee members will declare any and all conflicts of interest for all projects and artwork under consideration at the beginning of their meetings. A conflict of interest exists if a committee member, an organization the committee member is associated with as a staff or board member, or a committee member's family member, has the potential to gain financially from the project under consideration by the Committee. In order to promote public confidence in this process, a committee member may also declare a conflict if they think there may be a perception that they have a conflict. If a committee member has a conflict, he/she must not participate in the Committee's discussion or decision regarding the project. They must also refrain from discussion about the project and from influencing fellow committee members.

### **Procedures**

During an artist selection process, committee members will not submit applications for the placement of their own artwork and/or projects. City Staff and Committee Members are able to invite artists to participate but must refrain from giving advice to applicants or answering their questions and direct such questions to the Public Art Coordinator during the selection process. The City must solicit public comment for all pieces of public art being commissioned or purchased in excess of \$50,000.00. An opportunity for public comment must be given before a formal vote. The formal vote must be recorded in keeping with the City of Glenwood Springs public record requirements.

### **Project Implementation Process for Site- Specific Artworks**

Upon the decision of the Artist Selection Committee, the Public Art Coordinator will prepare a contract that includes the scope of work, fee, schedule, and relevant terms and conditions.

The City will follow the process for contracting required by City Charter and other applicable laws. For some projects, the contract with the artist may be phased to include two scopes of work with separate pay schedules and deliverables. The first phase would include all design documentation, including final design, stamped engineering drawings, installation details, and a revised fabrication budget and timeline. The second phase would include all costs related to fabrication and installation.

The Public Art Coordinator will ensure all documents are signed and insurance coverage secured before issuing a notice to proceed and will be responsible for coordinating the work of the artist to ensure the successful integration of the artwork into the project. The Public Art Coordinator will organize a meeting with all integral staff to review roles, responsibilities and schedule.

If specified in the contract, the artist will develop design development drawings for review and approval from the City before proceeding with fabrication. The Public Art Coordinator will schedule meetings with the appropriate offices to review and approve the plans.

If the artist proposes any significant design changes, the Public Art Coordinator will secure the recommendation for approval from Arts & Culture Board and the appropriate departments of the City before approving said changes in writing, per the terms and conditions of the contract.

If the parties are unable to reach an agreement, the City Attorney will act as arbiter. If the change will affect

the budget, scope or schedule, the Public Art Coordinator will initiate a contract modification, if funds are available to do so.

The Public Art Coordinator will be responsible for overseeing the installation of the artwork. The Public Art Coordinator will be responsible for ensuring that all the necessary requirements have been completed prior to interim and final invoice payments to the artist.

### **Maintenance Plan**

Understanding maintenance and care of public art begins before an artwork is created. During the design phase or when a donation is initiated, the City, artist, or sponsor will review and analyze their design proposal and advise on maintenance and operations of the artwork. A conservator should be commissioned to give a report on the artwork.

On behalf of the City, the artist, sponsor, or the appropriate party will submit a Maintenance Plan to the City of Glenwood Springs, who will review and then catalogue any tasks associated with maintenance of the artwork.

The Maintenance Plan will enable the City to:

- Evaluate the quality and sustainability of the proposed or existing public artwork;
- Establish maintenance requirements, assign schedules, and identify potential costs; and
- Determine if the City of Glenwood Springs should accept or decline the design proposal and/or public artwork.

To produce the Maintenance Plan, the artist should examine and render an opinion on the following:

- Durability;
- Type and integrity of materials;
- Construction/fabrication technique;
- Internal supports, anchoring and joining, and footings;
- Landscaping;
- Vulnerable and delicate elements;
- Drainage of artwork;
- Potentially dangerous elements;
- Security;
- Location;
- Environment;
- Whether the design encourages/discourages interaction; and
- Effects of skateboarding, graffiti, and any other potentially damaging activities.

The Maintenance Plan will include:

- A record of the artist's intentions for the work of art;
- Recommendations to mitigate potential problems discovered during the examination;
- Notes about how the artist would like the work of art to age;
- An itemization of long-range considerations and care, highlighting maintenance and the anticipated needs for periodic conservation treatment or repairs; and
- Identification of the lifespan of the artwork and a prognosis of its durability in consideration of that lifespan.

### **Lifespan of Artwork**

This lifespan will be selected from one of four categories:

- Temporary: 0-2 years
- Short Term: 2-10 years

- Medium-Term 10- 25 years
- Long-Term 25+ years

The artwork may also be identified as site-integrated, or part of the site and/or the architecture, as appropriate and will fall into the Long-Term lifespan category above.

## 6. Collection Management

The City of Glenwood Springs acquires artworks by commission and donation. Processes for these acquisitions are dictated by the Public Art Ordinance and by the Acquisition and Donation Policies. Artworks acquired through these processes are considered to have been accessioned into the City's Permanent Collection and must be cared for in accordance with the Policy and Procedure for Maintenance and the Collection Management Policy. Artworks in the City's possession that were acquired outside of or before these policies may not be accessioned pieces of the Permanent Collection and thus may not be subject to the Artwork Collection Management Policy. The Collection Management Policy is intended to maintain the value of the City's Permanent Collection and guard against the arbitrary disposal of any of its pieces.

### OBJECTIVES

- Maintain a collection management program that results in a high-quality, City-owned public art collection;
- Eliminate artworks that are unsafe, not repairable, or no longer meet the needs of City of Glenwood Springs;
- Respect the creative rights of artists; and
- Support an efficient workload for staff.

### DEFINITIONS

**Deaccession** means a procedure for the withdrawal of an artwork from the Permanent Collection and the determination of its future disposition.

**Relocation** means a procedure for the movement of an artwork from one location to another.

### Life Spans

- Temporary: 0-2 years
- Short Term: 2-10 years
- Medium-Term: 10- 25 years
- Long-Term: 25+ years

### GENERAL POLICIES

#### Removal from Public Display

City Council must approve the permanent removal of artwork upon the advice of staff based on the deaccession criteria below.

If the artwork is removed from public display, the City of Glenwood Springs may consider the following options:

- Relocation: If City Staff decides that an artwork must be removed from its original site, and if its condition is such that it can be re-installed, the City will attempt to identify another appropriate site. If the artwork was designed for a specific site, the City will attempt to relocate the work to a new site consistent with the artist's intention. If possible, the artist's assistance will be requested to help make this determination.
- Store artwork until a new site has been identified or the City decides to deaccession the artwork.
- Sell or trade the artwork after deaccession.

#### Provision for Emergency Removal

In the event that the structural integrity or condition of an artwork is such that the artwork presents an imminent threat to public safety, the City may authorize immediate removal without the artist's consent,

and have the artwork placed in temporary storage. The artist must be notified of this action within 30 days. The City will then consider options for repair, reinstallation, maintenance provisions or deaccessioning. In the event that the artwork cannot be removed without being altered, modified, or destroyed, and if the Artist's agreement with the City has not been waived under the Visual Artists' Protection Act, the City must attempt to gain written permission before proceeding. In the event that this cannot be accomplished before action is required in order to protect the public health and safety, the City shall proceed according to the advice of the City Attorney.

### **Criteria for Deaccession**

The City may consider the deaccessioning of artwork for one or more of the following reasons in the event that it cannot be re-sited:

1. An artwork is not, or is only rarely, on display because of lack of a suitable site.
2. The condition or security of the artwork cannot be reasonably guaranteed.
3. The artwork has been damaged or has deteriorated and repair is impractical or unfeasible.
4. The artwork endangers public safety.
5. In the case of site specific artwork, the artwork's relationship to the site is altered because of changes to the site.
6. The artwork has been determined to be incompatible within the context of the collection.
7. The City of Glenwood Springs wishes to replace the artwork with work of more significance by the same artist.
8. The artwork requires excessive maintenance or has faults of design or workmanship.
9. Written request from the artist.
10. The artwork has become publicly associated with racism, sexism, homophobia, xenophobia, acts of assault or violence, or other offensive themes particularly aimed at minorities or underrepresented people.

### **Integrity of Artworks**

The Glenwood Springs Public Art Program will seek to ensure the ongoing integrity of the artwork and the sites for which they were created, to the greatest extent feasible, in accordance with the artist's original intentions, and consistent with the rights afforded by the 1990 Visual Artists Rights Act.

### **Access to Artworks**

The City will seek to assure continuing access to artwork by the public, although the City may limit availability due to circumstances such as funding, public safety, display space, and deaccession processes.

### **Life Spans**

Life spans that have been assigned to the work during the commissioning process will be taken into consideration as part of requests for deaccession or removal. For artworks that have not been assigned a life span, the Public Art Coordinator may engage experts to assist in assigning the artwork a life span, based on the life expectancy of the artwork's materials and fabrication methods.

### **APPLICATION PROCESS**

#### **Preliminary Request**

Permanent artworks must be in place for at least five years before deaccession or relocation requests will be considered, unless matters of public safety necessitate the removal. Deaccession or relocation requests may be submitted by one of the following:

- Neighborhood organization or Homeowners Association;
- Resident;
- City Department;
- Independent Board or Commission of the City; and

- City Council Member.

## **DEACCESSION AND REMOVAL FORM**

The Public Art Coordinator will provide applicants with an application form that will serve as the applicant's formal request for consideration by the City.

## **REVIEW PROCESS**

The Public Art Coordinator will review requests and make a decision regarding deaccession or relocation.

### **Public Meeting**

The City will hold at least one public meeting for the purpose of gathering community feedback on a proposed deaccession or removal. The City may also decide to hold additional public meetings or gather community input through other methods. The City may seek additional information regarding the work from the artists, galleries, curators, appraisers or other professionals prior to making a recommendation.

### **Artist Involvement**

If deaccession or removal is recommended, the artist (if available) will be contacted and invited to provide input to the City. The artist's contract, along with any other agreements or pertinent documents will be reviewed and sent to the City Attorney's Office for final approval.

### **Recommendation**

The Public Art Coordinator will prepare a report that includes the opinion of the City Attorney on any legal restrictions that may apply to the specific artwork. City staff's recommendation may include dismissing the request and/or modifying, relocating, selling, donating, disposing, or storing the artwork.

The Public Art Coordinator will provide all relevant correspondence including, but not limited to:

1. Artist's name, biographical information, samples of past artwork, and resume.
2. A written description and images of the Artwork.
3. Artist's statement about the Artwork named in Deaccession or Relocation Request (if possible)
4. A description of the selection process and all related costs that was implemented at the time the Artwork was selected.
5. A formal appraisal of the Artwork (if possible)
6. Information regarding the origin, history, and past ownership of the Artwork
7. Information about the condition of the Artwork and the estimated cost of its conservation.
8. Information and images of the Artwork's site
9. Any information gained from the public meeting held about the deaccession and removal of the work.
10. Feedback from the Director of the City Department responsible for operating and maintaining the Artwork.
11. Detailed budget for all aspects of conservation, maintenance, repair, installation, operation, insurance, storage, and City Staff support.
12. The Artist's contract with the City.

City staff can recommend one or more of the following methods for an artwork's deaccession:

1. Sale or Exchange – sale shall be in compliance with the State of Colorado and City of Glenwood Springs laws and policies governing sale of municipal property.
  - Artist, or estate of the artist, will be given the first option to purchase or exchange the artwork(s).
  - Sale may be through auction, gallery resale, direct bidding by individuals, or other forms of sale in compliance with the State of Colorado and City of Glenwood Springs law and

policies governing surplus property.

- Exchange may be through an artist, gallery, museum or other institutions for one or more artwork(s) of comparable value by the same artist.
- No works of art shall be traded or given to Arts & Culture Board Members or City of Glenwood Springs Staff.
- Proceeds from the sale of artwork shall be placed in a City of Glenwood Springs account designated for public art purposes. Any pre-existing contractual agreements between the artist and the City regarding resale shall be honored. An exception to these provisions may be required if the artwork was originally purchased with funds that carried with them some restriction, for example, bond funds for street and sidewalk improvements, in which case the proceeds shall be placed in an account designated for art allowed under similar restriction(s).

2. Destruction of Artwork – if artwork is deteriorated or damaged beyond repair or deemed to be of negligible value.

If the City of Glenwood Springs is unable to dispose of the artwork in a manner outlined above, the Public Art Coordinator may recommend the donation of the artwork to a non-profit organization or another method.

### **COSTS**

If deaccession or relocation accommodates the applicant's interests or project, they may be required to cover the costs of deaccession or relocation at no cost to the City.

### **CONFLICT OF INTEREST**

No works of art shall be given or otherwise transferred publicly or privately, to officers, directors, or employees or staff of the City of Glenwood Springs, or their immediate families or representatives of the City of Glenwood Springs.

### **COMPLIANCE WITH APPLICABLE POLICIES AND REGULATIONS**

Deaccession and relocation of artwork will be done in a manner that complies with all other applicable City of Glenwood Springs, state of Colorado, and federal procedures, policies and regulations.

### **EXISTING PUBLIC ART PIECES AT TIME OF POLICY ADOPTION**

Existing public art pieces on City-owned property should be evaluated using the deaccession criteria to ensure that it is appropriate for the City to continue to own and maintain the piece. If it does not meet the deaccession criteria, then the piece will be accessioned into the Glenwood Springs Public Art Collection.

## **7. Donation Procedures**

Requests to donate artwork to the City may be considered on a case-by-case basis. Requests for consideration shall be made through the Arts & Culture Board.

### **DONATION REQUIREMENTS**

The City will consider donations on the following basis:

- The donation contributes to and enhances the City's public art collection;
- The donation meets a high standard of quality and is appropriate and meaningful to the community;
- The donation follows required City procedures including the submission of a Donation Proposal and a Maintenance Plan. Donation Proposal requirements are included in this policy. The requirements for the Maintenance Plan can be found in the Glenwood Springs Public Art Program Policy and Procedure for Maintenance Policy;
- The donation proposal includes a plan to fund and deliver ongoing operations and maintenance – or the resolution accepting the public art must identify how maintenance will be funded; and
- The donation proposal is reviewed and endorsed by Arts & Culture Board and approved by the City of Glenwood Springs.

The City will not accept a donation of artwork until all funds for development, fabrication, siting, and installation have been secured. The City will consider the following types of donation proposals for artworks for City-owned property:

- An already completed work of art; or
- A commissioned artwork by a specific artist or artists to be created especially for a City-owned property.

### **DONATION PROPOSAL PROCEDURES AND REVIEW PROCESS**

Formal requests to donate artwork to the City of Glenwood Springs are made through the Arts & Culture Board.

The donor shall complete an Art Donation Agreement Application (donor form), and submit the form to the Public Art Coordinator. Following a positive initial review by staff which evaluates the donation request to determine the appropriateness of the donation as measured by approval criteria will provide a written recommendation to the City. The City will then determine whether the donation is in the City's best interest and is consistent with the City's goals and applicable City laws, policies, ordinances and resolutions. The City will notify the donor, in writing, identifying and final conditions if approval is granted. The City will create and affix the donation plaque in accordance with the City's Gifting Policy.

### **OWNERSHIP**

Once a gift is accepted by the City, the City shall be the sole owner of the donated item and will have the right, in its sole and absolute discretion, to deaccession of any donated item without providing notice to or obtaining the consent of the donor.

### **CRITERIA FOR EVALUATION**

Elements will include, but will not be limited to, the following:

1. City-owned Property – Donated public artwork must be located on City-owned or City-managed property;
2. Relevance and Site Context – Works of art must be appropriate for the proposed location and its surroundings, and/or complement the architecture, topography, history, and social dynamic of the location in which it is placed;
3. Artist and Artwork Quality – The artist demonstrates the ability and potential to execute the proposed artwork, based on previous artistic achievement and experience. Duplication of work will

- also be considered. The artwork must enhance the City's public art collection;
4. Physical Durability – The artwork will be assessed for long-term durability against theft, vandalism, and weather;
  5. Public Safety and Liability – The artwork will be assessed for any public safety concerns, as well as for any potential liabilities for the City;
  6. Sustainability – Consideration will be given to the environmental impact and sustainability of the proposed artwork, including its operations and maintenance requirements/costs; and
  7. Legal – Proposed terms of donation, legal title, copyright authenticity, artist's right to reproduce, liability, and other issues as deemed appropriate will be considered.

#### **Memorial Gifts**

Memorial gifts will have an additional review process, which will include, but will not be limited to, the following:

8. Timeframe – The person or historic event being memorialized must be deemed significant enough to merit such an honor. If the artwork is portraying a person in their likeness, the person so honored will have been deceased for a minimum of five years prior to consideration. The City reserves the right to remove memorials at any time should the City deem it necessary;
9. Community Value and Timelessness – The art selected represents broad community values and timeless qualities that will be meaningful to future generations; and
10. Location – The location under consideration is an appropriate setting for the memorial; in general, there should be some specific geographic justification for the memorial being located in a specific site.

#### **Art on Loan or Temporary Display on City-owned Property**

Art on loan or art on temporary display on City-owned property must meet the Donation Requirements above, follow the Donation Proposal Procedures 1-9 above, and must be reviewed using step 1 of the Donation Proposal Review Process. Art on loan or art on temporary display on City-owned property must not be accessioned or added to the City's inventory list and master database.

#### **ACCEPTANCE AND ACCESSION OF THE ARTWORK**

If the proposal is accepted by the City of Glenwood Springs, a formal agreement will be negotiated outlining the responsibilities of each party (the City, the sponsor(s), the artist, and outside contractors, where applicable).

The agreement will address project funding, insurance, siting, installation, operations and maintenance, project supervision, vandalism, the right of removal or transfer, public safety, and other issues as necessary.

The City of Glenwood Springs will be the owner of the artwork and reserves the right to remove or alter the work to ensure public safety or because of any other City concerns. The City upholds copyright law and the Visual Artists Rights Act of 1990. Any changes will be made in consultation with the artist and sponsor(s) when possible, or notification will be provided.

The completed and installed artwork will be accessioned and added to the City's inventory list and master database with all accompanying documentation.

#### **REMOVAL, RELOCATION OR DEACCESSION OF THE ARTWORK**

In accepting a donation of artwork, the City of Glenwood Springs will not be bound by any agreement with the donor that restricts the City's ability to act in the best interest of the City of Glenwood Springs. Nothing in the acceptance of a donation of artwork shall prevent the City from approving subsequent removal, relocation or deaccessioning of such donations if it serves the City's best interest to do so. The City will deaccession and dispose of works of artwork in its collection in accordance with the Collection Management Policy.

## 8. Maintenance

The Glenwood Springs Public Art Maintenance Program uses the Public Art Acquisition Account.

The Public Art Maintenance Program will be administered by the City of Glenwood Springs with advice from Arts & Culture Board and other outside partners through yearly evaluation and planning for maintenance of the existing collection.

The Program addresses:

- Accessioning and inventorying the City's collection of public art;
- Conducting a semiannual Survey and Condition Assessments of all work in the collection;
- Preparing a biennial Public Art Maintenance Plan; and
- Overseeing routine maintenance and special conservation treatment of the City's public art collection.

Every five years, the City of Glenwood Springs will conduct an assessment of the condition of all public art with a qualified professional conservator and develop a prioritized list of works in need of conservation or maintenance. This list will be the basis of the biennial Public Art Maintenance Plan.

Under this plan, trained contractors may carry out routine maintenance. For work in need of a higher level of maintenance, specialized care, or conservation treatment, the Program will utilize the maintenance funds available held in the Public Art Acquisition Fund.

### **PROCEDURES PRIOR TO THE PUBLIC ART MAINTENANCE PROGRAM**

#### **Maintenance Plan**

As described in the Acquisition Policy, all acquired artworks must have a maintenance plan developed.

#### **Utilization of the Maintenance Plan**

The Maintenance Plan will be used to:

- Advise Arts & Culture Board, City Department Directors, and others who must review and approve design proposals or accept or decline donated public artwork;
- Troubleshoot the production of construction drawings, the fabrication of the artwork, and the preparation of the site;
- Follow-up on the artist's recommendations; and
- Refer to during the post-fabrication/installation inspection to prepare a final report and a punch-list to complete the project.

The City of Glenwood Springs, professional conservators, and artists will strive to address the recommendations in the Maintenance Plan without unduly interfering with the aesthetic intent of the proposed public art.

#### **Post Fabrication/Installation Inspection**

The Post-Fabrication/Installation Inspection conducted by staff will be based upon and follow-up on the Maintenance Plan that was carried out during the design phase. It will include the following:

- Ensure that recommendations made in the Maintenance Plan and during fabrication were followed;
- Confirm that the artwork is executed as proposed and agreed upon;
- Confirm that there are no missing or incomplete elements;
- Establish that materials quality and stability are acceptable;
- Establish that fabrication quality and stability are acceptable;
- Confirm that installation is stable and secure;

- Confirm that stainless steel is fully and properly “passivated”;
- Confirm that, if required, protective coatings have been applied;
- Ensure that warranties for electronic and other media are submitted as necessary;
- Identify any remaining vulnerabilities;
- Confirm no new damage resulting from installation process;
- Ensure that the maintenance and operations plan is accurate; amend as needed; and
- Confirm that the plaque/public notice meets program guidelines and is properly installed.

## 9. Mural Guidelines

Murals are a relatively quick and highly impactful way to bring public art into a city's built environment. Murals provide an opportunity for visual artists to show their talent and creativity while also contributing to a city's landscape and identity.

### Private Murals on Private Property

Murals on private property and not publicly-owned are governed by \_\_\_\_\_ of the City of Glenwood Springs' Municipal Code. This section exempts works of art or decorative architectural graphics that do not include a commercial message and are not symbolic of any commercial business or commercial activity taking place on the subject premises. Private, non-commercial murals are therefore considered allowable and exempt from both the city's sign ordinance and mural guidelines.

The City of Glenwood Springs and the Arts & Culture Board encourage the installation of private murals on private property in order to support artists and enhance the visual environment in the City of Glenwood Springs. Private property owners are encouraged to voluntarily follow the guidelines set forth in this document as applicable and are also encouraged to consult with the Arts & Culture Board and Parks and Recreation Department with regard to any questions or concerns as they develop and implement private murals.

### Publicly-Owned Murals

The Glenwood Springs Parks and Recreation department has oversight responsibility pertaining to the creation of publicly-owned murals in the City of Glenwood Springs. Publicly-owned murals may occur on publicly-owned buildings or on privately-owned buildings where the property owner agrees to a mural easement allowing for the creation and maintenance of a publicly-owned mural on private property for a specific period of time.

The Arts & Culture Board assists the Parks and Recreation Department with coordinating the creation and completion of publicly-owned murals. This assistance includes but is not limited to:

- • Identifying potential mural sites.
- • Securing the required private funds and/or in-kind contributions from individuals, foundations, businesses and other corporate donors.
- • Issuing and administering the Request for Qualifications (RFQ) for mural artists.
- • Coordinating a selection process for RFQ reviews and artist recommendations.

### Mural Design Considerations

Murals in the City of Glenwood Springs are encouraged to be varied in both content and design. A wide variety of murals will ensure a vibrant visual experience for residents and visitors alike. Some murals may celebrate the history of Glenwood Springs while others may be palettes for vibrant artistic expression, inject whimsy into the built environment, or showcase the artists' wildest dreams – the opportunities are endless.

While not relating to content, some design considerations should be made in order to ensure a successful project.

Design Considerations:

1. Scale – Who will be the intended viewer or audience? A mural intended for pedestrians may be of a different scale than one intended for automobile drivers or cyclists along a bike trail.
2. Accessibility – Are there opportunities to engage those who are visually impaired or otherwise not able to view the mural?
3. Maintenance – What are the long term maintenance implications of the design? Is it easily repairable?
4. Longevity – What is the expected life span of the mural? Is it intended to be a short or long term

installation?

5. Experiential Elements – Is there a potential for additional elements that could be added to enhance the experience of the viewer such as virtual (VR) or augmented (AR) reality elements, audio elements either on site or online, instagram or social media interactions or other opportunities?
6. Historic Preservation – Is this mural intended for a historic building? If so, painting unpainted finished masonry is generally considered an inappropriate treatment. Explore other options such as painted panels or applied vinyl.

### **Mural Easements**

In order to create additional mural opportunities within the City of Glenwood Springs, these guidelines encourage property owners to enter into easement agreements with the City that allow for public funds to be expended for murals on private property. Though there may be positive benefits for a property owner as a result of the creation of a publicly-owned mural on their building, there must be no direct correlation between the content of the mural and the property or any business housed in the property.

In order for the City to implement a publicly-owned mural on a privately-owned building the building owner must sign an easement created by the City of Glenwood Springs which states that the owner will not paint over, destroy, cover, or alter the mural for the duration of the agreement. Agreements typically last for a minimum of 5 years but may be shorter or longer depending on the project. As part of easement negotiations, the city should also consider negotiating with the property owner for nightly illumination of the mural for the lifetime of the easement.

### **RFQ Artist Selection**

An ad hoc selection committee led by Staff with representatives from the Arts & Culture Board, Arts & Culture Board, arts or design professionals, and community members should be formed in order to select artists. The following criteria should be utilized as the minimum criteria for the selection of artists for all mural projects. Additional project specific criteria may be added in addition to the baseline criteria.

- Experience with similar mural projects, examples of past projects – either in Glenwood Springs or other cities with strong mural programs, including at least ten (10) color images of one or more completed mural projects – and three supporting professional references.
- Willingness to work with the Staff and the Arts & Culture Board to develop and refine the mural design.
- Timely response to the RFQ, which shall include but not be limited to a requirement that at least ten (10) color renderings/designs of the proposed mural, a written description of the mural, and photographs of the proposed site and physical surroundings be submitted to the Arts & Culture Board.
- Innovative and unique artistic vision, including technique, composition of visual art elements, use of line, color, form, and texture.
- Realistic project budget and timeline.
- Willingness to enter into a contractual agreement with the City of Glenwood Springs.
- Liability/Workers compensation/automobile insurance.
- Agreement to allow images of the completed mural to be placed on the City of Glenwood Springs website.

### **Fundable Expenses**

The installation of a mural may necessitate additional expenses beyond the artist fee and materials. Additional fundable expenses include but are not limited to:

- Artist(s) fees for design and execution of mural.
- Rental or purchase of painting equipment or the purchase of painting supplies.
- Preparation of the mural surface including repairs and priming.

- Rental of barricades and other equipment required of street or alley closures.
- Lighting and electrical equipment.
- Other expenses that are pre-approved by the Arts & Culture Board and the City of Glenwood Springs.

### **Mural Implementation**

Upon selection the artist will work with the City of Glenwood Springs to create a design, secure permits, as appropriate, such as street or alley closures. Below is a general overview:

- The Arts & Culture Board will review and give final approval for the artist selection and mural design.
- City Staff will monitor the creation and completion of the mural.
- The Artist will create the artwork in a timely fashion. If more time is needed, the artist must notify the City of Glenwood Springs so that any applicable permits may be extended.
- The creation of the mural must include materials that are long-lasting (at least five (5) years unless agreed to beforehand), graffiti and UV resistant, or include an anti-graffiti and UV resistant coating.
- The artist must notify the City of Glenwood Springs when the mural is completed.
- When the mural is completed, the Arts & Culture Board will hold a mural dedication event.

# 04.

- Ski Slopes
- Small town feel with world class amenities
- Small-town vibe
- Sunlight Resort
- Surrounded by nature
- The amount of outdoor activities within and around us to enjoy
- The train station
- There's so much to offer in a small town.
- Trees
- Valley
- Vapor Caves
- We connect valleys and people
- Western Slope

**Long Answer:**

- A great and unique place to live, surrounded by beauty and home of some of the best Colorado attractions.
- A small town feel which we are losing but that is what did make it unique
- An evolving identity of old and new (historic West + modern idea), and the importance of water – the Colorado, the Roaring Fork, hot springs and vapor caves. Glenwood Springs is a confluence of activity, travel and access.
- Community areas: Under the bridge, Hot Springs, Rivers

- Everything! It's mountains, valleys, rivers, canyons, and more! Unique in every aspect
- Glenwood is a collage of beautiful elements earth, wind, fire and water. We have it all and have been pretty good stewards of it all.
- Glenwood Springs is cradle by the confluence of the Roaring Fork and Colorado River.
- Glenwood Springs is visually stunning, populated by both long-time locals and recent transplants, all working together. There is widespread appreciation for the natural beauty here, and great support socially as well as economically.
- It is a beautiful place to live and visit.
- It is a mixture of outdoor recreation, culture, history and natural beauty.
- It is a resort city, with historic significance, that also has a strong local community with respected elders and families that commit to making Glenwood Springs 'home' have their businesses here, and love the city. It is much more than just a resort destination.
- It's a town, split across a river with with multiple hot springs and other unique tourist attractions, as well as the confluence of three rivers. It has summer and winter activities and beautiful views.
- It's geographic position and all the opportunities it provides being an intersection of desert, mountains, rivers, and people.
- It's historic, it's inclusive, it's active, it's set in a gorgeous canyon with two iconic rivers.
- It's location of being along the mighty Colorado River and magical Roaring Fork River, the hot springs pools, our own ski area, a historic downtown, a wonderful selection of restaurants and one of a kind small businesses.
- It's the little mountain town in Colorado that's actually livable. It's affordable, it has jobs, it has resources.
- It's unique because there are so many wonderful attractions, outdoor recreation opportunities, and entertainment options packed into a tiny area!
- It's a beautiful small city, filled with many kind-hearted people.
- It's right in the center of roads going all directions, and so much beauty down those roads. I was shocked when so looked up the local art guild. Wow! So much talent that you aren't using.
- More diverse and open minded than many small rural communities.
- Multiple hot springs, access to two rivers and still some reasonably affordable but still good dining options.
- Natural resources and access to adventure.
- People are willing to connect, the environment is relaxing.
- People still know one another
- Perfect blend of small town comfort with surprising amenities
- Physical landscape and heritage as a tourist town – place to have fun and enjoy yourself.
- Real town and the gateway to the Roaring Fork beauty.
- The confluence of rivers, geology, and many decent, kind, loving people, as well as excellent connections to the rest of the world through the railroad, highways, and fiber. This unique array of natural beauty, independent thinking, a wonderful, dense, old downtown, and good hearts is unparalleled.
- The easy access to so many different activities whether it's family fun or backcountry isolation.
- The fact that it became a resort town soon after its founding.
- The gate to the beautiful Roaring Fork valley and home of the majestic Glenwood Canyon.
- The geographic features—hot springs and the canyon, and the history that goes along with it.
- There is a genuine "small town" vibe that Glenwood gives. That is difficult to come by with Denver, Vail, and Aspen being the main hubs of Colorado! Two gorgeous hot springs situated right in town gives both individuals and families the opportunity to soak in their glory.
- This town is a true community. We help each other and lift each other up. I'm proud to raise my family in this small mountain

town.

- We live here because we love the location, access to the outdoors, the people and the community itself.
- Year round, there is always something to do, whether it be hiking or rafting in the summer, or skiing and snowboarding in the winter, or taking a soak in the hot springs, or having fun at the adventure park. There's always a way to find fun and excitement and activity and the locals are so friendly and excited to engage with everyone
- The amount of outdoor activities created a fun open minded community of out going people. The restaurants and shops and the entire downtown area is amazing
- Our hot springs, outdoor activities and the mountain walls that surround us

**Question 3: My favorite activity involving arts and/or culture in Glenwood Springs is....**

- All the different performing arts groups (including from CMC and schools): theater, music, dance
- Any performances
- Anything history related
- Art festivals
- Art Guild
- Art on 8th
- Art show
- Artist's Mercantile
- Arts community gatherings - Arts Council collaborations
- Arts Programs
- Artwork on the buildings
- Book fairs
- Browsing Cooper Corner Gallery
- Christmas lights
- CMC Art Gallery
- CMC theater productions
- Concerts
- Cooper street gallery
- Creating art
- culinary arts festival
- Dance performances
- Dining
- Dinner Theater
- Downtown activities by the rocks
- Events in Two Rivers Park
- Fall Art Festival
- Glenwood historical museum
- Glenwood Springs Art Guild Fall Show
- Hard to say, we have a very poor/barely existent arts scene...
- hiking
- Historic photos and captions in often unknown places and legacy of the Utes and the period of time of late 1800s when GWS coming to be
- Hot springs
- Hotel colorado christmas celebration
- Hotel Colorado during Christmas or hiking up red mountain.
- i am an arts person from nyc who is living here there is not enough art here there could be more
- I don't really have one, but I do love art.
- I don't think of Glenwood this way. Sourcing materials and supplies

- I love the vaudeville and I enjoy seeing the art around town while on walks. Summer music in the park is always a treat.
- I love when local store or restaurants feature local artist.
- I love when there is live music in bethel plaza.
- I really liked the block parties that happened between 7th and 8th street one year.
- Interacting with the community itself.
- Jazz in the park
- kid centered activities
- Learning about and seeing the history
- Live music
- Live music during downtown market is a nice addition
- Live music in venues and outside
- Live music, art fair, strawberry days
- local parks. nature is the greatest art
- Love music
- Loved the music in the Park along the river
- Murals around town
- Music
- Music and events in the Bethel Plaza
- Music concerts
- Music in the Park
- Music in the Park in summertime
- Music in the park, special events when they happen
- Music in the park. Bring back music in the park!!
- Musical performances
- Outdoor festivals of any kind
- Outdoor music
- Painting Lessons
- Painting with the Glenwood Springs Art Guild members
- Photography, painting and drawing
- Plein air painting
- public art installations
- Public artwork
- Relaxing in the hot springs or the vapor caves.
- Rock climbing, pointing out the Bison's wood penis
- Sadly, there is not much art happening in GWS
- Seeing art works in local businesses and the opportunity the bandstand in 2 Rives Park to have different venues comes to

mind first.

- Seeing local artists work in all areas.
- Seeing murals on walls and buildings
- Spring Valley student theater productions
- Strawberry Days
- Summer Jazz at 2 Rivers Park
- Summer music at Two Rivers park
- Summer music festival
- Summer Music in the Park
- Summer of Jazz
- Summer of Music
- Symphony in the valley
- Tattooing!
- Tattooists from large metropolitan areas
- The community orchestra and inside concerts.
- The historical sights throughout town
- The interactive displays which invite both locals and tourists-especially loving the wing exhibit where my grandchildren as well as visitors enjoyed-picture ops -
- The murals
- The placement of butterfly wings in various areas within Glenwood.
- The summer of music on Wednesday nights at Two Rivers Park
- The Tour D'Art
- There used to be a public art walk. I love the live theater opportunities.
- Town history from the 1800s & early 1900s
- Under the bridge events - movie nights, zumba, FAC
- Vapor caves
- Vaudeville Theater is a local gem!
- Visiting art galleries
- Walking
- walking around downtown
- walking on streets or paths
- Walking through the residential neighborhoods
- watching the sunset
- Wednesday night concert in the park
- Wings
- wings in downtown, small effort big impact in a challenging time

**Question 4: My favorite activity involving arts and/or culture in the Roaring Fork Valley is...**

- Anything held at 2 rivers like the concerts in the summer
- Anything we do as a community ie. Strawberry days, Christmas/New Years events.
- Art classes
- Art classes at CMC
- Art exhibitions, especially the fall art festival, Vaudeville
- Art festivals
- Art openings
- Art shows
- Aspen Art Museum
- Aspen Chapel Gallery
- Aspen Comedy Fest
- Aspen Institute
- Aspen Music Festival
- Attending the Music Festival
- Belly Up
- Bud Light Free Concerts in aspen/snowmass
- Carbondale Creative Arts Center
- Carbondale Fashion Show
- Carbondale Mountain Fair
- Classes at the Art Base
- Concerts
- Crafts fairs during summer festivals
- Creating art & drinking coffee, or visiting patty's rock shop & finding a crystal treasure
- Cultural Festivals
- Defiance plays
- Dia de la muerte carbondale
- Events
- Fall Art Festival
- Farmers markets
- Festivals, farmers markets
- First friday art show openings
- First Friday Carbondale
- Food
- Food and Wine Festival Aspen
- Galleries
- Galleries in Basalt
- Garden Club, Hiking, outside gardens, the thought of us having a Botanical Garden.
- Ghost towns
- Going to art galleries
- Going to Aspen to catch live shows at the

Belly Up

- Green is the New Black Fashion Show
- Health and wellness
- Historic buildings and sites; and legacy of the valley
- Honestly, we don't find ourselves going Upvalley very often. We love the vibe down here, but the connections to the haute couture of Aspen are fun to have.
- Hot springs, caves
- i like the mural of the animal band on the river path under the bridge that is a unique location to me
- I really love the Crystal Theater in Carbondale - big movie person
- Jazz Aspen
- Kayak on Harvey Gap or Ruedi Reservoir taking photos.
- Launchpad
- Live Music
- live music and dancing
- Live music at Steve's Guitars
- Live music in the parks
- Live outdoor music
- Looking at the historical culture of the city
- Love music and theater
- Marble Carving
- Markets (Farmers markets, Strawberry Days, Launchpad)
- Mountain Fair
- Music
- Music at Two Rivers Park
- Music concerts
- Music festivals
- music, drama, public art
- Music, especially classical concerts
- Nature walks
- Openings, showings, driving, reading , exploring
- Outdoor music
- Outdoor music venues
- paint exhibits
- Painting, Pottery & Sculpture, Theater, Singing, Live Events.
- Participating in Carbondale's rich art community that has Glenwood is just starting to come to life.
- Photography, painting and drawing
- plays
- Plays, concerts, fairs, galleries, classes, lectures

- Roundabout art
- Seeing live theater and music
- Seeing sculptures of all kinds from John Denver songs engraved in stone to metal sculptures in Basalt to art walks in Carbondale to murals in Glenwood
- shopping eating
- Strawberry Days
- Strawberry Festival
- Street festivals
- Summer music events
- Summer of Music
- Supporting the locally owned art supply stores, galleries and boutiques
- Symphony of The Valley
- Tattooing!
- The Coke oven's
- The launchpad Carbondale
- The local Fine Art Guild is amazing.
- The vibrant community founded in its people's creativity. So many people create freely & contribute it to community building.
- Theater throughout the valley. Public art throughout the valley.
- Theatre
- Theatre, fine art, and activities for children
- Thunder River Theater
- Touring stand up acts and intellectual speakers at the wheeler. Or Warren Miller night!
- Valley Visual & high school shows (missing Annie Brooks)
- Vaudeville
- Visiting galleries
- Visiting the Powers and Aspen art museums
- Walking around Carbondale....looking at all the great sculptures and art work on the streets
- walking, and biking around town to the farmer's market
- Watching my granddaughter dance

**Question 5: What activities would you like to see more of in Glenwood Springs? (Select all that apply)**

- Live Music: 81.37%
- Live Performance (Dance, Theatre, etc): 63.98%
- Art Exhibitions: 63.35%
- Arts / Craft Festivals: 63.35%
- Youth Based Arts Activities: 43.48%
- Festivals (specify type): 36.02%
- Literary Events: 34.78%

**Festival Comments:**

- A mural program!
- A plain air event/fundraising contest! Perhaps held on the ped bridge
- Airport would be a great spot for a music festival. Just saying. Might be best to wait for southbridge for this one.
- An arts & music festival bringing together local artists in different mediums similar to the city of Golden's arts festival, which is very popular in the Denver Metro area
- An event celebrating the Latino community
- Any seasonal festival would be fun
- Any. Music, kayak, athletic events
- Anything is better than what we have now. We have no serious dance classes, no art centers, no performing art center, very little live music. The pavilion below the bridge is depressing, loud and frequented by homeless people and the mentally disturbed.
- Anything that gives the community a chance to gather.
- Art competition open to locals.
- Art, Music, Dance classes
- Arts Classes and workshops, revival of a Fall Arts Festival
- Botanical Garden
- "Brewery or Wine Fest, outside in the summer
- Paragliding Festival/airshow
- Drumline competition or Festival
- Bring back street dances on 7th!
- Celebration of diverse cultures in our community. Hispanic Heritage, Latino artist, Latino art.
- Chautauqua and/or Shakespeare festivals
- Comedy

- Community lead yearly events like that block party.
- Cooking festivals like the best of Denver or harvest or the chili cook off we used to have for ski spree. Bring ski spree back like it was 30 years ago, into town w parades at night. Have strawberry floats be decorated and get more marching bands. No more cars w a balloon in them... have to be decorated.
- Cultural experiences such as sound bath meditation, taiko, or regional culinary series. Engineering and automotive exhibitions (I know this is a stretch with your questioning but I believe engineering to be one of the most impressive branches of art).
- Cultural festivals - maybe a Latino or polish heritage festival
- Emphasis on history, such as ranching or farming. Also art festivals and maybe wine. .
- Festival -something unique like before new year's a bonfire type thing where everyone can throw in the fire papers with things written on them they want to get rid of. Or something like Carbondale's dandelion days-silly family orientated
- Festivals are needed that are based on Glenwood's history. The Wild West Fermentation event a few years ago never got off the ground like it could have.
- Festivals surrounding various outdoor sports and festivals about food
- Festivals: art, music, crafts.
- Film festivals, movies in the park
- Food
- Food and Wine
- Parade featuring horses in the parade
- Christmas concerts, parade with reindeer "
- Food-centric events
- Food/craft markets.
- Giant outdoor sculpture
- "Halloween parade with community activities that tie into the event. Things like storytelling, pumpkin carving, costumes, floats, etc.
- Flash performances by local talent."
- Highlights of LatinX in the arts (diversity, equity and inclusion).
- Historic home walk; a historic community...

many other locales have saved old community places to offer a tour of working places and historic museum; we need to embrace this culture, too many people don't know it

- history events, beer gardens
- It might just because because of the pandemic, so my answers might be skewed, but I miss festivals and live music
- Late 1800s gas lamp cultural development in the area of 6th, 7th and 8th streets. Up scale with horse carriages, etc. Classic style hotels similar to the Hotel Colorado and Hotel Denver. Have people feel that they are walking into the 1890s era. Cities like Omaha and San Diego have great gas lamp districts. Have arts and crafts in the area that represent that era. Have vintage style restaurants.
- Less business/consumer driven stuff and more like what you encounter in the RFV. Glenwood just feels like shopping, older people, and driving/traffic
- Local food fair/festival
- Missing Strawberry Days and it's many booths and great music.
- MORE LIVE MUSIC PLEASE!!! Mini glenwood springs music festival. Also beer festivals!
- Mtn bike festival - river rafting festive - wine fest - beer fest
- Murals - Glenwood has several that are outstanding - including in the Forest Service building
- Music and art festival on the river would be beautiful
- music festivals
- Outdoor art market, booths, and food.
- parades community pageants based around the environment something in harmony with the outdoor lifestyle
- "Plein air painting festival
- Home door decoration contest at Christmas "
- Plein air art festival with judging and prizes, exhibit, popular choice award, purchase award for permanent exhibit and promotional use
- Public art displays
- public art installations and refreshed look at the murals.
- Return Strawberry Days to June's calendar

of events to celebrate the end of fearing Covid.

- River festivals
- Running races
- Scientific and intellectual events. I think Glenwood is far more intellectual than is widely appreciated. Between VVH, CMC, and the HQ for the County and legal profession, we're sharp cookies. We may lack the fame of the Aspen Institute, but I don't think we lack the talent.
- should be 'which activities' not 'what'
- Something between downtown market and Strawberry Days. Perhaps monthly year round. Utilize Community Center in the Winter Months?
- Something with the train.
- Summertime plein air painting event or contest. Winning painting could be used in Glenwood promotions
- The Oktoberfest on 6th and NY eve fest and fireworks come to mind. Great to have another couple of fun events during the year.
- We need a good outdoor festival that promotes outdoor recreation and culture. A good example is PaddleFest in Buena Vista or Fibark in Salida.
- We should have more art markets / farmers markets!
- Would like to see the alley behind 6th street decorated with murals and made comfortable for walking.

**Question 6: What types of arts and cultural classes are you interested in? (select all that apply)**

- Cooking / Cuisine: 66.67%106
- Fine Art (painting, sculpture, drawing, etc.): 59.75%
- Music: 44.03%
- Cultural Traditions: 41.51%
- Dance Classes: 37.74%
- Theater/Drama: 31.45%
- Creative Writing: 30.82%49
- Storytelling: 27.67%
- Graphic Design: 25.79%
- **Other (please specify): 21.38%**
- Acupuncture certification school
- aerial yoga
- antiques repairing
- Art tours thought town, including west Glenwood
- Ceramics (not just drop in)
- circus trapeze
- Comedy
- community based arts practice multi generational
- Crafts
- Fiber art
- gardening
- geology
- Homemade craft festivals
- Improv
- Jewelry making, silversmithing
- Kids classes
- Learn to play instruments like piano, Guitar
- Locals sharing their interests, Art, craft in the parks and sharing rafting on the river with those who don't get that chance. A friendlier feeling getting local clubs involved.
- Mainly spectator now
- Music mixing/DJing
- Paint-outs
- Painting, drawing and sculpture and tattoo art
- photography
- Public art. Like Carbondale putting art on corners.
- Science and education!
- sculpting or welding
- self defense

- sewing
- Silversmithing
- Stand up Comedy
- Tai chi
- Wood working
- Woodworking

**Question 7: Where would you like to see more public art in Glenwood Springs? (select all that apply)**

- Downtown: 73.61%
- Parks: 72.22%
- Gateways (places where you enter the city): 68.75%
- Roundabouts: 55.56%
- Within Streetscapes or Medians: 49.31%
- Major Intersections: 36.81%
- Schools: 32.64%
- Government Buildings: 31.25%

**Comments:**

- Along the bike paths
- Along the Trail Corridors
- Along walking routes
- Art of design in infrastructure. Invest in high quality design of public places and not just pieces.
- Be careful with your choices. It all begins to look the same from city to city. Choose art that is magnificent not just glorifying an event, person, or thing. Choose paintings as well as sculptures.
- Be wary of sight distancing for high traffic visibility and safety
- Bike paths
- Building murals
- Context specific art- less focus on hiding transformers or placing art that isn't meaningful to its location
- Cooper/6th street
- Don't feel the need for more public art
- Downtown is the most important place as it would draw visitors to our core. Please do not put anything but grass in the roundabouts as it distracts drivers too much.
- Everything depends on the quality of the art and proper installation, ie, orientation, vegetation, cleanliness and consistency of artist's representation
- Flags or banners on the bridge to start! Make it happen. Not shutting down 82 is a lame excuse. The holders are there and there is zero traffic between 12am and 4am.
- Glenwood park could use some art.
- I am an art teacher at RFHS in Carbondale-

you guys should really talk to them about public art. Our art is really pretty lame. Their rotating art program is amazing. Who is on the committee for choosing art? I would be more than willing to join this committee.

- I don't think we should make buying art a financial priority right now. I think more public art should be interactive and created BY the people (adults and children) of Glenwood themselves, as volunteer community involvement projects.
- I think public art is often displayed that has no relevance to the community and is an exorbitant expense, and often placed in spots that create traffic hazards. While I liked the "buffalo herd" pallet display, placing them in the roundabout initially was dangerous because blocked views, and the expense was absolutely too expensive!
- Integrated into municipal landscapes, not just plopped ("plop art") line in Basalt, Aspen and Cdale. Glenwood is historic enough, with deep enough roots, the community art should be INTEGRATED. Sculpture designed into landscape settings. Murals befitting of its history and architecture. Be Glenwood, no where else. No copying. Celebrate Glenwood. And downtown? Life sized black and white historic photos, people cut outs, 3/8" steel, tourists & families can put their faces into, brand Glenwood and activate street settings. Let businesses \$ponsor them to increase foot traffic in their vicinity. In addition to traditional sculpture settings. A river walk with sculptures that tell the ecological and indigenous histories would also be true to Glenwood.
- Interactive fountain, surf board or kayak in roundabout by wave park, cut out board where tourists insert head for pictures like at the pool
- murals on buildings, on walls
- Murals on some of the buildings
- No where
- None - fix the roads
- Outside our community center.
- Places away from traffic where viewer can pause and enjoy
- Places where local people congregate

- Places where one can stop and enjoy without holding up traffic. Consider pedestrian bridges.
- Rec. Center
- Roundabouts in West Glenwood, too, not just in town.
- Something huge on the mountain that can be seen from all over town would be cool, like the cross on the mountain is seen from all over when it's lit. Or a giant alpine slide on the trail that leads to the cross, that's lit up with a variety of neon colors from top to bottom. Or a nightly laser light show covering the entire mountain would be cool. Or a fountain or fountains in a central place, & at night they could become dramatic with lights & huge geisers, which would fit the hot spring theme. I'd also like to see more public homage and education of this area before the white settlers arrived here, when the Ute were here & the hit springs were the "big waters," and the only white people were the occasional trappers. We know a lot about the gold mining days, doc holidays & Wyatt erp, but let's go back even further, and find out about the Native Americans and learn from them about what this area was like & how they existed. Glenwood has become a healing destination thought it's history, and it still is one. Those roots were planted long before Doc Holiday & Theodore Roosevelt came in search of health, let's go deeper into the last & into Native American shamanism. It's medicine that is still relevant, especially relevant, today.
- The bridge
- The Plaza
- There is so much space to do awe inspiring projects. Maybe go larger scale?
- Until our roads are fixed, our firefighters are paid fair wages, our police are fully staffed, and our teachers can live reasonable lives in our valley our city management has no business spending our money on such frivolity as public art. When our infrastructure is no longer overwhelmed and our public servants can afford to live in the town we protect and serve I can see this conversation being relevant. Until then it's just another in a long line of examples of

how out of touch our manager and the counsel are with the heart beat of our home.

- You have a lot of land where the old sewer plan was located. How about a Center for the arts and humanities that provides galleries, studios, classes and performance places. A good example would be the Arvada Center for the arts in the Denver Area.

**Question 8: Where specifically would you like to see new public art pieces?**

- 14th St pedestrian bridge
- 23rd st intersection
- 27th and midland
- 27th street bridge
- 27th street roundabout
- 6th Ave Roundabout
- 6th St. park
- 6th Street
- 6th Street between Laurel and Pine
- 7th
- 7th St pedestrian areas
- 7th street path to the roaring fork
- 7th Street Sunken Plaza
- 8th to 11th in core
- A mural on/inside the bandshell
- All over downtown
- All parks in town
- All roundabouts
- Alleys
- Along bike paths
- Along river corridor
- Along the bike path
- Along the bike path behind the old Safeway
- Along the bike path by dog park
- Along the bike path going in to Town
- Along the Jeanne Golay trail
- Along the Rio Grande Trail
- Anywhere at the Meadows
- Anywhere downtown
- Areas that are blighted
- Around the Meadows
- Art at Government buildings
- Art at public viewing area near White Water Park
- Art at schools
- Art shows in Centennial Park
- Art strategically placed along the Rio Grande Trail to mark & accent the trail
- At 8th and Midland empty lot - like a sculpture garden
- At all I-70 underpass entrances and all local park structures and schools. Art or ceramic murals and mosaics
- Before the bridge entering the city
- Bethel Plaza
- Better art sculptures in the roundabouts

- Bridges underpinnings for hiking etc
- Bringing back art shows and entertainment to the Art house near the Vapor Caves
- By the city's entrance and exits.
- By the river
- Centennial Park
- City hall 8th street
- Colorado ave
- Community center& VV Hospital.
- Cooper Ave
- Cooper Ave between 7th and 8th
- Cooper Wine and Spirits
- County Clerk and Recorder
- Courthouse
- Dog Park
- Downtown
- Downtown 8th and Grand
- Downtown by the public library.
- Downtown Cooper area
- Downtown near any of the restaurants (mural!)
- Downtown street corners
- Downtown streets including Blake, Cooper
- Entering Glenwood from Carbondale
- Entertaining West Glenwood
- Entrance to town from I-70
- Entry to Target shopping complex
- Entryways
- Every roundabout in town
- exit 114 south roundabout
- exit 116 westbound off ramp
- exit to Glenwood off I-70
- Exits from interstate
- Face of the building near the King Mall (east side of Grand btwn 7th & 8th)
- Gateways
- Glenwood adventure park
- Glenwood Mall
- Glenwood Meadows
- Glenwood Springs Elementary School
- Glenwood Springs High School
- Glenwood Springs Library
- Government building open spaces
- Grand Ave Bridge
- Grand Ave pedestrian bridge
- Grand Ave to 6th St pedestrian bridge
- Gregory Park
- Harrison Avenue
- Historic and cultural themed street parties (see comment on agriculture above)
- Historic events revolving around the Frontier Museum
- Hot Springs (both)
- Hung below the bridge above the river
- Hwy 82 bridge area
- I-70 / Grand Ave roundabout
- I-70 interchanges
- I70 entrances to town
- In front of City Hall / County Buildings
- In front of Sopris Elementary
- In the Municipal/courthouse complex
- Intersection before the new bridge
- Interstate Entrances to Glenwood
- Just north of Uncle Pizza
- Landing pad of old bridge
- Large format fun murals painted throughout the town
- Library plaza
- live painting downtown
- Lower Colorado Avenue
- Lower Cooper Avenue
- Main intersection into town
- Median at 8th and Midland intersection
- Midland & Mount Sopris
- Midland near Lowes/Target/Rafts building
- More by the marble statue by the pool - seems lost by itself
- more graffiti style on all of the abandoned buildings - thinking backside of the Safeway building!
- more murals in downtown alley ways
- Murals on downtown walls/underpass
- Murals on sides of buildings
- Near both pools
- Near Community Center - what's there now is good start
- Near Doc Holliday trailhead
- Near the confluence
- New Midland roundabouts
- new roundabout on south Midland
- North bridge landing
- North Landing
- On corner street, like near Confetti store
- On the "Landing" open space area on the North side of the pedestrian bridge
- On the brick wall in the open alleyway under the bridge...it is an eyesore as you drive into our town
- On the Bridge over the Colorado River
- On the pedestrian bridge over the highway
- on/along the walls of the new bridge - graffiti style

- Outside the library
- Parks
- Pedestrian areas north of downtown
- Perhaps a sculpture in Two Rivers Park
- Pitkin
- Plazas by the bridge
- Public bathroom across from clerk and recorder
- Public Buildings
- Public parking areas
- Public Parks
- Red Mountain:Cross
- River parks
- River Trail
- Rotate art shows at different businesses like banks, etc.
- Roundabout at 6th and West Glenwood exit
- Roundabout at ext 114
- Roundabout at ext 116
- Roundabout at Laurel Street
- Roundabout at Midland and 27th Streets
- Roundabout off I-70
- Roundabout off I70 near the mall
- Roundabout on 6th near Village Inn
- Roundabouts
- Sayre park
- Schools
- sculptures in all the roundabouts and the parks
- Sculptures where they'd fit
- Sister Lucey Downey Park
- Something a long the Rio Grande bike path. Similar to art walk in carbondale
- South end grand avenue
- south glenwood
- South Glenwood Entrance to town
- Strawberry park
- Street art options in alley areas
- Sunlight
- The area around the bridge where 8th goes over the river and the bike path connects to the road
- The cement 'roof' under the grand bridge.
- The Pedestrian Bridge
- The walking bridge that crosses the Roaring Fork by the High School.
- Two Rivers Park
- Under the bridge
- Underpasses
- Up and down grand
- Veltus Park
- Walkway
- Water Fountains along 7th Street
- West Entrance
- West Glenwood - hopefully in conjunction with mall redevelopment
- West Glenwood roundabout
- West of the Hotel Colorado
- White Water Park
- Whitewater Park

**Question 9: Do you have any thematic ideas about public art in Glenwood Springs (i.e. nature, agricultural heritage, functional, etc?)**

- 3D/POV art
- A maze built from hedges
- Adventure sports (skiing, mountain biking, etc.)
- Agricultural Heritage
- Agricultural Heritage and Future
- along river trails
- Animals
- Any but water for sure
- Any by local artists
- Art installation/murals around schools
- Art should be aesthetic and challenging
- Artist's concept
- Ask for art from minority groups
- Big things
- Biking
- blank plywood canvasses for children to paint on
- Botanical Garden
- Bright colors
- Bring in more culture
- Celebrate Diversity
- Celebrate history of the area inc Native American
- Celebrate western history
- Celebrated species of Glenwood- the blue heron, mountain lion, bear, Rocky Mountain sheep. No cliches, though- bugling elk, roaring bears, predatory lions.
- Celebrating diversity
- Celebration, of people in our community. ie. honor the people whose land we live on.
- Choose things that make us look
- Colorado History
- Colorado river
- Connection to outdoor recreation
- Consensus
- Contemporary, doesn't all need to be historical
- Contrasting Ideas in Harmony
- Creative
- Cultural Heritage
- Cultural Heritage highlighting the different ethnicities that came before us and that helped to build Glenwood Springs
- Culture - celebrating the Ute
- Culture/History
- Definitely nature
- Designed/crafted by valley-based artists
- Diversity
- Diversity of cultural history of residents
- Diversity of cultures
- Diversity, expressed by colors
- Doc Holiday
- Eagles since we have so many
- Earth health
- Encouraging local artists to be included in the process
- Environmental Sustainability
- environmental/educational, with the water in mind
- Faces
- Fall
- Fishing
- Fishing, interactive fountain, kayaking,
- Floral and fauna sculptures
- Fly Fishing Gateway
- Focusing on our beautiful environment
- Forest
- Fountain at 6th street and hotel Colorado
- Fun children themed by playgrounds (possibly functional)
- Functional and historically relevant
- Functional Art
- Functional art -- to make necessary public items more fun!
- Functional art, definitely benches or chairs for tourists
- Functional fountain for children to play
- Geology
- geometric design and nature
- Healing waters
- Health
- Heritage
- Heritage Native American
- Heritage RR and Ranchers
- Hiking
- Hispanic
- Hispanic heritage
- Historic buildings
- Historical
- historical figures / community founders
- History
- History - sculptures or educational landmarks of the people who've been predominant members of Glenwood Springs throughout the history of Glenwood

## Springs

- history is a theme that needs work (i.e. consistent representation)
- History of Glenwood
- History of Hot Springs
- History of the Valley
- Honoring Ute indians
- Hope
- Horse back riding at Sunlight Resort
- Hot springs
- Hot Springs History
- I love children's art
- I love the butterfly concept that has started developing downtown
- I love the natural art like the butterflies that have recently been installed in downtown
- Inclusion, acceptance
- indian heritage
- Indians
- indigenous cultures
- Indigenous peoples
- Innovative
- Inspired by our local natural beauty - rivers, mountains
- Intellectual Curiosity
- Interactive - interactive art can be a rare treat
- Interactive art installations
- Interactive art is a tourist attraction
- interactive natural "art" where people can weave plants/twigs into fences or lattices
- Interactive pieces and pieces appealing to children and sensory
- Joyful, colorful art - nothing rigid or harsh
- Keep ideas open NO Theme
- Kinetic sculpture / interactive - at Sayre park playground
- Landscape art
- Landscape Artists. Grant
- Landscape murals
- Large honorarium to artists for better quality art
- Latino community
- Latino representation
- Light
- Local historical people
- local history, Native American culture, Ute culture and art
- Local wild animals
- Love Glenwood
- Love the painted utility boxes with animals/ nature
- Love to see nature/plants painted on buildings
- mining history
- Modern
- modern but somewhat representational
- More contemporary-unity type theme
- More flower sculptures like the sunflowers downtown
- Motivational/Kindness
- Mountains
- multicultural intersection
- Murals
- Murals to beautify blank walls around town
- Music
- Native American
- Native American art
- Native American Heritage
- Native American History/Ute
- Native Wildlife
- Natural surroundings
- Nature
- Nature conservation
- Nature-abstract as we already are surrounded by real nature
- non-representational
- Not palette buffalos
- Old west heritage
- Old West History
- Other historic persons related to Glenwood
- Outdoor activities
- Outdoor art park
- Outdoor sports
- People
- please nothing with a hokey Wild West vibe
- recreation that draws so many to our valley is also neglected
- Recreation(rafting/skiin)
- Recycling structure sculpture . Medium sized scale
- Regional birds
- Regional plants/flowers
- Regional trees
- Representations highlighting indigenous peoples from the are
- River theme
- River walk described above
- Rivers intersecting, like culture within our community.
- Rock climbers climbing walls

- Rotating sculptures (annually)
- Sculpture from nature i.e. rocks, wood including branches
- Should go with what town is about
- Showcase more art from the Ute Indians
- Ski/Snowboard or Hot springs specific
- Small Town History
- Social justice
- Something that honors the Ute Indians or made by a Ute Indian
- Something that sets Glenwood from Carbondale or Basalt
- Something that teaches us about history and culture of the area
- Something to honor our Latino community
- South canyon historical site incorporated with biking trails
- Sports
- Spread Love
- Stagecoach and train engine replicas at north landing
- Stewardship environmental
- Storm water gardens where water may propel a sculpture during rain storms or run off
- Strawberries
- Subjects representative to the area
- Summer
- Summer camp for kids with horses and hiking at Sunlight
- Summer camp for special needs
- Temporary thematic
- The West
- Tourist attraction murals
- Train heritage
- Two Rivers/Water, the lifeblood of the Western Slope
- Unity
- Using the Rivers as a source of inspiration
- Variety of art - not predetermined
- Various Holiday festivals
- Vibrant Life
- Water
- Water activities
- Water fountains
- Water park in town
- Water representing the hot springs and rivers
- Wellness
- Western architecture and history
- Western Culture
- Western historical ideas
- Western lore
- Whimsical
- Wild west
- Wildlife
- Wildlife
- women who have made a difference

**Question 10: What types of public art would you like to see more of in Glenwood Springs? (select all that apply)**

- Murals: 79.31%
- Sculptural: 77.24%
- Functional Art (signage, bike racks, benches etc.): 68.97%
- Lighted Installations: 44.14%
- Mosaics: 40.00%
- Glass Works: 31.03%
- Multimedia: 25.52%
- Textile: 16.55%

**Comments:**

- "Functional" gets cheesy and unsophisticated fast
- All in the right places. Again be wary of sight distancing for motorized vehicle and pedestrian safety .
- Any that are free to exhibit or privately donated with no cost to the city/our citizens.
- Anything and everything •
- Anything but bison made of pallet wood. That was an embarrassment to every citizen of GWS.
- Events held by knowledgeable people in diverse fields.
- Flowers
- Hanging above things not sitting on the ground
- How about projected light show under the grand bridge, like Montreal's Notre-Dame Basilica <https://www.youtube.com/watch?v=ucO3t7PnbP4>
- I appreciate it all!
- I think functional art is great. Also I think murals have been popular with tourists and locals in the downtown core (e.g. the butterfly). Murals could cover the local past and present - I'd like to see historically accurate and culturally representative depictions.
- I would like it if the holiday lights were only up during the holidays.
- Include student art
- interactive immersive public activities
- Interactive kinetic art, musical installations
- Iron work along main bridge's edges and nice benches.
- Kinetic art, temporary art installations
- Lighted installations should be low light, and not disrupt the night sky or view of the stars. Limited to particular urban style areas - not parks.

- live music
- Lots of lighting now downtown so need to be careful with adding more clutter there, but some well positioned art would be a positive addition. Please work to preserve the Fred Haberlein mural on corner of 9th and Grand should it ever be threatened, it's of a gorgeous place on the Flat Tops and Fred was a Glenwood classic.
- Loved reused/recycled metal sculpture
- more benches, and please eradicate any "anti-homeless" type benches or architecture, make downtown and side streets more inviting
- Murals!
- My daughter is an artist. They had life size cows to paint that later were auctioned off. You submitted your idea to paint the cow and if your idea was picked you got one to paint. They were Jared judged and auctioned off to the highest bidder and lots of businesses kept them for an outside display
- Need comfortable seating under the bridge.
- None, feel money could go for much better use than public art.
- once again, which not what and on question 6 also
- PAINTINGS
- Really none; definitely NOT lighted. But if we must add more public art it should be unobstrusive and reflect the old west history of GWS and the RFV and Lower Colorado Valley
- Restore the mural on the brick wall in the walkway by Smoke restaurant. Save it.
- Sidewalk art downtown
- Street art mural, graph, junk art, Rotating installations some with functional applications in terms of optimally ethical trail, river, bike, camping etc... behavior for clean usage.
- Student art included in art mentioned above
- The historic photo ops I mentioned hold a multitude of cobenefits. Not

just cliché Doc stuff, but the daily life of Glenwood back in the day. Unique, eye opening, rich experiences

- Trees, trees trees!!
- Under functional art- beautiful lighting of pathways to wherever
- Walking children's books along the River Trail. A page or two at every stop with the ability to change out the books – did this in Parker, CO
- Water/light installations
- Whatever the choice, it needs to be of the highest quality, which hasn't always been the case.
- would love to create a Christo-like Gates install that is almost too epic to imagine. Almost :)

**Question 11: Do you live, work, and/or visit Glenwood Springs? (select all that apply)**

- Live: 35.29%
- Work: 4.58%
- Live & Work: 54.90%
- Visit: 5.23%

**Question 12: Please select your age range:**

- Under 18: 0.00%
- 18-24: 1.31%
- 25-44: 40.52%
- 45-64: 33.33%
- 65-84: 22.88%
- 85+: 1.96%

**Question 13: What is your ethnicity?**

- Hispanic / Latino: 9.09%
- Non - Hispanic / Latino: 90.91%

**Question 14: What is your race?**

- White: 94.52%
- Black or African American: 0.00%
- American Indian or Alaska Native: 0.00%
- Asian: 0.68%
- Native Hawaiian or Pacific Islander: 0.68%
- Other: 4.11%

DESIGNING LOCAL

# GLENWOOD SPRINGS

## PUBLIC ART MASTER PLAN

2021

# 01.

## INTRODUCTION

Arts and culture is at the heart of ensuring Glenwood Springs remains a diverse and prosperous community for years to come. The Glenwood Springs City Council and Mayor have tasked the Arts and Culture Board with the responsibility of promoting awareness, access, and appreciation of the fine, performing, and practical arts for City residents and visitors.

Key to promoting Arts and Culture in Glenwood Springs is the management and future expansion of public art in the community. The plan details the story of how the existing public art in our community came to be as well as lays out a roadmap for where public art will go in Glenwood Springs in the future.

The Arts and Culture Board believes that arts and culture are integral to vibrancy and the social fabric of our communities. Just as mortar binds building blocks, arts and culture brings people together and encourages meaningful connections. This plan is just the beginning as we set forth to achieve our goals and to further art in Glenwood Springs not just for arts sake, but as an opportunity to improve our economic vitality and ensure a vibrant more livable Glenwood Springs.

The Glenwood Spring Public Art Master Plan lays the foundation for the future of public art in our community and by extension prepares us to tell the next chapter of our story. Our public art is a tool to speak to visitors, residents, and all those seeking out our community from across the state or across the nation- to tell them this is a place where we care about who we are, what we do, and where we came from.

**- The Glenwood Springs Arts and Culture Board**

# HISTORY OF PUBLIC ART IN GLENWOOD SPRINGS

Recognizing the social and economic benefits realized through an aesthetic experience in public spaces, the Glenwood Springs public art program's purpose has been to add high quality, site-specific artists' work to the natural and built environments. In 1983, the City installed a number of donated art pieces and engaged in partnerships with local artists to mount several murals in the downtown area over the following decade. The commissioning of art pieces in the early 2000's for newly constructed public buildings and later the creation of an Arts and Culture Board began discussions of allocating a percentage of eligible City project funds for commissioning artists for services and site-specific artwork to be integrated into new construction projects.

In 2017, the City of Glenwood Springs created a task force of local artists and stakeholder groups to hire a renowned artist to work with the community to design a sculpture for the historic 6th Street corridor with the help of a National Endowment for the Arts (NEA) Art Works grant. Not only did this process result in a beautiful 10,000-pound Yule Marble sculpture entitled "Tubing on the River," but also inspired the City to continue to engage these local arts and community groups in the development of a Public Art Master Plan to guide future efforts to install public art, boost arts and cultural programming, and celebrate history around the community. This call for art process inspired the desire for more consideration to public art opportunities and thoughtful placemaking throughout the city.

Glenwood Springs' growing public art collection includes over 50 permanent artworks, in various mediums, in parks and City buildings, skate parks, recreation centers, sidewalks, city streets and plazas throughout the city. The City and County Building houses several unique paintings, photographs, prints, and sculptures. In recent years the City of Glenwood Springs has partnered with several agencies to integrate public art in their city-wide project areas. The future is bright for public art in Glenwood Springs!

We invite you to discover these art installations as you explore the downtown.

Los invitamos a descubrir estas instalaciones de arte y a explorar el centro de la ciudad.

# ESSENCE FRAMEWORK

The purpose of the Essence Framework for Glenwood Springs is to celebrate all that makes the city unique and special and to help artists and visionaries communicate that essence to the outside world. The concepts, descriptors, and images come together to create a family of components that speaks to the identity and story of Glenwood Springs.

Glenwood Springs is a town beloved by residents and visitors alike. With a mix of history, natural beauty, and forward momentum standing out among its peers in the Roaring Fork Valley, Colorado and beyond.

“It is a mixture of outdoor recreation, culture, history and natural beauty.”

– Survey Participant

## HEALING WATERS, HEALTHY HOME

From the indigenous people of the area to contemporary travelers, the Hot Springs and Vapor Caves of Glenwood Springs have cemented a culture of wellness. Access to outdoor recreation and sports have ensured that legacy will live on into the future.

"Two gorgeous hot springs situated right in town gives both individuals and families the opportunity to soak in their glory."

- Survey Participant

### **Descriptors:**

- **Yampah**
- **Aerial Adventures**
- **Gold Medal Waters**
- **Sunlight Mountain**
- **Mountain Biking**

# CONFLUENCE OF EVOLUTION

Glenwood Springs is a city where the historic environment meets with a vibrant future. Forward thinking and comfortable yet ever moving forward.

"An evolving identity of old and new..."  
- Survey Participant

## Descriptors:

- Energetic
- Relaxed Atmosphere
- Resilient
- Authentic
- Family Focused
- Diversity

## TIERRA DE OPORTUNIDADES

Whether for the early Anglo-American settlers of the Old West or modern-day newcomers, Glenwood Springs was and remains an accessible small town.

"It's the little mountain town in Colorado that's actually livable. It's affordable, it has jobs, it has resources."

- Survey Participant

### Descriptors:

- **Redstone Coal Baron**
- **Voces Unidas de las Montañas**
- **Trainloads of Tourists**
- **Hospitable Freedom**
- **Friendly and Welcoming**

# THE GOOD, MOUNTAIN LIFE

The slower paced life in Glenwood Springs is influenced by the glory of nature and the high quality of life in the community.

"Perfect blend of small town comfort with surprising amenities"

– Survey Participant

## Descriptors:

- Laid Back
- Small Town Vibe
- Kind
- Hidden Jewel
- Colorado Shangri La
- Embracing

## ACCESS ABOUND

A railroad town with nearly every modern form of transportation, Glenwood Springs is especially accessible and the nexus for travel in the Roaring Fork Valley and beyond.

“The gate to the beautiful Roaring Fork valley and home of the majestic Glenwood Canyon.”

– Survey Participant

### Descriptors:

- **Denver and Rio Grande Railroad**
- **VelociRFTA**
- **Colorado Midland Railroad**
- **I-70's 'Final Link'**
- **Rio Grande Trail**

# HOT WATER AND TALL ROCKS

The stunning natural environment of Glenwood Springs has drawn generations of residents and visitors of the community. The geology of the community is its most striking feature.

"Every turn is a different eye-catching view."  
– Survey Participant

## Descriptors:

- **Western Slope**
- **Roaring Fork**
- **Blue Skies**
- **Glenwood Canyon**
- **Colorado River**

# 02.

## **ESTABLISHING THE PUBLIC ART PROGRAM**

Though the City of Glenwood Springs has long had public art, a formal city-led program has not been established. Through the following steps, the City of Glenwood Springs will formally establish a Public Art Program. The Program will be governed by sound and transparent policies and procedures that will ensure continued success for the program.

## **Step 1: Enhancing the Role of the Arts and Culture Board**

The Arts and Culture Board is the principal body for the promotion of the arts in Glenwood Springs. The board is empowered to promote the arts within the city and advise the City Council on matters related to the implementation of arts and funding. In order to formalize the Public Art Program additional powers and duties should be given to the Arts and Culture Board.

### **Additional powers and duties to be added:**

- To review and approve proposed public art that is on City property or funded by the City.
- To make recommendations to the City Council for the procurement of public art and for the selection of artists for public art commissions.
- To advise City staff on the development of calls for artists and the establishment of selection committees for public art.

## ***Composition of the Board***

Eight (8) members, at least five (5) of which are residents of the City, three (3) of which may reside outside of the City, and one (1) of which being a youth representative under the age of eighteen (18) or not having completed his or her final year of high school. Those representatives residing outside of the City must reside within the 81601 postal zip code area, own real property or a business within the City, or attend school within the City.

## ***Existing Power and Duties of the Board***

- To promote awareness, access, and appreciation of the fine, performing, and practical arts for City residents and visitors.
- To advise the City Council in connection with all matters relating to the artistic and cultural development of the City.
- To provide opportunities for cultural and art experience and education for children and adults.
- To promote increased interaction and collaboration among artists, art-related organizations, and opportunities for growth and exposure.
- To promote knowledge and appreciation for cultural forms of artistic expression.
- To make recommendations to the City Council with respect to fundraising and annual budget appropriations for the arts.
- To advise and consult with local arts groups as requested by such groups or by the City Council.

## Step 2: Creating the Glenwood Springs Public Art Ordinance

Currently the Public Art Program is an informal outgrowth of the desire for more public art in the city. By adopting the Glenwood Springs Public Art Ordinance, the City Council will formalize the Public Art Program and set it up for future success.

The proposed Public Art Ordinance will do the following:

- Establish a definition for 'Public Art'
- Create a Public Art Acquisition Account
- Define the Relationship between the Public Art Program and the Arts and Culture Board
- Adopt the Public Art Master Plan
- Direct the Arts and Culture Board to Adopt the Public Art Policy as outlined on in the Appendix.

## Step 3: Implementing Public Art Policies

In order to create an efficient, transparent, and successful Public Art Program, the policies outlined below have been developed for the Arts and Culture Board. These will operationalize the Public Art Program as established by the Public Art Ordinance and should be used as the basis for decision making for the program.

### **Introduction**

This section lays out definitions for the remaining policies.

### **Roles and Responsibilities**

This section details who are the responsible parties for public art in Glenwood Springs and the role that each plays in executing a successful public art program.

**Work Plan**

This policy creates a requirement for a yearly Work Plan for the Public Art Program and defines how the work plan will build consensus on what the program can accomplish each year.

**Use of Funds**

This policy details how Public Art Program funds may be used throughout the development and implementation of public art projects.

**Acquisition Policy**

This policy establishes the practices for acquiring artworks through the Public Art Fund. This detailed policy will ensure a transparent process for acquiring artwork and favors open ended selection processes in order to promote artistic excellence and further the goals and strategies of the program.

**Collection Management Policy**

This policy establishes the management practices of artworks acquired through the solicitation and donation processes. These pieces are considered part of the City's Permanent Collection and must be cared for in accordance with the Maintenance Policy. The Collection Management Policy is intended to maintain the value of the City's Permanent Collection and guard against inappropriate disposal of any of its pieces.

**Donation Procedures**

This policy creates procedures for individuals or organizations who request to donate artwork to the City. These donations may be considered on a case-by-case basis and requests for consideration shall be made to the Arts and Culture Board.

**Maintenance Policy**

This policy establishes the procedure for maintenance of the future public art collection as well as for pieces currently in the collection. Direction for surveying the collection, working with future artists to establish a maintenance plan for any commissioned work, and inspection guidelines are included.

**Mural Guidelines**

These guidelines explain the various ways murals may be implemented in Glenwood Springs and who will be responsible for approval (or if approvals are needed) depending on the ownership of the site and the funding for implementation of the murals.

## Step 4: Permanent Funding for Public Art

In order to achieve the vision of public art in Glenwood Springs, additional funding will be needed. The following are a series of public art funding mechanisms that could be implemented in tandem or independently.

### **Percent for Art in Private Development**

This proposed public art requirement would apply to developments subject to the Common Open Space requirements as stipulated within the development code (Municipal Code #070.040.040).

#### *Option 1: On-site Artwork.*

- A. Submit documentation evidencing the escrow of funds for a work of Art valued in an amount not less than one (1) percent of the total construction costs.
- B. Submit an application for approval of the work of Art.
- C. The required amount would be discounted by 10 percent if a Garfield County based artist is used. The city will maintain a list of pre-qualified artists in order to assist developers in identifying artists.

#### *Option 2: Contribute to the Public Art Acquisition Account.*

- A. Contribute an amount equal to 80 percent of the one (1) percent of the total construction costs for deposit to the Art in Public Places Fund.

#### *Option 3: On-site Artwork and Contribute to Public Art Acquisition Account*

- A. Submit documentation evidencing the escrow of funds for a work of art valued in an amount not less than one (1) percent of the total construction costs, up to \$100,000.00.
- B. Contribute 80 percent of the balance of the one (1) percent of the total construction costs for deposit in the Art in Public Places Fund.

#### *Location of Artwork if Option 1 or 3 is selected:*

Artwork must be located in an exterior place defined as any place, public or private, outdoor and exterior to buildings or structures and exposed to public view, including, but not limited to, buildings, and green spaces.

### **Percent for Public Art in City Capital Improvement Projects**

The Percent for Art legislation will encumber 1 percent of CIP (publicly-funded capital improvement projects) per year for the commissioning of public Artworks, which will usually be sited in, on, or adjacent to the building or project being constructed. The Percent for Art ordinance guarantee a funding stream for public art projects regardless of what happens to city budgets or arts funding. The policy also guarantees that public art projects are planned each year, as long as CIPs are underway and municipal construction continues.

All capital construction projects qualify except the following: regular road maintenance, underground infrastructure, and underground utility projects with no above- ground components other than roads. Projects with underground infrastructure, including utility projects, should be included when there are visual elements of the project above ground. The total budget of the project should include all underground components.

#### *Types of potential Capital Improvement Projects to Include Public Art:*

- Roads
- Streetscape Projects
- Fire and Police Stations
- Parks
- City Facilities

# 03.

# **OPERATIONALIZING THE PUBLIC ART PROGRAM**

With the Public Art Program established through the steps in the previous chapter, the City and the Arts and Culture Board will need to move forward with operationalizing the program. Goals and strategies to operationalize the program are laid out in the following sections.

## Section 1: Goals

The City of Glenwood Springs and its partners share a commitment to intentionality when implementing public art in Glenwood Springs. As a community dedicated to ensuring both maximum livability for its residents and to supporting tourism and the wider economy public art can play a key role.

On the following pages are the core goals of the Public Art Program, in no specific order. These goals should be used when implementing public art projects and though no one project will accomplish all goals, projects should satisfy one or more of the goals.

### **Goal 1: Connect people to the identity of our community.**

Public art should foster a connection between the City of Glenwood Springs and the people who live, work, and visit the community.

### **Goal 2: Celebrate and enhance our community's natural environment and beauty.**

The splendor of the mountains and rivers are one of the most striking features of Glenwood Spring. Whatever its connection to the natural world, public art should strive to include it.

### **Goal 3: Connect to a culture of wellness.**

Whether it's a hot spring or a mountain climb, wellness is in the lifeblood of the community. Public art should contribute to that culture by encouraging interaction and physical activity.

#### **Goal 4: Build upon our rich heritage.**

There is no shortage of history to build upon in Glenwood Springs and public art can be used to help share those stories in new and contemporary ways.

#### **Goal 5: Extol our cultural diversity.**

As a community with a Native American legacy from the time of the Utes and growing non-native populations, particularly Latinos, our public art should tell the story of all those who make Glenwood Springs a vibrant community, particularly those who are underrepresented.

#### **Goal 6: Engage a sense of playfulness and whimsy.**

Public art in Glenwood Springs has the potential to move beyond the traditional and to inject creativity and fun into public spaces.

#### **Goal 7: Create place-based economic development.**

Targeted interventions of public art can be used to help enliven areas that are in need.

## Section 2: Strategies

The following strategies can be used in order to further the Public Art Program. Some strategies are continuations of existing approaches while others will involve new initiatives for the Public Art Program.

### **Strategy 1: Continue Partnership with the DDA and Downtown Business Owners**

The City has a strong ongoing partnership with the Downtown Development Authority and Downtown Business Owners and has implemented successful projects such as 'Glenwood Wings.' The Public Art Program should continue this successful partnership.

### **Strategy 2: Apply for Colorado Creative District Designation**

The City of Glenwood Springs should apply for designation for the Downtown area as a Creative District. Key benefits of the designation include recognition, market, technical assistance, and grant opportunities.

#### *Overview of the Colorado Creative Districts program*

The Colorado Creative Districts program certifies communities that contribute to our state's economy through creativity, culture, and the arts. The program's goal is to help communities increase jobs, incomes, and investments in creative places.

Colorado Creative Districts share resources and learning among districts. Communities also receive financial support, technical assistance, and training programs.

Benefits of the program include:

- technical and professional assistance
- increased visibility through news stories about how creativity is changing Colorado through the work of these districts
- two highway signs placed on state highways near districts
- access to statewide economic data on the impact of Creative Districts
- access to the Western States Arts Federation (WESTAF) Creative Vitality Suite, an online platform for creative economy data

A year after certification, districts can apply for the technical and professional assistance grant for projects and activities that support strategic goals.

### **Strategy 3: Create a nature based public art series**

Glenwood Springs existing public art is primarily focused on the Downtown area. Though the investments Downtown are entirely justified the addition of a nature focused public art series can promote public health, bring attention to issues relating to the environment, and enhance interactions and memories for visitors to Glenwood Springs.

### **Strategy 4: Invest in iconic public art in existing public spaces.**

Like "Tubing on the Colorado" additional iconic public art in Glenwood Springs can work to enhance existing public spaces and draw visitors to different parts of the city.

### **Strategy 5: Utilize and promote local artists.**

There are a large number of artists in Glenwood Springs and the surrounding areas and the City should work to create opportunities for these artists when possible. Due to the nature of public art, many large commissions may utilize national public artists, but the City should ensure to create smaller scale opportunities geared specifically for local artists. The City should also work to promote public artists in campaigns and other promotional material.

### **Strategy 6: Art and Culture campaign with Visit Glenwood Springs.**

Visit Glenwood Springs does a remarkable job promoting the City and all it has to offer. The Public Art Program should partner with Visit Glenwood Springs to specifically promote the City as an arts focused destination. Additionally the City should partner with other Roaring Fork Valley cities to promote the region as an arts destination.

# 04.

## PLACEMAKING WITH PUBLIC ART

The vision of public art in Glenwood Springs is full of creativity and intention and at this intersection lies the concept of placemaking. Glenwood Springs will use public art as one of its tools for placemaking that will result in more vibrant public spaces that residents and visitors will naturally be attracted to and enjoy. This chapter contains community selected locations for public art along with Big Ideas for the implementation of public art in Glenwood Springs.

"Placemaking inspires people to collectively reimagine and reinvent public spaces as the heart of every community. Strengthening the connection between people and the places they share, placemaking refers to a collaborative process by which we can shape our public realm in order to maximize shared value. More than just promoting better urban design, placemaking facilitates creative patterns of use, paying particular attention to the physical, cultural, and social identities that define a place and support its ongoing evolution."

-Project for Public Space

# COMMUNITY SELECTED LOCATIONS

## COMMUNITY GENERATED LOCATIONS INCLUDE

14th St Pedestrian Bridge  
 27th and Midland  
 27th Street Bridge  
 27th Street Roundabout  
 6th Ave Roundabout  
 8th to 11th in core  
 Along the Rio Grande Trail  
 Centennial Park  
 Bethel Plaza  
 Cooper Ave between 7th and 8th  
 County Clerk and Recorder  
 Courthouse

# BIG IDEAS

The following pages are filled with big ideas meant to excite and inspire. These proposed projects may be implemented as suggested, modified, or may just serve as inspiration for Glenwood Springs and its residents as we collectively implement the public art program.

## Idea 1: Off the Wall Mural Festival

Painting en plein air or outdoors has a storied history. Combining the concept with Glenwood Springs' recent successes with street murals and painting en plein air into an event or festival could bring together some of the best facets of the community. The event could be held in and around Glenwood Springs with artists set up at one or even a number of locations that showcase the superb natural beauty of the area.

Artists could be paid a stipend and the murals could be placed at locations in Downtown Glenwood Springs for display and rotate each year. Artwork could then be sold to help support future public art initiatives or the festival itself.

## Idea 2: Rio Grande Art Trail

Glenwood Springs, RFTA and other Roaring Fork Valley Partners have made an impressive commitment to construct the Rio Grande Trail. Aspen and Carbondale are particularly well known in and outside the region for their commitment to the arts and through this plan Glenwood Springs intends to redouble its commitment as well. By working with all the jurisdictions and partners in the region to create an art trail along the Rio Grand Trail, the region can further encourage cycling and cultural tourism.

A Rio Grand Art Trail may have specific focal points or themes such as the environment, natural world, and history or may focus on artist driven work that engages visitors and locals alike.

Specific Locations in Glenwood Springs include:

- Glenwood Springs Elementary School
- Glenwood Springs High School
- Glenwood Springs Dog Park
- Grand Avenue
- City Boundary

## Idea 3: Art on Top

Glenwood Springs is the quintessential mountain town and the nearby trails and peaks are (at a minimum) the city's tallest assets. Though many of the peaks and vistas are outside city-limits the city has a stake in its adjacent assets and attractions. Public art, situated at prominent locations on trails or other viewpoints on nearby mountains could promote health, recreation, and tourism in the city. Partnerships could be created with local, state and/or federal partners as needed.

Sensitivity towards the natural environment and view-sheds are highly important therefore any artwork should take this into account. Art could also be created that would be visible only from above on view points at higher elevations.

Inspirations Include:

- Tipit Rise Art Center (pictured below)
- Red Mountain Trail 'Hike to the Cross'

## Idea 4: Jurassic Art

The quirky branding of VelociRFTA is not the only thing that makes the bus rapid transit (BRT) system that connects the Roaring Fork Valley unique. It was the first and perhaps as of this publication, the only rural BRT system in the country. At its launch in 2013 RFTA placed temporary giant eggs and dino footprints at stops throughout the system. Using this as inspiration, the city could implement small scale public art at spots throughout Glenwood Springs to promote ridership, assist with way-finding, and to add fun and whimsy to the daily commute. Small paths could be created in the sidewalk to guide visitors from stops to the downtown business district and Bethel Plaza.

## Idea 5: Natural Playscape

Using wood or other found materials artists around the country create stunning and ephemeral outdoor works of public art. This art is particularly well suited for natural environments that need protected but also injected with public art. These installations make great play areas for young and old and in Glenwood Springs and could be well suited to the many parks and outdoor areas throughout the city. A particular location of interest is Two Rivers Park.

## Idea 6: River Art

Though logistically challenging due to the many entities involved, artwork in one or both of Glenwood Springs rivers (or at their confluence) would be particularly impactful. This would be a draw for locals and tourists alike and could be created with low impact materials if needed.

## Idea 7: For Kids by Kids!

Engaging the children of Glenwood Springs to create art around the community is not only a great opportunity to enliven the city but also to involve and engage the youth of the community. A variety of opportunities exist to have artwork created for by kids for kids (and adults too!).

Ideas include:

- Rotating art gallery
- Mural location that could rotate yearly
- Youth art installations at art festivals
- Capstone opportunities for seniors

## Idea 8: Poetry in the Streets

Combining poetry and street art allows for a great way to engage the literary community and enliven the streets of Glenwood Springs. Local poets could be commissioned to write short poems that would then be placed on sidewalks around Glenwood Springs using spray paint, etching, chalk or some other method. Poems could be themed or general and could be targeted in implementation or placed throughout the city.

## Idea 9: Local Artist Database

In order to assist individuals and businesses who are seeking to commission artwork by local artists, particularly developers impacted by the proposed Percent for Art Ordinance, the City should create a Local Artist Database. Creating a local artist database would allow for easier selection opportunities and connect those seeking art with artists.

The database would be updated yearly through an RFQ process. Artists would be required to submit the needed information yearly.

## Idea 10: Activating the Bridge

The Grand Avenue Bridge is a vital link between Downtown Glenwood Springs and the many attractions across the Colorado and I-70. The bridge along with the 7th Street Plaza below provide a canvas for activation by the arts, both visual and event based.

Ideas for Activation include:

- An Outdoor Art Show that takes place along the bridge
- Additional rotating murals along the bridge supports
- Plein Air art events
- Music on the Bridge

DESIGNING LOCAL

**City Council**  
**STAFF REPORT**  
**City of Glenwood Springs**  
**October 7, 2021**

**Agenda Item:** Resolution 2021-28: Roaring Fork School District Mill Levy Endorsement

**Action Requested:** Consider whether Council wants to issue a letter of support on a mill levy override ballot question for the Roaring Fork School District.

**Department:** City Administration

**Presented By:** Debra Figueroa, City Manager

**Background Info:** The School Board voted unanimously in August to put a question on the ballot that would enable it to earn up to \$7.7 million annually with the primary focus of raising employee wages to assist with recruitment and retention.

**Issues:** NA

**Staff Recommendation:** Staff defers to Council

**RESOLUTION 2021-28**

**A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF  
GLENWOOD SPRINGS, COLORADO TO ENDORSE YES ON 5B**

**WHEREAS**, we know that teachers and staff members who work with students in the Roaring Fork School District have the greatest impact on their learning; and

**WHEREAS**, Roaring Fork School District has the third most expensive cost of living among all 178 Colorado school districts yet ranks in the bottom third of per-pupil funding under the State's school finance formula; and

**WHEREAS**, this underfunding of our schools makes it impossible to pay competitive wages with RFSD ranking 23rd in average teacher salaries; and

**WHEREAS**, this has caused very high staff turnover rates and difficulty filling positions; and

**WHEREAS**, this has resulted in high numbers of teacher and staff vacancies in the 2021-2022 school year; and

**WHEREAS**, the staffing crisis due to low wages is already causing cuts to programs and services,

**WHEREAS, NOW, THEREFORE, BE IT RESOLVED** that the City of Glenwood Springs endorses a yes vote for 5B on the November 2021 ballot to better pay our teachers and staff at Roaring Fork School District,

**NOW, BE IT FURTHER RESOLVED** that the campaign We Are RFSD has permission to use our endorsement publicly.

INTRODUCED, READ AND PASSED THIS \_\_\_\_ DAY OF OCTOBER 2021

CITY OF GLENWOOD SPRINGS, COLORADO

# City of Glenwood Springs Community Survey

---

September 7<sup>th</sup> to 22<sup>nd</sup>, 2021

# Survey Objectives

The objectives of this community survey were to measure and understand the opinions of Glenwood Springs residents regarding city services, programs, priorities, and quality of life aspects.

# Survey Methodology

- Magellan Strategies are pleased to present the results of a survey of 861 residents in the City of Glenwood Springs, CO. Survey data collection included sending an MMS text message to 3,478 residents, posting a survey link on the city's website, promotion on city social media channels and posting a QR code at City Hall and the Community Center.
- Interviews were conducted from September 7<sup>th</sup> to 22<sup>nd</sup>, 2021.
- The overall survey responses have a margin of error of +/- 3.15% at the 95% confidence interval. Population subgroups will have a higher margin of error than the overall sample.
- The survey results were weighted to be representative of the demographics of the city's adult population.

Resident Opinion of Top Issues,  
Priorities and Problems the City  
Should Address the Most

# Resident Top Issues, Priorities & Problems

Please describe the top issues, priorities, or problems that you think the City of Glenwood Springs should address in the next three years.

## Common Themes

Affordable Housing

Traffic, Congestion, Road Maintenance

Population Growth, Glenwood Springs is Too Crowded

Homelessness

Building a South Bridge

Childcare, Kids Programs

“Affordable housing is the most important priority that the city should have. We need more housing overall, more housing subsidies and limits on predatory renting practices.” **-Female, 25-29, resident 1-5 years, Ward 1**

“Infrastructure in west Glenwood, roads need to be priority and an emergency plan in the case of disasters. Roads throughout the city need work.” **-Female, 65-74, resident 1-5 Years, Ward 2**

“The population is growing too rapidly. It makes traffic back up and depletes our only grocery store.” **-Female, 30-39, resident 20 Years, Ward 2**

“Over population, development, neighborhood street repair.” **-Male, 40-49, resident 6-10 Years, Ward 3**

“1. Affordable housing (through regulation of Airbnb, encouraging long term ADUs, or funding new projects). 2. Traffic (South Bridge is a good start) 3. Equitable Internet access for all (opening municipal fiber to residential)” **-Male, 40-49, resident 1-5 Years, Ward 5**

Re: City of Glenwood Springs Community Survey Summary

This is a summary of an online survey of 861 respondents 18 and older who live in the City of Glenwood Springs, Colorado. The interviews were conducted from September 7<sup>th</sup> to September 22<sup>nd</sup>, 2021. This survey has a margin of error of +/- 3.15% at the 95% confidence interval. The survey data is weighted to be representative of the demographics of Glenwood Springs, CO.

Survey Objective

The objectives of this community survey were to measure and understand the opinions of Glenwood Springs residents regarding city services, programs, priorities, and quality of life aspects.

Resident Top Issues, Priorities & Problems

When asked to describe the top issues, priorities, or problems that residents want the City to address in the next year years, the most common responses focused on issues related to population growth. Specifically, affordable housing, traffic congestion and road maintenance were the top issues mentioned.

### Resident Top Issues, Priorities & Problems

Please describe the top issues, priorities, or problems that you think the City of Glenwood Springs should address in the next three years.

| Common Themes                                      |
|----------------------------------------------------|
| Affordable Housing                                 |
| Traffic, Congestion, Road Maintenance              |
| Population Growth, Glenwood Springs is Too Crowded |
| Homelessness                                       |
| Building a South Bridge                            |
| Childcare, Kids Programs                           |

“Affordable housing is the most important priority that the city should have. We need more housing overall, more housing subsidies and limits on predatory renting practices.” -Female, 25-29, resident 1-5 years, Ward 1

“Infrastructure in west Glenwood, roads need to be priority and an emergency plan in the case of disasters. Roads throughout the city need work.” -Female, 65-74, resident 1-5 Years, Ward 2

“The population is growing too rapidly. It makes traffic back up and depletes our only grocery store.” -Female, 30-39, resident 20 Years, Ward 2

“Over population, development, neighborhood street repair.” -Male, 40-49, resident 6-10 Years, Ward 3

“1. Affordable housing (through regulation of Airbnb, encouraging long term ADUs, or funding new projects). 2. Traffic (South Bridge is a good start) 3. Equitable Internet access for all (opening municipal fiber to residential)” -Male, 40-49, resident 1-5 Years, Ward 5

City of Glenwood Springs Community Survey, 861n, +/-3.15% MoE, September 2021

## Quality of Life Opinion Measurements

The survey found solid ratings for the City of Glenwood Springs on several different broad quality of life measurements, including:

- 80% rate the City as an Excellent (29%) or Good (51%) place to live.
- 74% rate the overall quality of life as Excellent (22%) or Good (52%).
- 70% rate the City as an Excellent (28%) or Good (42%) place to raise a family.

The highest rated measurement was for Glenwood Springs as a place for recreation, as 53% rated the city Excellent and another 31% responded with Good.

The City received its lowest ratings on the following quality of life measurements:

- 12% rate the availability of housing choice as Excellent (3%) or Good (9%).
- 16% rate the traffic flow on major streets as Excellent (1%) or Good (15%).

These ratings are consistent with the “Top Issue” verbatim responses, as residents clearly view affordable housing and traffic/roads-related issues as areas where the City could improve.

## Resident Satisfaction with City Services

Respondents were also asked to indicate their level of satisfaction with the overall value of services for the taxes paid to the City of Glenwood Springs. While not as high as the ratings on the broad quality of life questions, this was still a strong measurement as 56% of respondents are either Extremely (6%) or Somewhat Satisfied (50%).

In many cases there was less satisfaction when asked about specific city services, though often that was because a higher percentage did not have an opinion. However, a majority of 57% of respondents are either Not Satisfied or Extremely Dissatisfied with the City's services for people experiencing homelessness (unhoused), and 64% are either Not Satisfied (29%) or Extremely Dissatisfied (35%) with street repair in the City. Again, there is a connection here between these two issues and the top issues mentioned in the verbatim question at the beginning of the survey.

## Resident Satisfaction with Public Safety, Recreation Services and Events/Outreach

There was generally a higher level of satisfaction when respondents were asked specifically about police services, fire and emergency medical services, parks/trails, the Community Center, and community events and outreach.

## City Budget Priorities

When asked to ranking their top City budget priorities from a list of nine items, “Roadway maintenance, resurfacing, slow plowing and street sweeping” was the clear #1 choice, as 28% of respondents chose that as their top priority. However, when the responses for “Emergency preparedness” and “Fire and emergency medical services” are combined, 32% of respondents rank one of those as their top priority, so clearly there is a desire for the City to address that broad issue as well.

## Opinion of Residential and Commercial Development

Respondents were asked a series of questions regarding the speed of development in Glenwood Springs over the past five years. On the development of new housing for sale, opinion is relatively split, though a plurality of 41% of respondents believe that it has been too fast.

There is more agreement on the speed of the development of new apartments, as a clear majority of 58% of respondents believe that it has been too fast, including a significant 41% who answered “much too fast”.

A question about retail and commercial growth reveals that nearly half (46%) of respondents believe it has been too slow, while another 32% believe that there has been the “right amount” of retail and commercial growth and only 14% believe it has been too fast.

## City Focus on Residents Versus Tourists

With this unique question, we measured how respondents perceive and rate the City's focus on residents versus tourists. A clear majority of 57% of respondents believe that the City is more focused on tourists than residents, while only 7% believe the opposite. A third group of 27% of respondents believe that the City has a balanced focus between the two groups.

## Importance of Specific Land Use and Planning Issues

The below tables show how respondents rated the importance of various land use and planning issues. While all of the listed options were relatively important to respondents, those with the highest level of importance were: small town character and community, water use and conservation, and affordable/employee housing.

## Potential Redevelopment in Retail and Commercial Areas

Respondents were asked whether they support or oppose the potential redevelopment of specific retail and commercial areas in Glenwood Springs. While a clear majority supported each of the five potential projects, redevelopment of Safeway was overwhelmingly popular at 88% support, followed by redevelopment of the West Glenwood Mall at 82%.

## Police, Public Safety and Emergency Preparedness Questions

Overall, a majority of respondents are satisfied with the performance of the Glenwood Springs Police Department (28% Extremely / 39% Somewhat Satisfied) and especially the Glenwood Springs Fire Department (56% Extremely / 28% Somewhat Satisfied). Satisfaction is lower when asked about more specific aspects of police and fire service, but there are no real areas of concern.

However, opinion is somewhat more divided on the question of whether the City is well prepared to respond to an emergency situation such as a wildfire or flood. While a majority of 54% of respondents agree with that statement, a sizable minority of 38% disagree, including 21% who strongly disagree. This suggests that some residents would benefit from communications regarding the City's preparations in the event of an emergency.

## Questions About City Communications

Respondents were asked whether they agree or disagree with the following statement: "The City of Glenwood Springs takes resident input into consideration when making decisions." A majority of 56% of respondents disagree with the statement, while 37% agree.

## Sources of Information about the City of Glenwood Springs

Finally, respondents were asked to select from a list of options how they are currently receiving information about the City of Glenwood Springs. The following graph shows the ranked responses.

## About Magellan Strategies

Magellan Strategies is a national full-service opinion polling and survey research firm. We have provided polling services to municipalities, school districts, local governments, ballot issue campaigns, candidates, government relations firms, and trade associations since 2006.

**Survey Data Collection Methodology**

This survey was conducted by sending an MMS text message to 3,478 residents in the City of Glenwood Springs, CO. Data collection also included a link posted on the City's website and social media profiles and a QR code posted at City Hall and the Community Center. The survey response data was weighted to reflect the demographics of the City of Glenwood Springs.

The interviews were conducted from September 7<sup>th</sup> to 22<sup>nd</sup>, 2021. This survey has a margin of error of +/- 3.15% at the 95 percent confidence interval. Any questions regarding the survey findings or methodology should be directed to David Flaherty or Ryan Winger. They can be reached by phone at 303-861-8585 or by email at [DFlaherty@magellanstrategies.com](mailto:DFlaherty@magellanstrategies.com) or [RWinger@magellanstrategies.com](mailto:RWinger@magellanstrategies.com).

Table 43

T43.1 The City of Glenwood Springs each year makes budget decisions allocating taxpayer dollars toward town services and programs. With that in mind, please rank the following budget items in the order of priority that you would like to see. Ranking a budget item #1 indicates your top priority and ranking a budget item #9 indicates your least or last priority.  
ROADWAY MAINTENANCE, RESURFACING, SNOW PLOWING, AND STREET SWEEPING

Table 43

T43.1 The City of Glenwood Springs each year makes budget decisions allocating taxpayer dollars toward town services and programs. With that in mind, please rank the following budget items in the order of priority that you would like to see. Ranking a budget item #1 indicates your top priority and ranking a budget item #9 indicates your least or last priority.

ROADWAY MAINTENANCE, RESURFACING, SNOW PLOWING, AND STREET SWEEPING

Table 44

T43.2 The City of Glenwood Springs each year makes budget decisions allocating taxpayer dollars toward town services and programs. With that in mind, please rank the following budget items in the order of priority that you would like to see. Ranking a budget item #1 indicates your top priority and ranking a budget item #9 indicates your least or last priority.

Table 46

T43.4 The City of Glenwood Springs each year makes budget decisions allocating taxpayer dollars toward town services and programs. With that in mind, please rank the following budget items in the order of priority that you would like to see. Ranking a budget item #1 indicates your top priority and ranking a budget item #9 indicates your least or last priority.

## FIRE AND EMERGENCY MEDICAL SERVICES

Table 50

T43.8 The City of Glenwood Springs each year makes budget decisions allocating taxpayer dollars toward town services and programs. With that in mind, please rank the following budget items in the order of priority that you would like to see. Ranking a budget item #1 indicates your top priority and ranking a budget item #9 indicates your least or last priority.

| <b>Background Info:</b>      | <p>As part of an agreement to permanently acquire property for 8th Street, the city agreed to several incentives for the eventual development of 406 W. 7th Street in addition to payment for the property. The development incentives are fully identified in the agreements attached and included:</p> <ul style="list-style-type: none"><li>• Counting the conveyed property as full satisfaction of the owner's parklands dedication requirement that is associated with residential development on the owner's residual property. No further parklands dedication would be required</li><li>• Approval of two additional accesses between the residual parcel and the City's riverfront pathway of at least 30 feet in aggregate width including access that wraps around the northwest corner near the existing church structure and the balance of the access as mutually agreed to best integrate the residual parcels with the City's riverfront pathway</li><li>• The City contributing 5 EQR taps for potable water and wastewater upon the date of development, which must be used on the residual property within the 5 year timeframe and run with the title</li><li>• A waiver of any land use application fees charged by the city within the 5-year period</li><li>• And acknowledgement that the acquisition of the property has the potential to interfere with and/or complicate the development of the Owners' residual property. As such, the City will consider in good faith and deal fairly in accommodating the impacts of the Property acquisition and other relevant matters if/when the Owner applies for any variance of setback requirements, design, height, parking and/or other zoning variances driven by said Property acquisition.</li></ul> <p>The property owners state that the coronavirus pandemic and resulting inability to hire contractors/developers impacted their ability to develop the property and are requesting a 2-year extension of the incentives.</p> |
| <b>Issues:</b>               | Staff members note that the incentives for this property were originally intended to be used within 5 years. There is a desire for more parkland within the city and future impacts to the water and wastewater systems are still necessary.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Staff Recommendation:</b> | Staff defers to Council.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## AGREEMENT

This Agreement ("**Agreement**") is made and entered into this 28 day of November, 2016, by and between 406 WEST 7<sup>TH</sup>, LLC, a Colorado limited liability company ("West 7<sup>th</sup>"), and the CITY OF GLENWOOD SPRINGS, COLORADO, a Colorado home rule municipal corporation (the "City") (individually, a "Party"; collectively, the "Parties").

## RECITALS

This Agreement is made with reference to the following facts:

A. West 7<sup>th</sup> is the owner of the real property located in Garfield County, Colorado described in the Quit Claim Deed recorded in the records of the Garfield County Clerk and Recorder at Reception No. 807737 and commonly known as 406 West 7<sup>th</sup> Street, Glenwood Springs, Colorado 81601 (the "Property").

B. The City and/or CDOT has recently constructed a portion of 8<sup>th</sup> Street which physically connects the 8<sup>th</sup> Street Bridge, located westerly of the Property, with 8<sup>th</sup> Street where the developed portion thereof terminated easterly of the now former Union Pacific railroad "wye," located easterly of the Property, and is performing additional work related to the recent construction work. City intends as part of this additional work that a segment of temporary sidewalk cross a portion of the Property.

C. The City has heretofore not negotiated an easement for the temporary or permanent sidewalk with West 7<sup>th</sup>, but the City's and/or CDOT's contractors are mobilized and now ready to construct the temporary sidewalk.

D. West 7<sup>th</sup> granted to the State of Colorado, for the use and benefit of the Colorado Department of Transportation ("CDOT"), a temporary easement on the Property so as to allow CDOT to perform certain work in connection with the physical connection. In exchange for grant of the Temporary Easement, CDOT paid certain consideration to West 7<sup>th</sup> and removed trees on the Property. One of the remaining trees is located within the portion of the Property on which the City will construct the temporary sidewalk.

E. West 7<sup>th</sup> and City desire, through this Agreement, to provide City the right to develop the temporary sidewalk on the Property, and to set forth terms and conditions regarding City's removal of the tree located within the intended sidewalk location.

NOW, THEREFORE, for and in consideration of the mutual agreements, promises and covenants herein contained, and other good and valuable consideration, the parties mutually undertake, promise, and agree for themselves, their respective representatives, successors and assigns, as follows:

1. **Incorporation of Recitals.** The Recitals set forth above are incorporated herein.
2. **Grant of Right.** West 7<sup>th</sup> grants to City the immediate right to remove the tree located within the intended sidewalk location on the Property and to develop the temporary

sidewalk after removal. In consideration of such grant of right, City agrees that it shall pay West 7<sup>th</sup> the sum of \$1,525.00.

3. **Authority.** The Parties have taken all necessary action to authorize the execution, delivery and performance of this Agreement and have the power and authority to execute, deliver and perform this Agreement. The persons signing this Agreement on behalf of the Parties warrant that they have full power and authority to bind the Party for whom the person is signing.

4. **Recording.** Once executed, the City, at its sole option, may record this Agreement in the real property records of Garfield County, Colorado.

5. **Execution in Counterparts; Electronic Signatures.** This Assignment may be executed in several counterparts, including with electronic and/or scanned signatures, each of which will be an original and all of which will constitute but one and the same instrument.

6. **Applicable Law.** This Agreement shall be governed by and construed in accordance with the laws of the State of Colorado.

For assistance you may call us at:  
1-800-829-4933

IF YOU WRITE, ATTACH THE  
STUB AT THE END OF THIS NOTICE.

**WE ASSIGNED YOU AN EMPLOYER IDENTIFICATION NUMBER**

Thank you for applying for an Employer Identification Number (EIN). We assigned you EIN 27-4986103. This EIN will identify you, your business accounts, tax returns, and documents, even if you have no employees. Please keep this notice in your permanent records.

When filing tax documents, payments, and related correspondence, it is very important that you use your EIN and complete name and address exactly as shown above. Any variation may cause a delay in processing, result in incorrect information in your account, or even cause you to be assigned more than one EIN. If the information is not correct as shown above, please make the correction using the attached tear off stub and return it to us.

A limited liability company (LLC) may file Form 8832, *Entity Classification Election*, and elect to be classified as an association taxable as a corporation. If the LLC is eligible to be treated as a corporation that meets certain tests and it will be electing S corporation status, it must timely file Form 2553, *Election by a Small Business Corporation*. The LLC will be treated as a corporation as of the effective date of the S corporation election and does not need to file Form 8832.

To obtain tax forms and publications, including those referenced in this notice, visit our Web site at [www.irs.gov](http://www.irs.gov). If you do not have access to the Internet, call 1-800-829-3676 (TTY/TDD 1-800-829-4059) or visit your local IRS office.

**IMPORTANT REMINDERS:**

- \* Keep a copy of this notice in your permanent records. **This notice is issued only one time and the IRS will not be able to generate a duplicate copy for you.**
- \* Use this EIN and your name exactly as they appear at the top of this notice on all your federal tax forms.
- \* Refer to this EIN on your tax-related correspondence and documents.

If you have questions about your EIN, you can call us at the phone number or write to us at the address shown at the top of this notice. If you write, please tear off the stub at the bottom of this notice and send it along with your letter. If you do not need to write us, do not complete and return the stub. Thank you for your cooperation.

Hello Jenn,

Here is a copy the real property tax and IRS EIN form. (1 of 2)

We would appreciate the City Council's consideration of a 2 -year extension past the date noted on the agreement with the city dated 2018. Due to the pandemic it was impossible to seek out developers or business partners for the construction on our parcel. Now that certain sectors are opening up, the contractors and developers that we have communicated with are not taking on new projects.

This puts us in a tough situation to expedite such a complicated development in a short period of time.

Your and the Council's consideration would be very much appreciated.

We look forward to hearing from you.

## 406 W 7<sup>th</sup> LLC

July 5, 2021

Gretchen Ricehill  
Senior Planner, Community Development Department  
City of Glenwood Springs, CO

Transmitted by e-mail: [Gretchen.ricehill@cogs.us](mailto:Gretchen.ricehill@cogs.us)

RE: Request for Extension of Covenants for 406 W 7<sup>th</sup> LLC Property

Dear Gretchen:

On June 7, 2017, the owners of the 406 W 7<sup>th</sup> LLC entered into an agreement to relinquish a parcel of land to the City of Glenwood Springs. Along with payment for the property the City offered several development incentives for the residual parcel adjacent to the riverfront, these covenants are due to expire on June 6, 2022.

Due to the impact of COVID-19 we have been unable to meet with potential contractors and/or developers in pursuit of developing this property. Our ability to fund this project has also been impacted substantially due to the pandemic.

In light of this situation, the owners would like to request an extension of 3 additional years from the date of the incentives expiration in order to explore the best commercial/ residential options of this very unique property.

Please contact me if you require any additional information or if any further action is required by me in support of this requested extension.

Thank you,

Barbara Bown Wyatt  
Manager

**AGREEMENT FOR IMMEDIATE POSSESSION  
AND CONVEYANCE OF PROPERTY INTERESTS**

**THIS AGREEMENT** is made and entered into this 7<sup>th</sup> day of June 2017, by and between 406 West 7th, LLC (also referred to herein as "Owner"), a Colorado limited liability company, and the City of Glenwood Springs (also referred to herein as the "City").

**RECITALS:**

1. The City of Glenwood Springs has the power under the Colorado Constitution to acquire property by eminent domain. This includes taking property that is needed by the public for transportation, drainage, roadways, or recreational purposes.
2. The City of Glenwood Springs has been impacted by significant construction, including the Grand Avenue Bridge Project, which has intensified traffic pressure on City streets and pedestrian rights of way. The City has responded, in part, by emphasizing non-motorized, bicycle, and pedestrian traffic. The City has also evaluated its vehicular traffic, transportation, and storm water drainage needs.
3. A portion of the property located at 406 West 7<sup>th</sup> Street has been acquired by the Colorado Department of Transportation, which constructed a temporary roadway and other temporary improvements on the property.
4. The City of Glenwood Springs intends to acquire a permanent interest in the property owned by 406 West 7th, LLC because it is necessary to make certain public improvements, including building stairs to connect a riverfront path to Eighth Street, constructing a storm sewer, and converting the Colorado Department of Transportation temporary property acquisition and improvements into permanent, City owned property and public improvements.
5. The City of Glenwood Springs agrees to pay the fair market value of the interest to be acquired, and the parties are committed to reaching an agreement regarding value. In the meantime, however, the City requires immediate possession of the property so that it can begin work on its transportation and drainage project.

Therefore, in light of the foregoing recitals, the parties agree as follows:

**COVENANTS:**

6. 406 West 7th, LLC hereby grants and conveys to the City of Glenwood Springs immediate and uncontested, exclusive possession (subject only to CDOT's existing rights of possession) of the Owner's property as described and depicted on Exhibits A

and B attached hereto (the "Property") upon the execution of this Agreement. The City will have the survey points for the Property to be acquired staked on the ground within ten days of execution, said staking will include the use of witness corners in the event any of the corners to the property are within the currently utilized public right of way. The City is willing to accept conveyance of the entire Property in Fee from the Owner, but in consideration of potential benefits to the Owner, the City agrees herein to give the Owner the option of having the City acquire only the portion of the Property identified and depicted on Exhibit A ("8<sup>th</sup> Avenue Right of Way") in fee with the City acquiring title to the balance of the Property described and depicted on Exhibit B via either fee grant or, at the Owner's sole timely election, a grant of easement conveying all necessary above ground, surface and below ground rights for construction, operation, maintenance, replacement, repair and operation of a public sidewalk and stairs and storm sewer facilities as well as any necessary appurtenant structures to those improvements. All grants shall be made via documents containing warranty of title and shall convey marketable title to the City, the fee conveyance shall be made by a deed conforming with the statutory definition of a special warranty deed and the grant of easement shall contain warranty of title language limiting the warranties contained therein to a special warranty by Owner. Owner agrees to make its election and execute all necessary documents to effect said conveyance no later than thirty days from the execution of this Agreement.

7. Within ninety (90) days from the date of the Owner's election under Paragraph 6 above, the City of Glenwood Springs will make a written offer to compensate 406 West 7th, LLC for the taking of the Property. The City's offer will be based upon the appraisal of a certified, licensed appraiser. Said licensed appraiser will be employed by the City at the City's sole expense and both parties to this Agreement shall have the full and fair opportunity to discuss value of the Property and to provide opinions relating to the value thereof to the Appraiser. Only written and signed submissions of such information, if otherwise admissible, may be offered as evidence in any judicial proceeding to determine the value of the property.
8. The City's offer will remain open for 120 days after the receipt of the offer Owner. While the offer is pending, Owner may obtain its own independent appraisal and the City will pay the reasonable cost of the owner's appraisal so long as it is received within the 120-day period. Pursuant to C.R.S. § 38-1-121, the parties agree that the date that the Owner received notice from the City of the City's intent to acquire the property on Friday, May 23, 2017.
9. After considering the Owner's appraisal, the City will make a written final offer. Said written final offer will be tendered to the Owner within 30 days following the receipt of the Owner's appraisal by the City.
10. In the event that the matter is resolved through negotiation, without the need for judicial proceedings of any kind, and in furtherance of the development of the residual parcel

within five years, the City of Glenwood Springs will agree to the following items, in addition to paying fair market value of the property to be acquired:

- a. Count the conveyed Property as full satisfaction of the owner's parklands dedication requirement that is associated with residential development on the Owner's residual Property and no further parklands dedication shall be required by the City of Owner; and
  - b. Approve two additional access between the residual parcel and the City's riverfront pathway of at least 30 feet in aggregate width including access that wraps around the northwest corner residual property near which the existing Church structure stands and the balance of the access as mutually agreed to best integrate the residual parcel with the City's riverfront pathway and protect the health, safety and welfare of the public; and
  - c. Contribute five (5) City of Glenwood Springs EQR taps for potable water and waste water upon the date of development. Said EQR taps can only be used on Owner's residual parcel and the ability to use those taps shall run with title to the Owner's residual parcel. Owner shall receive no credit or rebate in the event those taps are not used within the five-year period; and
  - d. The City will assist the Owner in applying to enlarge current EPA planning area in order to provide federal, state and local government resources for planning and economic analysis of the future development of Owner's residual property; and
  - e. A waiver of any land use application fees charged by the City for any development application or variance filed by the owner with the City within the five-year time period following the execution of this agreement; and
  - f. The City recognizes that the acquisition of the Property has the potential to interfere with and/or complicate the development of the Owners' residual property. As such, the City will consider in good faith and deal fairly in accommodating the impacts of the Property acquisition and other relevant matters if/when the Owner applies for any variance of setback requirements, design, height, parking and/or other zoning variances driven by said Property acquisition. The City and Owner contemplate that any development of the property will include (but not be limited to) commercial, residential and/or mixed use of the property to the fullest extent allowed, and nothing herein shall be considered to limit these uses.
11. In contrast to Paragraph 10, above, if an agreement cannot be reached as to value of the Property, the City of Glenwood Springs shall promptly commence condemnation proceedings.

12. All obligations contained herein shall be enforceable through specific performance.

13. Time is of the essence in the performance of the obligations set forth herein.

14. **Indemnification; Governmental Immunity.** To the extent permitted by law, the City shall defend, indemnify, and hold Owner harmless from any and all claims, suits, costs, and liability occasioned by the City's actions or inactions, or those actions or inactions of the City's agents, employees, or invitees, arising out of the right of possession of the Property granted herein. The City shall further defend and hold harmless Owner from and against any injury, claim or damage to any third party arising out of or in connection with City's operations under this Agreement. Notwithstanding the foregoing, nothing herein shall be deemed a waiver of the Colorado Governmental Immunity Act, C.R.S. § 24-10-101 *et seq.*, by the City. The City will require its contractors involved in the construction of any improvements in and/or upon the Property to name the Owner as an additional insured on all general liability policies. The City further agrees that the indemnification clause contained herein shall also be incorporated into any Easement Grant which is entered into by the parties as a result of this Agreement.

## EXHIBIT "A"

### PARCEL DATE: June 6, 2017 DESCRIPTION

A Parcel of land being a portion of Parcel "A" described in Reception No. 807737, recorded on September 6, 2011, in the Garfield County Clerk and Recorder's Office, located in the Northeast Quarter of the Southwest Quarter of Section 9, Township 6 South, Range 89 West, of the Sixth Principal Meridian, in Glenwood Springs, Garfield County, Colorado, said tract or parcel being more particularly described as follows:

Commencing at the Center West Sixteenth Corner of said Section 9, being a 3" aluminum cap marked "W 1/16 C-C S9 1976", whence the West Sixteenth Corner between said Section 9 and Section 16 of said township and range, as referenced by two 3-1/4" aluminum caps as described in the Field Notes of the Bureau of Land Management Dependent Resurvey by Cadastral Surveyor George E. Allen, accepted on September 5, 1997, bears S02°50'47"W, a distance of 2,708.96 feet (basis of bearing – assumed);

Thence S65°05'16"E a distance of 1171.28 feet to the southerly Right of Way line of 8<sup>th</sup> Street and the POINT OF BEGINNING;

Thence the following two (2) courses coincident with said southerly Right of Way line;

1. N77°47'11"E, a distance of 61.29 feet;
2. N63°03'11"E, a distance of 149.84 feet to the easterly line of said parcel of land described at Reception No. 807737;
3. Thence S13°44'18"W, coincident with said easterly line, a distance of 101.48 feet;
4. Thence N87°26'03"W a distance of 41.58 feet;
5. Thence N85°19'46"W, tangent with the following described curve, a distance of 64.20 feet;
6. Thence along the arc of a curve to the left, having a radius of 29.00 feet, a central angle of 18°31'50", a chord bearing of S85°24'19"W a distance of 9.34 feet, and an arc distance of 9.38 feet;
7. Thence N78°13'49"W non-tangent with the last described curve a distance of 55.72 feet to the POINT OF BEGINNING.

The above described Permanent Easement contains 7,847 square feet, (0.180 Acres), more or less.

**SECOND AMENDMENT TO AGREEMENT FOR IMMEDIATE POSSESSION  
AND CONVEYANCE OF PROPERTY INTERESTS**

This Second Amendment to Agreement for Immediate Possession and Conveyance of Property Interests ("Second Amendment") is made and entered into this 28<sup>th</sup> day of November 2017, by and between 406 West 7th, LLC, a Colorado limited liability company (also referred to herein as "Owner"), and the CITY OF GLENWOOD SPRINGS, COLORADO (also referred to herein as the "City").

WHEREAS, on June 7, 2017, the Parties entered into an Agreement for Immediate Possession and Conveyance of Property Interests (the "Agreement"); and

WHEREAS, on July 5, 2017 the Parties entered into an Amendment to Agreement for Immediate Possession and Conveyance of Property Interests; and

WHEREAS, the Parties desire to enter into this Second Amendment to the Agreement on the terms and conditions stated herein.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

1. The City agrees that it will construct a 5 foot wide sidewalk leading to the door on the north side of the building from the public sidewalk to be constructed by the City on the Property. The City will further construct 5 foot wide landings at the 1 door on the north side and the 2 doors on the west side of the building. The City will construct these improvements at the time the City constructs the final, permanent improvements on the Property.
2. Except for the foregoing amendment, all other terms and provisions of the Agreement shall remain in full force and effect as written and are unaffected by this Amendment.

**AMENDMENT TO AGREEMENT FOR IMMEDIATE POSSESSION  
AND CONVEYANCE OF PROPERTY INTERESTS**

This Amendment to the Agreement for Immediate Possession and Conveyance of Property Interests ("Amendment") is made and entered into this 5th day of July 2017, by and between 406 West 7<sup>th</sup>, LLC, a Colorado limited liability company, and the City of Glenwood Springs (collectively, the "Parties").

**RECITALS:**

WHEREAS, on June 7, 2017, the Parties entered into an Agreement for Immediate Possession and Conveyance of Property Interests (the "Agreement"); and

WHEREAS, the Parties desire to amend the Agreement on the terms and conditions stated herein.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

1. Paragraph 6 of the Agreement is amended to revise the last sentence to read as follows:

"...Owner agrees to make its election and execute all necessary documents to effect said conveyance no later than forty-two (42) days from the execution of this Agreement or by July 19, 2017."

Except for the foregoing amendment, all other terms and provisions of the Agreement shall remain in full force and effect as written and are unaffected by this Amendment.

IN WITNESS WHEREOF, the Parties have executed this Amendment on the day and year first written above.

**THIRD AMENDMENT TO AGREEMENT FOR IMMEDIATE POSSESSION  
AND CONVEYANCE OF PROPERTY INTERESTS**

This Third Amendment to Agreement for Immediate Possession and Conveyance of Property Interests ("Third Amendment") is made and entered into this 17 day of May 2018, by and between 406 West 7th, LLC, a Colorado limited liability company (also referred to herein as "Owner"), and the CITY OF GLENWOOD SPRINGS, COLORADO (also referred to herein as the "City").

WHEREAS, on June 7, 2017, the Parties entered into an Agreement for Immediate Possession and Conveyance of Property Interests (the "Agreement"); and

WHEREAS, on July 5, 2017 the Parties entered into an Amendment to Agreement for Immediate Possession and Conveyance of Property Interests; and

WHEREAS, on November 28, 2017 the Parties entered into a Second Amendment to Agreement for Immediate Possession and Conveyance of Property Interests; and

WHEREAS, the Parties desire to enter into this Third Amendment to the Agreement on the terms and conditions stated herein.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows:

1. The City agrees to pay Owner \$280,000 by May 31, 2018 as full compensation for the taking of the Property and Owner hereby accepts such payment as full compensation for its conveyance of the Property to the City.
2. The five years to utilize the development incentives set forth in Section 10 of the Agreement as additional consideration shall commence on June 1, 2018 and terminate on May 31, 2023.
3. Except for the foregoing amendment, all other terms and provisions of the Agreement, as amended shall remain in full force and effect as written.

| <b>Background Info:</b>      | <p>A group called 350 Roaring Fork is lobbying local governments that have funds invested in investment pools that have positions in oil companies to sell them as a protest to climate change. The group held a rally and submitted a petition to the City Clerk with roughly 225 signatures, mostly from the Roaring Fork Valley, and 20% from Glenwood Springs, supporting divesture of these assets.</p> <p>The Post Independent ran a short article that can be found here:</p> <p><a href="https://www.postindependent.com/news/climate-activists-ask-local-municipalities-to-divest-from-fossil-fuels/">https://www.postindependent.com/news/climate-activists-ask-local-municipalities-to-divest-from-fossil-fuels/</a>.</p>                                                          |
| <b>Issues:</b>               | <p>The City generally has around \$25 million at any point in time invested in funds like CSIP (Colorado Statewide Investment Program) and CSAFE (Colorado Surplus Asset Fund Trust). These are widely held by many local governments because they are high quality (low risk), liquid and generally conform with investment policies of state and local governments.</p> <p>In round numbers these pools have 1% of their funds invested in these securities. One percent of \$25 million is \$250,000. If these pools sold this position on behalf of the City it is possible they would have to reinvest the proceeds in one or more securities that earn a lower rate of interest. If we were to earn 2% per year less on \$250,000 the impact to the City would be \$5,000 per year.</p> |
| <b>Staff Recommendation:</b> | Staff defers to Council.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

Alan Krcmarik  
Board Chair

Byron Jefferson  
Board Vice Chair

Dear Mr. Glenn, Yip, Krcmarik and Jefferson,

Concerning holdings in C-SAFE's CORE portfolio, we, the [insert relevant body and jurisdiction], reflecting the wishes of our residents, our [town, city or county]'s stated values in environmental sustainability, and a serious concern about climate change, wish to express our desire not to be earning revenue from investments derived from the production and transport of fossil fuel reserves. We would like to ask C-SAFE to divest from its current holdings in the Exxon-Mobil and Chevron Corporations, however small a share they represent within the overall fund, by not purchasing new bonds once the current bonds reach maturity next year. Furthermore, we would like to ask C-SAFE's board of directors to take formal action to adopt restrictions against purchasing and owning securities in companies extracting, refining and delivering coal, oil and gas reserves in the future. We hope with this letter to encourage similar expressions from our sister communities in our valley and around the state.

We suspect that many of the towns, cities, counties, school districts and special districts who make up C-SAFE's members also care about a just and secure climate future for all of us. We especially worry for the younger generation who are facing serious, mounting challenges in the near future, even under best case scenarios, from climate-related impacts. It is incumbent on us as local government representatives to find every way we can to mitigate the problem of greenhouse gas emissions and prepare for a future with more, potentially catastrophic, weather extremes. We are taking steps as a municipality, with energy efficient building codes and utility upgrades. We can also make sure our finances aren't tied up with entities profiting from a form of energy that the world's preeminent body of climate scientists inform us must be wound down as fast as possible.

We feel it is rather inconsistent and incongruous for our town's finances to be invested in a business model that is at odds with a just and sustainable future. Investments are, by definition, assets set aside in the present for the purpose of growing in value to enhance the security and prosperity of future beneficiaries.

We understand that our collective economy remains quite reliant on fossil fuels and that consumer demand underpins the industry to a greater extent than short-term bonds

municipalities hold for purposes of liquidity. We wholeheartedly support policies at the local, state and federal level promoting electrifying our energy grid and incentivizing a transition to clean energy, such as electric vehicle infrastructure. But we are also aware of a worldwide movement to “green” the financial system and, just as the public sector can be on the leading edge of converting buildings, operations and vehicle fleets to cleaner technologies, so can they also take steps to make sure their finances are not working against goals for a stable climate.

We also recognize the somewhat arbitrary line drawn at coal, oil and gas companies when discussing fossil fuel divestment. There are any number of investments with high carbon-intensive exposure that raise questions. Surely, many of the banks and LLCs servicing the certificates of deposit, repurchase agreements and other instruments held in C-SAFE’s CORE and CASH funds themselves invest in traditional energy interests. But, again, there happens to be a worldwide effort among institutions, including municipalities, restricting investment in direct coal, oil and gas companies, given the urgency with which the world needs to reduce greenhouse gas emissions and the particular role this industry has played in preventing legislative solutions at the federal level.

We understand that the bonds in question make up a mere 0.73% (Exxon) and 0.16% (Chevron) of the fund and could therefore be rolled off without significantly affecting fund performance. We would hope that there were other securities C-SAFE could own with comparable yields. Indeed, we hope by taking this action, Colorado municipalities and districts can play their part in creating more demand for funds that are fossil fuel-free.

We are grateful for your prudent stewardship of our town’s investments and look forward to hearing back from you on this matter.

Sincerely,

**City Council**

**NOISE REGULATION EXEMPTION REQUEST****TO:** **DEBRA FIGUEROA, CITY MANAGER****DATE:** 9/23/2021**FROM:** **Name of Applicant/Contractor:** Casper Electric**Contact Name:** Ryan Waterbury**Mailing Address:** 3150 E Yellowstone Hwy**City, State, Zip Code:** Casper, WY 82609**Telephone Number:** (307) 258-5520**Email Address:** ryan@casperelectric.biz

Currently, the Municipal Code prohibits noise from construction equipment after 8:00 p.m. via the following code section:  
**100.070.030 Noises prohibited.**

(1) Construction work. Any noise created by operating or causing to be operated any equipment (mechanical or non-mechanical, self-propelled or manually manipulated) used in construction, repair, alteration or demolition work on buildings, structures, streets, alleys or appurtenances at any time other than between the hours of 7:00 a.m. to 8:00 p.m. on Monday through Friday, and 8:00 a.m. to 6:00 p.m. on Saturday and Sunday. The City Manager is hereby authorized to issue a construction work noise permit allowing construction work noise to occur at a time other than the time set forth herein based on circumstances which necessitate such construction work. In the event the City Manager issues such a permit, the City Council shall be advised of such issuance at the next regular City Council meeting.
