

AGENDA  
CITY OF GLENWOOD SPRINGS  
REGULAR CITY COUNCIL MEETING  
OCTOBER 7, 2021  
101 W. 8<sup>TH</sup> STREET  
6:15 PM

The agenda is subject to *change, including the addition of items 24 hours in advance or the deletion of items at any time.*

*The order and times of agenda items listed are approximate and intended as a guideline for the City Council.*

**ATTENTION:** To ensure your written comments are included in the City Council packet, public comments must be received by 4 p.m. (closing time of City Hall) on the day before City Council meetings. Comments may be submitted to [ryan.muse@cogs.us](mailto:ryan.muse@cogs.us) or delivered to the City Clerk's Office at 101 W. 8th Street.

Written comments may be submitted after this deadline and will be shared via email to City Council but are not guaranteed to make it into the meeting packet. Submit comments at any time directly to City Council via email at [citycouncil@cogs.us](mailto:citycouncil@cogs.us).

| <b>Background Info:</b>      | <p>In the budget work session on 9-16 Council discussed the split in accommodations tax receipts in the Tourism Fund with the General Fund. Years ago the split was 80% Tourism, 20% General Fund. That changed to 92.5% Tourism Fund with the other 7.5% set aside for Tourism-related grants and events recommended by the Financial Advisory Board.</p> <p>In the past several years a transfer of \$50,000 has been budgeted from the Tourism Fund to the General Fund to help offset the costs of major events including the 4th of July and New Year's Eve. The transfer was budgeted but not ultimately made in 2020 because the 4th of July event did not take place and accommodations tax revenues were down substantially. In 2021 the \$50,000 is budgeted directly in the Tourism Fund in the "Special Events" line item and the Fund will directly pay a City invoice.</p> |
| <b>Issues:</b>               | Accommodations tax revenues are forecasted to be \$1,355,000 in 2022. Staff needs to know whether Council would like the budget that will be submitted in this evening's session to change from its current 92.5%/7.5% split.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Staff Recommendation:</b> | Staff defers to Council.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| <b>Agenda Item:</b>          | Request to the RFTA Board for Release of Destination 2040 Funds for South Bridge                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>Action Requested:</b>     | Approval to ask the RFTA Board to release the Destination 2040 funds allocated to the South Bridge project to support the right of way acquisition.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Department:</b>           | Engineering                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>Presented By:</b>         | Terri Partch, City Engineer                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>Background Info:</b>      | <p>The South Bridge Project is approaching 90% design. The council recently approved a design amendment for the project that will bring the project through to 100% design. With the current design amendment, the Federal earmark funds will be expended. In addition, \$750,000 will be expended from the A&amp;I south bridge reserves, leaving no additional funding for the purchase of right of way.</p> <p>Staff feels that it is important to complete the project to a "shelf ready" level to compete for State and Federal funding.</p> <p>Through the Destination 2040 property tax measure, RFTA has allocated \$4,000,000 towards the construction of the grade separation of the Rio Grande trail in the project. RFTA leadership has requested that if we ask for the funds to be released in the right of way phase, that the City commit to constructing the grade separation of the trail when the project is built.</p> |
| <b>Issues:</b>               | The City will need to request release of the Destination 2040 funds from the RFTA Board and will need to commit to building the grade separation of the Rio Grande Trail.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Staff Recommendation:</b> | Approve the request to release the \$4,000,000 in Destination 2040 funds from the RFTA Board.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## REGULAR SESSION

### :07 Roll Call

Present: Mayor Godes, Mayor Pro-Tem Willman, Councilor Kaup, Councilor Stepp, Councilor Hershey, Councilor Davis, Councilor Wussow. Also present were Debra Figueroa, City Manager; Jenn Ooton, Asst. City Manager, Matt Langhorst, Director of Public Works, Brian Smith, Director of Parks and Recreation and Karl Hanlon, City Attorney.

### :07 Pledge of Allegiance

Mayor Godes led the Pledge.

### :07 Agenda Changes and Conflicts

**:07 Councilor Hershey moved, seconded by Councilor Wussow, to move Item 9: Resolution 2021-20: A resolution of the City of Glenwood Springs calling an election on November 2, 2021 and certifying a ballot issue to authorize an excise tax on admissions; setting the ballot title and content for the ballot issue; and providing other matters relating to the election. Item 10: Resolution 2021-21: A resolution of the City of Glenwood Springs calling an election on November 2, 2021 and certifying a ballot issue to authorize an excise tax on accommodations; setting the ballot title and content for the ballot issue; and providing other matters relating to the election. Item 11: Resolution 2021-22: A resolution of the City of Glenwood Springs calling an election on November 2, 2021 and certifying a ballot issue to authorize a mill levy to provide the operational and capital costs of providing, maintaining and expanding the municipal airport; setting the ballot title and content for the ballot issue; and providing other**

***matters relating to the election. Item 12, Ordinance #12 - Series of 2021 Enabling ballot measures and setting forth authorized uses of tax proceeds. Item 13, Resolution 2021-23: A Resolution of the City of Glenwood Springs calling an election on November 2, 2021 and certifying a ballot issue to amend the Glenwood Springs City Charter Section 13.2. indefinitely.***

Councilor Hershey stated that these items have been rushed.

Councilor Wussow stated that she agrees that these items have been rushed but does not agree with a moving these items indefinitely.

Councilor Hershey says he is willing to amend his motion.

Mayor Godes commented that the audience is present for items 9-13, and this is a great opportunity to hear from the community.

Mayor Pro-Tem stated that he supports the concept of not having items 9 and 10 put on the ballot but agrees that there should be a larger discussion. He commented that Items 11-13 need to be considered.

***:12 Councilor Hershey moved, seconded by Councilor Wussow, to move Items 9, 10, 11, 12, and 13 for one month.***

***Ayes: Hershey, Wussow***

***Nays: Willman, Kaup, Godes, Davis, Stepp***

***Motion Failed 5-2.***

:13 Citizens Appearing Before Council

None.

:13 Council Comments

Mayor Pro-Tem Willman commented that the Colorado Municipal League annual conference is September 22, 23, and 24. Willman also stated that Council proposed submitting to CML a legislative question for discussion regarding transfer tax and a question regarding changing rental units from a residential to a commercial zoning district. Council reaffirmed their desire for that discussion.

:14 Motion for Consent

***:14 Mayor Pro-Tem Willman moved, seconded by Councilor Hershey, to approve the consent agenda.***

***Motion passed unanimously.***

:15 Item 9 Resolution 2021-20: A resolution of the City of Glenwood Springs calling an election on November 2, 2021 and certifying a ballot issue to authorize an excise tax on admissions; setting the ballot title and

content for the ballot issue; and providing other matters relating to the election.

Attorney Hanlon requested that the Mayor take Items 9 and 10 together as Resolution 2021-20 and 2021-21 are very similar and contain similar language. Hanlon added that there was not a Staff presentation but rather they could answer questions. Furthermore, Hanlon went on to explain that the figures in the Tabor were estimated high as they generally are for a Tabor question.

Mayor Pro-Tem Willman asked whether a motion should be made before public comment is taken.

Attorney Hanlon responded that traditionally public comment is first, but it is Council's decision. Hanlon said the first motion on the table should be whether or not to put these items on the ballot.

:19 Item 10 Resolution 2021-21: A resolution of the City of Glenwood Springs calling an election on November 2, 2021 and certifying a ballot issue to authorize an excise tax on accommodations; setting the ballot title and content for the ballot issue; and providing other matters relating to the election.

:19 Mayor Godes opened the items for public comment.

Public comment was taken

1:08 Mayor Godes closed the item for public comment.

Attorney Hanlon stated for clarity that there will need to be two separate votes since there are two separate motions.

***1:09 Mayor Godes moved to approve the attraction tax to the November ballot and if a consensus cannot be reached on the details, there will be another vote to rescind this motion.***

***Motion failed for lack of a second.***

***1:12 Mayor Pro-Tem Willman moved, seconded by Councilor Hershey, to deny Resolution 2021-20: A resolution of the City of Glenwood Springs calling an election on November 2, 2021 and certifying a ballot issue to authorize an excise tax on admissions; setting the ballot title and content for the ballot issue; and providing other matters relating to the election.***

Mayor Pro-Tem Willman stated that he does not support putting this Resolution on the ballot this year, rather what he does support is finding a collaborative approach to the housing and work-force housing problems. Willman commented that this current tax measure does not address the problem because it lacks details. Willman stated that he appreciated the Mayor bringing this issue to the forefront of needed solutions however the way Council needs to address this is by having a group of citizens which can be supported by the overall community. Not doing this would end up with this measure failing.

Councilor Hershey stated that this measure is not about affordable housing because there is no specific plan for how this money is going to be spent. Hershey stated that this process has been rushed because of a pole that said 70% of the public wants affordable housing, but that means 30% of people are automatic no votes. Hershey stated this is not a good way to start a ballot measure: without a plan and

without community and business support. If this measure were to lose, it would not be able to be put back on the ballot and pass for a long time.

Councilor Kaup stated that although this measure might be put on the ballot quickly, it has been discussed for a long time. Kaup commented that although there is not a specific plan on how these funds will be spent, if there can be a dedicated revenue to affordable housing, the City could put a plan together. Kaup feels that our true asset is our neighbors and our workers, and she worries that we are becoming a community where our teachers, policemen, plumbers, and other workers are no longer able to live here. Kaup applauds the Mayor for bringing these measures together and believes the community can come together with a plan for the funds between now and the election. Kaup asked City Attorney Hanlon if waiting a year would change the measures or the tax amounts.

Attorney Hanlon responded that it would not change the language of the measures because there are not specifics for the revenue.

Kaup commented that this response reminded her that whether it is now or a year, funds need to be flexible, and specifics will be difficult.

Councilor Wussow commented that she heard a willingness from the community on these measures, however, there is not a collaborative effort that can be achieved in a matter of weeks. Wussow feels that with a collaborative effort with the community, these measures will have a foundation that can be trusted and then passed. Wussow thanked Mayor Godes for bringing this issue forward but cautioned that if these measures are not done well, they will not pass, and we will not have these methods of revenue again for a long time. Wussow stated that this measure is rushed.

Councilor Stepp agreed that this measure has come up quickly. Stepp commented that she is on the Financial Advisory Board, Tourism Committee, and the Housing Committee and in those meetings the aggregate of the conversation has been lack of employees for Glenwood businesses. Stepp stated that although the measure might feel rushed, the need is far from rushed. Stepp commented that she wants to know the percentage of the tax going towards affordable housing. Stepp also said that if this is put on the ballot, she would like to know who the stake holders are who are receiving this funding stream. Council needs flexibility in what the money is used for. Stepp emphasized that she wants to see affordable housing and not studios and apartments so families can move to and live in Glenwood.

Mayor Godes stated that every other mountain town already have affordable housing and they have done this through a real estate transfer tax, however Tabor has taken that away. Godes commented that when Pitkin County and Aspen received their affordable housing tax, they did not have everything bogged down with details. This measure does need to tighten up the language and this can be done before the election with a community inclusive committee. Godes commented that trust is developed by taking the lead on affordable housing because business leaders have not done so.

Councilor Davis stated that this issue has been discussed for the seven years he has been on Council, and he is disappointed that the Chamber of Commerce and the business community has yet to bring forth any conversation of their own. Davis is concerned about what qualifies as an attraction tax and does not feel people providing services from their homes should not be part of this measure. Davis stated that he wants this tax to mainly be about affordable and work-force housing but also wants funding to address the impacts that tourists have on our parks and facilities. Davis commented that in order to address this measure in as meaningful manner, a community committee needs to meet within the next 30 days and continue to meet once a month for the next 12 months. They will define what an

attraction is, how much the tax will be, where the revenue will go, what it is going to be used for, who is going to have to pay it, and what industries and businesses this tax will affect. Davis commented that he believes the lodging tax is low but before we pass a tax, he would like to know what amount it is increased to, what does it get used for, does the revenue all go towards housing or does some go towards impact. He would like input from the community before he votes for these measures.

***Ayes: Hershey, Willman, Wussow, Davis***

***Nays: Godes, Stepp, Kaup***

***Motion Passed 4-3.***

***1:53 Mayor Pro-Tem Willman moved, seconded by Councilor Hershey, to deny Resolution 2021-21: A resolution of the City of Glenwood Springs calling an election on November 2, 2021 and certifying a ballot issue to authorize an excise tax on accommodations; setting the ballot title and content for the ballot issue; and providing other matters relating to the election.***

Councilor Hershey stated that if these motions are split 4-3 the measure will never pass a vote by the citizens. Their needs to be a consensus by the Council and the citizens making comments.

Mayor Godes stated that the community has already given their voice and they are the people who cannot be in attendance because they are returning or leaving for their second jobs. He commented that the citizens Council Chambers do not accurately represent the community.

Councilor Wussow commented that this is not a matter of if, but when, and timing is everything. Wussow stated that she can only support waiting 12 months.

Councilor Stepp expressed concern that waiting can cause problems bringing up a past issue of inclusionary housing. Stepp stated that waiting will also lose a years' worth of revenue.

***Ayes: Davis, Willman, Hershey, Wussow,***

***Nays: Godes, Stepp, Kaup***

***Motion Passed 4-3.***

***2:00 Mayor Godes moved, seconded by Councilor Kaup, to adopt the proposed study committee on accommodation tax increase and attraction tax proposal #2 as outlined in the packet.***

Mayor Pro-Tem Willman stated that he cannot support the concept because it would have the Housing Commission in charge as well as some people who are not a part of the community. Willman commented that that he believes businesses should make presentations to a core group of people.

Councilor Kaup stated that she supports this proposal because it includes groups that focuses on housing.

Mayor Godes clarified that this proposal has the guidelines to have recommendations to Council by the second meeting in April with an expected commitment of one to two meetings a month.

With the suggestions of Councilor Kaup and Councilor Stepp, Mayor Godes amended his motion.

**2:05 Mayor Godes moved, seconded by Councilor Kaup, to adopt the proposed study committee on accommodation tax increase and attraction tax increase proposal #2 as outlined in the packet with framework for the measures by February and expected measures on the ballot in 2022.**

Councilor Wussow inquired whether the two proposals could be intertwined to include more businesses and private entities.

Mayor Godes commented that proposal #1 is about answering a tax question while proposal #2 is about answering a housing question.

Mayor Pro-Tem Willman agreed that it should be a combination of the two proposals. He commented that this is a Council led measure and not something that should be led by the Housing Commission.

Councilor Davis voiced his concern that proposal #1 does not allow the community to get involved without forcing them into a direction. Davis commented that this is an accommodation and attraction tax and not a 100% housing issue.

Councilor Kaup commented that there is leeway in the revenue for other issues.

***Ayes: Hershey, Kaup, Davis, Stepp, Godes***

***Nays: Wussow, Willman***

Consent to move item 16

2:28 Item 16 Planning File 58-20-Consideration of a Major Site Architectural Plan review for the construction of a 36-unit multifamily building.

Hannah Klausman, Assistant Director of Economic and Community Development, presented for Staff. Klausman commented that this proposal met the Glenwood Meadow requirements, parking requirements, and architectural requirements.

Councilor Stepp questioned why this seventh complex is being considered in Glenwood Meadows when the original approved proposal only designated six. Klausman stated that this building is on a separate lot.

Councilor Kaup asked about a one-acre park that was originally apart of the PUD and the poor condition of Wulfsohn street. Klausman stated that there was an agreement for hiking trails and land for the Community Center. Attorney Hanlon stated that there are conditions in the agreement for construction to stay off the road as much as possible. Hanlon commented that under the original ADA, The Lofts does not have any obligation to do improvements on this road. This specific site agreed to \$30,000 for off-site improvements.

Richard Meyers, developer, presented.

Councilor Hershey asked if there were any concerns over traffic.

Meyers stated that the traffic study showed additional traffic was low and traffic would most likely follow the typical traffic flow.

Councilor Stepp stated that the City recently passed an inclusionary housing ordinance and would like to know if the developer would be interested in adopting any of those measures.

Meyers stated that he had discussed with Attorney Hanlon their willingness to consider the voluntary program.

Councilor Kaup stated that in the original ADA, The Lofts were allowed 475 units, and this would bring them to 305. 300 of these units could be apartments and the remaining had to be for sale units.

Hanlon stated that the fourth amendment to the ADA opened up the commercial zoning below the apartments along Wulfsohn and the remaining 175 units that are required to be for sale units are those above the commercial units. There is no timeline for when they must sell them.

2:54 Mayor Godes opened the item for public comment.

2:55 Mayor Godes closed the item for public comment.

***2:55 Councilor Hershey moved, seconded by Councilor Kaup, to approve Planning File 58-20-Consideration of a Major Site Architectural Plan review for the construction of a 36-unit multifamily building with the findings and conditions noted in the staff report.***

Councilor Stepp commented that she is concerned about growth that does not include affordable housing. Stepp raised concern over the lack of an evacuation plan and how this site does not seem to fit with Glenwood's comprehensive plan. This site also exacerbates the number of small apartments and does nothing for families.

Mayor Pro-Tem Willman stated that he shares Councilor Stepp's concerns. Furthermore, this site's application came in two days before the inclusionary housing guidelines. However, it still meets the conditions, so as a Councilman, he is bound to vote in favor of this motion, although reluctantly.

Councilor Kaup stated that she echoed the previous Councilors, however the lack of diversity along with the high price in The Lofts and this site are in contradiction to Glenwood's comprehensive plan. Therefore, she does not feel obligated to vote for this motion.

Councilor Wussow commented that this location allows density, and that Council has approved many projects that have yet to break ground, but The Lofts have finished what they started, and they have provided housing.

Mayor Godes commented that although the site may have only turned in their application two days ahead of the deadline, they still played by the rules. Godes stated that at the time of the original ADA, it was a huge risk for this type of development, but The Lofts provided units. Godes commented that this site does not meet the City's Comprehensive Plan and therefore he will have to vote against it.

***Ayes: Davis, Willman, Hershey, Wussow,***

***Nays: Godes, Stepp, Kaup***

***Motion Passed 4-3.***

3:06 Item 11 Resolution 2021-22: A resolution of the City of Glenwood Springs calling an election on November 2, 2021 and certifying a ballot

issue to authorize a mill levy to provide the operational and capital costs of providing, maintaining and expanding the municipal airport; setting the ballot title and content for the ballot issue; and providing other matters relating to the election.

3:08 Mayor Godes opened the item for public comment.

Public comment was taken.

3:29 Mayor Godes closed the item for public comment.

Councilor Hershey commented that the timing is bad for a tax increase and at some point, the voters will say enough is enough. Hershey stated that he will not support this initiative and he feels the reasons behind this initiative are disingenuous.

Mayor Godes asked Parks and Recreation Director Brian Smith to explain the cost estimates.

City Attorney Hanlon added that these costs would increase the usage of the airport from a few individuals to making it more of a city owned, public friendly airport that is used by a larger group of people.

Councilor Stepp asked how the cost of the South Bridge Tunnel was incorporated into the estimate.

Attorney Hanlon responded that the EA was about location and environmental impacts and not about funding sources, so it is up to Council to determine funding sources.

Councilor Stepp asked if the previous Resolution by Council was approval for the tunnel dependent on funding.

### **March 4, 2021 City Council Meeting**

***1:39 Mayor Pro-Tem Kaup moved, second by Councilor Wussow, to take the preferred design including the tunnel to 100% design and at the same time pursue partners, grants and other available sources of funding.***

City Manager Figueroa stated that, according to the previous Resolution, if the City could not find funding, the question would have to go to the voters.

Mayor Pro-Tem Willman stated that he sees the tunnel as a part of the airport because it is necessary to keep the airport at its current operational state while still allowing Council to provide South Bridge which is an emergency exit for Glenwood citizens in case of a wildfire. Willman commented that he cannot force citizens to fund an airport that so few people use but asking voters if they want to directly pay for an airport through a Mill Levy is something he can support.

Councilor Kaup wanted to clarify that even if a tunnel was not built, the airport would be kept for classic air medical and helicopter operations. What would be lost is fixed wing aircraft usage. Kaup asked if, given the language of the prior motion, the City were able to obtain funding for the tunnel after a Mill Levy vote were passed, would there be a way to refund the voters.

Attorney Hanlon stated that there would because a Mill Levy could either be temporarily or permanently reduced. Hanlon commented that Council cannot raise taxes, but they can lower them.

Councilor Kaup stated that she sees this as a South Bridge issue. Out of 32 locations that were researched, South Bridge was feasible only at this location. Kaup commented that it is hard to justify taking five million dollars out of the general fund budget for an airport that serves a very limited portion of Glenwood's population. Kaup commented that the best solution for this problem is to put the question to the voters.

Councilor Stepp asked if the Mill levy could be changed to reflect a change in desired funding.

Attorney Hanlon answered in the affirmative adding that the 4 Mill Levy would be the maximum. Chief Operating Officer Steve Boyd responded that the current request of 4 Mills would generate roughly \$1 million a year and minus debt service, the City would have around half of that to use for the airport improvements.

Mayor Godes agreed that the South Bridge Tunnel is an airport cost. Godes went on to say that the City needs the additional items for safety, future revenue, and viability of the airport, but also for quality and consistency with our other local amenities. Godes stated that without City owned hangars, value added for the City owned airport would be very low.

Councilor Wussow stated that if this measure is put to the voters, the discussion of the airport should be put to rest. Wussow commented that the process to come to this stage has been flawed because it has ignored the boards and commissions. Wussow stated that this measure has been rushed. Wussow went on to say that the deficiencies and flaws with the current airport are the City's fault and that is the discussion the Council should be having.

***4:05 Councilor Godes moved to consider airport debt alternative 2 for a 20-year period, for a Mill Levy of 5 Mills, along with alternative 3 authorizing a debt question up to \$10 million.***

***Motion failed for lack of a second.***

Councilor Wussow asked what items are necessary as safety concerns for the airport and how much would they cost.

Attorney Hanlon responded that the airport currently needs fencing, a safe fuel farm, and communication upgrades. These upgrades would cost roughly \$2 million.

Mayor Pro-Tem Willman expressed concern that if Council passed a Mill Levy worth \$2 million then there would be a chance Council would have to ask the voters for another Mill Levy soon.

***4:12 Councilor Godes moved, seconded by Councilor Davis, to consider airport debt alternative 2 for a 20-year period, for a Mill Levy of 4 Mills, along with alternative 3 authorizing a debt question up to \$8 million.***

Councilor Davis stated that \$2 million cannot be spent on the airport now and \$6 million be spent a year later.

Councilor Wussow concurred, however, she stated that she is not an expert, and this is a situation where she would like for Council to utilize its Commissions, in particular, the Airport Commission. Wussow commented that she would be comfortable deciding based on feedback from the Commission, yet they were not involved.

Mayor Godes stated that if Council is going to ask voters for funding, they should ask for the full amount now.

***Ayes: Kaup, Godes, Davis, Stepp,***

***Nays: Hershey, Wussow, Willman***

***Motion Passed 4-3.***

4:19 Item 13 Resolution 2021-23: A Resolution of the City of Glenwood Springs calling an election on November 2, 2021 and certifying a ballot issue to amend the Glenwood Springs City Charter Section 13.2.

City Attorney Hanlon presented the three alternatives of the Resolution to be put on the ballot, amending the Charter.

4:22 Mayor Godes opened the item for public comment.

Public comment was taken.

4:28 Mayor Godes closed the issue to public comment.

Mayor Pro-Tem Willman asked why alternate three had wording about safety.

Attorney Hanlon explained that if there is safety hazard it will supersede the change to the Charter.

***4:29 Mayor Pro-Tem Willman moved, seconded by Councilor Wussow, to consider alternative 3 with the exception of the first sentence reading “The City Council shall not close the airport without the affirmative vote of a majority of the qualified electors of the City except for temporary closures for emergencies, safety or construction...” and the last sentence reading “...medical use nor require the City to expend...” .***

Mayor Godes asked what would happen if the vote for funding the airport was denied, but this Charter amendment passed.

Attorney Hanlon responded that it would be in the Charter that the airport would be maintained in its current configuration as of January 1, 2021.

Mayor Godes pointed out that this would mean the City would be forced to pay for a tunnel if the voters rejected the Mill Levy measure because the runway would be required to remain in its current state and the only option for South Bridge would be a tunnel.

***Ayes: Wussow, Stepp***

***Nays: Willman, Godes, Kaup, Hershey, Davis***

***Motion Failed 5-2.***

4:38 Item 15 Ordinance 2021-15 Updating Boards and Commissions

***4:40 Councilor Godes moved, seconded by Councilor Wussow, to accept Ordinance 2021-15 Updating Boards and Commissions with the exception that Boards and Commissions advise to Council and Staff.***

MINUTES  
CITY OF GLENWOOD SPRINGS  
SPECIAL CITY COUNCIL MEETING  
SEPTEMBER 7, 2021  
101 W. 8<sup>TH</sup> STREET  
6:15 PM

Note: Official meeting minutes are located on the City website via YouTube video at the following link: <https://www.youtube.com/user/GlenwoodSprings1885/videos>. The times in agenda items indicate approximately where the item can be found on the YouTube video timeline.

## **SPECIAL SESSION**

### **:05 Roll Call**

Present: Mayor Godes, Mayor Pro-Tem Willman, Councilor Hershey, Councilor Kaup, Councilor Davis, Councilor Stepp, Councilor Wussow. Also present were Debra Figueroa, City Manager, Jenn Ooton, Assistant City Manager, Steve Boyd, Chief Operating Officer, Matt Langhorst, Director of Public Works, Brian Smith, Director of Parks and Recreation and Karl Hanlon, City Attorney.

### **:06 Pledge of Allegiance**

Mayor Godes led the Pledge.

### **:06 Agenda Changes and Conflicts**

No conflicts offered.

### **:07 Citizens Appearing Before Council**

Don Voleski, citizen, wanted to know if there was a current study on traffic flow as the most recent one put the City's traffic condition at level "red". Voleski also wanted to know if there was a study on the current water flow as Glenwood is currently in a 10-year drought.

City Attorney Karl Hanlon stated he would respond to Voleski at a future point relating to the water study.

## :09 Council Comments

Mayor Godes voiced that on behalf of the Council and the Community, our hearts and thoughts go out to the family, the child, and the loved ones of the profound loss at the Glenwood Springs Adventure Park. This tragedy is felt deeply, and he hopes that everyone is finding support in carrying the weight of heavy hearts and mind. There is no easy answer for this and as a community we stand with the family that is dealing with this tragedy.

Mayor Godes read a statement of apology on behalf of himself and Council to Rob Gavrell for comments made at the September 2, 2021 Council meeting.

Councilor Hershey wished everyone a happy Rosh Hashanah.

## :11 CONTINUATION OF ANNEXATION

City Attorney Hanlon reminded the Council and Chambers that public comment had been closed and the last meeting was left off with questions by Council. This meeting would be questions to Staff and the applicant as well as a motion.

Councilor Hershey wanted clarity that there were two items that needed to have motions.

Attorney Hanlon responded in the affirmative, adding that there is an ordinance to go with each of the required motions. Hanlon commented that the first required motion would be Ordinance 2021-08: Annexing Property to the City and the second required motion would be Ordinance 2021-09: Zoning a Parcel of Land Annexed into the City.

Mayor Pro-Tem Willman asked if there were any changes to the plans regarding Council's desire for more open space.

Attorney Hanlon commented that the site plan was a part of the master plan under the condition list, and there would be a meaningful public space under that master plan and what that would constitute is open to negotiation.

The applicant commented that what has been discussed was adding some public space to the master plan.

Councilor Kaup asked for clarification on the master plan process.

Trent Hyatt, Senior Planner, commented that a master plan is required for an overall parcel that is a minimum of 5 acres. Hyatt stated that the overall plan for the property would have to be approved by City Council but smaller details for things such as individual parcels could be decided by staff.

Councilor Stepp asked for clarification on the master plan versus the ordinances on the table tonight.

Attorney Hanlon stated that if the ordinances were to pass tonight, they would primarily be setting the density and the master plan would come back to Council at a later date.

Mayor Pro-Tem Willman noted that the contract currently said, "private recreation facilities are to be constructed out of the PUD project."

Attorney Hanlon agreed that this was a deletion that should have been carried over and instead should read "for design and installation of the northern bike lane and design and installation of the southern bike lane and while, when necessary, any other improvements under the code."

Councilor Kaup commented that she would like to have 20% residential units at 100% area medium income. Kaup wanted clarification on how this was affecting for-sale and rental units.

Attorney Hanlon commented that the 20% residential units at 100% area medium income would be for apartment rentals and 10% of the for-sale units would be deed restricted.

Mayor Pro-Tem Willman asked why the word apartments was changed to units in the area medium income clause.

Haley Carmer, attorney for the applicant, stated the reason for this change was in case the for-sale units are ultimately rented by the future owner, these apartments are not in danger of being restricted into the AMI cap.

Councilor Stepp wanted clarification on the amount of town homes that would be deed restricted.

Attorney Hanlon commented that it would be 10% as the total amount of townhomes that will be authorized to be created are unknown at this moment.

Mayor Pro-Tem Willman asked whether there are requirements for the applicant to make Mel-Rey a fully functioning road. Willman asked about the change regarding the fire station. Willman also asked if the applicant did not proceed with its proposal of the mall, would the density approval only apply to the proposed residential property.

Attorney Hanlon replied that there are not requirements for the road because the City is unable to annex the road as it is not owned by the county. Hanlon commented that the applicant requested the change regarding the fire station with the goal to show that the fire station agreement would be moving forward at the stage of construction, not waiting until substantial completion. Hanlon stated that the applicant would have the density approved for the mall property as well but finished by saying that they would be forced to come back for approval of a master site plan for the mall in addition to the current proposed property.

***:36 Mayor Pro-Tem Willman moved, seconded by Mayor Godes, to deny the application on the basis that the annexation does not minimize the potential adverse impacts to the City and does negatively impact the public's health, safety, and welfare.***

Councilor Hershey stated that he is not sure of which way to vote and being unsure he will lean towards what the public is saying. Hershey stated that his biggest concern is Glenwood's limited water supply. Hershey stated that he is also concerned about Glenwood's infrastructure, and he cannot support bringing in more people. Hershey stated that he is also concerned over the current traffic in this community and what this proposal will do. Hershey said that his final concern over this project is that Glenwood Police is already short 10 police officers and a project adding five hundred people is not fair to the rest of the community. Hershey stated that there are already areas in Glenwood that are available for, and are going to have, development and he questions why it is necessary to annex additional locations into the city.

Mayor Pro-Tem Willman commented that this development is too much in too little of a space. Willman went on to add that this type of density might be appropriate if the mall was added to the proposal as a comprehensive redevelopment, but this proposal alone puts too many units in a 12-acre space. Willman stated that there is also a need for park space.

Councilor Wussow applauded the community and the developers for their participation. Wussow commented on her history in Glenwood and the benefits that subdivisions have had. Wussow stated that West Glenwood is an area that has a lot a development with density, but this proposal has a little too much. Wussow stated that she would be comfortable with this proposal if it could spread these units across the current and mall parcel. Wussow stated that she is concerned about water usage as

well, however, this type of housing uses a lot less water than if developed with single family homes throughout this amount of space.

Mayor Godes asked Councilor Wussow what level of density she would be comfortable with.

Councilor Wussow stated that she would like to see a 25%-30% reduction in the number of units, however, she would accept the developer being able to offset that with more for-sale units.

Councilor Kaup stated that the places to live available in Glenwood Springs are sparse and expensive. Kaup commented that West Glenwood needs a grocery store and Glenwood would benefit from having a movie theater again. Kaup stated that this would be accomplished by redeveloping the mall. Kaup commented that bicycle improvements are needed in the area. Kaup stated that this proposal is a way for all of these components to be done. Kaup commented that this project is not within our current city limits, but it is within our urban boundaries making it the perfect place for this project. Kaup commented that Glenwood's comprehensive plan calls for denser, inward, and upward growth, giving people the opportunity to live closer to their jobs. Kaup commented that the applicant is working with the City for evacuation ideas including giving the land for a new fire station which is sorely needed.

Councilor Stepp commented that there is going to be growth in Glenwood. Stepp stated that she will vote for this motion because she has multiple concerns. Stepp stated one concern is time and there are things that the Council still needs to work through. Stepp commented that even though this is just a vote for the annexation and PUD, the PUD revolves around some of the questions that Council needs to work through. Stepp stated that affordable housing should be about a variety of housing, including for-sale housing, town homes, duplexes, condominiums, and apartments, which is what she would like to see in a proposal of this size. Stepp commented that it would mitigate traffic if people could buy homes here. Stepp stated that Glenwood needs to show the evacuation plan to the West Glenwood Citizens before introducing a development of this size. Stepp agreed with Councilor Wussow that the density should be decreased by 25%-30%. Stepp finished by saying that she is concerned about the additional strain this many people would have on our infrastructure, fire department, and police.

Councilor Kaup commented that the way we help our police and fire force is to create housing for them to live in Glenwood.

***1:10 Councilor Kaup moved, seconded by Mayor Godes, to continue the motion to deny the application on the basis that the annexation does not minimize the potential adverse impacts to the City and does negatively impact the public's health, safety, and welfare until the October 7, 2021, Regular Council meeting.***

1:11 Recess

1:19 Meeting Reconvened

Mayor Godes commented that the continuation gives the applicant time to address some of these concerns.

Attorney Hanlon stated that if this motion is going to give Council time to negotiate an add plus then there will not be much progress. However, if this gives Council time to negotiate a give and take, there is a potential to address some of the issues stated.

Mayor Godes stated that the Community wants a grocery store, a new fire station, and an evacuation plan, but without this development that disappears. Godes stated that he believes the school district

would choose to limit the students who attend Glenwood Schools to be residents if this development added too many additional students in Glenwood Schools. Godes commented that he would like to hear from the school district. Godes stated that right now a 30% reduction in density would be 100 fewer units and with a 20% deed restriction there would be 20 fewer affordable housing units.

The applicant stated that because of the amount of work done on this project to date, there is the potential for work to take place in the next three to four weeks as long as there is an understanding that there needs to be a give and take. The applicant pointed out that although they are two separate parcels, they do have the mall under contract and tying it into a residential project would give it a much greater chance of success. The applicant commented that there will not be 800-1000 potential people living in this proposal.

***Ayes: Davis, Willman, Kaup, Godes, Wussow***

***Nays: Hershey, Stepp***

***Motion Passed 5-2.***

***1:40 Councilor Kaup moved, seconded by Mayor Godes, to continue the balance of the items on the agenda until the October 7, 2021, Regular Council meeting.***

***Ayes: Kaup, Wussow, Godes, Willman, Davis***

***Nays: Hershey, Stepp***

***Motion Passed 5-2.***

***1:41 Mayor Pro-Tem Willman moved, seconded by Councilor Kaup, to adjourn.***

Mayor Godes asked if there was support for returning to wearing masks in Council Chambers.

There was not agreement at the current time.

Councilor Stepp announced she will be absent from the October 7<sup>th</sup>, 2021 meeting.

***Motion passed unanimously***

MINUTES  
CITY OF GLENWOOD SPRINGS  
REGULAR CITY COUNCIL MEETING  
SEPTEMBER 16, 2021  
101 W. 8<sup>TH</sup> STREET  
6:15 PM

Note: Official meeting minutes are located on the City website via YouTube video at the following link: <https://www.youtube.com/user/GlenwoodSprings1885/videos>. The times in agenda items indicate approximately where the item can be found on the YouTube video timeline.

## REGULAR SESSION

### :15 Roll Call

Present: Mayor Godes, Councilor Kaup, Councilor Stepp, Councilor Hershey, Councilor Davis, Councilor Wussow. Also present were Debra Figueroa, City Manager; Jenn Ooton, Asst. City Manager, Matt Langhorst, Director of Public Works, Brian Smith, Director of Parks and Recreation and Karl Hanlon, City Attorney.

### :15 Pledge of Allegiance

Mayor Godes led the Pledge.

### :15 Agenda Changes and Conflicts

None

### :15 Citizens Appearing Before Council

None

### :16 Council Comments

Councilor Stepp commented that there have been trucks parking along Hwy 6 for long periods of time. City Manager Figueroa asked for individual emails that she could send to CDOT.

Councilor Stepp pointed out that there is a lot of trash being dumped on the Rio Grande Trail behind the old Safeway. Stepp requests that Council move the Continuation of the Motion for Denial of the Annexation to October 21<sup>st</sup>, as she will not be in attendance for the October 7<sup>th</sup> meeting.

City Attorney Karl Hanlon commented that with this type of continued motion, he is uncomfortable with Council continuing a motion for denial until the night of the Council meeting.

Stepp wanted to discuss requiring wearing masks in Council Chambers.

Mayor Godes put this discussion as an item under the Managers Report.

Councilor Davis stated that the Strawberry Shortcut created unnecessary graffiti on the City Streets.

Parks and Recreation Director Brian Smith stated that they have had this conversation with the organizers before, they do collect a damage deposit, and they will revisit their contract.

Councilor Hershey asked for a work session to change the City Charter to ask for a direct vote for Mayor.

Councilor Wussow supported the request. Wussow asked for Council to talk louder and make clarifying points for the audience and the Post Independent Reporter.

Councilor Kaup asked Council if they would agree to have Attorney Hanlon bring the owner of the property behind Walmart, the City, and other parties together to talk about a possible trail easement.

Mayor Godes agreed as long as the City does not take ownership but only legal liability in order to limit staff's workload.

## :27 Motion for Consent

***:27 Councilor Hershey moved, seconded by Councilor Stepp, to approve the consent agenda.***

***Motion passed unanimously.***

## :27 Proclamation for the Police Department: Dedication to Service

A proclamation for Zeus, a service dog with over 100 arrests, was read by Mayor Godes and was received by Zeus's handler, Officer Blake Gobbo.

## :32 Planning Item 20-21 - Consideration of a Major Site/Architectural Plan Review application for the construction of a 40 unit multi-family development in a single building

Assistant Director of Community Development, Hannah Klausman, presented for staff. Klausman stated that the proposal, Mountain View Flats, is consistent with the comprehensive plan and other adopted City policies and plans.

Councilor Stepp asked about snow storage, bike storage, and parking.

Assistant Director Klausman stated that up to 10% of parking can be used for snow storage. Klausman commented that all of their parking is off street parking and they are providing all of their parking with the administrative adjustment. Klausman stated that the applicant is substituting bike spaces for a reduction of 7% of their parking spaces.

Councilor Stepp asked about the Fire Marshal's concern over the turn radius in the parking lot for fire trucks.

Assistant Director Klausman answered that the problem had been remedied.

Councilor Kaup asked if there was irrigation for the trees in the landscaping and if there was an amount of time they are required to be kept alive in our city code. Kaup also asked about the energy efficiency of the building.

Assistant Director Klausman commented that she believes the code states that it is 12 months for establishment of the landscape. Klausman stated that she would leave the unanswered questions for the applicant.

The applicant presented that Mountain View Flats will have a mixture of 14 one-bedroom apartments and 26 two-bedroom apartments including 8 deed restricted, resident occupied units.

Councilor Wussow asked if the applicant if they have or would be willing to contact Garfield Clean Energy.

The applicant answered that they have not established a set rule for energy efficiency yet, but they are very receptive since this is a market rate they are going to design, at the very least, is a code minimum. They are willing to reach out to CLEER.

1:02 Mayor Godes opened the item for public comment.

Karleen Clark, West Glenwood resident, stated that the comprehensive plan is out of date. Clark stated that the additional traffic will make an already unsafe area worse. Clark stated the proposal does not include enough parking spaces. Clark commented that the people of West Glenwood already do not feel safe in an evacuation.

The applicant responded that they do have an access permit to utilize a private access drive, however they have not submitted it to CDOT yet because they are waiting to hear what City Council has to say. The applicant commented that they did meet the requirements for the access permit.

Councilor Stepp voiced concern that this development might eventually be sold and how that would affect the affordable housing units.

The applicant responded that a purchase of a subdivision would have to go through Council and that is not the intent of this property.

Assistant Director Klausman stated that the affordable housing units would not go away, the only difference would be if the apartments were to go up for sale, the units would change to affordable housing for-sale units.

1:09 Mayor Godes closed the item for public comment.

***1:10 Councilor Wussow moved, seconded by Councilor Davis, to approve Planning Item 20-21 - Consideration of a Major Site/Architectural Plan Review application for the construction of a 40-unit multi-family development in a single building, based on the findings and conditions referenced in the staff report with the additional condition of having a dialogue with CLEER.***

Councilor Stepp commented that she is concerned about the traffic and the evacuation plan. Stepp stated that she appreciates that this development has two-bedroom apartments and having deed restrictions on those is extremely helpful to families.

Councilor Kaup stated that Council is very aware of the evacuation concerns and staff is working on an evacuation plan. Kaup commented that she would like to have a specific energy efficiency standard.

City Attorney Karl Hanlon commented that Council does not have the authority to force this development to a specific energy efficiency standard but what Council can do is add a condition to use best practice energy efficiency and make an attempt to be 100% renewable using city electric.

Councilor Wussow commented that too often what is assumed will be in the future comprehensive plan is referenced, but the current plan is the guiding document for Council and she will use this to help her decide.

Councilor Wussow amended her motion.

***1:20 Councilor Wussow moved, seconded by Councilor Davis, to approve Planning Item 20-21 - Consideration of a Major Site/Architectural Plan Review application for the construction of a 40-unit multi-family development in a single building, based on the findings and conditions referenced in the staff report with the additional condition to use best practice energy efficiency and make an attempt to be 100% renewable using city electric.***

***Ayes: Wussow, Stepp, Hershey, Davis, Kaup***

***Nays: Godes,***

***Motion Passed 5-1.***

## 1:21 Award of Contract for Planning Services for the Comprehensive Plan Update and Appointment of a Project Steering Committee

Assistant City Manager Jenn Ooton presented. Ooton commented that the contract is slightly over budget. Ooton stated that the bulk of this committee would be made up of Planning and Zoning members, but they also wanted to have someone representing development, the Latino Community, a young person-Millennial or Generation Z-and another person recommended by Council.

Councilor Wussow suggested a member of the senior community.

Councilor Kaup agreed with Councilor Wussow and added the possibility of someone from the business community who is interested in housing for their employees.

Councilor Stepp suggested a mid-sized business that employs individuals in the area.

***1:25 Mayor Godes moved, seconded by Councilor Hershey, to Award the Contract for Planning Services for the Comprehensive Plan Update.***

***Motion passed unanimously.***

## 1:25 VALE Board Appointments

Councilor Hershey presented. Hershey stated there were two applicants and he recommends Joyce Jenkins.

**1:27 Councilor Hershey moved, seconded by Councilor Kaup, to approve Joyce Jenkins to the VALE Board.**

***Motion passed unanimously***

## 1:27 Detox Update and Budget Request

Sharon Raggio, President & CEO of Mind Springs Health, presented. Raggio stated that their goal is to create a Withdrawal Management Program in Glenwood Springs. This would cost \$400,000 to remodel a facility and the startup cost is approximately \$75,000-\$125,000 and there will be a cost for operations of the detox program once it is completed.

City Manager Debra Figueroa presented for staff. Figueroa commented that detox is a high priority in the current strategic vision and Council has made it one of their goals. Figueroa asked Council to be the one of the first Government entities to fund this project stating that its likely Glenwood will not be the only ones, citing that pre-COVID, more Government entities were lined up to follow. Figueroa stated that the request is for up to \$200,000 a year with the clause that if all the funding is not required, it will not be given.

**1:35 Councilor Stepp moved, seconded by Councilor Kaup, to approve up to \$200,000 for the opportunity to help pay for operations once the facility is built.**

Councilor Stepp wanted clarification that there has already been funding set aside for the building.

Manager Figueroa confirmed that \$50,000 has been set aside out of the marijuana tax fund.

Councilor Stepp commented that the stakeholder group involves people from all over the County and they are all very enthusiastic about this facility. Stepp stated that she believes Garfield County and other Municipalities will get involved and the cost will not be the full \$200,000.

Police Chief, Joseph Deras, stated that his only reservation is that outside municipalities will be bringing at-risk individuals into Glenwood and leaving them here, potentially taking police resources away Glenwood citizens. Deras commented that this could be solved with an MOU. Deras finished by saying this program and facility are a benefit to the community.

Manager Figueroa agreed that further down the road this will require MOU's.

Mayor Godes commented that this is a good use of the marijuana and tobacco tax.

Deputy Fire Chief, Doug Gerald, commented that people in intoxicated or mental crisis are unable to be left in their current locations but are limited to 2 places of transport, jail or the hospital, and often times neither of those are appropriate. Gerald applauds a detox facility.

***Motion passed unanimously.***

## 1:42 Southbridge - Jacobs Design Contract Amendment

Terri Partch, City Engineer, presented. Partch requested an amendment in the amount of \$741,382 for the Jacobs contract for the Southbridge project. Partch stated that this amendment would cover the need for re-evaluation of the project that would include bio-soils and any other change to the design, the tunnel insulation, landscaping, wall finishes, changes to the Thompson Glen drainage design, Holy Cross ranch accommodations, a noise wall design, additional funding for right of way, and bid support.

Councilor Stepp asked for clarification on the timing of the project progressing while the ballot issue is still undecided.

Engineer Partch responded that with the current work being done, the project will spend past the amount budgeted in the contract, and until additional funds are authorized, work would have to be suspended. Partch commented that of the items requested, only one was included in the ballot measure and she would not authorize that part of the project until November when the measure will be voted on. Partch stated that she believes it is important to continue to bring the work to a 90% design completion.

Councilor Stepp asked about the third Environmental Assessment.

Engineer Partch replied that EA re-evaluations are common, the Grand Avenue Bridge had 4, and they are smaller in scope and cover things that weren't included in the original design. Partch stated that this current re-evaluation would cover the change from curb and gutter to bio-soils as well as what is believed to be the discovery of a historic jail site.

Councilor Wussow asked if this would bring us closer to "shovel ready" for the grant process.

Engineer Partch responded in the affirmative but said they still need to acquire right of way, which will be very expensive but outside sources, including RFTA, might be willing to help.

Councilor Kaup voiced concern about the 10-foot-high noise wall restricting wildlife access to the river as well as the general height.

Engineer Partch replied that the noise wall is a requirement of the Environmental Assessment as a list of mitigation measures once the neighborhood voted. Partch commented that they are going to ask the neighborhood to vote if a tree wall would be acceptable. Partch commented that all of the existing roads will be available to the wildlife.

1:59 Mayor opened the item for public comment.

Meryl Glickman, part-time resident, member of the board of Cardiff, commented that, speaking for the board, they would like to view alternatives of the wall so they can have their green space and have the wall farther out.

2:02 Mayor Godes closed the item for public comment.

***2:02 Councilor Hershey moved, seconded by Councilor Kaup, to approve the Southbridge design contract amendment from Jacobs.***

Mayor Godes asked for clarification that no funds towards the tunnel aspect of the project will be spent before November 5<sup>th</sup>.

Engineer Partch answered in the affirmative.

***Motion passed unanimously.***

## 2:04 Local Match for Hanging Lake Trail Restoration

City Manager Debra Figueroa presented. Figueroa commented that at the end of July, there were debris flows that decimated Hanging Lake Trail, Glenwood's #1 tourist destination. Figueroa commented that the Forrest Service is going to repair the trail in two phases. The first, which they hope to have done

next year, is to clear the trail and rebuild a rudimentary trail. The second will be a longer-term fix and make the trail more resilient to debris flow. Glenwood's role would be to partner with the Forrest Service to obtain grants. The initial grant that they are pursuing is a \$250,00 from CPW and it requires a \$50,000 match. They Forrest Service is also attempting to obtain a federal grant that requires a \$100,000 match. Figueroa stated that the request from Council is \$50,000 to put towards this effort.

2:06 Mayor Godes opened the item for public comment.

2:06 Mayor Godes closed the item for public comment.

***2:07 Councilor Stepp moved, seconded by Councilor Wussow, to allocate \$50,000 towards the fundraising efforts with the Forrest Service with the funds from the FAB.***

***Motion passed unanimously.***

2:08 Break

## 2:16 Affordable Housing Manager and Budget

Mayor Godes presented. Godes stated that there is currently a strategic plan that puts affordable housing as a priority. Godes commented that the last few City poles have indicated that affordable housing was also the #1 issue. Godes stated that he wanted to bring a discussion forth about putting the position of an Affordable Housing Manager into the 2022 budget using the unallocated funds budgeted from the excess tourism reserves for one year only, in preparation of the 2022 election. Godes stated that after the tax is voted on, Council can come back for a further discussion on whether to elongate the position.

Councilor Stepp asked whether we could use Garfield County Housing Authority for this time period instead.

Mayor Godes commented that Glenwood needs someone working solely for Glenwood who is prepping to work for a potential large revenue, and increased number of units.

Councilor Kaup commented that by listening to the community at the ballot initiative Council meeting, Council decided that the measures would be delayed while the plan was worked on. Kaup stated that she would rather have a position come from in-house and help create a plan for the community than to out-source the job.

Manager Figueroa stated that if this was something that Council wanted to have focused on full time, a new position would be extremely helpful. Figueroa commented that she would put a new position under Economic and Community Development. Figueroa stated that if this was a topic that Council wanted to just be "fit in" when there was time, a new position would not be required, and the current staff could manage.

Councilor Hershey commented that the City needs to wait until after they hear from what the voters want.

Mayor Godes commented that earlier in the meeting, Council voted to approve 8 affordable housing units and Glenwood needs to show their priorities by hiring a Housing Manager.

Councilor Wussow commented that this seemed a little premature and she was uncomfortable with a full-time position. Wussow stated that she would be ok with a part-time position.

Mayor Godes stated that for this type of position, a part-time opportunity would not bring in quality candidates. Godes commented that if an issue is a top priority, staff needs to be given support to manage it.

Councilor Kaup commented that in order to move forward, Council would need a job description for the position.

Manager Figueroa commented that Council does not usually approve job descriptions and requested that she brings back a description of how this position would operate within the organization and what the position would work on.

Assistant Director of Economic and Community Development, Hannah Klausman, volunteered to help with this process.

***2:42 Councilor Kaup moved, seconded by Mayor Godes, to have staff bring back details of how an Affordable Housing Manager would operate within the City and what the position would work on to the Council Meeting on October 21.***

Councilor Wussow stated that she would like to have this dialogue in a work session.

***Ayes: Godes, Stepp, Kaup, Wussow***

***Nays: Davis, Hershey***

***Motion Passed 4-2.***

2:44 Ordinance 11, Series 2021 amending sections 090.040.070, 090.040.080 and 100.070.030 related to Snow Removal, Leaves in the Right of Way, and Snow Plowing and Street Sweeping

Assistant City Manager, Jenn Ooton, presented. Ooton stated that this ordinance is designed to prohibit putting snow, ice, and debris into the right of way, in service of keeping the curbs and gutters maintained. Ooton commented that additionally, snow plowing and street sweeping are not construction noise.

2:46 Mayor Godes opened the item for public comment.

2:46 Mayor Godes closed the item for public comment.

***2:46 Councilor Stepp moved, seconded by Councilor Kaup, to adopt Ordinance 11, Series 2021 amending sections 090.040.070, 090.040.080 and 100.070.030 related to Snow Removal, Leaves in the Right of Way, and Snow Plowing and Street Sweeping.***

***Motion passed unanimously.***

2:47 Resolution 2021-24 Temporarily Suspending Renewal Provisions of Accessory Tourist Rentals and Short-Term Rentals in the City

Economic and Community Development Planner 1, Emery Ellingson, presented. Ellingson stated that the purpose of this resolution is to wave the single requirement of showing proof that the permit holder has

submitted lodging tax during the last two years of their permit period. Ellingson commented that staff is requesting this waiver for two reasons- the first is a change to the state law that gives the managing sites the ability produce these fees in one lump sum, making it very difficult to track which property has paid. Ellingson stated the second is during certain periods in the past two years, Council did not allow permit holders to use their rentals and if permit holders are unable to show use, their permits will be pulled.

Chief Operating Officer, Steve Boyd, stated that when the City receives lump sums from big managing organizations, it is virtually impossible to tell where the funds came from.

Councilor Wussow commented that she is comfortable with this temporary waiver that gives staff the opportunity to decide how best to move forward. Wussow commented that she does want a permit holder to provide the dates of their rentals.

Councilor Stepp asked if there are the same problems with managing companies booking hotels.

COO Boyd answered in the affirmative.

Councilor Kaup wanted clarification that the permit holders are still required to pay taxes.

City Attorney Hanlon responded in the affirmative.

City Manager Figueroa commented that the collaboration between staff and Council with the initial Short-Term Rental issue was a perfect example of successfully solving a problem.

***3:08 Councilor Hershey moved, seconded by Mayor Godes, to approve Resolution 2021-24 Temporarily Suspending Renewal Provisions of Accessory Tourist Rentals and Short-Term Rentals in the City.***

***Motion passed 5-0 with Councilor Davis abstained.***

### 3:09 Report from City Administration

#### A. City Manager

City Manager Debra Figueroa asked if Council wanted to require masks to be worn in Council Chambers during City Council meetings.

Councilor Davis stated he does not want to require masks until the Governor advises for it.

***3:09 Mayor Godes moved, seconded by Councilor Stepp, to follow the Center for Disease Control's recommendation that all people wear masks in areas of high incident rate, and masks are worn regardless of vaccination, for City Council meetings.***

Councilor Davis asked why Council was going to start following the Federal guidelines and not the States.

Mayor Godes replied that Council has followed the Federal Government when they initially issued a mask order before anyone else in the state.

Manager Figueroa stated that the 14-day incident rate in Garfield County is in red, but the 7-day incident rate is in yellow.

Councilor Stepp commented that this is a time of caution and for Council to set an example for the community as well as be safe for staff, each other, and the members of the community who attend Council meetings.

***Ayes: Godes, Stepp, Kaup,***

***Nays: Wussow, Hershey, Davis***

***Motion Fails 3-3.***

Councilor Wussow commented that at the beginning of all Council meeting they recommend everyone wear a mask. Wussow stated that revoking personal freedoms is a slippery slope and Council needs to be consistent and unilateral in their execution.

B. City Attorney

None

C. Correspondence Incoming/Outgoing

None

***3:16 Councilor Stepp moved, seconded by Mayor Godes, to adjourn.***

***Motion passed 4-0.***

| <b>Action Requested:</b>     | Approval of price structure for acceptance of food waste by the ton for composting and smoke detectors per each for recycling at the South Canyon Landfill.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Department:</b>           | Public Works                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Presented By:</b>         | Matthew Langhorst, Public Works Director<br>Elizabeth Mauro, Landfill Manager                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Background Info:</b>      | <p>The landfill is already able to compost food waste. A specific price category will help us track waste diversion efforts and promote food waste composting. Increased food waste composting extends the life of the landfill, reduces methane emissions, and increases the amount of valuable, affordable soil amendment we sell back into the community. The suggested price covers the cost of processing into compost and will incentivize diversion.</p> <p>Smoke detector recycling is a unique program which will keep radioactive waste out of the landfill. Each smoke detector contains small amounts of this waste; recycling them helps the City avoid future issues with radioactive materials in leachate. The suggested price will cover the entire cost of the program.</p> |
| <b>Issues:</b>               | NA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| <b>Staff Recommendation:</b> | Staff supports approval.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

**RESOLUTION 2021-26**

**A RESOLUTION OF THE CITY COUNCIL OF THE CITY  
OF GLENWOOD SPRINGS, COLORADO, SETTING 2021  
LANDFILL FEES.**

**WHEREAS**, City Council sets fees for the Glenwood Springs Landfill Enterprise; and

**WHEREAS**, the most recent adjustment to Landfill fees was approved in July 2021; and

**WHEREAS**, recycling food waste and smoke detectors is beneficial to the environment;  
and

**WHEREAS**, the City's composting permit allows for the composting of food waste; and

**WHEREAS**, composting food waste will reduce the City's methane emissions; and

**WHEREAS**, smoke detectors contain radioactive material that should be recycled; and

**WHEREAS**, City staff recommends that the City establish and charge a fee for Food  
Waste and Smoke Detectors based on pricing set for on Exhibit A; and

**WHEREAS**, City staff recommends, and City Council agrees, that imposing the additional  
fees described on Exhibit A takes into account the needs of the community, the City, and  
the operational needs of the Landfill Enterprise and other area landfills;

**WHEREAS**, City Council wishes to implement updated fees for 2021 finding that they  
are necessary and appropriate.

**NOW, THEREFORE, IT IS RESOLVED BY THE CITY COUNCIL OF THE CITY  
OF GLENWOOD SPRINGS, COLORADO, THAT:**

**Section 1.** The above recitals are hereby incorporated as findings by the City Council of the  
City of Glenwood Springs.

**Section 2.** The City Council of the City of Glenwood Springs hereby adopts the Landfill Fee  
Schedule as set forth on **Exhibit A** attached hereto and incorporated herein, effective October 10,  
2021.

INTRODUCED, READ, AND PASSED THIS 7<sup>th</sup> DAY OF OCTOBER 2021.

CITY OF GLENWOOD SPRINGS, COLORADO

Exhibit A

Landfill Price Update As of 9/9/2021

Food Waste and Smoke Detectors

| Item            | Price   | Unit |
|-----------------|---------|------|
| Food Waste      | \$12.00 | ton  |
| Smoke Detectors | \$10.00 | each |

**City Council**  
**STAFF REPORT**  
**City of Glenwood Springs**  
**October 7, 2021**

**Agenda Item:** FAB Grant Recommendations

**Action Requested:** Approve grant requests for swim and hockey teams.

**Department:** City Administration

**Presented By:** Steve Boyd, COO  
Yvette Gustad, Finance Director

**Background Info:** Each year the Financial Advisory Board makes a recommendation to Council to award certain grant applications and the amount of each. In 2020 these funds went to COVID relief instead of not-for-profits.

In 2021 there were \$235,231 in discretionary grant funds available (including \$75,730 carried forward from last year as a reserve.) Total applications received in 2021 were \$173,300 and Council approved \$148,800 in grants. Due to the recent changes a few groups that normally submit an application did not in 2021, including the Sopris Barracudas Swim Team and Grizzly Hockey. These entities submitted grant applications in September and FAB agreed to recommend they be fully funded in a unanimous vote.

**Issues:** These two applications are outside the normal grant cycle, but given the recent circumstances and the fact that their requests are funded every year FAB voted to make an exception in this case and award the funds.

Sopris Barracudas are asking for \$11,000; they were awarded \$7,600 in 2015, \$9,500 in 2016, \$10,925 in 2017 and \$7,500 in 2019.

Grizzly Hockey is asking for \$15,000; they received \$6,000 in 2015, \$15,820 in 2016, \$13,000 in 2017, \$12,000 in 2018 and \$12,500 in 2019.

The amount remaining in grant funds on the attachment is \$157,815. This amount includes the \$50,000 for community events that the City will invoice, and Council appropriated \$50,000 at the September 16th meeting to match a grant aimed at rebuilding the Hanging Lake Trail. If Council were to fund these requests the reserve would be \$31,815.

There was no reserve for discretionary grants in the A&I Fund until 2020 when we carried over \$10,307 to 2021. Before 2020 all grant funds were awarded.

**Staff Recommendation:** Staff supports funding these two grant requests.

## APPLICATION CHECKLIST

SUBMIT THIS APPLICATION WITH THE FOLLOWING REQUIRED DOCUMENTS IN THE FOLLOWING ORDER:

- ☐ Description of Organization and its activities: (two pages maximum)
- ☐ Use of Funds Summary (one page maximum)
- ☐ Description of how the COVID pandemic impacted your organization
- ☐ Response to Selection Criteria Questions in narrative form (three pages maximum)
- ☐ Copy of IRS determination letter as to 501(c)(3) or other not-for-profit status
- ☐ Colorado Secretary of State Certificate as nonprofit corporation in good standing
- ☐ List of current board of directors and officers
- ☐ List of all major contributors (\$2,000 and above) and amounts contributed, highest to lowest
- ☐ Year-end financial statements for fiscal year most recently ended
- ☐ IRS Form 990 (most current available)
- ☐ Approved budget for current fiscal year

By signing below, the applicant hereby certifies and warrants that any and all statements and representations, including all sources and uses of funds made in this Grant Application, are true and correct, and may be relied upon by the City of Glenwood Springs.

Authorized Signature:   
(From applicant organization)

Date: 09/17/21  
(mm/dd/yyyy)

Printed Name and Title:

T.K. KWATKOWSKI - GSYHA DIRECTOR

### **Description of Glenwood Springs Youth Hockey Association & It's Activities:**

The Glenwood Springs Youth Hockey Association (*GSYHA*) is a non-profit, 501(c)(3) organization, focusing on youth sports development through the sport of ice hockey. We have been a solvent organization since 1998, with approximately 200 member families each season.

GSYHA is an affiliate of the Colorado Amateur Hockey Association (*CAHA*), which in turn is an affiliate of the national governing body, USA Hockey (*USAH*). Our affiliation is reliant upon our compliance with USA Hockey rules and regulations, and adherence to USA Hockey's philosophy and commitment to teaching life lessons to our players, including but not limited to; athleticism, sportsmanship, team building & problem solving, a sense of competition and emotional resilience and maturity.

GSYHA plays within a State & nationally sanctioned league, the Western Colorado Hockey League (*WCHL*), this allows our travel families to participate in approximately 16 to 20 'league' games, along with tournament opportunities 3 to 5 times a year for another 20+ travel game opportunities. GSYHA also provides a Recreation level of gameplay for our younger players ages 8 and under; this age group comprises almost 30% of our entire membership.

In closing, our purpose/mission statement is below for your review:

"Glenwood Springs Youth Hockey provides our area youth the opportunity to learn and play hockey. As a non-profit organization we also have governance and management responsibilities. Grizzly Hockey is about the players and their athletic endeavors, but is also about our responsibilities as coaches, mentors, parents, and members of USA Hockey.

Coaches, parents, managers, and spectators should always recognize Grizzly Hockey programs go beyond the obvious mission of teaching and playing hockey. The greater mission is developing athleticism, character, sportsmanship, and self-esteem."

### **Use of Funds Summary by GSYHA**

Glenwood Springs Youth Hockey would utilize these grant funds to recoup losses sustained in our 2020/2021 season (see next page), along with help restore our general fund reserves to where we were one year ago today.

This general fund helps subsidize player involvement through our Scholarship funding, along with attempting to keep our player fees the lowest in the region. This is knowing we have increasing costs across the board; coaching expenses, tournament fees, and local ice time have all increased this past season, including equipment, fuel, etc..

**Description of how the COVID Pandemic impacted GSYHA:**

As we all know, many local businesses were impacted by the happenings of 2020; Glenwood Springs Youth Hockey was also heavily impacted, suffering a financial loss for the first time in many years.

Some of this financial loss was attributed to players & families wanting to stay home/protect themselves from exposure to the virus; this was mostly our returning travel players that participated within our association previously.

Another impact was facility limitations, put upon us for our younger aged participants, as we had to cap our 8U membership to comply with State, County & City guidelines. This essentially eliminating the opportunity to recoup funds we had lost from the older players not participating, along with growing our 8U age levels; FYI, our 8U numbers generally average around 60 to 70 players, in 2020/2021 we were capped at 50 participants.

Overall, the financial loss GSYAH sustained for the 2020/2021 season was over \$15,000. In a 'normal' or 'regular' season, we have consistently averaged a positive net gain of approximately \$5,000 to \$10,000 per fiscal year.

## SELECTION CRITERIA

All applicants must respond to the following questions in no more than three (3) pages. The three-page limit applies only to your answers to these questions, not to the Summary Form, Use of Funds Summary, or any supporting documentation.

---

1. Which needs within the City of Glenwood Springs does your organization serve, or will your special event or public program serve?
2. Describe your paid professional staff and your level of volunteer involvement.
3. Quantify the service level you provide to the citizens of the City of Glenwood Springs. How many City clients were served in your last full fiscal year in the program(s) for which you are requesting funds? What are the projections for the current year and next year? If funding a special event, how many participants to you expect, and will the event draw visitors to Glenwood Springs?
4. Highlight the desired 2021 goals and outcomes to be achieved with City of Glenwood Springs' funds. How will you define and measure your success as related to this funding request?
5. Describe your income stream(s), including fundraising efforts. If you are the local chapter of a national entity, explain how much funding it provides.
6. Have you used City of Glenwood Springs funds to receive additional funds from other sources? If so, what is the amount of leveraged funds received?
7. Has your organization had a deficit budget within the last three years? If so, how did you fund the deficit? What plans have you made to eliminate future deficits? Does your organization have a fund balance/reserve that is equal to or greater than six months of operating expenses? If so, how do you plan to use this reserve?

Blank fillable pages are provided for these answers (page 8-10).

## Selection Criteria:

Glenwood Springs Youth Hockey serves individuals and families in our area, with the vast majority living within Glenwood Springs. We serve our community by providing local youth ages 4 to 19 yrs. opportunities to develop athleticism, sportsmanship, team-building, and emotional resilience through the sport of youth hockey. We generally serve approximately 200 families as members of our organization.

GSYHA hosts multiple weekends of events, bringing in approximately 60 to 100 families (*per event*) from other regional organizations, 8 to 10 times a season. This creates multiple tax revenue streams for our community, through visitor stays (*lodging, restaurant visits, etc; hockey families spend a lot of money when they travel!!*).

Last season was the first in many that we experienced a financial loss for the season. Our goal for the 2021-2022 season is to operate with a modest net income through a combination of playing fees, private sector sponsorships and donations, and public sector grants. Our cash reserves are far less than 6 months of operating expenses and our goal is build those reserves while continuing to assess our members reasonable playing fees, and scholarships to our members who apply. In the past, we have received Discretionary Grant finds from the City of Glenwood Springs, these funds were not leveraged to obtain more funding at any time.

Currently we have 3 main fundraising efforts: our annual Golf tournament, our Dasher Advertisement sales campaign, and one annual 'special event', historically in conjunction with the Glenwood Caverns Adventure Park. The remaining income comes from various donors in the area, and the player fees we charge for participation within our programming.

GSYHA has one paid staff, T.K. Kwiatkowski, the Executive Director of Hockey Operations. GSYHA relies on many volunteer staff, including but no limited to; Coaches (40+), Team Managers (~ 10), a working Board of Directors (9), along with other parent volunteers that help with multiple on-site duties (scorekeeping, off-ice officials, check-in/check-out, etc.). GSYHA is truly a grass roots organization, with a strong sense of unity & family.

Dear Taxpayer:

This is in response to your request of Feb. 12, 2008, regarding your tax-exempt status.

Our records indicate that a determination letter was issued in July 1999, that recognized you as exempt from Federal income tax, and discloses that you are currently exempt under section 501(c)(3) of the Internal Revenue Code.

Our records also indicate you are not a private foundation within the meaning of section 509(a) of the Code because you are described in section 509(a)(2).

Donors may deduct contributions to you as provided in section 170 of the Code. Bequests, legacies, devises, transfers, or gifts to you or for your use are deductible for Federal estate and gift tax purposes if they meet the applicable provisions of sections 2055, 2106, and 2522 of the Code.

If you have any questions, please call us at the telephone number shown in the heading of this letter.

Sincerely yours,

*Michele M. Sullivan*

**TREASURER**

## Part I Type of Return and Return Information (Whole Dollars Only)

Check the box for the return for which you are using this Form 8879-EO and enter the applicable amount, if any, from the return. If you check the box on line **1a**, **2a**, **3a**, **4a**, or **5a**, below, and the amount on that line for the return being filed with this form was blank, then leave line **1b**, **2b**, **3b**, **4b**, or **5b**, whichever is applicable, blank (do not enter -0-). But, if you entered -0- on the return, then enter -0- on the applicable line below. **Do not** complete more than one line in Part I.

## Part II Declaration and Signature Authorization of Officer

Under penalties of perjury, I declare that I am an officer of the above organization and that I have examined a copy of the organization's 2019 electronic return and accompanying schedules and statements and to the best of my knowledge and belief, they are true, correct, and complete. I further declare that the amount in Part I above is the amount shown on the copy of the organization's electronic return. I consent to allow my intermediate service provider, transmitter, or electronic return originator (ERO) to send the organization's return to the IRS and to receive from the IRS (a) an acknowledgement of receipt or reason for rejection of the transmission, (b) the reason for any delay in processing the return or refund, and (c) the date of any refund. If applicable, I authorize the U.S. Treasury and its designated Financial Agent to initiate an electronic funds withdrawal (direct debit) entry to the financial institution account indicated in the tax preparation software for payment of the organization's federal taxes owed on this return, and the financial institution to debit the entry to this account. To revoke a payment, I must contact the U.S. Treasury Financial Agent at 1-888-353-4537 no later than 2 business days prior to the payment (settlement) date. I also authorize the financial institutions involved in the processing of the electronic payment of taxes to receive confidential information necessary to answer inquiries and resolve issues related to the payment. I have selected a personal identification number (PIN) as my signature for the organization's electronic return and, if applicable, the organization's consent to electronic funds withdrawal.

Officer's PIN: check one box only

☒ I authorize DALBY, WENDLAND & CO., P.C. to enter my PIN 65763  
ERO firm name Enter five numbers, but do not enter all zeros

as my signature on the organization's tax year 2019 electronically filed return. If I have indicated within this return that a copy of the return is being filed with a state agency(ies) regulating charities as part of the IRS Fed/State program, I also authorize the aforementioned ERO to enter my PIN on the return's disclosure consent screen.

☐ As an officer of the organization, I will enter my PIN as my signature on the organization's tax year 2019 electronically filed return. If I have indicated within this return that a copy of the return is being filed with a state agency(ies) regulating charities as part of the IRS Fed/State program, I will enter my PIN on the return's disclosure consent screen.

|               |                                                                                                        |
|---------------|--------------------------------------------------------------------------------------------------------|
| <b>Part I</b> | <b>Reason for Public Charity Status</b> (All organizations must complete this part.) See instructions. |
|---------------|--------------------------------------------------------------------------------------------------------|

The organization is not a private foundation because it is: (For lines 1 through 12, check only one box.)

- 1 ☐ A church, convention, association of churches described in **section 170(b)(1)(A)(i).**

2 ☐ A school described in **section 170(b)(1)(A)(ii).** (Attach Schedule E (Form 990 or 990-EZ).)

3 ☐ A hospital or a cooperative hospital service organization described in **section 170(b)(1)(A)(iii).**

4 ☐ A medical research organization operated in conjunction with a hospital described in **section 170(b)(1)(A)(iii).** Enter the hospital's name, city, and state: \_\_\_\_\_

5 ☐ An organization operated for the benefit of a college or university owned or operated by a governmental unit described in **section 170(b)(1)(A)(iv).** (Complete Part II.)

6 ☐ A federal, state, or local government or governmental unit described in **section 170(b)(1)(A)(v).**

7 ☐ An organization that normally receives a substantial part of its support from a governmental unit or from the general public described in **section 170(b)(1)(A)(vi).** (Complete Part II.)

8 ☐ A community trust described in **section 170(b)(1)(A)(vi).** (Complete Part II.)

9 ☐ An agricultural research organization described in **section 170(b)(1)(A)(ix)** operated in conjunction with a land-grant college or university or a non-land-grant college of agriculture (see instructions). Enter the name, city, and state of the college or university: \_\_\_\_\_

10 ☒ An organization that normally receives: (1) more than 33 1/3% of its support from contributions, membership fees, and gross receipts from activities related to its exempt functions - subject to certain exceptions, and (2) no more than 33 1/3% of its support from gross investment income and unrelated business taxable income (less section 511 tax) from businesses acquired by the organization after June 30, 1975. See **section 509(a)(2).** (Complete Part III.)

11 ☐ An organization organized and operated exclusively to test for public safety. See **section 509(a)(4).**

12 ☐ An organization organized and operated exclusively for the benefit of, to perform the functions of, or to carry out the purposes of one or more publicly supported organizations described in **section 509(a)(1)** or **section 509(a)(2).** See **section 509(a)(3).** Check the box in lines 12a through 12d that describes the type of supporting organization and complete lines 12e, 12f, and 12g.

a ☐ **Type I.** A supporting organization operated, supervised, or controlled by its supported organization(s), typically by giving the supported organization(s) the power to regularly appoint or elect a majority of the directors or trustees of the supporting organization. **You must complete Part IV, Sections A and B.**

b ☐ **Type II.** A supporting organization supervised or controlled in connection with its supported organization(s), by having control or management of the supporting organization vested in the same persons that control or manage the supported organization(s). **You must complete Part IV, Sections A and C.**

c ☐ **Type III functionally integrated.** A supporting organization operated in connection with, and functionally integrated with, its supported organization(s) (see instructions). **You must complete Part IV, Sections A, D, and E.**

d ☐ **Type III non-functionally integrated.** A supporting organization operated in connection with its supported organization(s) that is not functionally integrated. The organization generally must satisfy a distribution requirement and an attentiveness requirement (see instructions). **You must complete Part IV, Sections A and D, and Part V.**

e ☐ Check this box if the organization received a written determination from the IRS that it is a Type I, Type II, Type III functionally integrated, or Type III non-functionally integrated supporting organization.

**Part IV Supporting Organizations**

(Complete only if you checked a box in line 12 on Part I. If you checked 12a of Part I, complete Sections A and B. If you checked 12b of Part I, complete Sections A and C. If you checked 12c of Part I, complete Sections A, D, and E. If you checked 12d of Part I, complete Sections A and D, and complete Part V.)

**Section A. All Supporting Organizations**

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Yes | No |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|
| <b>1</b> Are all of the organization's supported organizations listed by name in the organization's governing documents? If "No," describe in <b>Part VI</b> how the supported organizations are designated. If designated by class or purpose, describe the designation. If historic and continuing relationship, explain.                                                                                                                                                                                                                 |     |    |
| <b>2</b> Did the organization have any supported organization that does not have an IRS determination of status under section 509(a)(1) or (2)? If "Yes," explain in <b>Part VI</b> how the organization determined that the supported organization was described in section 509(a)(1) or (2).                                                                                                                                                                                                                                              |     |    |
| <b>3a</b> Did the organization have a supported organization described in section 501(c)(4), (5), or (6)? If "Yes," answer (b) and (c) below.                                                                                                                                                                                                                                                                                                                                                                                               |     |    |
| <b>b</b> Did the organization confirm that each supported organization qualified under section 501(c)(4), (5), or (6) and satisfied the public support tests under section 509(a)(2)? If "Yes," describe in <b>Part VI</b> when and how the organization made the determination.                                                                                                                                                                                                                                                            |     |    |
| <b>c</b> Did the organization ensure that all support to such organizations was used exclusively for section 170(c)(2)(B) purposes? If "Yes," explain in <b>Part VI</b> what controls the organization put in place to ensure such use.                                                                                                                                                                                                                                                                                                     |     |    |
| <b>4a</b> Was any supported organization not organized in the United States ("foreign supported organization")? If "Yes," and if you checked 12a or 12b in Part I, answer (b) and (c) below.                                                                                                                                                                                                                                                                                                                                                |     |    |
| <b>b</b> Did the organization have ultimate control and discretion in deciding whether to make grants to the foreign supported organization? If "Yes," describe in <b>Part VI</b> how the organization had such control and discretion despite being controlled or supervised by or in connection with its supported organizations.                                                                                                                                                                                                         |     |    |
| <b>c</b> Did the organization support any foreign supported organization that does not have an IRS determination under sections 501(c)(3) and 509(a)(1) or (2)? If "Yes," explain in <b>Part VI</b> what controls the organization used to ensure that all support to the foreign supported organization was used exclusively for section 170(c)(2)(B) purposes.                                                                                                                                                                            |     |    |
| <b>5a</b> Did the organization add, substitute, or remove any supported organizations during the tax year? If "Yes," answer (b) and (c) below (if applicable). Also, provide detail in <b>Part VI</b> , including (i) the names and EIN numbers of the supported organizations added, substituted, or removed; (ii) the reasons for each such action; (iii) the authority under the organization's organizing document authorizing such action; and (iv) how the action was accomplished (such as by amendment to the organizing document). |     |    |
| <b>b</b> <b>Type I or Type II only.</b> Was any added or substituted supported organization part of a class already designated in the organization's organizing document?                                                                                                                                                                                                                                                                                                                                                                   |     |    |
| <b>c</b> <b>Substitutions only.</b> Was the substitution the result of an event beyond the organization's control?                                                                                                                                                                                                                                                                                                                                                                                                                          |     |    |
| <b>6</b> Did the organization provide support (whether in the form of grants or the provision of services or facilities) to anyone other than (i) its supported organizations, (ii) individuals that are part of the charitable class benefited by one or more of its supported organizations, or (iii) other supporting organizations that also support or benefit one or more of the filing organization's supported organizations? If "Yes," provide detail in <b>Part VI</b> .                                                          |     |    |
| <b>7</b> Did the organization provide a grant, loan, compensation, or other similar payment to a substantial contributor (as defined in section 4958(c)(3)(C)), a family member of a substantial contributor, or a 35% controlled entity with regard to a substantial contributor? If "Yes," complete Part I of Schedule L (Form 990 or 990-EZ).                                                                                                                                                                                            |     |    |
| <b>8</b> Did the organization make a loan to a disqualified person (as defined in section 4958) not described in line 7? If "Yes," complete Part I of Schedule L (Form 990 or 990-EZ).                                                                                                                                                                                                                                                                                                                                                      |     |    |
| <b>9a</b> Was the organization controlled directly or indirectly at any time during the tax year by one or more disqualified persons as defined in section 4946 (other than foundation managers and organizations described in section 509(a)(1) or (2))? If "Yes," provide detail in <b>Part VI</b> .                                                                                                                                                                                                                                      |     |    |
| <b>b</b> Did one or more disqualified persons (as defined in line 9a) hold a controlling interest in any entity in which the supporting organization had an interest? If "Yes," provide detail in <b>Part VI</b> .                                                                                                                                                                                                                                                                                                                          |     |    |
| <b>c</b> Did a disqualified person (as defined in line 9a) have an ownership interest in, or derive any personal benefit from, assets in which the supporting organization also had an interest? If "Yes," provide detail in <b>Part VI</b> .                                                                                                                                                                                                                                                                                               |     |    |
| <b>10a</b> Was the organization subject to the excess business holdings rules of section 4943 because of section 4943(f) (regarding certain Type II supporting organizations, and all Type III non-functionally integrated supporting organizations)? If "Yes," answer 10b below.                                                                                                                                                                                                                                                           |     |    |
| <b>b</b> Did the organization have any excess business holdings in the tax year? (Use Schedule C, Form 4720, to determine whether the organization had excess business holdings.)                                                                                                                                                                                                                                                                                                                                                           |     |    |

**Part IV Supporting Organizations** (continued)

|                                                                                                                                                                              | Yes | No |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|
| <b>11</b> Has the organization accepted a gift or contribution from any of the following persons?                                                                            |     |    |
| <b>a</b> A person who directly or indirectly controls, either alone or together with persons described in (b) and (c) below, the governing body of a supported organization? |     |    |
| <b>11a</b>                                                                                                                                                                   |     |    |
| <b>b</b> A family member of a person described in (a) above?                                                                                                                 |     |    |

| <b>b</b> <input type="checkbox"/> The organization is the parent of each of its supported organizations. Complete line 3 below.                                                                                                                                                                                                                                                                                                                                                                                                         |  |     |    |
| <b>c</b> <input type="checkbox"/> The organization supported a governmental entity. Describe in <b>Part VI</b> how you supported a government entity (see instructions).                                                                                                                                                                                                                                                                                                                                                                |  |     |    |
| <b>2</b> Activities Test. Answer (a) and (b) below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |     |    |
| <b>a</b> Did substantially all of the organization's activities during the tax year directly further the exempt purposes of the supported organization(s) to which the organization was responsive? If "Yes," then in <b>Part VI</b> identify those supported organizations and explain how these activities directly furthered their exempt purposes, how the organization was responsive to those supported organizations, and how the organization determined that these activities constituted substantially all of its activities. |  | Yes | No |
| <b>2a</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |     |    |
| <b>b</b> Did the activities described in (a) constitute activities that, but for the organization's involvement, one or more of the organization's supported organization(s) would have been engaged in? If "Yes," explain in <b>Part VI</b> the reasons for the organization's position that its supported organization(s) would have engaged in these activities but for the organization's involvement.                                                                                                                              |  |     |    |
| <b>2b</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |     |    |
| <b>3</b> Parent of Supported Organizations. Answer (a) and (b) below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |     |    |
| <b>a</b> Did the organization have the power to regularly appoint or elect a majority of the officers, directors, or trustees of each of the supported organizations? Provide details in <b>Part VI</b> .                                                                                                                                                                                                                                                                                                                               |  |     |    |
| <b>3a</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |     |    |
| <b>b</b> Did the organization exercise a substantial degree of direction over the policies, programs, and activities of each of its supported organizations? If "Yes," describe in <b>Part VI</b> the role played by the organization in this regard.                                                                                                                                                                                                                                                                                   |  |     |    |
| <b>3b</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |  |     |    |

**Part V Type III Non-Functionally Integrated 509(a)(3) Supporting Organizations**

- 1** ☐ Check here if the organization satisfied the Integral Part Test as a qualifying trust on Nov. 20, 1970 (explain in Part VI). **See instructions.** All other Type III non-functionally integrated supporting organizations must complete Sections A through E.

| <b>Section A - Adjusted Net Income</b>                                                                                                                                                                            |          | (A) Prior Year | (B) Current Year (optional) |

Schedule O (Form 990 or 990-EZ) (2019)

# Application for Automatic Extension of Time To File an Exempt Organization Return

OMB No. 1545-0047

► **File a separate application for each return.**  
► **Go to [www.irs.gov/Form8868](http://www.irs.gov/Form8868) for the latest information.**

**Electronic filing (e-file).** You can electronically file Form 8868 to request a 6-month automatic extension of time to file any of the forms listed below with the exception of Form 8870, Information Return for Transfers Associated With Certain Personal Benefit Contracts, for which an extension request must be sent to the IRS in paper format (see instructions). For more details on the electronic filing of this form, visit [www.irs.gov/e-file-providers/e-file-for-charities-and-non-profits](http://www.irs.gov/e-file-providers/e-file-for-charities-and-non-profits).

## Automatic 6-Month Extension of Time. Only submit original (no copies needed).

All corporations required to file an income tax return other than Form 990-T (including 1120-C filers), partnerships, REMICs, and trusts must use Form 7004 to request an extension of time to file income tax returns.

|                                                                                                           |                                                                                                                               |                                                                 |

## 2021 GRANT APPLICATION

Dear Applicant,

This document contains the 2021 Grant Application.

Each year, the City of Glenwood Springs allocates a portion of sales tax revenues from its A&I and Tourism Funds for human services, special events, tourism promotion and other public purposes as City Council deems appropriate.

**Please understand that in 2020 City Council directed these grant funds be distributed to local businesses that were suffering as a result of the COVID pandemic and may do something similar this year. Therefore, we cannot guarantee any grant awards of any amounts at this time.**

Please be aware that this year the City is requiring all applications to be submitted in **full, on-time and in one pdf file only**. We have made exceptions in the past, but Council has directed the finance staff to not present applications to the reviewing body that do not meet the 2021 requirements. Applications must be completed and emailed to [FABGrant@glenwoodsprings.onmicrosoft.com](mailto:FABGrant@glenwoodsprings.onmicrosoft.com).

An applicant may submit only one application each grant cycle. The grant process is competitive. Receipt of funds in a prior year is not a guarantee of funding or the same amount of funds, in the current year.

Review your application completely before submitting it, and make sure you have followed all instructions.

The City of Glenwood Springs complies with all applicable state and federal laws, and does not discriminate in any manner.

Sincerely,

CITY OF GLENWOOD SPRINGS

## INSTRUCTIONS

#### ***PROGRAM DATES***

|                                |                      |
|--------------------------------|----------------------|
| <b>Applications Available:</b> | <b>April 2, 2021</b> |
| <b>Applications Due:</b>       | <b>May 10, 2021</b>  |
| <b>Target Award Date:</b>      | <b>June 4, 2021</b>  |

*Note: City Council reserves the right to take whatever time is necessary to make its final determination.*

## INSTRUCTIONS

---

1. Applications will be considered based on the following eligibility and organizational guidelines:
  - a. Must be complete, on-time and in a single pdf. Applications may be printed, completed and scanned along with supporting documentation into one pdf file. Applicants are encouraged to supply your answers directly in this Word document. You may then print this completed document as a pdf file and edit it to include your other documents or print this Word document when it is completed and scan it along with supporting documentation into a single pdf file. You may visit the City's finance office for assistance in either printing or scanning your document.
  - b. Must be a not-for-profit, government or tax-supported public entity.
  - c. May not be a political organization.
  - d. The estimated number of citizens of Glenwood Springs impacted by the application must be disclosed separately from the estimated number of people impacted overall.
  - e. General operating expenses are more likely to be funded than capital expenditures which will be subject to a higher level of scrutiny by the reviewing body.
  - f. Awards to religious organizations are generally not funded. Exceptions may be made on an individual basis depending on the purpose of the request.
  - g. We generally consider only applications of less than 10% of the organization's annual budget.
2. Applications **MUST BE RECEIVED** by the City of Glenwood Springs prior to 5:00 p.m. on May 10, 2021 may be completed and emailed to:  
[FABGrant@glenwoodsprings.onmicrosoft.com](mailto:FABGrant@glenwoodsprings.onmicrosoft.com). There will be no exceptions to this.
3. Applications will be evaluated first on compliance with eligibility requirements and then on responses to the selection criteria. The City of Glenwood Springs reserves the right to fund applications in whole, in part, or not at all, and to reject any or all applications.
4. Applications and all materials submitted to the City may be subject to disclosure pursuant to the Colorado Open Records Act.
5. No cover letter or table of contents should be submitted.
6. The final pdf file submitted to the City must include:
  - Completed and signed Summary Form – electronic signatures are acceptable
  - Use of Funds Summary
  - Responses to Selection Criteria Questions
  - Attachments or supporting documentation in proper order
7. The City Council of the City of Glenwood Springs is the sole decision maker for grants awarded through the Financial Advisory Board. The Financial Advisory Board reviews applications and makes its recommendations to the City Council.

8. The Finance Director is responsible for all activities regarding the distribution of funds through the 2021 Grant Cycle and may solicit information from any source as needed in conducting his work.
9. The City or its designee has the right to issue or not to issue supplemental statements regarding these Instructions or any aspect of the grant program on an as-needed basis, and to perform any due diligence that may be required in the discharge of its obligations. Applicants may be required to provide additional information or to participate in pre-award interviews, as needed.

**Description of Organization and its activities: (two pages maximum)**

As a not-for-profit organization, Team Sopris provides a year-round swim program for anyone who lives in the City of Glenwood Springs and the neighboring communities, from Vail to Rifle. The team exists to provide a family-friendly culture, striving to provide a safe and supportive child protective environment. We offer the opportunity for youth and adult to learn about and participate in competitive swimming. Our goal is for every swimmer to be prepared to compete to the maximum of his or her ability, and to have fun doing so.

Team Sopris is registered with USA Swimming and Colorado Swimming Inc. We are also members of the Western Slope League. We offer six practice levels: Discovery, Challenge 1, Challenge 2, CUDA, Junior and Senior. Team Sopris also offers a high school training group and a Master's swim program for adult swimmers age 18 and older.

**Use of Funds Summary (one page maximum)**

Grant funds will be used for scholarships and to offset operating costs so that participation fees for all swimmers may be kept at a minimum. A specific budget for this request is as follows:

|                                                                                                                                       |                 |
|---------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| Scholarships                                                                                                                          | \$4,000         |
| Pool and gym rental fees for 5 home swim meets (5 meets at a cost of \$1,200 per meet)                                                | \$6,000         |
| Software & subscriptions (training subscriptions, workout preparation software, subscription for team management and meet management) | \$1,000         |
| <b>TOTAL</b>                                                                                                                          | <b>\$11,000</b> |

**Description of how the COVID pandemic impacted your organization**

The COVID pandemic directly and negatively impacted Team Sopris. Following the numerous state and local public health orders, the Glenwood Springs Community Center closed in March 2020. As Team Sopris relies on the Community Center for its only regulation-sized pool in the city, practices and meets were immediately canceled. When the pool was partially opened in June 2020, Team Sopris created a return to swim plan that enabled a small team to resume the program. However, months of swimming were effectively 'lost' and 30% of our families were not able to participate. Organizationally, the pandemic resulted in the loss of over \$21,000 in revenue from swimmer fees and fundraisers.

## SELECTION CRITERIA

All applicants must respond to the following questions in no more than three (3) pages. The three-page limit applies only to your answers to these questions, not to the Summary Form, Use of Funds Summary, or any supporting documentation.

---

**1. Which needs within the City of Glenwood Springs does your organization serve, or will your special event or public program serve?**

Team Sopris is the only entity in Glenwood Springs that provides a comprehensive program that includes swim lessons, competitive swimming, and masters swimming. Our members learn swimming and personal skills that can be used through life. As the largest user of the Glenwood Springs Community Center pool, we create a positive experience for our citizens which, in turn, helps to increase community center memberships. By hosting swim meets, we bring swimmers and their families to Glenwood Springs and to the community center as visitors.

**2. Describe your paid professional staff and your level of volunteer involvement.**

We have a highly trained coaching staff, each of whom have been coaching competitive swimming for many years. Team Sopris currently has four paid professional staff including one full time head coach and three part-time coaches. Steve Vanderhoof serves as the head coach and was an original member of Team Sopris in 1970. Bob Brandon is assistant JR/Sr and age group coach, Kelley Cullen is the assistant age group coach and Becky Joslin is the Masters and High School Prep coach.

Parent involvement is also essential to the success of the organization. Each family must volunteer their time each season and we have specific volunteer assignments and requirements.

**3. Quantify the service level you provide to the citizens of the City of Glenwood Springs. How many City clients were served in your last full fiscal year in the program(s) for which you are requesting funds? What are the projections for the current year and next year? If funding a special event, how many participants to you expect, and will the event draw visitors to Glenwood Springs?**

For the 2021-2022 season, Team Sopris has 86 age group swimmers (ages 6-18), and 15 Masters swimmers. Sixty-five (65) or 76% of our members are citizens of Glenwood Springs. We are thrilled as our membership has rebounded significantly from the 30% decrease due to the pandemic. All individual members are required to purchase a community center membership. Many families of members also purchase memberships.

For this season, we plan to host five home swim meets. Each swim meet has 150 to 250 participants from surrounding communities. Swimmers from these other teams and their families travel to Glenwood Springs to purchase gas, food and often will stay in our local hotels. Hence each of these meets draw visitors to Glenwood Springs create a positive impact for the community overall.

Lastly, we hope to organize and host the annual "Turkey Trot" on Thanksgiving Day. This treasured community event draws over 500 participants and spectators. All proceeds benefit

Team Sopris and three Glenwood Springs High School sports teams. Our event budget of almost \$3,000 is spent with local businesses.

**4. Highlight the desired 2021 goals and outcomes to be achieved with City of Glenwood Springs' funds. How will you define and measure your success as related to this funding request?**

With funds from the City of Glenwood Springs, Team Sopris will work to achieve the following goals and outcomes:

- Retain current members with financial needs due to the ability to offer scholarships
- Retain current members by keeping membership fees low as funds from the city will help offset operating expenses

**5. Describe your income stream(s), including fundraising efforts. If you are the local chapter of a national entity, explain how much funding it provides.**

Income streams for the 2021-2022 season include membership fees, grants and donations and fundraising events. Membership fees cover the expense of four paid professional staff. Grants and donations, including from the City of Glenwood Springs, the Western Colorado Community Foundation and families, provide scholarships for members and cover additional operating expenses. Lastly, fundraising events including the annual Turkey Trot also are key for covering operating expenses.

**6. Have you used City of Glenwood Springs funds to receive additional funds from other sources? If so, what is the amount of leveraged funds received?**

No, Team Sopris has not had the opportunity to leverage funds from the City to receive additional funds.

**7. Has your organization had a deficit budget within the last three years? If so, how did you fund the deficit? What plans have you made to eliminate future deficits? Does your organization have a fund balance/reserve that is equal to or greater than six months of operating expenses? If so, how do you plan to use this reserve?**

Team Sopris recovered from a deficit approximately three years ago. This was due to coaching turnover. The coach at the time had a very competitive salary which needed to be supported by an increase in members. This was not realized, causing the deficit. The coach was let go and the current head coach was hired at a sub-market salary. The team has also now doubled in size. In this manner, the deficit was funded. Furthermore, reserves have been created. Currently, Team Sopris has approximately \$20,000 in reserves, or 25% of operating expenses.

Our Letter Dated:  
July 8, 1988  
Addendum Applicant:  
No

Dear Applicant:

This modifies our letter of the above date in which we stated that you would be treated as an organization that is not a private foundation until the expiration of your advance ruling period.

Your exempt status under section 501(c)(3) of the Internal Revenue Code as an organization described in section 501(c)(3) is still in effect. Based on the information you submitted, we have determined that you are not a private foundation within the meaning of section 509(a) of the Code because you are an organization of the type described in section 509(a)(1) and 170(b)(1)(A)(vi).

Grants and contributors may rely on this determination unless the Internal Revenue Service publishes notice to the contrary. However, if you lose your section 509(a)(1) status, a grantor or contributor may not rely on this determination if he or she was in part responsible for, or was aware of, the act or failure to act, or the substantial or material change on the part of the organization that resulted in your loss of such status, or if he or she acquired knowledge that the Internal Revenue Service had given notice that you would no longer be classified as a section 509(a)(1) organization.

If we have indicated in the heading of this letter that an addendum applies, the addendum enclosed is an integral part of this letter.

Because this letter could help resolve any questions about your private foundation status, please keep it in your permanent records.

If you have any questions, please contact the person whose name and telephone number are shown above.

Sincerely yours,

Gary O. Booth  
District Director

Inspection

Name of the organization

**SOPRIS BARRACUDA SWIM TEAM**

Employer identification number

**\*\*-\*\*\*0401**

**Part I Reason for Public Charity Status** (All organizations must complete this part.) See instructions.

The organization is not a private foundation because it is: (For lines 1 through 12, check only one box.)

- 1 ☐ A church, convention of churches, or association of churches described in **section 170(b)(1)(A)(i).**
- 2 ☐ A school described in **section 170(b)(1)(A)(ii).** (Attach Schedule E (Form 990 or 990-EZ).)
- 3 ☐ A hospital or a cooperative hospital service organization described in **section 170(b)(1)(A)(iii).**
- 4 ☐ A medical research organization operated in conjunction with a hospital described in **section 170(b)(1)(A)(iii).** Enter the hospital's name, city, and state: \_\_\_\_\_
- 5 ☐ An organization operated for the benefit of a college or university owned or operated by a governmental unit described in **section 170(b)(1)(A)(iv).** (Complete Part II.)
- 6 ☐ A federal, state, or local government or governmental unit described in **section 170(b)(1)(A)(v).**
- 7 ☐ An organization that normally receives a substantial part of its support from a governmental unit or from the general public described in **section 170(b)(1)(A)(vi).** (Complete Part II.)
- 8 ☐ A community trust described in **section 170(b)(1)(A)(vi).** (Complete Part II.)
- 9 ☐ An agricultural research organization described in **section 170(b)(1)(A)(ix)** operated in conjunction with a land-grant college or university or a non-land-grant college of agriculture (see instructions). Enter the name, city, and state of the college or university: \_\_\_\_\_
- 10 ☒ An organization that normally receives: (1) more than 33 1/3% of its support from contributions, membership fees, and gross receipts from activities related to its exempt functions - subject to certain exceptions, and (2) no more than 33 1/3% of its support from gross investment income and unrelated business taxable income (less section 511 tax) from businesses acquired by the organization after June 30, 1975. See **section 509(a)(2).** (Complete Part III.)
- 11 ☐ An organization organized and operated exclusively to test for public safety. See **section 509(a)(4).**
- 12 ☐ An organization organized and operated exclusively for the benefit of, to perform the functions of, or to carry out the purposes of one or more publicly supported organizations described in **section 509(a)(1)** or **section 509(a)(2).** See **section 509(a)(3).** Check the box in lines 12a through 12d that describes the type of supporting organization and complete lines 12e, 12f, and 12g.
- a ☐ **Type I.** A supporting organization operated, supervised, or controlled by its supported organization(s), typically by giving the supported organization(s) the power to regularly appoint or elect a majority of the directors or trustees of the supporting organization. **You must complete Part IV, Sections A and B.**
- b ☐ **Type II.** A supporting organization supervised or controlled in connection with its supported organization(s), by having control or management of the supporting organization vested in the same persons that control or manage the supported organization(s). **You must complete Part IV, Sections A and C.**
- c ☐ **Type III functionally integrated.** A supporting organization operated in connection with, and functionally integrated with, its supported organization(s) (see instructions). **You must complete Part IV, Sections A, D, and E.**
- d ☐ **Type III non-functionally integrated.** A supporting organization operated in connection with its supported organization(s) that is not functionally integrated. The organization generally must satisfy a distribution requirement and an attentiveness requirement (see instructions). **You must complete Part IV, Sections A and D, and Part V.**
- e ☐ Check this box if the organization received a written determination from the IRS that it is a Type I, Type II, Type III functionally integrated, or Type III non-functionally integrated supporting organization.
- f Enter the number of supported organizations: \_\_\_\_\_
- g Provide the following information about the supported organization(s).

| (i) Name of supported organization | (ii) EIN | (iii) Type of organization (described on lines 1-10 above (see instructions)) | (iv) Is the organization listed in your governing document? |    | (v) Amount of monetary support (see instructions) | (vi) Amount of other support (see instructions) |

**Part II Support Schedule for Organizations Described in Sections 170(b)(1)(A)(iv) and 170(b)(1)(A)(vi)**

(Complete only if you checked the box on line 5, 7, or 8 of Part I or if the organization failed to qualify under Part III. If the organization fails to qualify under the tests listed below, please complete Part III.)

**Section A. Public Support**

| Calendar year (or fiscal year beginning in) ▶                                                                                                                                                               | (a) 2015 | (b) 2016 | (c) 2017 | (d) 2018 | (e) 2019 | (f) Total |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|----------|----------|----------|----------|-----------|
| 1 Gifts, grants, contributions, and membership fees received. (Do not include any "unusual grants.") .....                                                                                                  |          |          |          |          |          |           |
| 2 Tax revenues levied for the organization's benefit and either paid to or expended on its behalf .....                                                                                                     |          |          |          |          |          |           |
| 3 The value of services or facilities furnished by a governmental unit to the organization without charge ...                                                                                               |          |          |          |          |          |           |
| 4 <b>Total.</b> Add lines 1 through 3 .....                                                                                                                                                                 |          |          |          |          |          |           |
| 5 The portion of total contributions by each person (other than a governmental unit or publicly supported organization) included on line 1 that exceeds 2% of the amount shown on line 11, column (f) ..... |          |          |          |          |          |           |
| 6 <b>Public support.</b> Subtract line 5 from line 4.                                                                                                                                                       |          |          |          |          |          |           |

**Section B. Total Support**

| Calendar year (or fiscal year beginning in) ▶                                                                                                                                                        | (a) 2015 | (b) 2016 | (c) 2017 | (d) 2018 | (e) 2019 | (f) Total                |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|----------|----------|----------|----------|--------------------------|
| 7 Amounts from line 4 .....                                                                                                                                                                          |          |          |          |          |          |                          |
| 8 Gross income from interest, dividends, payments received on securities loans, rents, royalties, and income from similar sources ...                                                                |          |          |          |          |          |                          |
| 9 Net income from unrelated business activities, whether or not the business is regularly carried on ...                                                                                             |          |          |          |          |          |                          |
| 10 Other income. Do not include gain or loss from the sale of capital assets (Explain in Part VI.) .....                                                                                             |          |          |          |          |          |                          |
| 11 <b>Total support.</b> Add lines 7 through 10                                                                                                                                                      |          |          |          |          |          |                          |
| 12 Gross receipts from related activities, etc. (see instructions) .....                                                                                                                             |          |          |          |          | 12       |                          |
| 13 <b>First five years.</b> If the Form 990 is for the organization's first, second, third, fourth, or fifth tax year as a section 501(c)(3) organization, check this box and <b>stop here</b> ..... |          |          |          |          |          | <input type="checkbox"/> |

**Section C. Computation of Public Support Percentage**

|                                                                                                                                                                                                                                                                                                                                                                                                                     |    |                          |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|--------------------------|
| 14 Public support percentage for 2019 (line 6, column (f) divided by line 11, column (f)) .....                                                                                                                                                                                                                                                                                                                     | 14 | %                        |
| 15 Public support percentage from 2018 Schedule A, Part II, line 14 .....                                                                                                                                                                                                                                                                                                                                           | 15 | %                        |
| 16a <b>33 1/3% support test - 2019.</b> If the organization did not check the box on line 13, and line 14 is 33 1/3% or more, check this box and <b>stop here.</b> The organization qualifies as a publicly supported organization .....                                                                                                                                                                            |    | <input type="checkbox"/> |
| b <b>33 1/3% support test - 2018.</b> If the organization did not check a box on line 13 or 16a, and line 15 is 33 1/3% or more, check this box and <b>stop here.</b> The organization qualifies as a publicly supported organization .....                                                                                                                                                                         |    | <input type="checkbox"/> |
| 17a <b>10% -facts-and-circumstances test - 2019.</b> If the organization did not check a box on line 13, 16a, or 16b, and line 14 is 10% or more, and if the organization meets the "facts-and-circumstances" test, check this box and <b>stop here.</b> Explain in Part VI how the organization meets the "facts-and-circumstances" test. The organization qualifies as a publicly supported organization .....    |    | <input type="checkbox"/> |
| b <b>10% -facts-and-circumstances test - 2018.</b> If the organization did not check a box on line 13, 16a, 16b, or 17a, and line 15 is 10% or more, and if the organization meets the "facts-and-circumstances" test, check this box and <b>stop here.</b> Explain in Part VI how the organization meets the "facts-and-circumstances" test. The organization qualifies as a publicly supported organization ..... |    | <input type="checkbox"/> |
| 18 <b>Private foundation.</b> If the organization did not check a box on line 13, 16a, 16b, 17a, or 17b, check this box and see instructions .....                                                                                                                                                                                                                                                                  |    | <input type="checkbox"/> |

Schedule A (Form 990 or 990-EZ) 2019

**Part III Support Schedule for Organizations Described in Section 509(a)(2)**

(Complete only if you checked the box on line 10 of Part I or if the organization failed to qualify under Part II. If the organization fails to qualify under the tests listed below, please complete Part II.)

**Section A. Public Support**

| Calendar year (or fiscal year beginning in) ▶                                                                                                                                    | (a) 2015 | (b) 2016 | (c) 2017 | (d) 2018 | (e) 2019 | (f) Total |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|----------|----------|----------|----------|-----------|
| 1 Gifts, grants, contributions, and membership fees received. (Do not include any "unusual grants.") .....                                                                       | 112,407. | 101,196. | 80,935.  | 89,112.  | 110,573. | 494,223.  |
| 2 Gross receipts from admissions, merchandise sold or services performed, or facilities furnished in any activity that is related to the organization's tax-exempt purpose ..... | 1,601.   | 1,642.   | 2,890.   | 1,630.   | 0.       | 7,763.    |
| 3 Gross receipts from activities that are not an unrelated trade or business under section 513 .....                                                                             |          |          |          |          |          |           |
| 4 Tax revenues levied for the organization's benefit and either paid to or expended on its behalf .....                                                                          |          |          |          |          |          |           |
| 5 The value of services or facilities furnished by a governmental unit to the organization without charge .....                                                                  |          |          |          |          |          |           |
| 6 <b>Total.</b> Add lines 1 through 5 .....                                                                                                                                      | 114,008. | 102,838. | 83,825.  | 90,742.  | 110,573. | 501,986.  |
| 7a Amounts included on lines 1, 2, and 3 received from disqualified persons .....                                                                                                | 10,920.  | 15,317.  | 11,847.  | 11,890.  | 14,083.  | 64,057.   |
| b Amounts included on lines 2 and 3 received from other than disqualified persons that exceed the greater of \$5,000 or 1% of the amount on line 13 for the year .....           |          |          |          |          |          | 0.        |
| c Add lines 7a and 7b .....                                                                                                                                                      | 10,920.  | 15,317.  | 11,847.  | 11,890.  | 14,083.  | 64,057.   |
| 8 <b>Public support.</b> (Subtract line 7c from line 6.) .....                                                                                                                   |          |          |          |          |          | 437,929.  |

**Section B. Total Support**

| Calendar year (or fiscal year beginning in) ▶                                                                                             | (a) 2015 | (b) 2016 | (c) 2017 | (d) 2018 | (e) 2019 | (f) Total |
|-------------------------------------------------------------------------------------------------------------------------------------------|----------|----------|----------|----------|----------|-----------|
| 9 Amounts from line 6 .....                                                                                                               | 114,008. | 102,838. | 83,825.  | 90,742.  | 110,573. | 501,986.  |
| 10a Gross income from interest, dividends, payments received on securities loans, rents, royalties, and income from similar sources ..... | 2.       | 2.       | 2.       | 2.       | 1.       | 9.        |
| b Unrelated business taxable income (less section 511 taxes) from businesses acquired after June 30, 1975 .....                           |          |          |          |          |          |           |
| c Add lines 10a and 10b .....                                                                                                             | 2.       | 2.       | 2.       | 2.       | 1.       | 9.        |
| 11 Net income from unrelated business activities not included in line 10b, whether or not the business is regularly carried on .....      |          |          |          |          |          |           |
| 12 Other income. Do not include gain or loss from the sale of capital assets (Explain in Part VI.) .....                                  |          |          |          |          |          |           |
| 13 <b>Total support.</b> (Add lines 9, 10c, 11, and 12.) .....                                                                            | 114,010. | 102,840. | 83,827.  | 90,744.  | 110,574. | 501,995.  |

14 **First five years.** If the Form 990 is for the organization's first, second, third, fourth, or fifth tax year as a section 501(c)(3) organization, check this box and **stop here** ..... ☐

**Section C. Computation of Public Support Percentage**

|                                                                                                  |    |         |
|--------------------------------------------------------------------------------------------------|----|---------|
| 15 Public support percentage for 2019 (line 8, column (f), divided by line 13, column (f)) ..... | 15 | 87.24 % |
| 16 Public support percentage from 2018 Schedule A, Part III, line 15 .....                       | 16 | 88.30 % |

**Section D. Computation of Investment Income Percentage**

|                                                                                                       |    |       |
|-------------------------------------------------------------------------------------------------------|----|-------|
| 17 Investment income percentage for 2019 (line 10c, column (f), divided by line 13, column (f)) ..... | 17 | .00 % |
| 18 Investment income percentage from 2018 Schedule A, Part III, line 17 .....                         | 18 | %     |

19a **33 1/3% support tests - 2019.** If the organization did not check the box on line 14, and line 15 is more than 33 1/3%, and line 17 is not more than 33 1/3%, check this box and **stop here**. The organization qualifies as a publicly supported organization ..... ☒

b **33 1/3% support tests - 2018.** If the organization did not check a box on line 14 or line 19a, and line 16 is more than 33 1/3%, and line 18 is not more than 33 1/3%, check this box and **stop here**. The organization qualifies as a publicly supported organization ..... ☐

20 **Private foundation.** If the organization did not check a box on line 14, 19a, or 19b, check this box and see instructions ..... ☐

**Part IV Supporting Organizations**

(Complete only if you checked a box in line 12 on Part I. If you checked 12a of Part I, complete Sections A and B. If you checked 12b of Part I, complete Sections A and C. If you checked 12c of Part I, complete Sections A, D, and E. If you checked 12d of Part I, complete Sections A and D, and complete Part V.)

**Section A. All Supporting Organizations**

- 1 Are all of the organization's supported organizations listed by name in the organization's governing documents? If "No," describe in **Part VI** how the supported organizations are designated. If designated by class or purpose, describe the designation. If historic and continuing relationship, explain.
- 2 Did the organization have any supported organization that does not have an IRS determination of status under section 509(a)(1) or (2)? If "Yes," explain in **Part VI** how the organization determined that the supported organization was described in section 509(a)(1) or (2).
- 3a Did the organization have a supported organization described in section 501(c)(4), (5), or (6)? If "Yes," answer (b) and (c) below.
- b Did the organization confirm that each supported organization qualified under section 501(c)(4), (5), or (6) and satisfied the public support tests under section 509(a)(2)? If "Yes," describe in **Part VI** when and how the organization made the determination.
- c Did the organization ensure that all support to such organizations was used exclusively for section 170(c)(2)(B) purposes? If "Yes," explain in **Part VI** what controls the organization put in place to ensure such use.
- 4a Was any supported organization not organized in the United States ("foreign supported organization")? If "Yes," and if you checked 12a or 12b in Part I, answer (b) and (c) below.
- b Did the organization have ultimate control and discretion in deciding whether to make grants to the foreign supported organization? If "Yes," describe in **Part VI** how the organization had such control and discretion despite being controlled or supervised by or in connection with its supported organizations.
- c Did the organization support any foreign supported organization that does not have an IRS determination under sections 501(c)(3) and 509(a)(1) or (2)? If "Yes," explain in **Part VI** what controls the organization used to ensure that all support to the foreign supported organization was used exclusively for section 170(c)(2)(B) purposes.
- 5a Did the organization add, substitute, or remove any supported organizations during the tax year? If "Yes," answer (b) and (c) below (if applicable). Also, provide detail in **Part VI**, including (i) the names and EIN numbers of the supported organizations added, substituted, or removed; (ii) the reasons for each such action; (iii) the authority under the organization's organizing document authorizing such action; and (iv) how the action was accomplished (such as by amendment to the organizing document).
- b **Type I or Type II only.** Was any added or substituted supported organization part of a class already designated in the organization's organizing document?
- c **Substitutions only.** Was the substitution the result of an event beyond the organization's control?
- 6 Did the organization provide support (whether in the form of grants or the provision of services or facilities) to anyone other than (i) its supported organizations, (ii) individuals that are part of the charitable class benefited by one or more of its supported organizations, or (iii) other supporting organizations that also support or benefit one or more of the filing organization's supported organizations? If "Yes," provide detail in **Part VI**.
- 7 Did the organization provide a grant, loan, compensation, or other similar payment to a substantial contributor (as defined in section 4958(c)(3)(C)), a family member of a substantial contributor, or a 35% controlled entity with regard to a substantial contributor? If "Yes," complete Part I of Schedule L (Form 990 or 990-EZ).
- 8 Did the organization make a loan to a disqualified person (as defined in section 4958) not described in line 7? If "Yes," complete Part I of Schedule L (Form 990 or 990-EZ).
- 9a Was the organization controlled directly or indirectly at any time during the tax year by one or more disqualified persons as defined in section 4946 (other than foundation managers and organizations described in section 509(a)(1) or (2))? If "Yes," provide detail in **Part VI**.
- b Did one or more disqualified persons (as defined in line 9a) hold a controlling interest in any entity in which the supporting organization had an interest? If "Yes," provide detail in **Part VI**.
- c Did a disqualified person (as defined in line 9a) have an ownership interest in, or derive any personal benefit from, assets in which the supporting organization also had an interest? If "Yes," provide detail in **Part VI**.
- 10a Was the organization subject to the excess business holdings rules of section 4943 because of section 4943(f) (regarding certain Type II supporting organizations, and all Type III non-functionally integrated supporting organizations)? If "Yes," answer 10b below.
- b Did the organization have any excess business holdings in the tax year? (Use Schedule C, Form 4720, to determine whether the organization had excess business holdings.)

|     | Yes | No |
|-----|-----|----|
| 1   |     |    |
| 2   |     |    |
| 3a  |     |    |
| 3b  |     |    |
| 3c  |     |    |
| 4a  |     |    |
| 4b  |     |    |

| 10b |     |    |

**Part IV Supporting Organizations** (continued)

|                                                                                                                                                                              | Yes | No |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|
| <b>11</b> Has the organization accepted a gift or contribution from any of the following persons?                                                                            |     |    |
| <b>a</b> A person who directly or indirectly controls, either alone or together with persons described in (b) and (c) below, the governing body of a supported organization? |     |    |
| <b>11a</b>                                                                                                                                                                   |     |    |
| <b>b</b> A family member of a person described in (a) above?                                                                                                                 |     |    |
| <b>11b</b>                                                                                                                                                                   |     |    |
| <b>c</b> A 35% controlled entity of a person described in (a) or (b) above? If "Yes" to a, b, or c, provide detail in Part VI.                                               |     |    |
| <b>11c</b>                                                                                                                                                                   |     |    |

**Section B. Type I Supporting Organizations**

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | Yes | No |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|
| <b>1</b> Did the directors, trustees, or membership of one or more supported organizations have the power to regularly appoint or elect at least a majority of the organization's directors or trustees at all times during the tax year? If "No," describe in Part VI how the supported organization(s) effectively operated, supervised, or controlled the organization's activities. If the organization had more than one supported organization, describe how the powers to appoint and/or remove directors or trustees were allocated among the supported organizations and what conditions or restrictions, if any, applied to such powers during the tax year. |     |    |
| <b>1</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |     |    |
| <b>2</b> Did the organization operate for the benefit of any supported organization other than the supported organization(s) that operated, supervised, or controlled the supporting organization? If "Yes," explain in Part VI how providing such benefit carried out the purposes of the supported organization(s) that operated, supervised, or controlled the supporting organization.                                                                                                                                                                                                                                                                             |     |    |
| <b>2</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |     |    |

**Section C. Type II Supporting Organizations**

|                                                                                                                                                                                                                                                                                                                                                                               | Yes | No |

Complete line 2 below.                                                                                                                                                                                                                                                                                                                                                                                                                         |     |    |
| <b>b</b> <input type="checkbox"/> The organization is the parent of each of its supported organizations. Complete line 3 below.                                                                                                                                                                                                                                                                                                                                                                                                  |     |    |
| <b>c</b> <input type="checkbox"/> The organization supported a governmental entity. Describe in Part VI how you supported a government entity (see instructions).                                                                                                                                                                                                                                                                                                                                                                |     |    |
| <b>2</b> Activities Test. Answer (a) and (b) below.                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |     |    |
| <b>a</b> Did substantially all of the organization's activities during the tax year directly further the exempt purposes of the supported organization(s) to which the organization was responsive? If "Yes," then in Part VI identify those supported organizations and explain how these activities directly furthered their exempt purposes, how the organization was responsive to those supported organizations, and how the organization determined that these activities constituted substantially all of its activities. | Yes | No |
| <b>2a</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |    |
| <b>b</b> Did the activities described in (a) constitute activities that, but for the organization's involvement, one or more of the organization's supported organization(s) would have been engaged in? If "Yes," explain in Part VI the reasons for the organization's position that its supported organization(s) would have engaged in these activities but for the organization's involvement.                                                                                                                              |     |    |
| <b>2b</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |    |
| <b>3</b> Parent of Supported Organizations. Answer (a) and (b) below.                                                                                                                                                                                                                                                                                                                                                                                                                                                            |     |    |
| <b>a</b> Did the organization have the power to regularly appoint or elect a majority of the officers, directors, or trustees of each of the supported organizations? Provide details in Part VI.                                                                                                                                                                                                                                                                                                                                |     |    |
| <b>3a</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |    |
| <b>b</b> Did the organization exercise a substantial degree of direction over the policies, programs, and activities of each of its supported organizations? If "Yes," describe in Part VI the role played by the organization in this regard.                                                                                                                                                                                                                                                                                   |     |    |
| <b>3b</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |    |

**Part V Type III Non-Functionally Integrated 509(a)(3) Supporting Organizations**

- 1 ☐ Check here if the organization satisfied the Integral Part Test as a qualifying trust on Nov. 20, 1970 (explain in Part VI). See instructions. All other Type III non-functionally integrated supporting organizations must complete Sections A through E.

| Section A - Adjusted Net Income |                                                                                                                                                                                                          | (A) Prior Year | (B) Current Year (optional) |
|---------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|-----------------------------|
| 1                               | Net short-term capital gain                                                                                                                                                                              | 1              |                             |

Filers of:

Section:

Form 990 or 990-EZ

☒ 501(c)( 3 ) (enter number) organization☐ 4947(a)(1) nonexempt charitable trust **not** treated as a private foundation☐ 527 political organization

Form 990-PF

☐ 501(c)(3) exempt private foundation☐ 4947(a)(1) nonexempt charitable trust treated as a private foundation☐ 501(c)(3) taxable private foundationCheck if your organization is covered by the **General Rule** or a **Special Rule**.**Note:** Only a section 501(c)(7), (8), or (10) organization can check boxes for both the General Rule and a Special Rule. See instructions.**General Rule**

- ☒ For an organization filing Form 990, 990-EZ, or 990-PF that received, during the year, contributions totaling \$5,000 or more (in money or property) from any one contributor. Complete Parts I and II. See instructions for determining a contributor's total contributions.

**Special Rules**

- ☐ For an organization described in section 501(c)(3) filing Form 990 or 990-EZ that met the 33 1/3% support test of the regulations under sections 509(a)(1) and 170(b)(1)(A)(vi), that checked Schedule A (Form 990 or 990-EZ), Part II, line 13, 16a, or 16b, and that received from any one contributor, during the year, total contributions of the greater of (1) \$5,000; or (2) 2% of the amount on (i) Form 990, Part VIII, line 1h; or (ii) Form 990-EZ, line 1. Complete Parts I and II.
- ☐ For an organization described in section 501(c)(7), (8), or (10) filing Form 990 or 990-EZ that received from any one contributor, during the year, total contributions of more than \$1,000 *exclusively* for religious, charitable, scientific, literary, or educational purposes, or for the prevention of cruelty to children or animals. Complete Parts I, II, and III.
- ☐ For an organization described in section 501(c)(7), (8), or (10) filing Form 990 or 990-EZ that received from any one contributor, during the year, contributions *exclusively* for religious, charitable, etc., purposes, but no such contributions totaled more than \$1,000. If this box is checked, enter here the total contributions that were received during the year for an *exclusively* religious, charitable, etc., purpose. Don't complete any of the parts unless the **General Rule** applies to this organization because it received *nonexclusively* religious, charitable, etc., contributions totaling \$5,000 or more during the year ..... ▶ \$ \_\_\_\_\_

**Caution:** An organization that isn't covered by the General Rule and/or the Special Rules doesn't file Schedule B (Form 990, 990-EZ, or 990-PF), but it **must** answer "No" on Part IV, line 2, of its Form 990; or check the box on line H of its Form 990-EZ or on its Form 990-PF, Part I, line 2, to certify that it doesn't meet the filing requirements of Schedule B (Form 990, 990-EZ, or 990-PF).

LHA For Paperwork Reduction Act Notice, see the instructions for Form 990, 990-EZ, or 990-PF.

**Part I Election To Expense Certain Property Under Section 179** Note: If you have any listed property, complete Part V before you complete Part I.

|    |                                                                                                                                         |                              |                  |
|----|-----------------------------------------------------------------------------------------------------------------------------------------|------------------------------|------------------|
| 1  | Maximum amount (see instructions)                                                                                                       | 1                            | 1,020,000.       |
| 2  | Total cost of section 179 property placed in service (see instructions)                                                                 | 2                            |                  |
| 3  | Threshold cost of section 179 property before reduction in limitation                                                                   | 3                            | 2,550,000.       |
| 4  | Reduction in limitation. Subtract line 3 from line 2. If zero or less, enter -0-                                                        | 4                            |                  |
| 5  | Dollar limitation for tax year. Subtract line 4 from line 1. If zero or less, enter -0-. If married filing separately, see instructions | 5                            |                  |
| 6  | (a) Description of property                                                                                                             | (b) Cost (business use only) | (c) Elected cost |
| 7  | Listed property. Enter the amount from line 29                                                                                          | 7                            |                  |
| 8  | Total elected cost of section 179 property. Add amounts in column (c), lines 6 and 7                                                    | 8                            |                  |
| 9  | Tentative deduction. Enter the smaller of line 5 or line 8                                                                              | 9                            |                  |
| 10 | Carryover of disallowed deduction from line 13 of your 2018 Form 4562                                                                   | 10                           |                  |
| 11 | Business income limitation. Enter the smaller of business income (not less than zero) or line 5                                         | 11                           |                  |
| 12 | Section 179 expense deduction. Add lines 9 and 10, but don't enter more than line 11                                                    | 12                           |                  |
| 13 | Carryover of disallowed deduction to 2020. Add lines 9 and 10, less line 12                                                             | 13                           |                  |

Note: Don't use Part II or Part III below for listed property. Instead, use Part V.

**Part II Special Depreciation Allowance and Other Depreciation (Don't include listed property.)**

|    |                                                                                                                          |    |         |
|----|--------------------------------------------------------------------------------------------------------------------------|----|---------|
| 14 | Special depreciation allowance for qualified property (other than listed property) placed in service during the tax year | 14 | 30,080. |
| 15 | Property subject to section 168(f)(1) election                                                                           | 15 |         |
| 16 | Other depreciation (including ACRS)                                                                                      | 16 |         |

**Part III MACRS Depreciation (Don't include listed property. See instructions.)****Section A**

|    |                                                                                                                                   |    |  |
|----|-----------------------------------------------------------------------------------------------------------------------------------|----|--|
| 17 | MACRS deductions for assets placed in service in tax years beginning before 2019                                                  | 17 |  |
| 18 | If you are electing to group any assets placed in service during the tax year into one or more general asset accounts, check here |    |  |

**Section B - Assets Placed in Service During 2019 Tax Year Using the General Depreciation System**

| <b>35</b> Was the vehicle used primarily by a more than 5% owner or related person? .....              |                |                |                |                |                |                |
| <b>36</b> Is another vehicle available for personal use? .....                                         |                |                |                |                |                |                |

**Section C - Questions for Employers Who Provide Vehicles for Use by Their Employees**

Answer these questions to determine if you meet an exception to completing Section B for vehicles used by employees who aren't more than 5% owners or related persons.

|                                                                                                                                                                                                                                        | Yes | No |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|
| <b>37</b> Do you maintain a written policy statement that prohibits all personal use of vehicles, including commuting, by your employees? .....                                                                                        |     |    |
| <b>38</b> Do you maintain a written policy statement that prohibits personal use of vehicles, except commuting, by your employees? See the instructions for vehicles used by corporate officers, directors, or 1% or more owners ..... |     |    |
| <b>39</b> Do you treat all use of vehicles by employees as personal use? .....                                                                                                                                                         |     |    |
| <b>40</b> Do you provide more than five vehicles to your employees, obtain information from your employees about the use of the vehicles, and retain the information received? .....                                                   |     |    |
| <b>41</b> Do you meet the requirements concerning qualified automobile demonstration use? .....                                                                                                                                        |     |    |

**Note:** If your answer to 37, 38, 39, 40, or 41 is "Yes," don't complete Section B for the covered vehicles.

**Part VI Amortization**

# Application for Automatic Extension of Time To File an Exempt Organization Return

OMB No. 1545-0047

► **File a separate application for each return.**  
► **Go to [www.irs.gov/Form8868](http://www.irs.gov/Form8868) for the latest information.**

**Electronic filing (e-file).** You can electronically file Form 8868 to request a 6-month automatic extension of time to file any of the forms listed below with the exception of Form 8870, Information Return for Transfers Associated With Certain Personal Benefit Contracts, for which an extension request must be sent to the IRS in paper format (see instructions). For more details on the electronic filing of this form, visit [www.irs.gov/e-file-providers/e-file-for-charities-and-non-profits](http://www.irs.gov/e-file-providers/e-file-for-charities-and-non-profits).

## Automatic 6-Month Extension of Time. Only submit original (no copies needed).

All corporations required to file an income tax return other than Form 990-T (including 1120-C filers), partnerships, REMICs, and trusts must use Form 7004 to request an extension of time to file income tax returns.

|                                                                                            |                                                                                                                               |                                                           |

| <b>Background Info:</b>      | <p>The attached ordinance makes changes to the Municipal Code as it relates to the depositing of snow, leaves and garbage within the City's rights-of-way. As proposed, the regulations would not allow snow and ice to be shoveled from a private property onto public streets, sidewalks and other public property, including from tri-plexes, duplexes/paired homes, and single family residences. This regulation is intended to keep the vehicular and pedestrian areas clear of ice and the build up of snow.</p> <p>Ordinance 11 would also create a similar prohibition on depositing leaves and other debris from private property onto a sidewalk, street or other public property. Keeping these items from the curb and gutter is important to street sweeping operations. Each fall, staff encounters leaves blown into the right-of-way, and this specific regulation would add to the already stated section which requires owners to keep sidewalks, curbs and gutters clean and maintained.</p> <p>This ordinance also clarifies that snow plowing and street sweeping is not considered construction noise. This is intended to exempt snow plowing and street sweeping operations from noise time restrictions thereby allowing plowing for private parking lots and public works operations to occur overnight and early in the morning.</p> |
| <b>Issues:</b>               | NA                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Staff Recommendation:</b> | Approval of Ordinance 11, Series 2021.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## **ORDINANCE NO. 11**

Series of 2021

### **AN ORDINANCE OF THE CITY OF GLENWOOD SPRINGS, COLORADO, AMENDING SECTIONS 090.040.070, 090.040.080, AND 100.070.030 OF THE GLENWOOD SPRINGS MUNICIPAL CODE.**

**WHEREAS**, the City of Glenwood Springs (“Glenwood Springs” or the “City”) is a home-rule municipality organized under Article XX of the Colorado Constitution and with the authority of the Glenwood Springs Home Rule Charter; and

**WHEREAS**, Section 090.040.070 of the Municipal Code addresses the maintenance of sidewalks, curbs and gutters; and

**WHEREAS**, Section 090.040.080 of the Municipal Code addresses removal of snow; and

**WHEREAS**, Section 100.070.030 of the Municipal Code addresses noises prohibited; and

**WHEREAS**, the City Council finds and declares that the amendments to 090.040.070, 090.040.080, and 100.070.030 set forth in **Exhibit A**, hereto and incorporated herein by this reference, are in the best interest of the City.

### **NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF GLENWOOD SPRINGS, COLORADO, ORDAINS:**

**Section 1.** The foregoing recitals are incorporated herein as if set forth in full.

**Section 2.** Sections 090.040.070, 090.040.080, and 100.070.030 of the Glenwood Springs Municipal Code are hereby amended as set forth in **Exhibit A** attached hereto.

**Section 3.** Any ordinances or resolutions or parts thereof, which are in conflict with this ordinance, are hereby repealed to the extent of such conflict only.

**Section 4.** With the exception of the provisions of the Municipal Code of the City of Glenwood Springs which are modified as provided herein, all remaining provisions of the Municipal Code of the City of Glenwood Springs shall remain in full force and effect.

## EXHIBIT A

The following sections of the Municipal Code are amended as follows with double underlined text added and ~~strike through text deleted~~.

### **090.040.070 Maintenance of sidewalks, curbs and gutters.**

- (a) *Duty.* In addition to any other obligations imposed upon owners pursuant to this article, it shall be an owner's duty to maintain the sidewalks, curbs and gutters along public rights-of-way abutting said owner's real property in a clean condition free of all debris, garbage, trash, leaves or any other substances which would impair or interfere in any way with the use of the sidewalks or curbs and gutters.
- (b) *Depositing items in right-of-way prohibited.* It shall be unlawful for any person to remove debris, garbage, trash or leaves from any private property and deposit it upon any public street, sidewalk, alley or other public property within the City.
- ~~(b)~~(c) *Notice.* In the event that the City determines that an owner has been negligent in performing the duty imposed by this section, the City shall provide written notice either by first class mail, postage prepaid, or by hand delivery to the owner, to perform the duties as set forth in this section. The owner shall have two (2) days from the date of the receipt of such notice to perform said duty. In the event the sidewalk or curb and gutter is in such condition as to constitute an immediate hazard to the health, safety or welfare of persons using said sidewalk or curb and gutter, the City may require the immediate performance of the owner's duty pursuant to this section. In the event that the owner fails to perform said duty, the City may, but need not, perform or have performed by an independent contractor all work necessary to ensure compliance with this section and shall charge the owner for the cost of such performance.
- ~~(c)~~(d) *Lien on owner's property.* In the event that the City performs such work or has such work performed, it shall have a lien upon the owner's real property for the cost of such performance until such cost is paid, which lien may be certified to the County Treasurer and/or Assessor and enforced in the same manner as is the collection of real property taxes. The City shall be entitled to recover, in the event that the cost of performance is not paid within thirty (30) days of the date of mailing or delivery of notice to the owner of the cost of such performance, its attorney fees incurred to collect such sums and interest at the rate of one (1) percent per month. Such attorney's fees and interest shall also constitute a lien against the owner's real property until paid.
- ~~(d)~~(e) *Violation.* In addition to the remedies set forth in this section, it shall be a misdemeanor for any person to fail to perform the duty required of him/her by this section and, upon conviction of the same, such person shall be punished in accordance with the provisions of Section 010.020.080.

### **090.040.080 Removal of snow.**

- (a) *Shoveling of public sidewalks required.* It shall be unlawful for any owner or occupant of any lot, block or parcel of ground within the City, or for any agent in charge of such property, to allow any snow or ice to accumulate or remain upon the entire width of any sidewalk in the public right-of-way abutting such property longer than twenty-four (24) hours from the time of the last accretion of such snow or ice.

- (b) *Depositing snow in right-of-way prohibited.* It shall be unlawful for any person to remove snow or ice from any private property and deposit such snow or ice upon any public street, sidewalk, alley or other public property within the City ~~under the following circumstances:~~
- ~~(1) When the snow or ice is removed from any private nonresidential property.~~
- ~~(2) When the snow or ice is removed from any private residential property containing in excess of four (4) dwelling units as defined in Title 070 of this Code.~~
- (c) *Obstructing and endangering public right-of-way prohibited.* It shall be unlawful for any person to plow, shovel, blow or otherwise move snow or ice in or upon any public street, sidewalk, alley or other public property within the City in a manner which:
- (1) Obstructs vehicular or pedestrian traffic upon the right-of-way.
  - (2) Increases hazards to vehicles and pedestrians traveling upon the right-of-way.
  - (3) Interferes with the maintenance of the public right-of-way by the City.
- (d) *Exception for public crews.* Nothing contained in this section shall be construed to prohibit or regulate the manner in which persons working for or on behalf of the City clear or remove snow or ice from the public streets or other public places within the City.
- (e) *Penalties.* Upon first violation of this section, occupant may be assessed a fine of fifty dollars (\$50.00). Upon second violation of this section, occupant may be assessed a fine of seventy-five dollars (\$75.00). Upon third violation of this section, property owner and occupant may be cited with a misdemeanor punishable in accordance with Section 010.020.080 of this Code.

\*\*\*\*

#### **100.070.030 Noises prohibited.**

The following noises are declared a nuisance and are in violation of this section:

- (1) *Construction work.* Any noise created by operating or causing to be operated any equipment (mechanical or nonmechanical, self-propelled or manually manipulated) used in construction, repair, alteration or demolition work on buildings, structures, streets, alleys or appurtenances at any time other than between the hours of 7:00 a.m. and 8:00 p.m. on Monday through Friday, and 8:00 a.m. and 6:00 p.m. on Saturday and Sunday. Snow plowing and Street Sweeping activities are not considered "construction work" under this section. The City Manager is hereby authorized to issue a construction work noise permit allowing construction work noise to occur at a time other than the time set forth herein based on circumstances which necessitate such construction work. In the event the City Manager issues such a permit, the City Council shall be advised of such issuance at the next regular City Council meeting.
- (2) *Radios, tape players, record players, television sets, musical instruments and similar devices.* It shall be unlawful to use, operate or permit the operation of any radio receiving set, phonograph, tape player, television set, musical instrument or other machine or device for the production of sound in such a manner as to be plainly audible at twenty-five (25) feet from such device when operated in the City. In addition to the foregoing within all commercial zone districts, businesses shall make reasonable efforts to contain any noise produced by the business within the confines of the business' premises.
- (3) *Engine braking device.* Any noise created from the operation of any motor vehicle with an engine brake engaged.

**City Council**  
**STAFF REPORT**  
**City of Glenwood Springs**  
**October 7, 2021**

**Agenda Item:** Resolution 2021-27 Supporting a Land Water Conservation Fund Grant for the Sayre Park Phase II Project

**Action Requested:** Approve Resolution 2021-27 in support of a \$900,000 LWCF Grant for the Sayre Park Phase II Project.

**Department:** Parks & Recreation

**Presented By:**

**Background Info:** The City of Glenwood Springs seeks \$900,000 in Land & Water Conservation Fund (LWCF) grant funding with \$900,000 in match to construct the City's first universal design playground at Sayre Park as part of the Phase II Improvements Project.

The 7.6-acre park on Grand Avenue services residential neighborhoods to the north, east, and west; a commercial corridor to the south; and the Valley View Hospital medical center to the southeast. The park is located within a block from three local churches and adjacent to the St. Stephen Catholic School. Residents and visitors to the area span a wide range of ages and abilities, from the toddlers attending pre-school at St. Stephen Catholic School to the seniors living just blocks away at the Sunnyside Retirement Center.

Beginning in 2019, the City of Glenwood Springs launched a public engagement process about improvements to Sayre Park. The public engagement process (conducted in English and Spanish) has included surveys, stakeholder meetings, community open houses, one-on-one meetings, neighbor interviews, and city council presentations on the resulting Sayre Park Master Plan. Public engagement identified improvements to accessibility as a high priority for Sayre Park. Glenwood Springs does not have an all-inclusive playground where children with disabilities can improve their physical, cognitive and social skills side-by-side with their able-bodied friends. Approximately 120 kids in Glenwood Springs have a disability. A snapshot survey revealed that nine out of ten families with children with disabilities feel their child does not have the same opportunities to play as other children. These children are on the outside looking in and missing out on a crucial component to healthy, typical development.

Phase 2 of the Sayre Park Improvements Project includes construction of a universal design playground, ADA walkways, restroom improvements, and a pavilion/plaza in the northeast quadrant of the park. With LWCF grant funds, the City of Glenwood Springs will complete the construction of the inclusive playground. The 1:1 match will be provided by Rotary Club Grants, Park Impact Fees, Conservation Trust Fund and community donations.

The universal design playground will include such elements as accessible surfacing, exciting adaptive equipment, an inclusive apparatus layout, and an inviting theme. The project will enable people of all ages and abilities to access and enjoy the park.

**Issues:** None.

**Staff Recommendation:** Approve Resolution 2021-27 in support of a \$600,000 LWCF Grant for the Sayre Park Phase II Project.

## **RESOLUTION 2021-27**

### **A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF GLENWOOD SPRINGS, COLORADO, AUTHORIZING AND SUPPORTING THE APPLICATION FOR A GRANT FROM THE COLORADO LAND & WATER CONSERVATION FUND FOR PHASE 2 OF THE SAYRE PARK REDEVELOPMENT.**

**WHEREAS**, the City of Glenwood Springs is a political subdivision of the State of Colorado, and therefore an eligible applicant for a grant awarded by the Colorado Land & Water Conservation Fund ("LCWF"); and

**WHEREAS**, the City of Glenwood Springs intends to submit a Grant Application to LCWF for Phase 2 of the Sayre Park redevelopment, requesting an award of \$900,000; and

**WHEREAS**, Phase 2 of the Sayre Park Improvements project includes construction of a universal design playground, ADA walkways, restroom improvements, and a pavilion/plaza in the northeast quadrant of the park. With LWCF grant funds, the City of Glenwood Springs will complete the construction of the inclusive playground; and

**WHEREAS**, City Council strongly supports the completion of Phase 2 of the Sayre Park redevelopment if awarded the LCWF Grant.

**NOW, THEREFORE, IT IS RESOLVED BY THE CITY COUNCIL OF THE CITY OF GLENWOOD SPRINGS, COLORADO, THAT:**

**The above recitals are hereby incorporated as findings by the City Council of the City of Glenwood Springs.**

**Section 1.** The above recitals are hereby incorporated as findings by the City Council of the City of Glenwood Springs.

**Section 2.** The City Council of the City of Glenwood Springs strongly supports the Phase 2 Sayre Park redevelopment and has appropriated matching funds for a grant.

**Section 3.** The City Council of the City of Glenwood Springs will authorize the expenditure of funds necessary to meet the terms and obligations of any grant awarded pursuant to a Grant Agreement with LCWF.

**Section 4.** If the grant is awarded, the City of Glenwood Springs hereby authorizes the Mayor or Mayor Pro Tem to sign the grant agreement with LCWF.

INTRODUCED, READ AND PASSED THIS 7<sup>th</sup> DAY OF OCTOBER 2021.

CITY OF GLENWOOD SPRINGS, COLORADO

Jonathan Godes, Mayor

ATTEST:

---

Ryan Muse, Assistant City Clerk

**City Council**  
**STAFF REPORT**  
**City of Glenwood Springs**  
**October 7, 2021**

**Agenda Item:** 09-20 Consideration of an Annexation and the initial zoning/Rezoning of 15.818 acres to Commercial (CO) District and Planned Unit Development (PUD) District at 214 Center Drive (PIN: 2185-061-00-042).

**Action Requested:** **Action 1 - Annexation** – of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs.

**Action 2 - Initial Zoning/Rezoning** – of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

**Department:** Economic and Community Development

**Presented By:** Trent Hyatt, Senior Planner

**Background Info:** The Planning and Zoning Commission (Commission) is the recommending body to City Council for all Annexation and Rezoning applications. The Commission first considered the proposal at their March 23, 2021 regular meeting where public comment was taken. Said meeting was continued to the next regular meeting on April 27, 2021 and then again to May 25, 2021. At each step of the review process, the Commission received additional information from the applicant and staff and also received comments from the public. All information/materials provided to the Commission and the minutes from each meeting are attached for your review.

**Issues:** For a complete analysis of various issues related to the proposal, please refer to the attached staff reports, staff memos, applicant responses, and public comments submitted to date. However, the list below is a summary of the topics addressed during the review process.

**Issues Addressed**

1. Traffic, circulation, and access;
2. Emergency egress/evacuation;
3. Density of the project;
4. Lack of open space proposed and/or available in west Glenwood;
5. City growth and development;
6. Building heights and related view impacts;
7. Impacts to schools;
8. Quality of life issues/impacts;
9. Parking;
10. Water availability and use; and
11. Residential unit types provided.

**Planning and Zoning Commission Discussion/Recommendation**

The Commission took the actions outlined below at their May 25, 2021 meeting.

**Action 1 - Annexation** – of a 15.818 acre parcel into the municipal limits of the City of Glenwood

Springs.

The Commission voted unanimously 4-0 to recommend **denial** of the Annexation finding it is not consistent with the *Glenwood Springs Comprehensive Plan's* (Comp Plan) goals of livability, small town character, and safety and that it has the potential to create adverse impacts to the health, safety, and welfare of the City and adjacent neighborhoods. The Commission provided the comments/recommendations below.

#### **Considerations**

1. The City needs to determine the makeup of our small town and its future in conjunction with an update of the comprehensive plan;
2. A shortage of housing units in the City does not necessarily mean we have the capacity to accommodate them nor do we know the specific housing type needed ;
3. The Comp Plan identifies annexation of the subject parcel as a high priority but requests for other properties have also been denied for similar concerns to those identified during this review;
4. The proposal does not address Comp Plans goal of our small town character, does not direct growth inward, does not provide for civic spaces, and is not infill and redevelopment;
5. Offsite transportation and pedestrian improvements are needed in this area regardless of the current development proposal;
6. Need to address life safety egress issues before the approval of such a large development;
7. Density of the proposal is too high and applicant should consider development of the project in phases;
8. Site should be developed in conjunction with the redevelopment of the Glenwood Mall site.
9. Proposal of this size should have a direct connection to Highway 6;
10. Remove false gable roof connections between townhome units;
11. Consider scaling down density and offsite improvements accordingly; and
12. Revise City's Comp Plan before annexation and/or additional large scale development.

**Action 2 - Initial Zoning/Rezoning** – of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

The Commission voted unanimously 4-0 to recommend **denial** of the Rezoning finding it has adverse impacts related to traffic, evacuation/safety sight lines and potential expense to City. The Commission provided the comments/recommendations below.

#### **Considerations**

1. Consider reducing project density;
2. Provide story poles to identify building heights and remove lower gable on townhome units;
3. Remove on-street parking;
4. Require a minimum of 20 percent of the units are owner occupied housing that inclusionary housing exceed the required 10 percent minimum;
5. Complete evacuation planning and implementation adding significant density;
- 6; Provide space for a new fire station for the City;
7. Further consider expense to City of taking ownership of new road sections/rights-of-way;
8. Provided direct access to Highway 6;
9. Redevelop this parcel in conjunction with the Glenwood Mall site;
10. Further study traffic impacts;
11. Consider park land dedication for open space instead of a fee in lieu of;
12. Consider reducing surface parking via tuck under building parking; and
13. Solve evacuation/egress issues before adding congestion.

#### **Applicant's Response**

On July 9 and 12, the applicant submitted revisions to the proposal in an attempt to address some of the issues above. Most significant is the removal of the two easternmost apartment buildings along

Donegan Road and replacement thereof with 20 townhome units (for a total of 40) in four buildings. This reduces the total project unit count by 27, from 360 to 332. As a result, the total number of parking spaces required is reduced to 566 leaving an excess of 13 off street parking spaces. This is in addition to the on-street parking still proposed along Donegan and Storm King Roads.

#### **Other Related Developments**

#### **Staff Recommendation:**

##### **Action Alternatives**

Section 070.060.030(g)(1)d outlines the review and decision procedures for applications being considered by the Commission and/or City Council stating, "he applicable review body shall approve, approve with conditions, or deny the application based on the applicable approval criteria listed in the application-specific procedures. The body may also continue the hearing..."

**Action 1 - Annexation** – of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs.

##### **Staff Recommendation**

Staff recommends **approval (with conditions)** of the Annexation with the findings and conditions outlined below. Please note, the recommended conditions include significant changes related to the revisions to the proposal and by the applicant's potential purchase of the Glenwood Mall site.

##### **Recommended Findings:**

1. The annexation conforms to applicable state statutes.
2. The annexation is consistent with the Comprehensive Plan; and
3. The annexation minimizes potential adverse impacts to the City and does not negatively impact the City's public health, safety, and welfare.

##### **Recommended Conditions:**

1. The applicant shall comply with/address all City staff comments related to the proposal prior to submittal of any future development permit application.
2. Future development shall comply with the various requirements outlined in the PUD, where applicable, related items such as uses, building heights, densities, minimum open space, parking, and/or landscaping. The exact locations site features may change upon site/architectural plan review. The Glenwood Springs Municipal Code is otherwise applicable to any standards not addressed therein.
3. The applicant shall comply with all verbal representations made in the public hearings, as outlined in all application materials, and/or as revised per conditions herein and approved by the Community Development Director.
4. Prior to approval of any future development review application, the applicant shall apply for and receive the approval of a CDOT access permit, where applicable.
5. The applicant shall amend the annexation agreement to address the following:
  - a. The applicant shall provide a payment in the amount of \$40,000 to aid in the planning for and implementation of necessary emergency evacuation measures.
  - b. The applicant shall amend the development proposal as is necessary to include not less than one acre of land for the future construction of a new fire station for the Glenwood Springs Fire Department. Said land shall be dedicated to the City.
  - c. The applicant shall deed restrict a minimum of 20 percent of the residential units at 100 percent of area median income or 10 percent of the residential units at 90 percent of area median income. A minimum of 20 percent of the total residential units shall be resident occupied.
  - d. The applicant shall amend the development proposal as is necessary to include access to Highway 6 through the parcel to the south.
  - e. All offsite transportation and pedestrian related improvements to the Mel Ray, Storm King, and Donegan Roads rights-of-way.

f. The applicant shall amend the proposal as is necessary to include xeriscape drought resistant landscaping design.

ANNEXATION AND ZONING SUBMISSION

NOT FOR CONSTRUCTION

September 29, 2021

Dear City Council,

R2 Development in West Glenwood

Mark and I have been residents of Glenwood Springs for 48 years and 42 years respectively and love our little piece of paradise.

You, city council members, have an amazing responsibility in this place and time! To quote one of you at our last meeting about this annexation, "Democracy is messy". Well, it was messy to see the vote whether to approve or disapprove this annexation get hijacked during the actual vote, when 4 votes had already been cast to deny.

I would just like to remind you that as stewards of our great town, you must consider the LONG TERM consequences of allowing this annexation and development to go on at this location in the name of Glenwood Springs needing more "affordable housing". The big issue is the density of the project and resulting consequences.

Your own P&Z clearly stated the reasons that this project was denied, so I would ask that you pause this annexation and YOU JUST STOP...go back to the drawing board on what is good for West Glenwood, not what is good for the developer.

Update the comprehensive plan that is now 10 years old and address the evacuation and shelter in place concerns, the water issues that are not going away, and infrastructure such as roads and traffic that are neglected before making a decision on this annexation.

It is a tough ask, and I appreciate the job you are doing, but remember, all of us that live in West Glenwood are all every bit a part of Glenwood Springs.

Please have the foresight to look backward and address what others before you did not!

Susie and Mark Straus

Please forward this email to all members of the City Council. Thanks so much Ryan.

To all members of City Council-

I realize you've received many many emails from me, in hopes to encourage you to deny the annexation of 480 Donegan in West Glenwood. My main purpose in writing so many letters has been rooted in fear, fear of yet another evacuation due to a fire with no clear way out, for myself or the hundreds of new residents of R2's proposed development.

In all of my letters, I've given numerous reasons that speak also to the density of such a project.

However, I recently came across a quote by Al Gore that I feel speaks even more to denying this particular project by R2 developers;

***MANY OF THE GREEN PLACES AND OPEN SPACES  
THAT NEED PROTECTING THE MOST TODAY,  
ARE IN OUR OWN NEIGHBORHOODS.***

9

***IN TOO MANY PLACES, THE BEAUTY OF LOCAL VISTAS  
HAVE BEEN DEGRADED BY DECADES OF ILL PLANNED  
AND ILL COORDINATED DEVELOPMENT  
AL GORE***

Thank you, as always, for taking the time to read yet another letter opposing the R2 development.  
Take care-  
Jamie Darien

## Where Will Any of Us Live in 2027?

The Post Independent recently had an article about the growing deficit of affordable housing for even the middle class, and the grim prognosis for 2027. That's only 8 years from now.

Last month, the sad destruction of five mountain lions in West Glenwood captured our attention as it destroyed our cherished fantasy of life right now in our Valley.

We have filled in and filled up all the habitable places. Now we live with escalating conflicts with all the other beings whose home territory we have colonized. We can hardly avoid seeing that we are now in a war of extermination, in lethal competition for the basic resources of air, water, sustenance and habitat. There are no more empty places where we can relocate and release "problem" cats and bears into "the wild." The surviving remnant we so love to watch from our decks grows increasingly desperate, and when they destroy our gardens and kill our pets, we're sorry – but they have to go. Because there's nowhere for them to go, that means they have to be killed. But we're not like our pioneer ancestors, able to assume that their populations will adapt and thrive despite us. No, in our discomfort we perceive the mass extinctions of the Anthropocene. We wonder what we have done.

Bruno Latour, French philosopher of science and technology, has identified three universal phenomena he sees as symptoms of a single historical situation: first, "deregulation." Then an "increasingly vertiginous explosion of inequalities." And the third, a "systematic effort to deny the existence of climate change – 'climate' in the broad sense of the relations between human beings and the material conditions of their lives." In his essay *Down to Earth*, published in 2017 in France and now available in English, he says of this historical situation, "it is as though a significant segment of the ruling classes (known today rather too loosely as 'the elites') had concluded that the earth no longer had room enough for them and for everyone else." When we face stark realities like that which the West Glenwood mountain lions represent, we recognize that the "everyone" has long since ceased to include the fauna of our colonized spaces. But from the 1980s on, he says, these elites, having concluded that it is "pointless to act as though history were going to continue to move toward a common horizon, toward a world in which all humans could prosper...stopped purporting to lead and began instead to shelter themselves from the world." Places like Aspen are some of these shelters, where the illusion of a common world will be lovingly curated as long as possible. Unlike Glenwood, where the undeniable lack of options for the local lions has unleashed a profound, maybe existential, unease.

And yet, Bruno Latour points out a realistic hope for a future – one that accepts the limitations of a finite world, in which all its inhabitants are recognized as integral to it. He refers to it as the "Terrestrial attractor," contrasting it to the dead-end of the globalist fantasy in one direction, and the impossible retreat to an imagined golden past, in the opposite direction. It requires a complete reassessment of what makes life worthwhile within the limits of the world. It imposes a radical solidarity, a common search for ways to live together, which among other things will change what we mean by "affordable housing." No longer will the protection of property values have anything to do with having a home.

I can't see how the transition from the current impossible situation to a saner and more livable world will take place. But I see that it must, and I sense that the love for other beings, from the mountain lions on the ledges to the dogs who wait to welcome us home every night, may provide the inspiration and the determination to do what it takes to make it happen. Realizing we have made a world in which there will soon be no room for the others brings us right up to that point of choice. I hear it in the voices lamenting the Glenwood lions. We will either make a world that acknowledges each being's right to her own place to live, or we will come to inhabit a world that is home to no one.

-LAURIE RAYMOND

Subject: Annexation and Initial Zoning of 214 Center Drive, Glenwood Springs and Development by R2 Partnership

I am writing to express my opposition to the annexation, rezoning and development of the 12.285-acre property at 214 Center Drive currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley in general may have a housing need, but to allow 360 residential units, with 1200 tenants with only 650 parking spaces to be built on a plot of land next to a rural neighborhood is a concern for me on many levels.

Safety:

I'm confident that last year's wildfires in South Canyon and Glenwood Canyon have demonstrated the need for wise decisions to be made as you plan a strong and safe community for all residents of Glenwood Springs. Shortly after the South Canyon wildfire, the residents of West Glenwood saw firsthand how quickly gridlock occurred, leaving almost every road impassable until late into the evening.

To add another 1200 residents to the current 3500 residents of West Glenwood would be utterly catastrophic. Not only do all of these residents need to evacuate safely, but there are elderly and disabled residents who may need assistance, families with young children, as well as two schools and many daycare facilities. We are not talking IF a wildfire will happen again in Glenwood Springs but WHEN.

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." West Glenwood has many roads leading to A SINGLE ROAD - Highway 6. Highway 6 cannot allow for the safe

evacuation of all the residents of West Glenwood as it stands today. Depending on the location of the fire, emergency vehicles may block off one or more roads to enable access to a fire or flood area, which would further restrict evacuation efforts.

Impact on Traffic:

The roads in West Glenwood are entirely inadequate to support a development of this size. The addition of 1000-1500 vehicles to our streets will create a traffic nightmare of overwhelming proportions and will turn West Glenwood into a parking lot. COVID has dramatically reduced traffic, and any traffic study done during these months will not reflect the reality of this area.

Proximity to schools:

Currently, the developer plans to have their main exit immediately opposite both the Two Rivers School and the Montessori School currently housed in the Glenwood Business Center. Even if the developer moves the exit street to somewhere else on Storm King, congestion and safety concerns for our young children, their parents, and our teachers are inevitable.

Green Space:

Glenwood residents value the beauty of the land and recognize the importance of green space; we will be losing yet another precious piece of land for our environment and wildlife. This pasture also affords West Glenwood with a good measure of protection against the spread of wildfires. Bike paths exist around town coming almost to this piece of property for both tourists and residents to recreate and enjoy this valley. Many tourists bike past the pasture to visit the area's Fish Hatcheries.

I urge you to protect its current population and help keep its residents safe by rejecting the application to annex and rezone this property.

As a lifetime resident of Glenwood Springs I am deeply saddened by what Glenwood has become. You should listen to Small Town by Jonathan Byrd and do some self reflection. Glenwood cannot continue to support what you are allowing.

Dear Council members ,

I hope that the entire council and staff appreciate that we in West Glenwood are just as concerned about what happens in their immediate neighborhoods as much as any other observant councilperson is concerned for their own district . We have no other “ political “ agenda other than safety and well being of entire families including and especially .. the school children who would suffer most from the negative impacts associated with an enormous surge of population north of the Colorado river .

The teachers , coaches and kids of TRES school have tried with all their might to be as safe , creative and to be adaptive as possible to the conditions these children are in ..it’s hard too see most of their play area is asphalt and parked buses and cars . It is heartening to watch a caravan of young kids out for fresh air ( well smokey , dusty and diesel filled at times , sure) and vigorous exercise. They do so need and deserve their recreation . No child of any age is safe biking alone through the exits 114 , 116 . They need many supervising eyes including , driver’s eyes on high alert to their crossings.

Trying to watch a caravan of young children on bicycles try to negotiate the Exit 114 as they cross over to the Meadows trails area is a scary thing to witness . Even though it appears well supervised , motorists are certainly not always driving in a safe manner , not only in the narrow roads but also along Hwy 6 .. not to mention further afield .

Older children in middle school do not commonly bike or walk to school through exit 114 ..just too dangerous a passage in high traffic hours .

Also as far as “ walkability is concerned .. there are still too many unleashed dig incidents in West G area for many to walk and feel safe from aggression. Certainly not many kids walk their own dogs . I

had serious incidents 4 x this year alone ( this year my dog did not receive puncture wounds as in some past years though .) The last incident was a few days ago in West G west of Hotel C . Three small french bulldogs were being walked on thick 6' leashes when the older woman deliberately dropped the leashes on a "quiet" sidewalk. They rushed me and my well socialized and leashed mini Aussie, who did all he could to resist aggression while all three viciously barked , circled and tightly wrapped my ankles . So walkability .. is certainly at residents peril, a matter of luck, distance and good timing . There are simply 0 open spaces for residents to enjoy public space without a commute. Residents in nearby townhomes have children too . I have seen in my own Orchard Lane townhomes area , children whose very lives are endangered when they try to play outside . There is almost zero open space here. I have repeatedly seen these kids so long cooped up by covid burst into tears when told they could not run around least they come close to garage doors where people are backing out . I do not blame them . I blame the adult decision makers who have not considered their best interest . Residents here will meet with the HOA next week having called a special meeting about this situation . the R-1 school yard is still closed for covid yes , but also has never been welcoming to surrounding residents at off hours .

Please treat West G and North G , with as much attention as you would like to see given your own neighborhood .

Thanks for this opportunity at least take you all for a descriptive tour of West G.

Sincerely ,  
Bobbie Meriwether

Hi Ryan,

Please add this email to the packet for the next meeting.

Thank you!

Annie Uyehara

Dear City Council,

Dearest City Council members,

As you are poised to render your final votes on the two related agenda items concerning the 214 Center Drive Annexation Petition and the 480 Donegan Road Zoning/Rezoning application, I wanted to share a “few” more thoughts and concerns that have come to mind.

To begin with, I find one process that is very confusing and problematic. There is a very short time allowed for the public to digest and respond to items on a council agenda. The packet is published online by noon on Monday for a Thursday council meeting the SAME week. I’ve been told the reason why is to allow council to make any changes to the agenda. Any comments or concerns made by the citizenry during this short period are NOT part of the packet since it has already been published AND also an applicant is not made aware of concerns before the meeting. And with the case of the above proposals, the public is NOT allowed further oral comments if they have already made same, even if there have been major changes from the original proposal considered, such as some of you urging to include public parkland.

With whatever item a member of the public has interest in, the few days/hours between Monday noon and Thursday of the same week for your work sessions or general meeting, it can be difficult to seek further information and if desired, to reflect and respond adequately. I don’t know if there is a better approach, perhaps publishing a “DRAFT” packet “subject to change” the Thursday before the next Thursday meeting?

The next random item to share concerns the future of the West Glenwood Sanitation District and their facilities. Is there any thought that the City may have to take over the sanitary sewer needs of WGWS in the future? Already the City provides water and electricity for much of the un-annexed areas. I don’t know the boundaries of WG San.

Along with this concern is other future development and possible need to annex MORE of WGWS, including re-development requests and perhaps most importantly the future of the parcels west of Ami’s Acres where a modular home development is anticipated. Will the city be asked to extend water service and thus per code annex more of WGWS? The past history of the City providing water to WGWS without requiring annexation is interesting. Now per code, annexation is required IF water, but NOT sewer is provided. Will the city be asked to provide domestic water service and thus annex even more?

And related to sewer is my simplistic research/recollection there is a possible “threshold” of 10,000 in population where “storm water treatment” is required. Glenwood is now officially at this residency count. And it may be worthy of

consideration related to ANY decisions forthcoming if a possible issue and great expense.

#### Water Quality Control Division – Stormwater Program

[www.cdphe.state.co.us/wq/permitsunit](http://www.cdphe.state.co.us/wq/permitsunit)

“1) State must evaluate for permit coverage: If the municipality has a population from 10,000-50,000, is outside of an urbanized area, and has a population density of at least 1000/square mile. Designation Criteria: -discharge to sensitive waters -high growth or growth potential -size of population and population density -contiguity to an urbanized area -significant contributor of pollutants to State waters -adequacy of existing stormwater quality control programs 2) State can evaluate for permit coverage: Any municipality under 10,000 population, with less than 1000 population/square mile, and outside an urbanized area.”

Since I’m cutting and pasting, I wanted to share something from GarCo related to Glenwood Partnership/Floyd Diemoz original plans of the fifteen buildings (three of which are already constructed) and 711 parking spaces oft mentioned. I know it is a gamble, but there is nothing preventing such development IN the county and would expect much less construction and ongoing impacts from such a development and thus would probably be more acceptable to neighbors, especially with a 25’ height limitation. And the 711 parking spaces may be a “red herring” as the initial application was anticipating and wanting to provide fewer spaces.

NOTE: County requirements are presently 1 parking space per 200 sq.ft. of office floor area. Other areas have found this could produce excessive parking areas and are re-evaluating this ratio. Our intent in using the 300 sq.ft. formula is to anticipate a reduced single passenger auto use in the future.

---

**PARKING NOTE:** The parking formula we have adopted is being successfully used for office/warehouse type buildings throughout California, Oregon and Colorado. For pure office buildings, many communities are finding that the ratio of 1 space per 200 sq.ft. of office floor area can result in excessive parking. In the future, this imbalance may become more pronounced as increased car pooling and gasoline prices reduce single passenger auto use. While the illustrative site plan shown in this report more than meets existing code requirements, our intent will be to monitor parking trends so that future phases do not result in excessive parking areas.

## GLENWOOD BUSINESS CENTER

Something that has been brought to my attention numerous times are the current traffic impacts associated with Two Rivers Community School, especially with after-school pickup and the ensuing congestion. Also there are parking issues in this area which both contribute to possible emergency response issues. Many encourage you to visit this area during this after-school frenzy. Also pointed out to me is the traffic study done by R2 Partners was done during the earlier pandemic restrictions when school may not have been in person or with very limited attendance. This would NOT reflect current conditions if done during an "off" period and also in a broader sense, their study does not reflect current conditions with then people staying home or businesses affected by the slowdown. A revised study should be warranted and required to reflect current conditions.

A "wake me up when it is still dark" thought is no matter where traffic from development on this very dense residential proposal (or any other developments in WGWS), the traffic volumes will need to access Highway 6&24. There is an absolute need to involve CDOT for their input and recommendations. The proposed improvements to the intersection of Donegan Road and 6&24 are no longer included in the Draft Annexation Agreement. One wonders why? Perhaps it was proposed

without CDOT involvement? What will be the path of least resistance for traffic movement and increased volumes from all areas north of 6&24? To avoid the oftentimes congested and dangerous north-side I-70 Exit 113 roundabout will there be increased traffic on Soccer Field Road adjacent to the Middle School? Looking at the Street Map on the City website, maybe it does make sense as put forth by GarCo for the City to annex the balance of the residential subdivision north of these 214/480 parcels inclusive of the remainder of Mel Rey and Donegan Roads? And then how far west should be annexed? Will there still be enough water and wastewater capacity and staffing/equipment to serve not only these parcels under annexation consideration, but perhaps even more and more?

To share some thoughts about fire infrastructure/needs NOT related to emergency evacuation planning and implementation...the “carrot” of R2 Partners providing land, funding for evacuation planning (by their own consultants I recall) and helping fund the construction of a new fire station MAY pale in comparison to the construction of a new fire station, equipment and personnel needs and expenses faced by the City and GSRFD.

As you may have noticed in your recent budget documents/discussions there is a request to replace one fire pumper for \$800,000. Chief Tillotson has shared there are two others of the same age that could be anticipated need replacing as well. The one was refurbished but with poor results, thus I would expect the two others would need to be replaced as well at a probable increased inflationary cost. Also per the Chief there should be another aerial apparatus added to serve the growth in GWS especially with the many multi-story buildings (including 480 Donegan). This apparatus would be in the \$1 million range. And with the City’s recent Compensation Study and response to increase wages, this would be an important factor along with the expected increasing construction costs of a new fire station even with a dedication of land.

Also “fire-related” is the ISO (Insurance Services Office) rating affecting both homeowners and commercial insurance pricing. Per Chief Tillotson, the usual occurrence for ISO Rating Schedule for assessment and determination of a community’s rating has been every ten years but has changed to every five years. The pandemic affected the assessment and GWS is overdue for their inspection and determination of updated ISO rating. Currently those residents within five miles of a fire station in our area have an ISO rating of 2. This link shows some of the basis for their rating and could be worthy of your consideration now and into the future, especially with climate change and the wildfires we have had in our area, region, state and nation.

<https://www.isomitigation.com/ppc/fsrs/>

With the City building and approving more high density multi-level housing, the ISO rating for the ENTIRE city and surrounding areas could be reduced which would increase insurance rates and/or require near-term or immediate investment in equipment and personnel to preserve the current favorable 2 rating on a 1 to 10

scale. Perhaps this is something worthy of your consideration, with or without this project, additional other residential high-density project like at Glenwood Meadows, the approved ones behind Discount Tire and Bell-Rippy along with the expected inclusion and re-development of the WGW Mall. Growing larger and taller will have additional not-so-hidden costs and will additional development cover those costs? The adage of residential does not pay its way should encourage you to pursue more commercial development like another supermarket. What happened to Murdoch's coming to the Roaring Fork Marketplace? I'm heartened there has finally been movement on an "Attractions Tax" to help diversify Glenwood's dependence on sales tax dollars in a changing retail/commerce model.

A very disturbing "aberration or flaw" I discovered in my involvement with the 214/480 project-related items is the absence of input from your Parks and Recreation Commission and Director Brian Smith of those departments, as well as from our RE-1 School District. Many feel it is important to explore the inclusion of actual parkland to address the shortage in this area. I had reached out to both and finally got a response. The latter RE-1 representative said the City had not been in contact with the District.

With the requested residential density of one R2 iteration, the parkland and school land dedication requirements are very significant...5.8 acres for parkland and 4.4 acres for school land! Working backwards, this helps show how very, very dense and thus impactful in so many ways R2 proposes for JUST their residential/mixed use PUD zoning proposal, excluding whatever may be proposed for the mall redevelopment. Yes, they state they will limit the number of residents to 600, but is that realistic with 332 units???

Director Brian Smith replied via e-mail and to me it seems quite absurd the City process has not really discussed or included land dedications or fees-in-lieu before the Parks and Rec Commission, P&Z or even City Council prior to this point in time. Apparently the "process" (or Muni Code) prevents this from happening AND in a recent council meeting it was shared that the City typically acts as a pass through agent and collects and gives RE-1 the fees in lieu of requiring any actual land. I believe that NOT requiring ANY park or school land dedications is abdominal and represent huge missed opportunities.

There needs to be involvement and a conversation with our school district representatives. RE-1 Superintendent Rob Stein in a recent GSPI column (September 23, 2021) stated:

"...being able to provide affordable staff housing for nearly 10% of our workforce plays a critical part in making sure we can retain and recruit staff. Using the revenues from the program, combined with land made available to school districts through housing development, we will be able to expand our staff housing program over time."

And one of Brian Smith's reply to me:

Greg,

The estimated parkland fees for the last number of units proposed to Council (332) was \$1,369,452.62 (which represent 5.81 acres of land dedication). The applicant has requested that offsite bicycle/ped improvements adjacent to the site along Storm King and Donegan be deducted from that amount (this is outlined/allowed by Code for all projects). Please note, these are simply estimates as we don't know the exact final number of units that Council may or may not approve. Also, we don't actually collect or determine exact applicable fees until building permits. This information is not included in any packet information because is not official. Also, important to remember that a development permit review is still required for any development related to the annexation long before any building permit is issued.

We do not usually run these types of applications through the Parks and Recreation Commission as they are vetted through Planning and Zoning and a Departmental review by each Department include Parks and Recreation.

We do have a few schools that utilize adjacent parks as you pointed out. We have not historically charged for this use and instead have had a cooperative relationship with them in sharing of facilities. This is changing however, as we are proposing a new fee schedule and commercial use of parklands next year which will pull in permits needed by the schools to use the parks.

Hope this answers your questions and thanks for reaching out.

Best Regards,

**BRIAN E. SMITH**  
PARKS & RECREATION DIRECTOR

I had also reached out to Habitat for Humanity Roaring Fork that helps provide affordable, restricted owner-occupied housing, but they declined to be involved in a controversial project. Their NEED is having land upon which to build. They have a presence from Basalt to Parachute. Glenwood is missing the boat and hopefully can work with partners to build HFH housing in Glenwood. The City could with the revision of the Comp Plan and updating the Muni Code could foreseeably get land upon which to build employee housing. Maybe there could be that opportunity with this proposal and/or with the re-development of the WGS Mall.

SURPRISE, SURPRISE...the agenda for your next meeting (10/07/21) HAS been published online as of today, Saturday October 2... not late Monday as I've typically encountered. BUT a HUGE DISAPPOINTMENT is in the proposed Annexation Agreement the CITY agrees to accept fees-in-lieu of school land dedication and same with parkland dedication, the latter amount REDUCED by the costs to build bike lanes and walls and "private recreation facilities to be constructed on the PUD

portion of the property"! I along with many others (and hopefully some of YOU) believe this is a huge mistake if you agree to not pursue ANY actual land dedication. With the obvious shortage of parkland in WGW and perhaps RE-1 getting land to build staff housing there is a need for the city to truly analyze the ramifications of these two items and hold strong with a vision of what is best for current and future residents! The \$1.48 million in lieu of parkland ("offset" by the above...resulting in some lesser amount given to the City) and \$880,000 for school land will be spent and gone while actual land will be a permanent opportunity now and for future residents and generations. PLEASE delve deeply into dedications or dollars and what it means as YOU are the ones that may allow this project to be annexed into the City...for whose and what benefit.

Another thought/issue that comes to mind is the revelation by your City Attorney at the September 7, 2021 meeting that pretty much your zoning/rezoning decision boils down to just the zoning district applied (PUD or otherwise) along with density and height. To me, it seems the time, architectural renderings, Google maps extrapolating height impacts, preliminary site maps, engineering, etc. have been a waste of money and time for the developer, P&Z and you. Apparently what only matters is the zoning and annexation, as site maps will come later for a final decision by council or staff.

It is truly disheartening to see council recently and unexpectedly "negotiating" with R2 at council meetings, not allowing further public comment and seemingly negating the time, effort and work done prior by staff, P&Z and the citizenry in the many numerous public meetings including prior city council meetings. I believe there should be a "threshold" if changes are made to what was presented initially to then refer items back to staff and/or P&Z for further work and public comment.

This also brings up the perhaps "unwieldiness" of the process between council and P&Z where sometimes "conceptual review" is done at council level and then referred to P&Z with comments from council vs. with this specific annexation and zoning/re-zoning items. These were referred directly to P&Z and now has come back to council with P&Z recommendations to deny what was presented and now Council is "negotiating/revising" the original proposals to come up with what Council alone might think is the best. And to not have Parks and Rec involvement in the early stages or to "assume" RE-1 is satisfied with dollars passed through rather than being presented with the proposal and school land dedication seems unfair and absurd even if supposedly it is too "early" in the process. When should be the correct time?

It is absurd that Parks and Rec staff and commission as well as RE-1 School District will NOT be involved until AFTER a decision is made on the zoning! How could they/you require or acquire ANY land dedication if the "inn is already full"? This process is absolutely flawed...unless council mandates there will be a dedication of X +Y acres of land IF we approve annexation and zoning request. Again per your City Attorney, the PUD request mainly will decide "density and height". It is "bass-

ackward” trying to squeeze in five more pounds of potatoes into an already full ten pound bag! I just shake my head in disbelief that land dedications are and have been off the table, hidden from important stakeholders or just ignored. The finally revealed “Phasing Plan” included in your current packet shows no provision or ability to provide for public parkland, school land or land dedicated to the city for a fire station. Since the “site plans et al” MAY be essentially meaningless at this stage of the “game”, maybe you can require land dedications and they will come back with another “pretty picture”? Of course R2 will say “they can’t give any more as their numbers won’t work”. If you want to “play”, here are the rules. If you can’t work with the tools and rules, maybe it is time for them to find another game...maybe even near like the WGWS Mall property? If R2 can’t/won’t make it work, maybe there is another developer that can? Or revert to what GarCo zoning in place allows? Or find other partners including non-profits, employers, districts willing to find the funding to purchase this unincorporated parcel from Glenwood Partnership and create a better, more realistic, affordable, less impactful product than what R2 Partners wants and proposes?

That said, perhaps a strategy for you to consider is to approve annexation conditional to R2 purchasing the mall AND to allow/require an overall Master Plan for this vacant GarCo parcel and the old mall. The developed Glenwood Partnership portion could be annexed under an appropriate City Zone District. IF you desire to attach zoning to the vacant portion I would urge you to perhaps NOW attach RT Residential Transitional Zoning or RH Residential High Density to this unincorporated parcel AND perhaps allow it to change to PUD if the mall property is purchased AND a Master Plan done to incorporate all property between Highway 6&24 and Donegan Road. Both of these Residential Zone Districts allow a height up to 40’ that still may not be acceptable for many. The Bell-Rippy project underway is zoned RT and to their and your staff’s credit they will be providing public parkland unlike the hesitancy of R2 reluctantly proposing a “tot lot” for public parkland...probably already existing with the closed Montessori pre-school part of Glenwood Partnership Center Drive complex.

070.020.080 - Residential Transitional (RT) District.

(a)

Purpose. The RT district is intended to provide for transitional areas consisting of primarily residential uses at varied densities, with limited commercial uses that are compatible with surrounding neighborhoods. The RT district is intended to serve as a transitional buffer between residential and nonresidential zoning districts.

070.020.070 - Residential High-Density District (RH) District.

(a)

Purpose. The RH district is intended to accommodate various housing types ranging from single-family detached on small lots to multifamily dwellings. The RH district is intended to transition between established neighborhoods and more intense commercial or other nonresidential districts.

And to address some items related to the ads in the GSPI by Glenwood Partnership LLC on Friday, October 1<sup>st</sup>, with “justification” encouraging your approval of these applications using the 2011 Comp Plan:

-Is the R2 proposal a “compatible/coordinated mixed use development? I think not unless done along with a Master Plan including the mall, even if not, is it “compatible” with the existing neighborhood?

-And a Master Plan should be required as the ad highlights: “This plan envisions the Glenwood Mall and the properties immediately north of it be integrated and redeveloped into a mixed-use community...thus creating a center focal point for the west-end of town.” Again, this highlights the need for a Master Plan and the “focal point” may not be a positive one, especially with their seeming desire to “wall out” general public use of anything BUT a tot lot and their restaurant.

Speaking of “mixed use”, in my mind their offering of 13 live/work units is a token representation or inclusion of mixed-use development...13 units of their most recently proposed 332 units is just 3.9 percent of their “mixed use community”. This “snake in the grass” action glosses over their true focus of profitable residential rental and recently reluctantly some home ownership townhomes. I guess including the already built Center Drive buildings one could add those three to their “mixed use development” 2011 Comp Plan justification?

Their "Phase One" "Phase Two" of their finally shared Phasing Plan included in your packet still does not make much sense to me as it does not include the mall property which they are under contract to purchase. If done in conjunction, then direct access to 6&24 from there development could be achieved which would reduce the amount of traffic impacts to the existing neighborhood, conceivably reduce R2's expenditures for off-site infrastructure improvements such as the Donegan Road and 6&24 intersection improvements (which for whatever reason is now not included in the Draft Annexation Agreement!) AND allow better emergency response from a new fire station rather than via secondary roads (as the dedication to the City of land for a fire station IS included in the Agreement somewhere on this 15 acre parcel...not being able to anticipate or include the mall property). This too should highlight the best intention/outcome to somehow strive for or delay however possible your decisions until there is certainty with the purchase of the mall property and thus include all parcels into an overall Master Plan.

An analogy that comes to mind, perhaps not relevant in times of drought, is water filling up all the nooks and crannies of Glenwood Springs. The "flows" from our regional economy are filling up Glenwood. Some of it leaks out and flows to communities west of Glenwood. The beautiful and attractive reservoir of GWS seems to already be at capacity, but there has been the desire to see how much more "water" can be added. There are under-filled reservoirs in communities west of GWS. Granted the "erosion" of lifestyles for those who travel up and down the I-70 and SH 82 "rivers" cause impacts to quality of life and infrastructure. To add more

“water/residents” to our almost over-filled GWS requires serious planning and consideration. “We/you/they” are already trying to build more capacity, building higher and filling in the last spaces. I imagine something will break. The flows to and from the west of us, to the east of us and to the south of us already impact our and their lives. With more affordable (for both residents and developers) to areas west of GWS, maybe our GarCo commissioners will finally whole-heartedly support RFTA and perhaps even consider working with EaCo to provide public transit through Glenwood Canyon?

What is the best and smartest way to proceed? SOME final decisions will be made concerning the annexation and future development of the vacant West Glenwood Pasture parcel (whether this current proposal or another) and also the future redevelopment of the West Glenwood Mall. Whatever you decide at your next meeting(s) please take into consideration the many impacts both local to the neighborhood of this project as well as to the overall city and region. Only so many grains of rice/residents can fit into OUR bag. It can swell beyond capacity, then begin to overflow and then??? Will seams begin to fail and the economy, attractiveness and desirability decline and the bag starts emptying on its own, or will the bag catastrophically fail and have a huge(r) mess to deal with? Already there are many stray grains that are impacting the “tidiness” of our community requiring extra attention, focus and dollars spent to try to make things right(er). Putting Band-Aids on the bag when more and more grains are filling it, as seemingly done now without an overall plan does not seem to be a worthy or workable solution, thus the importance to update the Comp Plan. We should work with and seek help from other partners who are dealing with their own bags of rice along with those who are willing to help with fixes or willing to help carry the load. Already there are many vacant commercial spaces in GW...will this be followed by many vacant rental units? Lessons right or wrong can be learned from other communities. Well known is our regional economy and the challenges faced throughout. From jobs, housing, affordability, zoning, land use, geographical limitations, revenue sources/dependence...there are many, many challenges faced individually and collectively. What can ALL of us together do now and for the future?

Some on council and staff seem to be swayed by the amounts of time and dollars the applicants have spent to date putting forth their desires, vision and ambitions. I urge you to not be swayed by their “investment/gamble” but rather play the “long game” and seek the best return on OUR in-place investment of limited land within our valley. Seek to achieve a better, more sustainable, ecologically sound, resilient community with truly affordable, and inclusive of housing types through preserving and promoting creative partnerships and thinking. Include Muni Code updates to include comprehensive energy smart building requirements as well as addressing public safety/wildfire concerns such as evacuation planning, resilient building material, wildfire mitigation and safe spaces as addressed by many in not only WGWS but also applicable to our immediate area.

I thank you (so much) again for your time, patience, hopeful understanding and consideration of yet another “spewing of the keyboard” by yours truly. I thank you and city staff as well as many public voices spoken and unspoken for their concerns for YOUR/OUR city. Change is not easy or easy to predict. Reality sometimes bites. Hopefully with so many issues and challenges involved seemingly everywhere we look or touch, from a personal/family level to a city and region-wide scale, we all strive to make the best decisions we can with what we know and have available. Quick decisions are inevitable with often both immediate AND long-term consequences. I sincerely thank you and appreciate your time and dedication to the City of Glenwood Springs...with the physical infrastructure and associated characteristics as well as the human infrastructure and capacity. Both contribute to the successes of what we call home and have made it a very special community. With hope and action each of us, our descendants, as well as future generations will still have a desirable, attractive and safe place to call OUR home and to remain a very special destination for visitors upon which Glenwood’s reputation depends and is built.

With immense gratitude and appreciation for you time, efforts, work and patience,

Greg Jeung  
1188 CR 120  
Glenwood Springs CO 81601

Four of you were prepared to turn down this annexation on September 7th, but with some persuasion by Karl Hanlon (is that proper decorum for city council? I'm not sure), the majority of you, surprisingly, voted for a continuation on the motion to deny.

I don't know what three more weeks will garner.

There's generations of families that live in W. GWS as well as the hordes of commuters and visitors who'll be affected if 480 Donegan passes.

Your desire for more affordable housing won't be addressed; the water still isn't there. Infrastructure issues that already exist will only become more exacerbated.

A shiny, new firehouse isn't the answer, nor is the mall.

What about the 4 story buildings that will dwarf single story homes that have been there for decades, their families as well? Pride of ownership and a sense of home will be abandoned. The homes will more likely be bought out by R2 for more condos. Councilwoman Kaup might like that, it's on the valley floor, after all.

Developing on the valley floor makes sense, Ms. Kaup.

But not your comment on why you voted against a small amount of units at the last meeting because you wanted to keep a small town character, but advocate 332 units that clearly overrides that philosophy.

Mayor Godes, you confuse me. I am a former S. GWSer as you are/were, and we talked about fire evacuation concerns and building a S. Bridge—why would you not extend the same concern to the neighbors to the west?

You went on CNN telling people to stay away from Glenwood Springs because there isn't enough water.

That comment alone could be taken as anti-growth. Still, Mr. Godes, is there enough water for 900 more people in a field with a small ditch during a prolonged drought and global warming? Mr. Willman and Mr. Hershey understand that and thusly, made a motion to deny the annexation mostly on those grounds.

It's not smart growth if 480 Donegan creates a glut in the nearby schools (to say the schools will deny enrollment is oversimplifying the problem since the schools are already overpopulated), or strains the already understaffed police department. The traffic and infrastructure problems already exist; to exacerbate it doesn't seem like smart growth to me.

Ms. Wussow, I appreciate your balanced reasons for wanting to deny annexation for 480 Donegan. But you said you didn't hear any of us concerned citizens talk about affordable housing. But we did because we too, want affordable housing. I spoke about it at the 1st

public comment and I mentioned it in several letters to the council. I asked Mayor Godes to ask the developers for 100% affordable housing. What a legacy that would be for city council, to achieve that!

Finally, R2 is not not the only game in town. As you can attest to, there's plenty of development in the pipeline already, and plenty that has recently been completed.

Another developer with another opportunity will absolutely come along. And saying it will all be gone, Mayor Godes, if you don't approve annexation is kind of silly: Parkland can be created without 332 units.

Affordable housing surely must be achieved without some \$18 million I heard Mr. Hanlon quote at the meeting as being required by the city to make happen.

As Paula Stepp—who also wishes to deny annexation—wisely said, this is about timing, and she is doing her due diligence for all of the valley when it comes to infrastructure, traffic, student overpopulation, and public services. Fix these issues before you make them larger with an oversized development.

Take a deep breath. We all know growth is happening.

Waiting one more year will only foster smart growth.

Due diligence.

Nothing good comes from haste.

Annie Uyehara

---

Dear council,

Forgive me if I missed something, but I have not seen or heard of a traffic impact study from R2. Wouldn't it stand to reason that R2 should have a traffic impact study? MountainView is 40 units and 480 Donegan is 332 units, which will greatly impact the traffic and overshadow the Mountainview project.

It is also obvious that if you add more units onto MountainView then you add more cars on the same road that 480 Donegan project wants to use as well, which is Highway 6 and 24.

Again, due diligence is required for all smart growth!

Sincerely,

Annie and Carl Uyehara  
Sent from my iPhone

On October 7<sup>th</sup> you will make a decision on 480 Donegan based upon a comprehensive plan that on September 19<sup>th</sup> you awarded a Denver design company a contract to update. How can a decision of such magnitude be made with this important update on the horizon? Councilwoman Kaup, you stated that “the developer is being very responsible in responding to the desires of the community.” Is it responsibility, or is R2 savvy in wanting to take advantage of this moment? Yes, we need a new fire station. Sure, we need the mall to be revitalized. But number one should be the safety of the community members that currently reside here.

If the developer is indeed taking responsibility in responding to community concerns, R2, being the long-term holders and thinkers that they are, should understand the desire to want to pursue this update prior to this significant decision being made. This time would also allow the city to see how the mall contract plays out, as the mall purchase would provide a true asset to the area – especially when talking about an addition of 600+ people.

Many agree that West Glenwood needs revitalized. But what is the true cost? Councilman Hershey said it best. “I’m not anti-growth, but it needs to be smart growth.” Councilman Willman too, when he stated that “it’s a good concept, but it’s too much in a little space.” I share their thoughts. With so many surrounding communities pursuing smart growth opportunities, why is Glenwood so far behind the curve? There is enough in the pipeline. Let’s learn from the options of shared purpose that exist up and down the valley.

With threats of wildfire and other natural disasters at the door, adding more people to an area with one access road that leads to a main thoroughfare through our tight mountain corridor is senseless. Please, let’s take some time to get a better sense of what this project can be, how traffic will be impacted, update the comprehensive plan, and implement an evacuation protocol before adding more people to this topographically sensitive area.

Sincerely,

Lacy King

Dear Council,

I attended your meeting and found it frustrating when it appeared 4 council members were deciding to deny the annexation before it was all rudely interrupted to continue.

I really want to thank Councilman Hershey & Willman and Councilwomen Stepp and Wussow for really listening to our concerns. Wussow expressed concern for water and when the next “event” would happen. Wisely said as I feel blessed we didn’t have any wildfires this year as I have survived the Storm King and Coal Seam fires living on Mitchell Creek. Would we be having this conversation if we did have a wildfire this year and W. Glenwood went into its usual gridlock trying to evacuate and people actually maybe dying. Because that is what we fear and unless you have experienced it you cannot understand what that feels like. You like to allude that an evacuation plan is being worked on but you have nothing concrete and why would you add to an existing problem without first fixing this dangerous situation. I don’t know if it’s even possible to fix with our geography, but I do know more people will only exacerbate the problem.

Councilman Hershey wisely said “I don’t think you can build your way out of this”. We don’t have the infrastructure to support this density. And it was disheartening to hear the mayor and another say they weren’t really concerned with the density. **Seriously??** We rarely see any law enforcement in W. Glenwood and we have cars racing up and down streets in the night. Again how can you add to an existing problem, especially since the police in Glenwood can barely take care of what they presently have. Not to mention the Fireman and schools and grocery stores etc.

Yes we would love a grocery store or a movie theater but you are basing that on a promise of property that hasn’t even been purchased. Of course they will say whatever it is you want to hear on what their plans for the Mall property will be. What if R2 hasn’t purchased the Mall property, how will the traffic exit off of Hwy 6? Now we go back to entering on Storm King or Donegan. I really encourage you to come to W. Glenwood when the school starts and ends to experience that

traffic nightmare. We all know to stay away in those pickup hours. Also you will see the streets parked up all the way around the school with teachers cars.

You talk about improving Mel Ray Rd. Does that mean you will be taking residents' yards out to widen the road to put in sidewalks? Did you not listen to the owners that have the semi truck business that must bring damaged semi's in off of Mel Ray. This viable business is needed due to our location to I-70. Does it really make sense to put a sidewalk in front of that???

R2 states there won't be 600 to 1000 people inhabiting those apartments. Somehow they will manage that. When you come to experience the school traffic please drive down Donegan and see the 8 cars parked in front of one residence and tell me how that scenario is not going to happen in their new development. Those extra cars are going to be parked throughout W. Glenwood.

With all the concerns of climate change and water some of you still lack concern over our water. Maybe condos or apartments do take less water but not with the amount of people that will be inhabiting them. If you read my previous letters be concerned about Mitchell creek that feeds the Reynolds Cain ditch. This year it barely rose at all from runoff. Many people have rights out of Mitchell creek and Diemoz does not have senior rights. It belongs to the Golf course, meaning they can call rights at any time and shut down other users. If any of those rights get changed meaning they are saying they will pass on any extra water to the city it must go thru water court first is my understanding. Look at what is happening to the West. Do you really believe that can't happen here? Maybe you should look into the amount of springs that have dried up that have been used for decades. That should tell you something.

All of us know the Diemoz property will be developed and they certainly have the right to sell, but not at the expense of the safety and quality of life for residences of W Glenwood that have lived here for decades. There are so many existing problems that need to be dealt with before you continue this building frenzy. Do you not feel the pain of the traffic or maybe you all get to walk or bicycle to work. The roundabout and our traffic problems not just in W Glenwood but thru out the city is exhausting. Most of our neighbors to the West try to stay away from

Glenwood because it's miserable to try and navigate and we only need one hiccup in the flow for it to turn into its usual gridlock.

We have so little vacant land left in this valley. All we ask is you slow down and do this right thing by all the people. Please don't cave to the developers promises that aren't concrete. Give us some of the small town pleasures of a park to bring our kids and grandkids to play or find another way to build the fire station on that property. Having a pool and clubhouse in a neighborhood where we aren't allowed does not seem a way to bring together a community.

Yes we all want affordable housing but I have heard that term used for years and I can't seem to put my finger on what is considered affordable to you and the developers. My kids who grew up here can't afford to buy a house. I have a daughter living in a spacious basement apartment renting from a generous couple at \$650/month. That my friends is affordable, not \$1600 for a single person. Wages in this valley don't mirror the cost of living.

My last comment is why do we have a Planning and Zoning committee? Is it just an exercise the city goes thru as I don't understand why you aren't taking them seriously with the reasons they denied it.

I can only hope you listen to your citizens. We did not have the pleasure of electing you since many of us live in the County. Watching what has happened to our City and Valley has been painful especially for those that grew up here, but I am sure our ancestors before us felt the same. Change is inevitable, but managing smart growth is crucial.

Respectfully,

Lee Bowles

Please include in the packet for City Council  
Thank you.

Dear Members of the City Council

I attended this past City Council meeting on September 7th, as I've attended all others in regards to the R2 development proposal. I must say, I left that meeting disappointed, frustrated and very confused.

I believed (wrongly) the council was to make a decision that evening regarding annexation and zoning possibilities for the property on 480 Donnegan.

After remarks from council and the developers, Councilman Willman "moved" to deny the request to annex 480 Donnegan, citing too much density. Councilman Hershey agreed to the denial and stated his concerns for water. Councilwoman Wussow also wanted the annexation denied because of having too many units in such a small space. Councilwoman Stepp then moved to speak, but was interrupted by Councilwoman Kaup as she spoke to allowing the development at 480 Donnegan. Kaup cited the need to allow change, grow our town, and to provide more housing and redevelopment of the mall. After Kaup spoke, Councilwoman Stepp continued with her initial time/thoughts and was in agreement to the motion, stating too much density, not enough housing diversity, lack of information from the PD, GSFD, and the school district in regards to serving more people. Stepp wanted to discuss and develop an evacuation plan before allowing any development, and before the next "event" for evacuation takes place.

**Four (majority) in agreement to the motion to deny the request for annexation!**

And then, it appeared to me, a very strange thing happened, as Councilwoman Kaup immediately interrupted and asked to make yet another motion, even though the original motion hadn't yet completed input from the remaining council members, Godes and Davis.

It was then explained Kaup couldn't make another motion but could either "Table" the original motion, or ask for a "Continuance", as she then did.

Godes suggested a short break, but not before seconding Kaup's desire to continue .

After more discussion, (barely audible I might add), another “vote” was taken in regards to the Continuation happening in 3 weeks. Stepp and Hershey held their ground and voted no, the others voted yes.

The end or the beginning?

It’s hard to be a quiet “bystander” when so many questions, doubts, confusion are screeching through your entire body. I understand this wasn’t time for Public Comments, yet most of the Bystanders hadn’t witnessed such a process, which added to our state of confusion.

Kaup said many had approached her wanting a grocery store and movie theater in West Glenwood, and she thought approving this development would provide that opportunity. Also she kept referring to the opportunity of affordable housing.

To Councilwoman Kaup, that would be a firm “no” to both speculations.

R2 does not have to produce any ideas/plans/thoughts to what the redevelopment of the Mall might suggest. It may even be leveled out to allow for more building. And as shared in their presentation, the majority of units will be “middle income” affordability.

Please know, the majority in attendance, whether through physical presence, Zoom, those writing letters to either the Council Members or Post editor, and in addition to the 1700 who signed the petition to deny this annexation , we are not “**protestors**”. We are actually “**protectors**” of our homes, true Affordable Housing for all, climate, character, values, and above all....safety.

So once again, I ask the Council to listen to your constituents and hearts, and vote knowing Councilwomen Wussow lives in West Glenwood, but vote as if you and your families call Western Hills your home as well

Thank you.

Jamie Darien

Trent - will you please forward this to all City Council Members so it will be in their packets.  
Thank you

Dear City Council Member,

I was happy to see you continued the discussion on the proposed project behind the West Glenwood Mall. As before I would bring your attention to the difficulty, if not impossibility of quick evacuation of the area in case of a fire or other emergency.

Also - are we sure the water supply is adequate for 1000 new citizens in that development? I know the developers say that they would not allow that many people to live there. That may be true of the people currently running the development company, but as they age and retire we have no guarantee that their successors would follow their lead.

And just in general the development does not fit the current density of the neighborhood.

From the above you may think I am against development, I am not, but I think a more realistic number of homes in the area would be to follow current neighborhood density of four to six single family homes per acre.

Thank you for your time and attention to my letter.

Thank you,  
Christina Gore

September 29, 2021

Dear City Council,

R2 Development in West Glenwood

Mark and I have been residents of Glenwood Springs for 48 years and 42 years respectively and love our little piece of paradise.

You, city council members, have an amazing responsibility in this place and time! To quote one of you at our last meeting about this annexation, "Democracy is messy". Well, it was messy to see the vote whether to approve or disapprove this annexation get hijacked during the actual vote, when 4 votes had already been cast to deny.

I would just like to remind you that as stewards of our great town, you must consider the LONG TERM consequences of allowing this annexation and development to go on at this location in the name of Glenwood Springs needing more "affordable housing". The big issue is the density of the project and resulting consequences.

Your own P&Z clearly stated the reasons that this project was denied, so I would ask that you pause this annexation and YOU JUST STOP...go back to the drawing board on what is good for West Glenwood, not what is good for the developer.

Update the comprehensive plan that is now 10 years old and address the evacuation and shelter in place concerns, the water issues that are not going away, and infrastructure such as roads and traffic that are neglected before making a decision on this annexation.

It is a tough ask, and I appreciate the job you are doing, but remember, all of us that live in West Glenwood are all every bit a part of Glenwood Springs.

Please have the foresight to look backward and address what others before you did not!

Susie and Mark Straus

West Glenwood Springs

2021 Income Limit and Maximum Rent Tables  
for All Colorado Counties  
20% to 120% of Area Median Income (AMI)

HUD Effective Date: April 01, 2021

- The IRS allows LIHTC projects that placed in service as of 12.31.2008 to use higher HERA Special limits.
- All LIHTC and CHFA Loan projects are "held harmless" from limit decreases. To be "held harmless," a project must be in service before 05.16.2021.
- LIHTC and CHFA Multifamily Loan projects whose counties experienced a decrease in 2021 limits and that place in service before 05.16.2021 may continue to apply the same limits used in 2020.

| County   | HERA | AMI  | 2021 Maximum Rents |        |        |        |        | 2021 Income Limits |          |          |          |          |          |          |          |

## ANNEXATION AGREEMENT

THIS ANNEXATION AGREEMENT made and entered into this \_\_\_\_ day of \_\_\_\_\_, 20\_\_ by and between the CITY OF GLENWOOD SPRINGS, COLORADO, a Colorado home-rule municipality (hereinafter “City”), GLENWOOD PARTNERSHIP LLLP, a Colorado limited liability limited partnership (“Owner”), and COMMERCIAL DEVELOPMENT SERVICES GROUP, LLC, a Delaware limited liability company (“CDSG”). Each of the City, Owner, and CDSG may be referred to as a Party, and all of the foregoing may be referred to hereinafter as the “Parties.”

### WITNESSETH:

WHEREAS, Owner is the owner of certain real property currently located in unincorporated Garfield County, Colorado, more particularly described on Exhibit A attached hereto and incorporated herein (the “Property”); and

WHEREAS, CDSG is under contract to purchase a portion of the Property and develop that portion as mixed-use, multi-family housing development; and

WHEREAS, the portion of the Property to be retained by Owner is currently developed for office and warehouse purposes; and

WHEREAS, Owner desires to annex the Property and connect it to the City of Glenwood Springs and has filed a Petition for Annexation (“Petition”) to do the same; and

WHEREAS, along with the Petition, Owner and CDSG submitted a zoning application for the Property asking that the City approve (i) Commercial (CO) zoning for Owner’s retained portion of the Property and (ii) Planned Unit Development (PUD) zoning for CDSG’s portion of the Property as more fully described in Exhibit B hereto; and

WHEREAS, on June 3, 2021, the City Council held a duly and properly noticed public hearing at which time the City Council adopted a resolution finding Owner’s Petition to be in substantial compliance with the statutory requirements for annexation of the Property to the City; and

WHEREAS, on July 29, August 19, September 7, and October 7, 2021, the City Council held a duly and properly noticed annexation hearing at which time the City Council approved the annexation and zoning of the Property as set forth in Ordinance No. \_\_, Series 2021, and Ordinance No. \_\_, Series 2021; and

WHEREAS, C.R.S. §§31-12-101, *et seq.*, authorizes the City and Owner to enter into an Annexation Agreement; and

WHEREAS, the City and Owner desire to enter into this Agreement to set forth their agreements in writing concerning the terms and conditions of annexation of the Property to the City.

NOW, THEREFORE, for and in consideration of the mutual promises and covenants contained herein, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

1. **Purpose.** The purpose of this Agreement is to set forth the terms and conditions of the annexation of the Property to the City. Except as expressly provided for herein to the contrary, all conditions herein are in addition to any and all requirements concerning annexation contained in the Municipal Code of the City of Glenwood Springs (hereinafter “City Code”) or the Municipal Annexation Act of 1965, as amended, C.R.S. §§31-12-101, *et seq.* This Agreement is intended to provide a contractual relationship between the City and Owner to ensure compliance with the City Code, state statutes, and all terms and conditions set forth herein. This Agreement includes additional terms and conditions for the purposes of the Municipal Annexation Act.

2. **Annexation.** The annexation of the Property shall be in accordance with the Colorado Municipal Annexation Act of 1965, C.R.S. §§31-12-101, *et seq.*, as amended.

3. **Zoning.** The PUD Plan attached hereto as Exhibit B shall govern the development of that portion of the Property designated as “PUD” in the Plan. The remaining portion of the Property shall be zoned as Commercial (CO) and subject to the regulations set forth in the City’s Municipal Code. The City agrees that, upon annexation of the Property, the zoning of a portion of the Property as PUD and the remaining portion as Commercial (CO) would be consistent with the City’s Comprehensive Plan.

4. **Specific Conditions.** In consideration of the annexation of the Property, and in further consideration of the City providing municipal services to the Property, as hereinafter provided, the Parties agree that it is appropriate that the following payments, dedications and other exactions be made:

(a) CDSG or its successor or assign shall pay Fire and Emergency Services Impact Fees for the PUD portion of the Property in accordance with Section 070.040.030(g)(5) at the time of building permit for each phase of development. Said fees will be paid by Owner or its successor or assign on the Commercial (CO) portion of the Property if required at the time of any future development.

(b) CDSG or its successor or assign shall pay and the City shall accept fees in lieu of land dedication for the benefit of schools in the RE-I School District (the “District”) pursuant to Municipal Code Section 070.040.030(g)(4), or any amended version thereof in force and effect at the time of the final development permit approval for the PUD portion of the Property. Such fees shall be applicable to the number of units proposed for all residential phases scheduled for development and shall be payable upon the issuance of a building permit for a residential dwelling unit. No school land dedication or fee in lieu thereof will be required for the Commercial (CO) portion of the Property unless and until the Property is redeveloped as residential.

(c) CDSG or its successor or assign shall pay and the City shall accept fees in lieu of parkland dedication pursuant to Municipal Code Section 070.040.030(g)(2), or any amended version thereof in force and effect at the time of the final development permit approval for the PUD portion of the Property, subject to reductions: (i) for private

recreation facilities to be constructed on the PUD portion of the Property; (ii) for the design and installation of the northern bike lane along Donegan Road from the western edge of the Property east to Soccer Field Road; (iii) for the design and installation of the southern bike lane and wall (where necessary) along Donegan Road from the eastern boundary of the Property east to Soccer Field Road; and (iv) on any other basis approved by the City under Municipal Code Section 070.040.030(g)(2). No parkland dedication or a fee in lieu thereof will be required for the Commercial (CO) portion of the Property unless and until the Property is redeveloped for residential purposes.

(d) CDSG or its successor or assign shall pay all water tap fee and water system improvement fees required under Municipal Code Section 080.040.010(c) and Article 080.060, respectively, applicable to the development of the PUD portion of the Property. No water tap fees or water system improvement fees will be required for the Commercial (CO) portion of the Property unless and until additional water capacity is needed therefor. Should a change in use of any structure on any portion of the Property occur in the future that causes an increase in water usage, the owner of the structure will be required to pay the system improvement fee associated with the increased use in accordance with Municipal Code in effect at the time of the change in use.

(e) Owner agrees to pay all actual costs incurred for notice publication, recording fees, attorney fees and similar reasonable administrative charges related to the annexation of the Property.

5. **Affordable Housing.** CDSG shall deed restrict a minimum of ~~20-10~~ percent of the residential ~~for rent apartment~~ units at ~~100-80~~ percent of area median income ~~or and~~ 10 percent of the residential ~~for rent apartment~~ units at ~~90-130~~ percent of area median income. A minimum of 20 percent of the total ~~for rent residential residential apartment~~ units shall be resident occupied. The deed restricted unit mix shall be dispersed amongst the unit types and bedroom configurations.

CDSG shall construct a minimum of thirty-five (35) for sale units, all of which shall be resident occupied. Ten percent of the for-sale units constructed shall be deed restricted as to sale price. CDSG and the City shall negotiate the terms of said deed restriction and the financial contribution of the City as a part of the affordable housing deed-restriction agreement referenced below.

6. **Affordable Housing Agreement.** The Parties shall enter into an affordable housing deed-restriction agreement to be finalized and recorded at the earlier of (a) the closing of CDSG's purchase of the PUD portion of the Property or (b) issuance of the first building permit for the same.

7. **Dedication of Water Rights.** At or before the time of recordation of the final plat subdividing the Property as shown in the PUD Plan, Owner and/or CDSG, as appropriate, shall assign to the City, free and clear of all liens and encumbrances (subject only to the provisions of Section 8, below), all of Owner or CDSG's right, title, and interest in and to 614 shares of Reynolds & Cain Ditch Company stock (the "Shares") historically used on the undeveloped portion of the Property. By this conveyance, Owner and CDSG shall fully satisfy any and all water rights dedication requirements of the City for annexation and development of the Property as set forth in the Municipal Charter and Municipal Code and as approved by the City Council.

8. **Lease-Back of Water Rights.** As consideration for the Shares, the City hereby leases all of the water represented by the Shares to Owner and CDSG for irrigation of the PUD portion of the Property at the rate of \$1.00 per year. The City agrees to lease the Shares to Owner and CDSG until such time as the City may be required to use the Shares for another purpose. In the event the City can no longer lease the Shares to Owner and CDSG, the City will provide notice to Owner and CDSG thereof at least sixty (60) days prior to the termination of use of the Shares and will waive any tap or service improvement fees Owner and CDSG would otherwise be required to pay for increasing their use of City water as a result of losing use of the Shares.

9. **Resource Conservation.** CDSG shall revise the PUD landscaping to provide drought resistant xeriscaping and design all improvements to provide leading edge and best management practices for conservation, fixtures, and practices for the development. In addition, the residential buildings within the PUD development portion of the Property shall not use natural gas unless CDSG can demonstrate to the satisfaction of the City that it is the only alternative.

10. **Off-Site Improvements and Other Obligations.** As an element of the City's approval of (i) the Petition, (ii) the PUD zoning application, and (iii) acceptance of this Agreement, CDSG has agreed to design and, upon approval of the City Engineer, construct certain off-site improvements, and to make certain financial contributions and dedications to the City, namely:

(a) Install a bike lane along the north and south sides of Donegan Road for the length of the Property and extending east to Soccer Field Road;

(b) Install parallel parking and a detached 6-foot sidewalk on the south side of Donegan Road and extend the sidewalk and related improvements east to Soccer Field Road;

(c) Stripe bike lanes on the east and west side of Storm King Road south of Center Drive.

(d) Widen the east side of Storm King Drive north of Center Drive to add a northbound bike lane, parallel parking, and a detached 6 foot wide sidewalk.

~~Install an eastbound left turn lane and an eastbound acceleration lane from the southbound left turn lane at the State Highway 6 and Donegan Road intersection consistent with recommendation set forth in CDSG's traffic study.~~

~~Install a five foot sidewalk to the west side of Melray Road between SH 6 & 24 and Donegan.~~

(e) CDSG shall either amend the PUD as is necessary to include not less than one acre of land for the future construction of a new fire station for the Glenwood Springs Fire Department or provide such land at a location acceptable to the City. Said land shall be dedicated to the City. Notwithstanding the foregoing, the land to be dedicated to the City may be less than one acre only to the extent that shared parking for the fire station is located on adjacent property. CDSG and the City agree to cooperate in good faith to develop an urban firehouse plan and design for the new fire station.

(f) CDSG shall provide \$100,000 to be used for emergency planning and the cost to construct emergency access and egress improvements.

(g) Amend the development proposal as is necessary to include emergency access to Highway 6 through the parcel to the south.

(h) Amend the annexation map to include the annexation of Storm King to Donegan to Mel Ray.

~~Provide an annexation map for Mel Ray from Donegan to 6 & 24 if on or before June 1, 2022 Garfield County can establish ownership of the ROW allowing the City to legally annex the ROW. In the event that the ROW cannot be annexed the improvements related Mel Ray shall not be required to be constructed however, CDSG shall pay to the City an amount equal to the engineers estimate of the cost of improvements.~~

(i) Reconstruction of the foregoing streets before acceptance by the City.

The off-site street improvements described in this Section 10 shall be completed prior to or contemporaneously with the issuance of a final and permanent certificate of occupancy for the first building to be constructed within the PUD portion of the Property. Parkland dedication fees required in connection with development of the PUD portion of the Property shall be reduced by the total actual costs incurred by CDSG to (i) engineer, design, and install the northern bike lane along Donegan Road from the western edge of the Property east to Soccer Field Road; (ii) engineer, design, and install the southern bike lane, sidewalk, and wall (where necessary) along Donegan Road from the eastern boundary of the Property east to Soccer Field Road.

In addition to the foregoing, no final and permanent certificate of occupancy for the first building to be constructed within the PUD portion of the Property shall be issued unless: 1) the emergency access described in (h) above has been constructed and is operational; 2) a new water tank serving North and West Glenwood has been constructed and is operational; and 3) CDSG has dedicated the land for a new West Glenwood Fire Station ~~is substantially complete~~. The foregoing shall not be a condition precedent of issuance of a final and permanent certificate of occupancy for the first building to be constructed within the PUD portion of the Property unless the City has budgeted for the planning and completion of the emergency access improvements, water tank, and West Glenwood Fire Station in the Fiscal Year 2022 and 2023 budgets.

The City and CDSG agree that the improvements, dedications, and financial contributions listed in Section 4 and (a) – (i) of this Section establish the full and complete obligations of CDSG and its successors and assigns with respect to off-site pedestrian/traffic/transportation improvements, impact and dedication fees, and emergency planning related to the development of the PUD portion of the Property.

11. **Site Planning and Phasing**. Development of the PUD portion of the Property will require approval of a site plan through a public entitlement process. Site Plan approval shall be through a Master Plan pursuant to GSMC Title 070, ~~and~~ shall include the West Glenwood Mall site to the South of the PUD Property; provided, however, that if (i) CDSG or its affiliate, successor, or assign does not purchase the Mall property, or (ii) if a Master Plan application is submitted to the City but the Master Plan is not approved within eighteen (18) months of execution of this Agreement, ~~the Master Plan shall not be a condition precedent to filing for a Site Plan on the PUD Property. if a Master Plan has been submitted within six (6) months of execution of this Agreement and has not been approved within eighteen (18) months of execution of this Agreement~~

~~and CDSG or its affiliate, successor, or assign fails to purchase the Mall property. In the event of the foregoing a Master Plan is not required pursuant to the foregoing sentence, then the development of the PUD portion of the Property will be phased as shown on Exhibit C. Construction of Phase 2 cannot be commenced until all other conditions of this Agreement have been completed. The restriction on construction of Phase 2 shall not apply to the construction of a fire station in the event the land dedicated pursuant to Section 10(ge) is located in the area designated as Phase 2 on Exhibit C. CDSG agrees that if a Master Plan is not required as provided in this Section 11, CDSG will use good faith efforts to work with the current or future owner/developer of the Mall property to integrate and transition the PUD portion of the Property with the redevelopment of the Mall property.~~

12. **Vested Rights**. In order to allow Owner and CDSG a reasonable opportunity to develop the Property in accordance with this Agreement and the PUD Plan, the PUD Plan and related development rights and uses approved hereby shall, to the extent allowed by law, constitute a “site specific development plan” under C.R.S. §§24-68-101 *et seq.*, as amended. The site specific development plan shall be vested for a period of ten years beginning on the date the final plat subdividing the Property as shown in the PUD Plan is recorded (the “Vested Period”). The Property as to which rights have been vested shall be immune from changes in the City’s land use regulations for the duration of the Vested Period except as provided in this Section 12. Except in instances of force majeure, the requirements of federal or state law, cases of preemption or other superior jurisdictional mandate, the City shall not initiate any zoning or land use action which would alter, impair, prevent, diminish, impose a moratorium on development, or otherwise unreasonably delay any of Owner’s or CDSG’s rights set forth in this Agreement or their plans for development or zoning, as approved by the City. Notwithstanding the foregoing, the establishment of vested property rights under this Agreement shall not prevent the City from enacting and enforcing regulations of general applicability (including, but not limited to, building, fire, plumbing, electrical and mechanical codes, including the preliminary plat and final plat subdivision requirements under the Municipal Code and other City ordinances), except where the approved plans for development of the Property or state or federal regulations provide otherwise, as all of such regulations exist on the date of this Agreement or may be enacted or amended after the date of this Agreement.

13. **Conditions Precedent**. Notwithstanding the date set forth in the introductory paragraph of this Agreement, annexation of the Property shall not be effective, and this Agreement shall not be in force, until:

(a) Final Approval has occurred, meaning the thirtieth day after the effective date of the latest of the motion, ordinance, and/or resolution by which the City Council approves (i) this Agreement; (ii) publication after final passage on second reading of the ordinance by which City Council approves the annexation of the Property; (iii) the zoning of the Property as PUD and Commercial (CO) as provided in Exhibit B; and (iv) subdivision and major site plan approval for the PUD portion of the Property consistent with Exhibit B; and

(b) The affordable housing agreement called for in Section 6 hereof has been approved by both the City and CDSG; and

(c) The annexation map has been recorded with the Garfield County Clerk & Recorder; and

(d) The Parties have executed and delivered this Agreement for recordation with the Garfield County Clerk & Recorder.

14. **Failure of Conditions.** Until all of the conditions set forth in subsection 13 above have been satisfied, this document shall constitute an offer by Owner and CDSG and the City to enter into this Agreement (notwithstanding the Parties' mutual execution and delivery of this document), and the annexation and zoning of the Property shall not be effective. Consequently, at any time before such conditions are satisfied, Owner may withdraw the Petition and Owner and/or CDSG may withdraw its offer to enter into this Agreement. If Owner withdraws the Petition or Owner and/or CDSG withdraw its offer to enter into this Agreement, or if final approval does not otherwise occur for any reason, then this Agreement shall be deemed void and of no force or effect, and the Property shall be deemed not annexed to the City. Owner and CDSG may exercise their rights under this Section 14 independently.

15. **Deannexation.** The provisions of this Agreement, as well as acceptable City zoning of the Property, are material considerations of Owner's agreement to annex the Property to the City. Therefore, in the event (a) the City fails to perform under the terms of this Agreement, or (b) Owner, CDSG, or both are unable to obtain, either before or after annexation proceedings are complete, Commercial (CO) and PUD zoning of the Property as described above and/or subdivision and/or development approval for development of the Property which they in their sole discretion find acceptable, Owner, CDSG, and the City stipulate and agree, pursuant to C.R.S. §31-12-501, that it shall be in the best interest of the City that the Property (or a portion of thereof) be de-annexed from the City. In such event, the City agrees that it shall initiate de-annexation proceedings, and to take all steps necessary to effect the de-annexation. The City further acknowledges and agrees that de-annexation is not prohibited by the City Charter or Municipal Code and ordinances, and that the City will not amend its ordinances to preclude a de-annexation permitted hereunder. The Parties' right to de-annex shall be in addition to any other rights available to them at law or under this Agreement. Upon the de-annexation of the Property (or portion thereof) from the municipal boundaries and specific jurisdiction of the City, the City agrees that it shall convey, assign, transfer and quitclaim to Owner or their successors and assigns, any and all water rights (the public dedication of which is more fully described by Section 6 hereof) previously dedicated by Owner hereunder to the City for the public use and benefit.

16. **Assignment.** The parties agree and acknowledge that the rights and obligations of Owner and CDSG under this Agreement may be assigned by them to persons or entities acquiring title to the Property or a portion thereof without the prior consent of the City if, and only if, such assignee agrees in writing to be bound by the terms and conditions of this Agreement, and the Owner or CDSG, as applicable, shall give notice to the City of any such conveyance, together with the assignee's written agreement to be bound by the terms and conditions of this Agreement.

17. **Waiver of Defects.** In executing this Agreement, Owner and CDSG waive all objections either may have concerning defects, if any, in the formalities whereby it is executed, or concerning the power of the City to impose conditions on Owner or CDSG as set forth herein, and concerning the procedure, substance and form of the ordinances or resolutions adopting this Agreement.

18. **Final Agreement.** This Agreement supersedes and controls all prior written and oral agreements and representations relating to the annexation of the Property to the City, and is the total integrated agreement between the City, Owner, and CDSG.

19. **Modifications.** This Agreement shall not be amended except by subsequent written agreement between the Parties hereto.

20. **Release of Liability.** It is expressly understood that the City cannot legally be bound by the representations of any of its officers or agents or their designees except in accordance with the City Code, City ordinances and the laws of the State of Colorado. Owner and CDSG, when dealing with the City, act at their own risk as to any representation or undertaking by the City officers, agents or their designees which is subsequently held unlawful by a court of law.

21. **Captions.** The captions in this Agreement are inserted only for convenience and in no way define, limit, or prescribe the scope or intent of this Agreement or any part thereof.

22. **Binding Effect.** This Agreement shall be binding upon and inure to the benefit of the Parties hereto and their respective heirs, successors, and assigns.

23. **Severability.** If any provision(s) of this Agreement shall be determined to be void or invalid by a court of competent jurisdiction, then such determination shall not affect any other provision hereof, all of which other provisions shall remain in full force and effect. It is the intention of the parties hereto that, if any provision of this Agreement is capable of two constructions, one of which would render the provision void, and the other of which would render the provision valid, then the provision shall have the meaning that renders it valid.

24. **Governing Law.** The laws of the State of Colorado shall govern the validity, performance, and enforcement of this Agreement. Should either party institute legal suit or action for enforcement of any obligation contained herein, it is agreed that the venue of such suit or action shall be in Garfield County, Colorado.

25. **Attorneys' Fees; Survival.** Should this Agreement become the subject of litigation between the City and Owner or CDSG, the prevailing party shall be entitled to attorneys' fees and costs of suit actually incurred, including expert witness fees. All rights concerning remedies and/or attorneys' fees shall survive any termination of this Agreement.

26. **Gender.** Whenever the context shall require, the singular number shall include the plural, the plural the singular, and the use of any gender shall be applicable to all genders.

27. **Counterparts.** This Agreement may be executed in counterparts, each of which shall be deemed an original and all of which, when taken together, shall be deemed one and the same instrument.

28. **Notice.** All notices required under this Agreement shall be in writing and shall be hand-delivered or sent by first class mail postage prepaid, to the addresses of the parties set forth herein. All notices by hand delivery shall be effective upon receipt. All notices by mail shall be considered effective seventy-two (72) hours after deposit in the United States Mail with the proper

address as set forth below. Either party by notice so given may change the address to which future notices may be sent.

Notice to the City:                   City Manager  
City of Glenwood Springs

## CITY COUNCIL LIST OF MOTIONS

Date: October 7, 2021  
To: City Council  
From: Trent Hyatt, Senior Planner  
Subject: #09-20- Consideration of an Annexation and the initial zoning/Rezoning of 15.818 acres to Commercial (CO) District and Planned Unit Development (PUD) District at 214 Center Drive (PIN: 2185-061-00-042).

**Action 1 – Ordinance 2021-08 - Annexation** – of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs.

### **Motion to Approve:**

I move to reverse the recommendation of the Planning and Zoning Commission and approve the request for an Annexation, as outlined in Ordinance 2021-08, of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs with the recommended findings and conditions listed on Pages 1-2 of the City Council List of Motions September 7, 2021.

### **Recommended Findings:**

1. The annexation conforms to applicable state statutes.
2. The annexation is consistent with the Comprehensive Plan; and
3. The annexation minimizes potential adverse impacts to the City and does not negatively impact the City's public health, safety, and welfare.

### **Recommended Conditions:**

1. Prior to second reading of the annexation ordinance, the applicant shall revise the annexation map to include adjacent Storm King, and Donegan Roads rights-of-way roadway sections related to the project.
2. The applicant shall comply with/address all City staff comments related to the proposal prior to submittal of any future development permit application.
3. Future development shall comply with the various requirements outlined in the PUD, where applicable, related items such as uses, building heights, densities, minimum open space, parking, and/or landscaping.
4. The exact locations of site features may change upon site/architectural or master plan review. The *Glenwood Springs Municipal Code* is otherwise applicable to any standards not addressed therein.
5. The applicant shall comply with all verbal representations made in the public hearings, as outlined in all application materials, and/or as revised per conditions herein and approved by the Community Development Director.
6. Prior to approval of any future development review application, the applicant shall apply for and receive the approval of a CDOT access permit, where applicable.
7. The applicant shall enter into an annexation agreement with the City. Said agreement shall provide for the following items related to the to the annexed property:
  - a. A payment in the amount of \$100,000 to aid in the planning for and implementation of necessary emergency evacuation measures.

- b. The dedication to the City of not less than one acre of land, unless less land area is determined necessary by City, for the future construction of a new fire station for the Glenwood Springs Fire Department.
  - c. The applicant shall deed restrict a minimum of 10 percent of the residential apartment units at 80 percent of area median income and 10 percent of the residential apartment units at 130 percent of area median income. A minimum of 20 percent of the total residential apartment units shall be resident occupied.
  - d. Any future development proposal shall include direct access to Highway 6 through the parcel to the south.
  - e. All related offsite transportation, bicycle, and pedestrian related improvements to the Storm King, and Donegan Roads rights-of-way.
8. The subject property shall be developed pursuant to a Master Plan per Section 070.060.050(b) of the *Glenwood Springs Municipal Code*, unless otherwise permitted by the agreement.
  9. The future Master Plan submittal shall provide for a meaningful public open space area.

#### Alternative Motion

\*\*\*A member of City Council has requested that land use applications include suggested motions for both approval and denial. In most instances, staff has worked diligently with the applicant to address requirements outlined in the *Glenwood Springs Municipal Code* (Code) applicable to any given proposal. Therefore, we are usually in support of an application by the time it reaches the Planning and Zoning Commission and/or City Council. However, if City Council **does not** believe the application meets the Code's minimum standards, your denial motion should be based on one or more of the same approval criteria applicable to the land use application. You should support your findings with information outlining the shortcomings of the request as shown in the example below:

#### Motion to Deny:

I move to uphold the recommendation of the Planning and Zoning Commission and deny the request for a the request for an Annexation, as outlined in Ordinance 2021-08, of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs finding [**please state your findings here**, potential finding are provided below]....

1. The annexation DOES NOT conform to applicable state statutes.
2. The annexation is NOT consistent with the Comprehensive Plan; and
3. The annexation DOES NOT minimize potential adverse impacts to the City and DOES negatively impact the City's public health, safety, and welfare.

**Action 2 -Ordinance 2021-09 - Initial Zoning/Rezoning** – of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

**Motion to Approve:**

I move to reverse the recommendation of the Planning and Zoning Commission and approve the request for an Initial Zoning/Rezoning, as outlined in Ordinance 2021-09, of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District with the recommended findings and conditions listed on Page 3 of the City Council List of Motions September 7, 2021.

**Recommended Findings:**

1. The rezonings are consistent with the City's comprehensive plan and the purpose of the *Glenwood Springs Municipal Code*;
2. The rezonings are consistent with the purpose statements of the Commercial (CO) and Planned Unit Development (PUD) zoning districts;
3. Substantial changes in the area warrant a zoning change;
4. The intensity of existing and proposed development in the new zoning districts is not expected to create significantly adverse impacts to surrounding properties or the neighborhood.
5. The PUD rezoning will meet any and all applicable standards of this Code not expressly modified by the PUD application; and
6. The PUD provides multiple, varied residential housing types and densities.

**Recommended Conditions:**

1. The applicant shall submit a Minor Subdivision application to create the two lots outlined in the request.
2. Future development shall comply with the various requirements outlined in the PUD, where applicable. The *Glenwood Springs Municipal Code* is otherwise applicable to any aspect not addressed therein.
3. The applicant shall comply with all verbal representations made in the public hearings, as outlined in all application materials, and/or as revised per conditions herein and approved by the Community Development Director.

**Alternative Motion**

\*\*\*A member of City Council has requested that land use applications include suggested motions for both approval and denial. In most instances, staff has worked diligently with the applicant to address requirements outlined in the *Glenwood Springs Municipal Code* (Code) applicable to any given proposal. Therefore, we are usually in support of an application by the time it reaches the Planning and Zoning Commission and/or City Council. However, if the Planning and Zoning Commission does not believe the application meets the Code's minimum standards, your denial motion should be based on one or more of the same approval criteria applicable to the application. You should support your findings with information outlining the shortcomings of the request as shown in the example below:

**Motion to Deny:**

I move to uphold the recommendation of the Planning and Zoning Commission and deny the

request for an Initial Zoning/Rezoning, as outlined in Ordinance 2021-09, of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District finding [please state your findings here, potential finding are provided below]....

1. The rezonings are NOT consistent with the City's comprehensive plan and the purpose of the *Glenwood Springs Municipal Code*;
2. The rezonings are NOT consistent with the purpose statements of the Commercial (CO) and Planned Unit Development (PUD) zoning districts;
3. Substantial changes in the area DO NOT warrant a zoning change;
4. The intensity of existing and proposed development in the new zoning districts IS expected to create significantly adverse impacts to surrounding properties or the neighborhood.
5. The PUD rezoning will NOT meet any and all applicable standards of this Code not expressly modified by the PUD application; and
6. The PUD DOES NOT provides multiple, varied residential housing types and densities.

## **ANNEXATION AGREEMENT**

THIS ANNEXATION AGREEMENT made and entered into this \_\_\_\_ day of \_\_\_\_\_, 20\_\_\_\_ by and between the CITY OF GLENWOOD SPRINGS, COLORADO, a Colorado home-rule municipality (hereinafter “City”), GLENWOOD PARTNERSHIP LLLP, a Colorado limited liability limited partnership (“Owner”), and COMMERCIAL DEVELOPMENT SERVICES GROUP, LLC, a Delaware limited liability company (“CDSG”). Each of the City, Owner, and CDSG may be referred to as a Party, and all of the foregoing may be referred to hereinafter as the “Parties.”

### **W I T N E S S E T H:**

WHEREAS, Owner is the owner of certain real property currently located in unincorporated Garfield County, Colorado, more particularly described on Exhibit A attached hereto and incorporated herein (the “Property”); and

WHEREAS, CDSG is under contract to purchase a portion of the Property and develop that portion as mixed-use, multi-family housing development; and

WHEREAS, the portion of the Property to be retained by Owner is currently developed for office and warehouse purposes; and

WHEREAS, Owner desires to annex the Property and connect it to the City of Glenwood Springs and has filed a Petition for Annexation (“Petition”) to do the same; and

WHEREAS, along with the Petition, Owner and CDSG submitted a zoning application for the Property asking that the City approve (i) Commercial (CO) zoning for Owner’s retained portion of the Property and (ii) Planned Unit Development (PUD) zoning for CDSG’s portion of the Property as more fully described in Exhibit B hereto; and

WHEREAS, on June 3, 2021, the City Council held a duly and properly noticed public hearing at which time the City Council adopted a resolution finding Owner’s Petition to be in substantial compliance with the statutory requirements for annexation of the Property to the City; and

WHEREAS, on July 29, August 19, and September 7, 2021, the City Council held a duly and properly noticed annexation hearing at which time the City Council approved the annexation and zoning of the Property as set forth in Ordinance No. \_\_, Series 2021, and Ordinance No. \_\_, Series 2021; and

WHEREAS, C.R.S. §§31-12-101, *et seq.*, authorizes the City and Owner to enter into an Annexation Agreement; and

WHEREAS, the City and Owner desire to enter into this Agreement to set forth their agreements in writing concerning the terms and conditions of annexation of the Property to the City.

NOW, THEREFORE, for and in consideration of the mutual promises and covenants contained herein, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

1. **Purpose.** The purpose of this Agreement is to set forth the terms and conditions of the annexation of the Property to the City. Except as expressly provided for herein to the contrary, all conditions herein are in addition to any and all requirements concerning annexation contained in the Municipal Code of the City of Glenwood Springs (hereinafter “City Code”) or the Municipal Annexation Act of 1965, as amended, C.R.S. §§31-12-101, *et seq.* This Agreement is intended to provide a contractual relationship between the City and Owner to ensure compliance with the City Code, state statutes, and all terms and conditions set forth herein. This Agreement includes additional terms and conditions for the purposes of the Municipal Annexation Act.

2. **Annexation.** The annexation of the Property shall be in accordance with the Colorado Municipal Annexation Act of 1965, C.R.S. §§31-12-101, *et seq.*, as amended.

3. **Zoning.** The PUD Plan attached hereto as Exhibit B shall govern the development of that portion of the Property designated as “PUD” in the Plan. The remaining portion of the Property shall be zoned as Commercial (CO) and subject to the regulations set forth in the City’s Municipal Code. The City agrees that, upon annexation of the Property, the zoning of a portion of the Property as PUD and the remaining portion as Commercial (CO) would be consistent with the City’s Comprehensive Plan.

4. **Specific Conditions.** In consideration of the annexation of the Property, and in further consideration of the City providing municipal services to the Property, as hereinafter provided, the Parties agree that it is appropriate that the following payments, dedications and other exactions be made:

(a) CDSG or its successor or assign shall pay Fire and Emergency Services Impact Fees for the PUD portion of the Property in accordance with Section 070.040.030(g)(5) at the time of building permit for each phase of development. Said fees will be paid by Owner or its successor or assign on the Commercial (CO) portion of the Property if required at the time of any future development.

(b) CDSG or its successor or assign shall pay and the City shall accept fees in lieu of land dedication for the benefit of schools in the RE-I School District (the “District”) pursuant to Municipal Code Section 070.040.030(g)(4), or any amended version thereof in force and effect at the time of the final development permit approval for the PUD portion of the Property. Such fees shall be applicable to the number of units proposed for all residential phases scheduled for development and shall be payable upon the issuance of a building permit for a residential dwelling unit. No school land dedication or fee in lieu thereof will be required for the Commercial (CO) portion of the Property unless and until the Property is redeveloped as residential.

(c) CDSG or its successor or assign shall pay and the City shall accept fees in lieu of parkland dedication pursuant to Municipal Code Section 070.040.030(g)(2), or any amended version thereof in force and effect at the time of the final development permit approval for the PUD portion of the Property, subject to reductions: (i) for private

recreation facilities to be constructed on the PUD portion of the Property; (ii) for the design and installation of the northern bike lane along Donegan Road from the western edge of the Property east to Soccer Field Road; (iii) for the design and installation of the southern bike lane and wall (where necessary) along Donegan Road from the eastern boundary of the Property east to Soccer Field Road; and (iv) on any other basis approved by the City under Municipal Code Section 070.040.030(g)(2). No parkland dedication or a fee in lieu thereof will be required for the Commercial (CO) portion of the Property unless and until the Property is redeveloped for residential purposes.

(d) CDSG or its successor or assign shall pay all water tap fee and water system improvement fees required under Municipal Code Section 080.040.010(c) and Article 080.060, respectively, applicable to the development of the PUD portion of the Property. No water tap fees or water system improvement fees will be required for the Commercial (CO) portion of the Property unless and until additional water capacity is needed therefor. Should a change in use of any structure on any portion of the Property occur in the future that causes an increase in water usage, the owner of the structure will be required to pay the system improvement fee associated with the increased use in accordance with Municipal Code in effect at the time of the change in use.

(e) Owner agrees to pay all actual costs incurred for notice publication, recording fees, attorney fees and similar reasonable administrative charges related to the annexation of the Property.

5. **Affordable Housing.** CDSG shall deed restrict a minimum of 20 percent of the residential ~~for-rent-apartment~~ units at 100 percent of area median income or 10 percent of the residential for rent units at 90 percent of area median income. A minimum of 20 percent of the total ~~for-rent-residential-residential apartment~~ units shall be resident occupied. The deed restricted unit mix shall be dispersed amongst the unit types and bedroom configurations.

CDSG shall construct a minimum of thirty-five (35) for sale units, all of which shall be resident occupied. Ten percent of the for-sale units constructed shall be deed restricted as to sale price. CDSG and the City shall negotiate the terms of said deed restriction and the financial contribution of the City as a part of the affordable housing deed-restriction agreement referenced below.

6. **Affordable Housing Agreement.** The Parties shall enter into an affordable housing deed-restriction agreement to be finalized and recorded at the earlier of (a) the closing of CDSG's purchase of the PUD portion of the Property or (b) issuance of the first building permit for the same.

7. **Dedication of Water Rights.** At or before the time of recordation of the final plat subdividing the Property as shown in the PUD Plan, Owner and/or CDSG, as appropriate, shall assign to the City, free and clear of all liens and encumbrances (subject only to the provisions of Section 8, below), all of Owner or CDSG's right, title, and interest in and to 614 shares of Reynolds & Cain Ditch Company stock (the "Shares") historically used on the undeveloped portion of the Property. By this conveyance, Owner and CDSG shall fully satisfy any and all water rights dedication requirements of the City for annexation and development of the Property as set forth in the Municipal Charter and Municipal Code and as approved by the City Council.

8. **Lease-Back of Water Rights.** As consideration for the Shares, the City hereby leases all of the water represented by the Shares to Owner and CDSG ~~in the proportion mentioned in Section 7, above,~~ for irrigation of the PUD portion of the Property at the rate of \$1.00 per year. The City agrees to lease the Shares to Owner and CDSG until such time as the City may be required to use the Shares for another purpose. In the event the City can no longer lease the Shares to Owner and CDSG, the City will provide notice to Owner and CDSG thereof at least sixty (60) days prior to the termination of use of the Shares and will waive any tap or service improvement fees Owner and CDSG would otherwise be required to pay for increasing their use of City water as a result of losing use of the Shares.

9. **Resource Conservation.** CDSG shall revise the PUD landscaping to provide drought resistant xeriscaping and design all improvements to provide leading edge and best management practices for conservation, fixtures, and practices for the development. In addition, the PUD development shall not use natural gas unless CDSG can demonstrate to the satisfaction of the City that it is the only alternative.

10. **Off-Site Improvements and Other Obligations.** As an element of the City's approval of (i) the Petition, (ii) the PUD zoning application, and (iii) acceptance of this Agreement, CDSG has agreed to design and, upon approval of the City Engineer, construct certain off-site improvements, and to make certain financial contributions and dedications to the City to the surrounding street system, namely:

(a) Install a bike lane along the north and south sides of Donegan Road for the length of the Property and extending east to Soccer Field Road;

(b) Install parallel parking and a detached 6-foot sidewalk on the south side of Donegan Road and extend the sidewalk and related improvements east to Soccer Field Road;

(c) Stripe bike lanes on the east and west side of Storm King Road south of Center Drive.

(d) Widen the east side of Storm King Drive north of Center Drive to add a northbound bike lane, parallel parking, and a detached 6 foot wide sidewalk.

(e) Install an eastbound left turn lane and an eastbound acceleration lane from the southbound left turn lane at the State Highway 6 and Donegan Road intersection consistent with recommendation set forth in CDSG's traffic study.

(f) Install a five foot sidewalk to the west side of Melray Road between SH 6 & 24 and Donegan.

(g) CDSG shall either amend the PUD as is necessary to include not less than one acre of land for the future construction of a new fire station for the Glenwood Springs Fire Department or provide such land at a location acceptable to the City. Said land shall be dedicated to the City. Notwithstanding the foregoing, the land to be dedicated to the ~~Fire Department~~City may be less than one acre only to the extent that shared parking for the fire station is located on adjacent property. ~~Said land shall be dedicated to the City.~~

(h) CDSG shall provide \$100,000 to be used for emergency planning and the cost to construct emergency access and egress improvements.

(i) Amend the development proposal as is necessary to include emergency access to Highway 6 through the parcel to the south.

(j) Amend the annexation map to include the annexation of Storm King to Donegan to Mel Ray.

(k) Provide an annexation map for Mel Ray from Donegan to 6 & 24 if, on or before June 1, 2022, Garfield County can establish ownership of the Mel Ray ROW-right-of-way allowing the City to legally annex the ROW-right-of-way. In the event that the ROW-right-of-way cannot be annexed by said date, the improvements related Mel Ray proposed by CDSG shall not be required to be constructed; provided, however, CDSG shall pay to the City an amount equal to the engineers estimate of the cost of improvements to Mel Ray, which funds shall be used by the City to repair and maintain roads in West Glenwood, including, but not limited to, the roundabout on Highway 6 & 24, or for emergency planning or infrastructure.

(l) Reconstruction of the foregoing streets before acceptance by the City.

The off-site street improvements described in this Section 10 shall be completed prior to or contemporaneously with the issuance of a final and permanent certificate of occupancy for the first building to be constructed within the PUD portion of the Property. Parkland dedication fees required in connection with development of the PUD portion of the Property shall be reduced by the total actual costs incurred by CDSG to (i) engineer, design, and install the northern bike lane along Donegan Road from the western edge of the Property east to Soccer Field Road; (ii) engineer, design, and install the southern bike lane, sidewalk, and wall (where necessary) along Donegan Road from the eastern boundary of the Property east to Soccer Field Road.

In addition to the foregoing, ~~no issuance of a~~ final and permanent certificate of occupancy for the first building to be constructed within the PUD portion of the Property shall be issued unless: 1) the emergency access described in (h) above has been constructed and is operational; 2) a new water tank serving North and West Glenwood has been constructed and is operational; and 3) a new West Glenwood Fire Station is under construction-substantially complete. The foregoing shall not be a condition precedent of issuance of a final and permanent certificate of occupancy for the first building to be constructed within the PUD portion of the Property unless the City has budgeted for the planning and completion of the emergency access improvements, water tank, and West Glenwood Fire Station in the Fiscal Year 2022 and 2023 budgets.

The City and CDSG agree that the improvements, dedications, and financial contributions listed in Section 4 and (a) – (l) of this Section establish the full and complete obligations of CDSG and its successors and assigns with respect to off-site pedestrian/traffic/transportation improvements, impact and dedication fees, and emergency planning related to the development of the PUD portion of the Property.

11. Site Planning and Phasing. The PUD portion of the Property still requires approval of a site plan through a public entitlement process. Site Plan approval shall be through a Master Plan pursuant to GSMC 070 and shall include the West Glenwood Mall site to the South of the PUD Property. The Master Site Plan shall not be a condition precedent to filing for a Site Plan on the PUD Property if a Master Plan has been submitted within six (6) months of execution of this Agreement and has not been approved within eighteen (18) months of execution of this

~~Agreement and CDSG or its affiliate, successor, or assign fails to purchases the Mall property. In the event of the foregoing then the development of the PUD portion of the Property will be phased as shown on Exhibit C. Construction of Phase 2 cannot be commenced until all other conditions of this Agreement have been completed. The restriction on construction of Phase 2 shall not apply to the construction of a fire station in the event the land dedicated pursuant to Section 10(g) is located in the area designated as Phase 2 on Exhibit C.~~**Phasing.** ~~The development of the PUD portion of the Property will be phased as shown on Exhibit C. Construction of Phase 2 cannot be commenced until there is an approved redevelopment plan for the West Glenwood Mall site to the south; provided, however, that the forgoing shall not be a condition precedent to construction of Phase 2 if the (i) a Mall redevelopment plan has not been submitted to the City within six (6) months but not approved within three (3) years from the commencement of construction of Phase 1, and (ii) provided that CDSG or its affiliate, successor, or assign purchases the Mall property, CDSG (or its affiliate, successor, or assign) has submitted a redevelopment plan to the City within six (6) months of its purchase of the Mall property. The restriction on construction of Phase 2 shall not apply to the construction of a fire station in the event the land dedicated pursuant to Section 10(g) is located in the area designated as Phase 2 on Exhibit C.~~

12. **Vested Rights.** In order to allow Owner and CDSG a reasonable opportunity to develop the Property in accordance with this Agreement and the PUD Plan, the **PUD Plan and related** development rights and uses approved hereby shall, to the extent allowed by law, constitute a “site specific development plan” under C.R.S. §§24-68-101 *et seq.*, as amended. The site specific development plan shall be vested for a period of ten years beginning on the date the final plat subdividing the Property as shown in the PUD Plan is recorded (the “Vested Period”). The Property as to which rights have been vested shall be immune from changes in the City’s land use regulations for the duration of the Vested Period except as provided in this Section 12. Except in instances of force majeure, the requirements of federal or state law, cases of preemption or other superior jurisdictional mandate, the City shall not initiate any zoning or land use action which would alter, impair, prevent, diminish, impose a moratorium on development, or otherwise unreasonably delay any of Owner’s or CDSG’s rights set forth in this Agreement or their plans for development or zoning, as approved by the City. Notwithstanding the foregoing, the establishment of vested property rights under this Agreement shall not prevent the City from enacting and enforcing regulations of general applicability (including, but not limited to, building, fire, plumbing, electrical and mechanical codes, including the preliminary plat and final plat subdivision requirements under the Municipal Code and other City ordinances), except where the approved plans for development of the Property or state or federal regulations provide otherwise, as all of such regulations exist on the date of this Agreement or may be enacted or amended after the date of this Agreement.

13. **Conditions Precedent.** Notwithstanding the date set forth in the introductory paragraph of this Agreement, annexation of the Property shall not be effective, and this Agreement shall not be in force, until:

- (a) Final Approval has occurred, meaning the thirtieth day after the effective date of the latest of the motion, ordinance, and/or resolution by which the City Council approves (i) this Agreement; (ii) publication after final passage on second reading of the ordinance by which City Council approves the annexation of the Property; (iii) the zoning of the Property as PUD and Commercial (CO) as provided in Exhibit B; and (iv)

subdivision and major site plan approval for the PUD portion of the Property consistent with Exhibit B; and

(b) The affordable housing agreement called for in Section 6 hereof has been approved by both the City and CDSG; and

(c) The annexation map has been recorded with the Garfield County Clerk & Recorder; and

(d) The Parties have executed and delivered this Agreement for recordation with the Garfield County Clerk & Recorder.

14. **Failure of Conditions.** Until all of the conditions set forth in subsection 13 above have been satisfied, this document shall constitute an offer by Owner and CDSG and the City to enter into this Agreement (notwithstanding the Parties' mutual execution and delivery of this document), and the annexation and zoning of the Property shall not be effective. Consequently, at any time before such conditions are satisfied, Owner may withdraw the Petition and Owner and/or CDSG may withdraw its offer to enter into this Agreement. If Owner withdraws the Petition or Owner and/or CDSG withdraw its offer to enter into this Agreement, or if final approval does not otherwise occur for any reason, then this Agreement shall be deemed void and of no force or effect, and the Property shall be deemed not annexed to the City. Owner and CDSG may exercise their rights under this Section 14 independently.

15. **Deannexation.** The provisions of this Agreement, as well as acceptable City zoning of the Property, are material considerations of Owner's agreement to annex the Property to the City. Therefore, in the event (a) the City fails to perform under the terms of this Agreement, or (b) Owner, CDSG, or both are unable to obtain, either before or after annexation proceedings are complete, Commercial (CO) and PUD zoning of the Property as described above and/or subdivision and/or development approval for development of the Property which they in their sole discretion find acceptable, Owner, CDSG, and the City stipulate and agree, pursuant to C.R.S. §31-12-501, that it shall be in the best interest of the City that the Property (or a portion thereof) be de-annexed from the City. In such event, the City agrees that it shall initiate de-annexation proceedings, and to take all steps necessary to effect the de-annexation. The City further acknowledges and agrees that de-annexation is not prohibited by the City Charter or Municipal Code and ordinances, and that the City will not amend its ordinances to preclude a de-annexation permitted hereunder. The Parties' right to de-annex shall be in addition to any other rights available to them at law or under this Agreement. Upon the de-annexation of the Property (or portion thereof) from the municipal boundaries and specific jurisdiction of the City, the City agrees that it shall convey, assign, transfer and quitclaim to Owner or their successors and assigns, any and all water rights (the public dedication of which is more fully described by Section 6 hereof) previously dedicated by Owner hereunder to the City for the public use and benefit.

16. **Assignment.** The parties agree and acknowledge that the rights and obligations of Owner and CDSG under this Agreement may be assigned by them to persons or entities acquiring title to the Property or a portion thereof without the prior consent of the City if, and only if, such assignee agrees in writing to be bound by the terms and conditions of this Agreement, and the Owner or CDSG, as applicable, shall give notice to the City of any such conveyance, together with the assignee's written agreement to be bound by the terms and conditions of this Agreement.

17. **Waiver of Defects.** In executing this Agreement, Owner and CDSG waive all objections either may have concerning defects, if any, in the formalities whereby it is executed, or concerning the power of the City to impose conditions on Owner or CDSG as set forth herein, and concerning the procedure, substance and form of the ordinances or resolutions adopting this Agreement.

18. **Final Agreement.** This Agreement supersedes and controls all prior written and oral agreements and representations relating to the annexation of the Property to the City, and is the total integrated agreement between the City, Owner, and CDSG.

19. **Modifications.** This Agreement shall not be amended except by subsequent written agreement between the Parties hereto.

20. **Release of Liability.** It is expressly understood that the City cannot legally be bound by the representations of any of its officers or agents or their designees except in accordance with the City Code, City ordinances and the laws of the State of Colorado. Owner and CDSG, when dealing with the City, act at their own risk as to any representation or undertaking by the City officers, agents or their designees which is subsequently held unlawful by a court of law.

21. **Captions.** The captions in this Agreement are inserted only for convenience and in no way define, limit, or prescribe the scope or intent of this Agreement or any part thereof.

22. **Binding Effect.** This Agreement shall be binding upon and inure to the benefit of the Parties hereto and their respective heirs, successors, and assigns.

23. **Severability.** If any provision(s) of this Agreement shall be determined to be void or invalid by a court of competent jurisdiction, then such determination shall not affect any other provision hereof, all of which other provisions shall remain in full force and effect. It is the intention of the parties hereto that, if any provision of this Agreement is capable of two constructions, one of which would render the provision void, and the other of which would render the provision valid, then the provision shall have the meaning that renders it valid.

24. **Governing Law.** The laws of the State of Colorado shall govern the validity, performance, and enforcement of this Agreement. Should either party institute legal suit or action for enforcement of any obligation contained herein, it is agreed that the venue of such suit or action shall be in Garfield County, Colorado.

25. **Attorneys' Fees; Survival.** Should this Agreement become the subject of litigation between the City and Owner or CDSG, the prevailing party shall be entitled to attorneys' fees and costs of suit actually incurred, including expert witness fees. All rights concerning remedies and/or attorneys' fees shall survive any termination of this Agreement.

26. **Gender.** Whenever the context shall require, the singular number shall include the plural, the plural the singular, and the use of any gender shall be applicable to all genders.

27. **Counterparts.** This Agreement may be executed in counterparts, each of which shall be deemed an original and all of which, when taken together, shall be deemed one and the same instrument.

28. **Notice.** All notices required under this Agreement shall be in writing and shall be hand-delivered or sent by first class mail postage prepaid, to the addresses of the parties set forth herein. All notices by hand delivery shall be effective upon receipt. All notices by mail shall be considered effective seventy-two (72) hours after deposit in the United States Mail with the proper address as set forth below. Either party by notice so given may change the address to which future notices may be sent.

## CITY COUNCIL LIST OF MOTIONS

Date: September 7, 2021  
To: City Council  
From: Trent Hyatt, Senior Planner  
Subject: #09-20- Consideration of an Annexation and the initial zoning/Rezoning of 15.818 acres to Commercial (CO) District and Planned Unit Development (PUD) District at 214 Center Drive (PIN: 2185-061-00-042).

**Action 1 – Ordinance 2021-08 - Annexation** – of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs.

### **Motion to Approve:**

I move to reverse the recommendation of the Planning and Zoning Commission and approve the request for an Annexation, as outlined in Ordinance 2021-08, of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs with the recommended findings and conditions listed on Pages 1-2 of the City Council List of Motions September 7, 2021.

### **Recommended Findings:**

1. The annexation conforms to applicable state statutes.
2. The annexation is consistent with the Comprehensive Plan; and
3. The annexation minimizes potential adverse impacts to the City and does not negatively impact the City's public health, safety, and welfare.

### **Recommended Conditions:**

1. Prior to second reading of the annexation ordinance, the applicant shall revise the annexation map to include adjacent Storm King, and Donegan Roads rights-of-way roadway sections related to the project.
2. The applicant shall comply with/address all City staff comments related to the proposal prior to submittal of any future development permit application.
3. Future development shall comply with the various requirements outlined in the PUD, where applicable, related items such as uses, building heights, densities, minimum open space, parking, and/or landscaping.
4. The exact locations site features may change upon site/architectural or master plan review. The Glenwood Springs Municipal Code is otherwise applicable to any standards not addressed therein.
5. The applicant shall comply with all verbal representations made in the public hearings, as outlined in all application materials, and/or as revised per conditions herein and approved by the Community Development Director.
6. Prior to approval of any future development review application, the applicant shall apply for and receive the approval of a CDOT access permit, where applicable.
7. The applicant shall provide for the following:
  - a. The applicant shall provide a payment in the amount of \$100,000 to aid in the planning for and implementation of necessary emergency evacuation measures.

- b. The applicant shall amend the development proposal as is necessary to include not less than one acre of land for the future construction of a new fire station for the Glenwood Springs Fire Department. Said land shall be dedicated to the City.
  - c. The applicant shall deed restrict a minimum of 20 percent of the residential units at 100 percent of area median income or 10 percent of the residential units at 90 percent of area median income. A minimum of 20 percent of the total residential units shall be resident occupied.
  - d. The applicant shall amend the development proposal as is necessary to include access to Highway 6 through the parcel to the south.
  - e. All related offsite transportation and pedestrian related improvements to the Storm King, and Donegan Roads rights-of-way.
- 8. The subject property shall be developed pursuant to a Master Plan per Section 070.060.050(b) of the *Glenwood Springs Municipal Code*.
  - 9. The future Master Plan submittal shall provide for a meaningful public open space area.

#### Alternative Motion

\*\*\*A member of City Council has requested that land use applications include suggested motions for both approval and denial. In most instances, staff has worked diligently with the applicant to address requirements outlined in the *Glenwood Springs Municipal Code* (Code) applicable to any given proposal. Therefore, we are usually in support of an application by the time it reaches the Planning and Zoning Commission and/or City Council. However, if City Council does not believe the application meets the Code's minimum standards, your denial motion should be based on one or more of the same approval criteria applicable to the application. You should support your findings with information outlining the shortcomings of the request as shown in the example below:

#### **Motion to Deny:**

I move to uphold the recommendation of the Planning and Zoning Commission and deny the request for a the request for an Annexation, as outlined in Ordinance 2021-08, of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs finding [**please state your findings here**, potential finding are provided below]....

- 1. The annexation DOES NOT conform to applicable state statutes.
- 2. The annexation is NOT consistent with the Comprehensive Plan; and
- 3. The annexation DOES NOT minimize potential adverse impacts to the City and DOES negatively impact the City's public health, safety, and welfare.

**Action 2 -Ordinance 2021-09 - Initial Zoning/Rezoning** – of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

**Motion to Approve:**

I move to reverse the recommendation of the Planning and Zoning Commission and approve the request for an Initial Zoning/Rezoning, as outlined in Ordinance 2021-09, of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District with the recommended findings and conditions listed on Page 3 of the City Council List of Motions September 7, 2021.

**Recommended Findings:**

1. The rezonings are consistent with the City's comprehensive plan and the purpose of the *Glenwood Springs Municipal Code*;
2. The rezonings are consistent with the purpose statements of the Commercial (CO) and Planned Unit Development (PUD) zoning districts;
3. Substantial changes in the area warrant a zoning change;
4. The intensity of existing and proposed development in the new zoning districts is not expected to create significantly adverse impacts to surrounding properties or the neighborhood.
5. The PUD rezoning will meet any and all applicable standards of this Code not expressly modified by the PUD application; and
6. The PUD provides multiple, varied residential housing types and densities.

**Recommended Conditions:**

1. The applicant shall submit a Minor Subdivision application to create the two lots outlined in the request.
2. Future development shall comply with the various requirements outlined in the PUD, where applicable. The *Glenwood Springs Municipal Code* is otherwise applicable to any aspect not addressed therein.
3. The applicant shall comply with all verbal representations made in the public hearings, as outlined in all application materials, and/or as revised per conditions herein and approved by the Community Development Director.

**Alternative Motion**

\*\*\*A member of City Council has requested that land use applications include suggested motions for both approval and denial. In most instances, staff has worked diligently with the applicant to address requirements outlined in the *Glenwood Springs Municipal Code* (Code) applicable to any given proposal. Therefore, we are usually in support of an application by the time it reaches the Planning and Zoning Commission and/or City Council. However, if the Planning and Zoning Commission does not believe the application meets the Code's minimum standards, your denial motion should be based on one or more of the same approval criteria applicable to the application. You should support your findings with information outlining the shortcomings of the request as shown in the example below:

**Motion to Deny:**

I move to uphold the recommendation of the Planning and Zoning Commission and deny the request for an Initial Zoning/Rezoning, as outlined in Ordinance 2021-09, of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District finding [please state your findings here, potential finding are provided below]....

1. The rezonings are NOT consistent with the City's comprehensive plan and the purpose of the *Glenwood Springs Municipal Code*;
2. The rezonings are NOT consistent with the purpose statements of the Commercial (CO) and Planned Unit Development (PUD) zoning districts;
3. Substantial changes in the area DO NOT warrant a zoning change;
4. The intensity of existing and proposed development in the new zoning districts IS expected to create significantly adverse impacts to surrounding properties or the neighborhood.
5. The PUD rezoning will NOT meet any and all applicable standards of this Code not expressly modified by the PUD application; and
6. The PUD DOES NOT provides multiple, varied residential housing types and densities.

Hello, Please include this in the comments to council for the Sept 7 meeting. Thank you.

Dear Council Members:

You have many difficult tasks on your plate, and I appreciate your having allocated time since the last meeting for more thoughtful consideration of all the issues the 480 Donegan proposal contains.

I second the request to postpone a decision until the new comprehensive plan has been completed. The West Glenwood neighborhoods are already overcrowded and under-served. The new plan will have to take climate change into consideration in all its aspects.

I'm looking forward to taking the survey that will become available tomorrow, and commend council for requesting input. I do hope it will have at least some open ended questions and is not all multiple choice! And I further encourage you to convene small groups to brainstorm possible solutions, going forward. Here's one I can't resist mentioning now, though I do realize it can't be seriously entertained as a proposal at this time.

As a West Glenwood resident and business owner, I would LOVE to see the Mall add a second story of housing that would be affordable to the retail workers and small business employees working there and nearby. This would not require the additional footprint of any of the proposed housing. Wouldn't it be possible to obtain support through housing and transportation grants? Think of the cars it would keep off the road! And there is already plenty of parking. I would expect that Mall businesses

would welcome a move that would tend to let them keep good employees by keeping them close and happy! Other housing solutions I'd like to see considered would require revisiting existing zoning so that single family houses could safely and affordably convert or build ADUs. It would current residents options in the spiraling escalation of real estate values, property taxes and forced departures. That would be in keeping with small-town character far more than more cookie-cutter multiplexes.

These issues have been long in the making and won't be solved - or at least won't be solved well -- unless we acknowledge that we are at a point of no return if we continue to put growth at the top of our list of priorities. I believe that I and my neighbors are willing to work to craft real solutions. But speaking for myself, if the city doesn't permit necessary change to happen, I'll be among the heartbroken folks who give up on it.

Laurie Raymond

Hi Trent,

Will you please share this with all of the City Council Members.

Thank you,

Christina Gore

Dear City Council Members,

I am a citizen of Glenwood Springs.

I am writing to ask you not to allow the proposed development behind the West Glenwood Springs Mall. In the event of another fire in the area people living in the area may not be able to evacuate in time. Also the proposed density does not fit with the current density in the area.

I am not against development of the area, I just think it should match current density with individual single family homes behind the mall.

Thank you for your time and attention to this letter

Thank you,  
Christina Gore

I am opposing the Annexation of 480 Donegan Pasture for the proposed development of 360 rental units. There are numerous reasons why I am opposed but the main reason is the SAFETY of lives during a wildfire in this neighborhood. Adding this many people and cars in any situation is dangerous and unacceptable. Which brings me to this point: The units will be built but no occupancy until the three conditions are met. First is the evacuation in the event of a fire, the water tower needs to be reconstructed to hold more water, and a new fire station (which is not to fight a wildfire). This is unacceptable as there cannot be a plan for an evacuation as all roads lead to the already impacted round-about. I asked a structural engineer what happens in this event to the already built structures. The answer was a Variance-Really. This is probably true as I am sure the Developers will not be willing to bulldoze the structures. I guess they get what they want by hook or by crook.

I will state this question again: When will the 2,000 needed housing get reduced. Carbondale is building housing units, more Lofts are being built, I understand the Miniature Golf on Hwy 6 will be turned into housing units, 6 Canyon has been built (and not fully occupied), and it goes on and on.

West Glenwood is not the only place that is considered the Roaring Fork Valley.

Thank you City Council for your time,  
Gwendolyn Porter

Please add my letter to the City Council agenda/packet for the September 7<sup>th</sup> City Council Meeting.

Dear City Council:

I am not anti-growth, but rather I am pro smart-growth. The 480 Donegan project is definitely not the pro smart-growth we need in Glenwood Springs.

In 1976 I moved here and lived with my parents through 1979. In 1980 I moved out and shared housing with a roommate. In 1981 I moved away because I couldn't afford to live here. As my employer said "You can't eat the scenery can you?"

From 1981 – 1982 I rented in Carbondale and Glenwood, lived in low income housing, and worked two to three jobs at varying times.

In 1983 I built a small home with unfinished space and over the years have added on and remodeled as I could afford to, from time to time still working more than one job.

Does this sound familiar? This is my story but I imagine that it was much the same for some of you. A young man spoke at the recent City Council meeting about growing up here but he can't afford to live here. His concerns, while true, are not new and have not changed in the forty years I have lived here.

My point is this: Housing issues in this valley– availability and affordability, have existed for a very long time. These same issues existed over forty years ago when I moved here. The town built more housing, we became more crowded, safety and crime became an issue, traffic became an issue – and all the while housing is STILL an issue. Given our geographical restrictions and that we live in a resort town it always will be an issue.

I'm sure you remember the Field Of Dreams movie that states "If you build it, they will come". Yes they will, and with their arrival we'll have even more housing, safety, crime and traffic issues. And R2, though they say they "are THE solution to the existing problem" – will actually **be part** of the existing problem.

You have the power and responsibility to put a stop to this building insanity and to take care of the constituents you currently have - your friends, family members, and neighbors - who have a right to green space, low crime, traffic safety, and a comprehensive evacuation plan.

Please do the right thing and put a moratorium on growth, including 480 Donegan, until our concerns are met.

Thank you.

Erin Wiencek

Dear Ms. Figuero and Mr. Hyatt,  
I'm finally learning not to contact council members directly so I'm asking you both to include this letter in a packet to give to all the City Council members.  
Thanks so much -  
Jamie Darien

Dear Members of our City Council,

I feel one last letter, opposing the West Glenwood R2 Development site, is warranted to highlight the need for an update to the Comprehensive Plan adopted in 2011, before continuing with any future development(s) in West Glenwood.

Ten years is a long time since the last plan was written. As I said in the August 19th meeting, much has changed in that time....mostly with an increase of people and traffic, and a common need for low income housing.

An update to address these needs by reviewing and possibly renewing parameters and boundaries, will allow for a ***comprehensive plan that can help determine future developments, and not developments determining the plan for the city.***

As I've stated before, this current development brought before Council, is the only development that is in a neighborhood and within close proximity to a school. Because of this requested location, many neighboring citizens will be affected by a large increase in traffic, noise, side street-parking, and people.

I'm not familiar with Comprehensive plans in general, but I'm questioning the prospect of such a plan providing viable evacuation routes in case of a fire or other emergency - our number one concern in Western Hills and all of West Glenwood.

Allowing a Comprehensive plan to address open space, safety concerns and prioritize additional resources needed (ie a new Fire Station housed within the development), is so needed at this time. A plan which would address Glenwood's "caring capacity" - a term I was recently made aware of, a capacity which determines a town's population size, in regards to maintaining and sustaining a quality of life for all of it's residents.

So again, I'm writing another letter (perhaps my fourth or fifth...I've lost count) to encourage all of you to delay and/or deny R2's request for annexation and rezoning of 480 Donegan, until an updated Comprehensive Plan is completed.

I do appreciate you all once again hearing/reading my thoughts on this project.

Thanks as always, for taking your time in coming to such an important and such an ***impactful*** decision.

In peace and with much gratitude,  
Jamie Darien

Hello all, again,

Here are photos taken today, Monday, August 23rd right around 3:30pm, with Two Rivers school students getting out of class. The cars lined up are in Storm King Drive. An entrance/exit onto a large development like 480 Donegan would cause gridlock and a safety issue.

The other photos are along Donegan Street—a photo of Two Rivers staff parking on the side of the road; and the other of cars and people traveling on Donegan as well as evidence that homeowners already use Donegan as a parking area, so to speak.

I hope you all make it a priority to see what the safety issues are about by visiting W. GWS. To be honest, I didn't even know this area existed when I first moved to GWS in 2010 to S. GWS.

If you visit, you'll see narrow roads, and road upon road snaking up to "pocket neighborhoods" that surprise in the numbers of houses that are there. All these residents spill out onto Donegan. As well, there are often-visited areas like Mitchell Creek fish hatchery and the narrow roads that lead up there.

I looked at the ditch, and was surprised at how small it is. I wonder how 480 Donegan residents will get enough water, especially in our global-warming world. To ask for a swimming pool is more than exorbitant.

Thank you for looking at the photos, and if you need a guide to show you around W. GWS, please contact me!

Sincerely,

Annie Uyehara

On Aug 23, 2021, at 2:27 PM, Annie Uyehara <[annie.u@comcast.net](mailto:annie.u@comcast.net)> wrote:

Dear City Council,

Firstly, thank you very much, all the council members who take time to read our many letters filled with many concerns about the 480 Donegan project. Please, read on! I'm grateful to those who asked questions for city staff and R2 Partners and PR staff on Aug. 19th.

This isn't so much a letter as it's a compilation of what was said (and wasn't), what was asked and answered (or not) at the meeting and what I hope and pray is remembered, digested, considered, and researched some more before City Council takes a vote on annexation of 480 Donegan:

- Haley Carmer, from R2's PR firm said:

"We are the solution to the existing problem. Density ensures affordable housing."

It may indeed, but density creates a host of problems: infrastructure, being a "bad neighbor," losing our "small

town character” and forever changing the footprint from a rural neighborhood to a Willits-like area, which would essentially take away retail traffic from downtown Glenwood and move it west. That may be nice for residents, but not for merchants.

-Someone said, “Small town character can be hard to define.” Ha! It’s not 27-32 feet tall buildings towering over one-story houses that have been there for 40 years! High density housing erases “small town character.” Planning and Zoning rejected it, saying it’s “incompatible” for a few good reasons. I don’t know why that is seemingly being ignored by staff.

-I loved that quite a few council members brought up the fact that besides tiny Gregory Park, there’s no parks or open space in W. GWS. A marvelous idea would be for the county and city to collaborate and buy the Diemoz property and make it into a beautiful, tree-filled open space. What a legacy for the city, what a legacy for the Diemoz family! What good neighbors they would be!

-But, should the city make the mistake to annex 480 Donegan, it would be a kind, environmentally friendly thing to require open space, replete with hundreds of trees to mitigate the warming planet. It’s worth losing a private pool and restaurant.

-It was one of the most talked about questions from the meeting when Willman asked, “How big is Sayre Park?” because we know there’s just one park and it’s not even close to the size of Sayre Park. In response, R2 said providing a park would cut into their profit. Thank you, Ms. Wussow, Mr. Willman, and Ms. Stepp, for caring that there’s no open space in W. GWS and it’s for the health and welfare of the community and the environment, that there be open space.

-Parkland: Karl Hanlon interrupted R2 from speaking on this. Some of us wondered if Hanlon was working for R2 as well, since he spoke more for them than they did themselves. He said staff can “negotiate” with the developer. No one heard if R2 was interested in negotiating.

-Haley said, “[People are saying] put a pause and update the comp plan but today you have to follow the comp plan in place.”

City Council isn’t beholden to an outdated comp plan when climate change, accelerated growth, and a 10-year drought have changed our town dramatically. Haley threatened that if the city updated its 11-year-old comp plan, “that all the money to the city” will disappear. City Council, other developers are eager and willing offer money as well, hopefully for smart housing and smart growth. But first, the comp plan needs to be updated; there’s too many problems that aren’t being addressed that will only grow if not.

-Infrastructure and evacuation routes: For that to occur, the county and CDOT will need to get involved, said Karl Hanlon. The \$100K R2 is offering will take care of ONE gate/access line, according to Terri Partch. CDOT has spent so much money on Glenwood Canyon, and our county can’t pay for a South Bridge, so how can we expect cooperation to build a proper evacuation route?

-A firehouse is needed. But it’s one small piece of the puzzle. Again: infrastructure, guaranteed water (it goes beyond 480 Donegan needs), and evacuation plans and routes must be addressed before adding some 900+ people with families into an already scary situation in W. GWS, which by the way, *matters to its people as much as those living in S. GWS care about their safety. Let’s take care of all of our citizens.*

-Ms. Stepp asked how to get money for infrastructure. Hanlon said, “We don’t have a property tax but I suggest we ID the need for a fire station and the mall to balance the cost but we will incur new costs. . . Mel Ray, we can’t annex it, we have to negotiate with the county.”

-The Mall was spoken of as if it’s the key to obtain the money needed for infrastructure and wildfire evacuation routes. Hanlon said “the Mall and annexation are linked together.” But R2 said they are at the “Early phase of [a contract to purchase the Mall] and have to work closely with Ross.” It’s not a guaranteed sale, and several previous buyers saw their contract fall through. Ross might indeed be a thorn in R2’s side. To consider the mall as the cash cow for revenue is premature.

-A council member asked the Chief of Police Deras how 480 Donegan would impact his department. He said, “The costs can add up quickly.” I think it’d be essential to find out how many officers and money will be needed for 900 new residents, especially since Deras has a deficit of officers in his department currently. It’s a safety issue and should be taken with utmost seriousness.

-Mayor Godes asked R2, “How does parkland eliminate unit count?” Rosenberg: “It doesn’t.” Godes: “Would the

pool and restaurant open to community? Rosenberg: "It would not."

A presumption then, is R2 could eliminate the private pool and restaurant, and still make a profit while providing much needed open space for all of W. Glenwood Springs.

Hanlon concluded that he heard loud and clear about the concern for open space in W. GWS. We all are grateful he heard that. More importantly, Hanlon said to the council, when trying to decide whether to vote now or continue at a special meeting said, take your time, "You guys need to get it right, this is a big application."

INDEED,

IT IS. DUE DILIGENCE IS REQUIRED.

I hope and pray that all the council members are giving 480 Donegan all the due diligence it requires, because it matters, not only to those impacted by it in W. GWS, but by those in downtown, and all thoroughfares. As Shelly Kaup commented, "Putting in a public park is very important, and I am concerned about traffic. On Mel Ray Rd, it would be a 31% increase of traffic."

Godes conclude by saying he'd like 25% affordable housing and Willman by saying he needs to know more about traffic impact. Tony Hershey said he wanted to go home about an hour earlier. Light humor! We all did, none of us wanted to be there, defending the safety of our lives by short-sighted high density housing that is incompatible to the area.

Sincerely,

Annie Uyebara

Dear City Council,

Firstly, thank you very much, all the council members who take time to read our many letters filled with many concerns about the 480 Donegan project. Please, read on! I'm grateful to those who asked questions for city staff and R2 Partners and PR staff on Aug. 19th.

This isn't so much a letter as it's a compilation of what was said (and wasn't), what was asked and answered (or not) at the meeting and what I hope and pray is remembered, digested, considered, and researched some more before City Council takes a vote on annexation of 480 Donegan:

- Haley Carmer, from R2's PR firm said:

"We are the solution to the existing problem. Density ensures affordable housing."

It may indeed, but density creates a host of problems: infrastructure, being a "bad neighbor," losing our "small town character" and forever changing the footprint from a rural neighborhood to a Willits-like area, which would essentially take away retail traffic from downtown Glenwood and move it west. That may be nice for residents, but not for merchants.

-Someone said, "Small town character can be hard to define." Ha! It's not 27-32 feet tall buildings towering over one-story houses that have been there for 40 years! High density housing erases "small town character." Planning and Zoning rejected it, saying it's "incompatible" for a few good reasons. I don't know why that is seemingly being ignored by staff.

-I loved that quite a few council members brought up the fact that besides tiny Gregory Park, there's no parks or open space in W. GWS. A marvelous idea would be for the county and city to collaborate and buy the Diemoz property and make it into a beautiful, tree-filled open space. What a legacy for the city, what a legacy for the Diemoz family! What good neighbors they would be!

-But, should the city make the mistake to annex 480 Donegan, it would be a kind, environmentally friendly thing to require open space, replete with hundreds of trees to mitigate the warming planet. It's worth losing a private pool and restaurant.

-It was one of the most talked about questions from the meeting when Willman asked, "How big is Sayre Park?" because we know there's just one park and it's not even close to the size of Sayre Park. In response, R2 said providing a park would cut into their profit. Thank you, Ms. Wussow, Mr. Willman, and Ms. Stepp, for caring that there's no open space in W. GWS and it's for the health and welfare of the community and the environment, that there be open space.

-Parkland: Karl Hanlon interrupted R2 from speaking on this. Some of us wondered if Hanlon was working for R2 as well, since he spoke more for them than they did themselves. He said staff can "negotiate" with the developer. No one heard if R2 was interested in negotiating.

-Haley said, “[People are saying] put a pause and update the comp plan but today you have to follow the comp plan in place.”

City Council isn’t beholden to an outdated comp plan when climate change, accelerated growth, and a 10-year drought have changed our town dramatically. Haley threatened that if the city updated its 11-year-old comp plan, “that all the money to the city” will disappear. City Council, other developers are eager and willing offer money as well, hopefully for smart housing and smart growth. But first, the comp plan needs to be updated; there’s too many problems that aren’t being addressed that will only grow if not.

-Infrastructure and evacuation routes: For that to occur, the county and CDOT will need to get involved, said Karl Hanlon. The \$100K R2 is offering will take care of ONE gate/access line, according to Terri Partch. CDOT has spent so much money on Glenwood Canyon, and our county can’t pay for a South Bridge, so how can we expect cooperation to build a proper evacuation route?

-A firehouse is needed. But it’s one small piece of the puzzle. Again: infrastructure, guaranteed water (it goes beyond 480 Donegan needs), and evacuation plans and routes must be addressed before adding some 900+ people with families into an already scary situation in W. GWS, which by the way, *matters to its people as much as those living in S. GWS care about their safety. Let’s take care of all of our citizens.*

-Ms. Stepp asked how to get money for infrastructure. Hanlon said, “We don’t have a property tax but I suggest we ID the need for a fire station and the mall to balance the cost but we will incur new costs. . . Mel Ray, we can’t annex it, we have to negotiate with the county.”

-The Mall was spoken of as if it’s the key to obtain the money needed for infrastructure and wildfire evacuation routes. Hanlon said “the Mall and annexation are linked together.” But R2 said they are at the “Early phase of [a contract to purchase the Mall] and have to work closely with Ross.” It’s not a guaranteed sale, and several previous buyers saw their contract fall through. Ross might indeed be a thorn in R2’s side. To consider the mall as the cash cow for revenue is premature.

-A council member asked the Chief of Police Deras how 480 Donegan would impact his department. He said, “The costs can add up quickly.” I think it’d be essential to find out how many officers and money will be needed for 900 new residents, especially since Deras has a deficit of officers in his department currently. It’s a safety issue and should be taken with utmost seriousness.

-Mayor Godes asked R2, “How does parkland eliminate unit count?” Rosenberg: “It doesn’t.” Godes: “Would the pool and restaurant open to community? Rosenberg: “It would not.”

A presumption then, is R2 could eliminate the private pool and restaurant, and still make a profit while providing much needed open space for all of W. Glenwood Springs.

Hanlon concluded that he heard loud and clear about the concern for open space in W. GWS. We all are grateful he heard that. More importantly, Hanlon said to the council, when trying to decide whether to vote now or continue at a special meeting said, take your time, “You guys need to get it right, this is a big application.”

Hi Trent,

I sent a note to Charlie, but he said send it to you. Please see below.

Have you ever thought about why the planning offices are always about “development”? I never see any effort into the opposite of “development”. The best towns and cities have lots of great non-built land. Vancouver, B.C. is that way.

I don’t see one thing in your webpage about climate change. The most important thing in the world and no mention. What will likely end the human race. Shouldn’t CC be the first thing in every agenda?

“Development” was not used in the title back in the day.

The way GS goes affects Carbondale.

Thanks, Pat

Pat,

I cannot review this as it is submitted outside of a the quasi judicial hearing.

You should submit to Trent at City Development office.

Charlie

On 8/20/2021 10:07 AM, [hunter@sopris.net](mailto:hunter@sopris.net) wrote:

Hi Charlie,

My 2 cents: the right answer is no development. Even 100% “affordable” would be wrong. All development leaves huge “externalities” for the greater community to have to deal with. Those costs are never covered by the developers. Whatever housing they would build means new people who need all the services all the rest of us require.

Developer makes a profit. Community pays for services forever. This is one big reason that towns are always chasing tax revenue. It is a vicious circle. But you probably knew that.

With climate change. The problems with I-70, water issues, and the virus; adding more population is a bad policy.

Land without buildings may be the most valuable thing a community can have. There is, I think, a big psychological plus with "vacant" land in a city. Could always be gardens and/or even a permaculture field.

Developers are not the friends of towns and cities.

Is there anybody that can create persuasive guidance for "no build" policies?

Best,

Pat

This letter is also sent to Ryan Muse: Ryan, Please include this letter to "BE IN THE PACKET" for the next City Council meeting September 7th, 2021

300 word limit Letters to Editors. 3 minute limit Public Comment time for City Planning & Zoning, County Board of Commissioners and Glenwood City Council. Once you have spoken, you cannot speak again at future meetings.

At the 8/19/21 City Council Meeting, it was brought up that City P&Z and many others had requested R2 Developers to provide "Story Poles" to illustrate visual impacts of their 480 Donegan project.

During Council Q&A session with Developers (Glenwood City Council, YouTube, 2021/08/19, at 3hr.10min.44sec.), Councilor Willman asked Developer, "Somebody mentioned Story Poles. Is there a reason you haven't done the Story Poles?"

Developer replied "Well what we actually did do is we did it's not on here it was on the original presentation but we went to a great length and expense to actually do a visual from those front porches because it was asked by P&Z we actually did a Google Map, and (?ANSI?) can describe the process but it's probably about as accurate as you can imagine of what you would actually be seeing across the street if you were looking outside of your window and so what we did is that which we think is the most accurate depiction of what that visual would be uhh looking from someone's house".

Fact Check: There are no "porches" across from 480 Donegan; the Google Map is looking more south/southeast away from Red Mountain and through the only opening into the development off of Donegan, not at the other 38 townhomes across from Donegan to the west/southwest.

PLEASE PLEASE City Council, before approval, require the Developer to put up Story Poles reflecting accurate building heights and have them "line out" the sidewalks/bike paths/setbacks/parking spaces

proposed on Donegan, Mel Ray and Storm King.

And then do a physical walkthrough in person with the neighborhood.

City Council Members,

Please consider postponing any decision in reference to the proposed West Glenwood Annexation and Development until the Updated Comprehensive Plan is adopted next year.

In the RFP the City is soliciting services from a planning firm to provide a full range of services to guide the city through the challenges facing us on planning related decisions. The RFP states:

***“As comprehensive plans are the backbone of any community planning effort, it is important that the Glenwood Springs Comprehensive plan be updated to meet the new on ongoing needs of the community.”***

Any major land use decisions made now before completing the work of updating the Comprehensive Plan clearly would not follow logically from the statement above. It would be non sequitur, absurd and confusing to grant approval of any major development in West Glenwood Springs without first adopting a new Comprehensive Plan. Things have changed, we have new principles to follow for the development of the Transit Oriented community needed to get people out of their cars, into affordable housing, within mixed use neighborhoods. The way we design our communities has changed; climate change is here. Any additional impact on infrastructure is critical. The need for planning has never been greater and the need for a wider range of stakeholders and public interest make for a difficult landscape. It is time to step back from the approval of this development and look at the broader context and potential effects on community and environment.

The updated Comprehensive Plan is scheduled by the city to be written and adopted in 2022. Let’s take a little time for the Comprehensive Planning process to work and communicate it to all constituents.

Sincerely,  
David Hauter

## **ANNEXATION AGREEMENT**

THIS ANNEXATION AGREEMENT made and entered into this \_\_\_\_ day of \_\_\_\_\_, 20\_\_ by and between the CITY OF GLENWOOD SPRINGS, COLORADO, a Colorado home-rule municipality (hereinafter “City”), GLENWOOD PARTNERSHIP LLLP, a Colorado limited liability limited partnership (“Owner”), and COMMERCIAL DEVELOPMENT SERVICES GROUP, LLC, a Delaware limited liability company (“CDSG”). Each of the City, Owner, and CDSG may be referred to as a Party, and all of the foregoing may be referred to hereinafter as the “Parties.”

### **WITNESSETH:**

WHEREAS, Owner is the owner of certain real property currently located in unincorporated Garfield County, Colorado, more particularly described on Exhibit A attached hereto and incorporated herein (the “Property”); and

WHEREAS, CDSG is under contract to purchase a portion of the Property and develop that portion as mixed-use, multi-family housing development; and

WHEREAS, the portion of the Property to be retained by Owner is currently developed for office and warehouse purposes; and

WHEREAS, Owner desires to annex the Property and connect it to the City of Glenwood Springs and has filed a Petition for Annexation (“Petition”) to do the same; and

WHEREAS, along with the Petition, Owner and CDSG submitted a zoning application for the Property asking that the City approve (i) Commercial (CO) zoning for Owner’s retained portion of the Property and (ii) Planned Unit Development (PUD) zoning for CDSG’s portion of the Property as more fully described in Exhibit B hereto; and

WHEREAS, on June 3, 2021, the City Council held a duly and properly noticed public hearing at which time the City Council adopted a resolution finding Owner’s Petition to be in substantial compliance with the statutory requirements for annexation of the Property to the City; and

WHEREAS, on July 29 and \_\_\_\_, 2021, the City Council held a duly and properly noticed annexation hearing at which time the City Council approved the annexation and zoning of the Property as set forth in Ordinance No. \_\_, Series 2021, and Ordinance No. \_\_, Series 2021; and

WHEREAS, C.R.S. §§31-12-101, *et seq.*, authorizes the City and Owner to enter into an Annexation Agreement; and

WHEREAS, the City and Owner desire to enter into this Agreement to set forth their agreements in writing concerning the terms and conditions of annexation of the Property to the City.

NOW, THEREFORE, for and in consideration of the mutual promises and covenants contained herein, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

1. **Purpose.** The purpose of this Agreement is to set forth the terms and conditions of the annexation of the Property to the City. Except as expressly provided for herein to the contrary, all conditions herein are in addition to any and all requirements concerning annexation contained in the Municipal Code of the City of Glenwood Springs (hereinafter “City Code”) or the Municipal Annexation Act of 1965, as amended, C.R.S. §§31-12-101, *et seq.* This Agreement is intended to provide a contractual relationship between the City and Owner to ensure compliance with the City Code, state statutes, and all terms and conditions set forth herein. This Agreement includes additional terms and conditions for the purposes of the Municipal Annexation Act.

2. **Annexation.** The annexation of the Property shall be in accordance with the Colorado Municipal Annexation Act of 1965, C.R.S. §§31-12-101, *et seq.*, as amended.

3. **Zoning.** The PUD Plan attached hereto as Exhibit B shall govern the development of that portion of the Property designated as “PUD” in the Plan. The remaining portion of the Property shall be zoned as Commercial (CO) and subject to the regulations set forth in the City’s Municipal Code. The City agrees that, upon annexation of the Property, the zoning of a portion of the Property as PUD and the remaining portion as Commercial (CO) would be consistent with the City’s Comprehensive Plan.

4. **Specific Conditions.** In consideration of the annexation of the Property, and in further consideration of the City providing municipal services to the Property, as hereinafter provided, the Parties agree that it is appropriate that the following payments, dedications and other exactions be made:

(a) CDSG or its successor or assign shall pay Fire and Emergency Services Impact Fees for the PUD portion of the Property in accordance with Section 070.040.030(g)(5) at the time of building permit for each phase of development. Said fees will be paid by Owner or its successor or assign on the Commercial (CO) portion of the Property if required at the time of any future development.

(b) CDSG or its successor or assign shall pay and the City shall accept fees in lieu of land dedication for the benefit of schools in the RE-I School District (the “District”) pursuant to Municipal Code Section 070.040.030(g)(4), or any amended version thereof in force and effect at the time of the final development permit approval for the PUD portion of the Property. Such fees shall be applicable to the number of units proposed for all residential phases scheduled for development and shall be payable upon the issuance of a building permit for a residential dwelling unit. No school land dedication or fee in lieu thereof will be required for the Commercial (CO) portion of the Property unless and until the Property is redeveloped as residential.

(c) CDSG or its successor or assign shall pay and the City shall accept fees in lieu of parkland dedication pursuant to Municipal Code Section 070.040.030(g)(2), or any amended version thereof in force and effect at the time of the final development permit approval for the PUD portion of the Property, subject to reductions: (i) for private

recreation facilities to be constructed on the PUD portion of the Property; (ii) for the design and installation of the northern bike lane along Donegan Road from the western edge of the Property east to Soccer Field Road; (iii) for the design and installation of the southern bike lane and wall (where necessary) along Donegan Road from the eastern boundary of the Property east to Soccer Field Road; and (iv) on any other basis approved by the City under Municipal Code Section 070.040.030(g)(2). No parkland dedication or a fee in lieu thereof will be required for the Commercial (CO) portion of the Property unless and until the Property is redeveloped for residential purposes.

(d) CDSG or its successor or assign shall pay all water tap fee and water system improvement fees required under Municipal Code Section 080.040.010(c) and Article 080.060, respectively, applicable to the development of the PUD portion of the Property. No water tap fees or water system improvement fees will be required for the Commercial (CO) portion of the Property unless and until additional water capacity is needed therefor. Should a change in use of any structure on any portion of the Property occur in the future that causes an increase in water usage, the owner of the structure will be required to pay the system improvement fee associated with the increased use in accordance with Municipal Code in effect at the time of the change in use.

(e) Owner agrees to pay all actual costs incurred for notice publication, recording fees, attorney fees and similar reasonable administrative charges related to the annexation of the Property.

5. **Affordable Housing.** CDSG shall deed restrict a minimum of 20 percent of the residential for rent units at 100 percent of area median income or 10 percent of the residential for rent units at 90 percent of area median income. A minimum of 20 percent of the total for rent residential units shall be resident occupied. The deed restricted unit mix shall be dispersed amongst the unit types and bedroom configurations.

CDSG shall construct a minimum of thirty-five (35) for sale units, all of which shall be resident occupied. Ten percent of the for-sale units constructed shall be deed restricted as to sale price. CDSG and the City shall negotiate the terms of said deed restriction and the financial contribution of the City as a part of the affordable housing deed-restriction agreement referenced below.

6. **Affordable Housing Agreement.** The Parties shall enter into an affordable housing deed-restriction agreement to be finalized and recorded at the earlier of (a) the closing of CDSG's purchase of the PUD portion of the Property or (b) issuance of the first building permit for the same.

7. **Dedication of Water Rights.** At or before the time of recordation of the final plat subdividing the Property as shown in the PUD Plan, Owner and/or CDSG, as appropriate, shall assign to the City, free and clear of all liens and encumbrances (subject only to the provisions of Section 8, below), all of Owner or CDSG's right, title, and interest in and to 614 shares of Reynolds & Cain Ditch Company stock (the "Shares") historically used on the undeveloped portion of the Property. By this conveyance, Owner and CDSG shall fully satisfy any and all water rights dedication requirements of the City for annexation and development of the Property as set forth in the Municipal Charter and Municipal Code and as approved by the City Council.

8. **Lease-Back of Water Rights.** As consideration for the Shares, the City hereby leases all of the water represented by the Shares to Owner and CDSG in the proportion mentioned in Section 7, above, for irrigation of the Property at the rate of \$1.00 per year. The City agrees to lease the Shares to Owner and CDSG until such time as the City may be required to use the Shares for another purpose. In the event the City can no longer lease the Shares to Owner and CDSG, the City will provide notice to Owner and CDSG thereof at least sixty (60) days prior to the termination of use of the Shares and will waive any tap or service improvement fees Owner and CDSG would otherwise be required to pay for increasing their use of City water as a result of losing use of the Shares.

9. **Resource Conservation.** CDSG shall revise the PUD landscaping to provide drought resistant xeriscaping and design all improvements to provide leading edge and best management practices for conservation, fixtures, and practices for the development. In addition, the development shall not use natural gas unless CDSG can demonstrate to the satisfaction of the City that it is the only alternative.

10. **Off-Site Improvements and Other Obligations.** As an element of the City's approval of (i) the Petition, (ii) the PUD zoning application, and (iii) acceptance of this Agreement, CDSG has agreed to design and, upon approval of the City Engineer, construct certain improvements to the surrounding street system, namely:

(a) Install a bike lane along the north and south sides of Donegan Road for the length of the Property and extending east to Soccer Field Road;

(b) Install parallel parking and a detached 6-foot sidewalk on the south side of Donegan Road and extend the sidewalk and related improvements east to Soccer Field Road;

(c) Stripe bike lanes on the east and west side of Storm King Road south of Center Drive.

(d) Widen the east side of Storm King Drive north of Center Drive to add a northbound bike lane, parallel parking, and a detached 6 foot wide sidewalk.

(e) Install an eastbound left turn lane and an eastbound acceleration lane from the southbound left turn lane at the State Highway 6 and Donegan Road intersection consistent with recommendation set forth in CDSG's traffic study.

(f) Install a five foot sidewalk to the west side of Melray Road between SH 6 & 24 and Donegan.

(g) CDSG shall either amend the PUD as is necessary to include not less than one acre of land for the future construction of a new fire station for the Glenwood Springs Fire Department or provide such land at a location acceptable to the City. Notwithstanding the foregoing, the land to be dedicated to the Fire Department may be less than one acre only to the extent that shared parking for the fire station is located on adjacent property. Said land shall be dedicated to the City.

(h) CDSG shall provide \$~~10~~40,000 to be used for emergency planning and ~~20%~~ ~~of the costs~~ to construct emergency access and egress improvements.

(i) Amend the development proposal as is necessary to include emergency access to Highway 6 through the parcel to the south.

(j) Amend the annexation map to include the annexation of Storm King to Donegan to Mel Ray ~~and Mel Ray from Donegan to 6 & 24.~~

(k) Provide an annexation map for Mel Ray from Donegan to 6 & 24 if on or before June 1, 2022 Garfield County can establish ownership of the ROW allowing the City to legally annex the ROW. In the event that the ROW cannot be annexed the improvements related Mel Ray shall not be required to be constructed however, CDSG shall pay to the City an amount equal to the engineers estimate of the cost of improvements.

~~(k)(l)~~ Reconstruction of the foregoing streets before acceptance by the City.

The improvements described in this Section 10 shall be completed prior to or contemporaneously with the issuance of a final and permanent certificate of occupancy for the first building to be constructed within the PUD portion of the Property. Parkland dedication fees required in connection with development of the PUD portion of the Property shall be reduced by the total actual costs incurred by CDSG to (i) engineer, design, and install the northern bike lane along Donegan Road from the western edge of the Property east to Soccer Field Road; (ii) engineer, design, and install the southern bike lane, sidewalk, and wall (where necessary) along Donegan Road from the eastern boundary of the Property east to Soccer Field Road.

In addition to the foregoing no issuance of a final and permanent certificate of occupancy for the first building to be constructed within the PUD portion of the Property shall be issued unless: 1) the emergency access described in (h) above has been constructed and is operational; 2) a new water tank serving North and West Glenwood has been constructed and is operational; and 3) a new West Glenwood Fire Station is substantially complete. The foregoing shall not be a condition precedent of issuance of a final and permanent certificate of occupancy for the first building to be constructed within the PUD portion of the Property unless the City has budgeted for the planning and completion of the emergency access improvements, water tank and West Glenwood Fire Station in the Fiscal Year 2022 and 2023 budgets.

11. **Phasing.** The development of the PUD portion of the Property~~Project~~ will be phased as shown on Exhibit C. Construction of Phase 2 cannot be commenced until there is an approved redevelopment plan for the West Glenwood Mall site to the south; provided, however, that the forgoing shall not be a condition precedent to construction of Phase 2 if the Mall redevelopment plan has not been submitted to the City within six (6) months but not approved within three(3) years from the commencement of construction of Phase 1.

12. **Vested Rights.** In order to allow Owner and CDSG a reasonable opportunity to develop the Property in accordance with this Agreement and the PUD Plan, the development rights and uses approved hereby shall, to the extent allowed by law, constitute a “site specific development plan” under C.R.S. §§24-68-101 *et seq.*, as amended. The site specific development plan shall be vested for a period of ten years beginning on the date the final plat subdividing the Property as shown in the PUD Plan is recorded (the “Vested Period”). The Property as to which rights have been vested shall be immune from changes in the City’s land use regulations for the duration of the Vested Period except as provided in this Section 12. Except in instances of force majeure, the requirements of federal or state law, cases of preemption or other superior jurisdictional

mandate, the City shall not initiate any zoning or land use action which would alter, impair, prevent, diminish, impose a moratorium on development, or otherwise unreasonably delay any of Owner's or CDSG's rights set forth in this Agreement or their plans for development or zoning, as approved by the City. Notwithstanding the foregoing, the establishment of vested property rights under this Agreement shall not prevent the City from enacting and enforcing regulations of general applicability (including, but not limited to, building, fire, plumbing, electrical and mechanical codes, including the preliminary plat and final plat subdivision requirements under the Municipal Code and other City ordinances), except where the approved plans for development of the Property or state or federal regulations provide otherwise, as all of such regulations exist on the date of this Agreement or may be enacted or amended after the date of this Agreement.

13. **Conditions Precedent.** Notwithstanding the date set forth in the introductory paragraph of this Agreement, annexation of the Property shall not be effective, and this Agreement shall not be in force, until:

(a) Final Approval has occurred, meaning the thirtieth day after the effective date of the latest of the motion, ordinance, and/or resolution by which the City Council approves (i) this Agreement; (ii) publication after final passage on second reading of the ordinance by which City Council approves the annexation of the Property; (iii) the zoning of the Property as PUD and Commercial (CO) as provided in Exhibit B; and (iv) subdivision and major site plan approval for the PUD portion of the Property consistent with Exhibit B; and

(b) The affordable housing agreement called for in Section 6 hereof has been approved by both the City and CDSG; and

(c) The annexation map has been recorded with the Garfield County Clerk & Recorder; and

(d) The Parties have executed and delivered this Agreement for recordation with the Garfield County Clerk & Recorder.

14. **Failure of Conditions.** Until all of the conditions set forth in subsection 13 above have been satisfied, this document shall constitute an offer by Owner and CDSG and the City to enter into this Agreement (notwithstanding the Parties' mutual execution and delivery of this document), and the annexation and zoning of the Property shall not be effective. Consequently, at any time before such conditions are satisfied, Owner may withdraw the Petition and Owner and/or CDSG may withdraw its offer to enter into this Agreement. If Owner withdraws the Petition or Owner and/or CDSG withdraw its offer to enter into this Agreement, or if final approval does not otherwise occur for any reason, then this Agreement shall be deemed void and of no force or effect, and the Property shall be deemed not annexed to the City. Owner and CDSG may exercise their rights under this Section 14 independently.

15. **Deannexation.** The provisions of this Agreement, as well as acceptable City zoning of the Property, are material considerations of Owner's agreement to annex the Property to the City. Therefore, in the event (a) the City fails to perform under the terms of this Agreement, or (b) Owner, CDSG, or both are unable to obtain, either before or after annexation proceedings are complete, Commercial (CO) and PUD zoning of the Property as described above and/or subdivision and/or development approval for development of the Property which they in their sole

discretion find acceptable, Owner, CDSG, and the City stipulate and agree, pursuant to C.R.S. §31-12-501, that it shall be in the best interest of the City that the Property (or a portion of thereof) be de-annexed from the City. In such event, the City agrees that it shall initiate de-annexation proceedings, and to take all steps necessary to effect the de-annexation. The City further acknowledges and agrees that de-annexation is not prohibited by the City Charter or Municipal Code and ordinances, and that the City will not amend its ordinances to preclude a de-annexation permitted hereunder. The Parties' right to de-annex shall be in addition to any other rights available to them at law or under this Agreement. Upon the de-annexation of the Property (or portion thereof) from the municipal boundaries and specific jurisdiction of the City, the City agrees that it shall convey, assign, transfer and quitclaim to Owner or their successors and assigns, any and all water rights (the public dedication of which is more fully described by Section 6 hereof) previously dedicated by Owner hereunder to the City for the public use and benefit.

16. **Assignment.** The parties agree and acknowledge that the rights and obligations of Owner and CDSG under this Agreement may be assigned by them to persons or entities acquiring title to the Property or a portion thereof without the prior consent of the City if, and only if, such assignee agrees in writing to be bound by the terms and conditions of this Agreement, and the Owner or CDSG, as applicable, shall give notice to the City of any such conveyance, together with the assignee's written agreement to be bound by the terms and conditions of this Agreement.

17. **Waiver of Defects.** In executing this Agreement, Owner and CDSG waive all objections either may have concerning defects, if any, in the formalities whereby it is executed, or concerning the power of the City to impose conditions on Owner or CDSG as set forth herein, and concerning the procedure, substance and form of the ordinances or resolutions adopting this Agreement.

18. **Final Agreement.** This Agreement supersedes and controls all prior written and oral agreements and representations relating to the annexation of the Property to the City, and is the total integrated agreement between the City, Owner, and CDSG.

19. **Modifications.** This Agreement shall not be amended except by subsequent written agreement between the Parties hereto.

20. **Release of Liability.** It is expressly understood that the City cannot legally be bound by the representations of any of its officers or agents or their designees except in accordance with the City Code, City ordinances and the laws of the State of Colorado. Owner and CDSG, when dealing with the City, act at their own risk as to any representation or undertaking by the City officers, agents or their designees which is subsequently held unlawful by a court of law.

21. **Captions.** The captions in this Agreement are inserted only for convenience and in no way define, limit, or prescribe the scope or intent of this Agreement or any part thereof.

22. **Binding Effect.** This Agreement shall be binding upon and inure to the benefit of the Parties hereto and their respective heirs, successors, and assigns.

23. **Severability.** If any provision(s) of this Agreement shall be determined to be void or invalid by a court of competent jurisdiction, then such determination shall not affect any other

provision hereof, all of which other provisions shall remain in full force and effect. It is the intention of the parties hereto that, if any provision of this Agreement is capable of two constructions, one of which would render the provision void, and the other of which would render the provision valid, then the provision shall have the meaning that renders it valid.

24. **Governing Law.** The laws of the State of Colorado shall govern the validity, performance, and enforcement of this Agreement. Should either party institute legal suit or action for enforcement of any obligation contained herein, it is agreed that the venue of such suit or action shall be in Garfield County, Colorado.

25. **Attorneys' Fees; Survival.** Should this Agreement become the subject of litigation between the City and Owner or CDSG, the prevailing party shall be entitled to attorneys' fees and costs of suit actually incurred, including expert witness fees. All rights concerning remedies and/or attorneys' fees shall survive any termination of this Agreement.

26. **Gender.** Whenever the context shall require, the singular number shall include the plural, the plural the singular, and the use of any gender shall be applicable to all genders.

27. **Counterparts.** This Agreement may be executed in counterparts, each of which shall be deemed an original and all of which, when taken together, shall be deemed one and the same instrument.

28. **Notice.** All notices required under this Agreement shall be in writing and shall be hand-delivered or sent by first class mail postage prepaid, to the addresses of the parties set forth herein. All notices by hand delivery shall be effective upon receipt. All notices by mail shall be considered effective seventy-two (72) hours after deposit in the United States Mail with the proper address as set forth below. Either party by notice so given may change the address to which future notices may be sent.

Re: Annexation of a 15.818-acre parcel into the municipal limits of the City of Glenwood Springs and Initial Zoning/Rezoning of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

As stated in my first letter on this subject, I believe that there are a number of reasons to oppose the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and the 12.285-acre PUD proposal that's currently under contract with R2 Partnership LLC

I would like to focus on low-income/affordable housing. I think we all, including possibly council members, would like some clarification on the intentions of the developers regarding the type of housing planned. The project has been referred to as low-income housing but in an article in the Aspen Daily News and perhaps at other times that I'm not aware of, the developer is quoted as saying this would provide housing for middle-income families? Which is it? And a more important question for Council to consider is this. What does our town most need at this time?

A rent/work calculator (See attachment.) looks at maximum affordable monthly rent based on # of hrs worked/week and pay/hour and might be helpful as the Council attempts to answer the question of current housing needs. With all the recent building, what is the availability of affordable housing for local firefighters, police officers, teachers, health care workers, restaurant wait staff, etc. Consider 30% of income towards rent as the "standard" and then let's see what affordable housing for the different pay grades might really look like. An example follows.

The following figures are from The City of GS Salary Grade Plan Effective 1/1/2020 -

Regular Full-Time Non Exempt. I understand that these figures may be higher for 2021 but they give us an idea of what a beginning employee for GSPD might be able to afford to live in the town that he or she works in.

|                                     |         |         |         |
|-------------------------------------|---------|---------|---------|
| 50 2108 POLICE CADET - TRAINEE      | 23.9178 | 28.7212 | 33.5245 |
| 50 2110 POLICE ADMIN ASSISTANT II   | 23.9178 | 28.7212 | 33.5245 |
| max affordable rent (30% of income) | \$1200  |         | \$1450  |

\$1550+

$(\$24 \times 40 \text{ hrs} = 960 \times 4.2 \text{ wks/mo} = \$4032 \times 30\% = \$1209 \text{ for rent})$

According to Indeed Salaries, a restaurant server makes an average of \$11.87 per hour. See [www.indeed.com/hire/job-description/restaurant-server](http://www.indeed.com/hire/job-description/restaurant-server). This amount is roughly half of the police trainee salary in the example above so we might assume that a restaurant server working 40 hours/week could afford \$600/month in rent. This precludes the fact that that individual might have a spouse, partner and/or roommate(s) sharing the expenses of an apartment to help pay rent. Or that person might take on a second job.

Nevertheless, my point is that we all need to be looking at solutions for providing housing to those workers who support our city's welfare and well being as well as supporting this economy of ours that is based largely on tourism. There used to be a housing fund that local realtors contributed to for grants to new homebuyers. Is that still in place? There are other options to consider such as Habitat for Humanity with the motto, Giving a Hand Up, Not A Handout.

Again, this housing issue is only one of many issues that the current annexation proposal has raised. You have read in emails or heard from your constituents at Council meetings a myriad of concerns. We want you to be able to look at solutions to problems with the most up to date information available. The bottom line is that our Comprehensive Plan and Master Plan need to be updated with current and future needs of the citizens of Glenwood Spring in mind. Should you vote to approve this proposal now? The answer is no, not until the Comprehensive Plan and Master Plan have both been updated.

Thank you for your consideration.

## Maximum Affordable Monthly Rent

| Hours/week→<br>Pay/hour↓ | 20    | 25    | 30      | 35      | 40      | 45      |
|--------------------------|-------|-------|---------|---------|---------|---------|
| \$8                      | \$200 | \$250 | \$300   | \$350   | \$400   | \$450   |
| \$9                      | \$225 | \$281 | \$338   | \$394   | \$450   | \$506   |
| \$10                     | \$250 | \$313 | \$375   | \$438   | \$500   | \$563   |
| \$11                     | \$275 | \$344 | \$413   | \$481   | \$550   | \$619   |
| \$12                     | \$300 | \$375 | \$450   | \$525   | \$600   | \$675   |
| \$13                     | \$325 | \$406 | \$488   | \$569   | \$650   | \$731   |
| \$14                     | \$350 | \$438 | \$525   | \$613   | \$700   | \$788   |
| \$15                     | \$375 | \$469 | \$563   | \$656   | \$750   | \$844   |
| \$16                     | \$400 | \$500 | \$600   | \$700   | \$800   | \$900   |
| \$17                     | \$425 | \$531 | \$638   | \$744   | \$850   | \$956   |
| \$18                     | \$450 | \$563 | \$675   | \$788   | \$900   | \$1,013 |
| \$19                     | \$475 | \$594 | \$713   | \$831   | \$950   | \$1,069 |
| \$20                     | \$500 | \$625 | \$750   | \$875   | \$1,000 | \$1,125 |
| \$21                     | \$525 | \$656 | \$788   | \$919   | \$1,050 | \$1,181 |
| \$22                     | \$550 | \$688 | \$825   | \$963   | \$1,100 | \$1,238 |
| \$23                     | \$575 | \$719 | \$863   | \$1,006 | \$1,150 | \$1,294 |
| \$24                     | \$600 | \$750 | \$900   | \$1,050 | \$1,200 | \$1,350 |
| \$25                     | \$625 | \$781 | \$938   | \$1,094 | \$1,250 | \$1,406 |
| \$26                     | \$650 | \$813 | \$975   | \$1,138 | \$1,300 | \$1,463 |
| \$27                     | \$675 | \$844 | \$1,013 | \$1,181 | \$1,350 | \$1,519 |
| \$28                     | \$700 | \$875 | \$1,050 | \$1,225 | \$1,400 | \$1,575 |
| \$29                     | \$725 | \$906 | \$1,088 | \$1,269 | \$1,450 | \$1,631 |
| \$30                     | \$750 | \$938 | \$1,125 | \$1,313 | \$1,500 | \$1,688 |

How to read the table: Find your hourly rate down the column on the left and your weekly hours across the top. Then find your maximum affordable rent at the intersection.

For example, if you get paid \$20/hr. and work 35 hours a week, then your max. rent is \$875.

Calculation: Hours x Hourly Rate x 50 Weeks = Monthly Rent  
 35 x \$20 x 50 = \$3,500  
 \$3,500 ÷ 4 = \$875

I had originally sent an email opposing this project during the initial stages. I assumed that when Planning & Zoning rejected this development, that the City Council would follow suit and not allow this to happen.

WRONG! Money, bargaining chips, and I will scratch your back, if you will scratch mine, seems to be the order of the day now.

I am very opposed to this development due to the various reasons that most of the West Glenwood residents and others have stated over and over again. I live behind the Two Rivers Community School and am always in the thick of the traffic, especially when school begins and lets out. There is traffic congestion every single day on Storm King Road, Hwy 6 & 24, Donegan Road, and the Roundabout area, let alone during a closure or evacuation. I have lived over here through both the Storm King fire and the Coal Seam Fire and thought I would probably burn up trying to get out of West Glenwood. Things have not improved much at all since then.

We do not have enough law enforcement, fire fighting personnel, water, parking, pedestrian and bike traffic, etc., to accommodate the density of this housing project. I would think it would be obvious to the Council that the community does not want this area to develop with the proposal at hand, as there were over 1700 signers on the petition.

City Council was elected to have the community's best interest in their decision-making. Please listen to our citizens and make the right decision. NO TO ANNEXATION AND THIS DEVELOPMENT!

Thank you for your time and consideration. Please include in the packet for tonight's meeting if still possible.

Re: Development of West Glenwood Pasture by R2 Developers

**I request that my email be included in the City Council agenda packet for Thursday, August 19<sup>th</sup>.**

I have concerns regarding the affordability, and also the mis-representation, of the proposed housing at the West Glenwood Pasture by R2 Developers.

The proposed development started with a description of **low-income** housing and as of the July 29<sup>th</sup> meeting it was described by R2, the developer, as **middle-income** housing. The proposed cost of that housing, when described as low income, is way higher than what a low income family could afford in Glenwood Springs. Now, described as middle income housing, the same is true. It is not priced affordably for low- or middle-income families. Do the math – the developer has lowered the number of housing units therefore they are higher priced in order to retain his profits.

The developer also mentioned that pedestrian/bike traffic along Donegan Road has only one way out of danger – the Reynolds and Cain Ditch. In 38 years living in West Glenwood, travelling Donegan Road almost daily, I have never seen a pedestrian or biker dive for the ditch. In fact, what I have witnessed is all traffic, including motor vehicles, being equally polite to allow safe passage through our lovely rural neighborhood.

He mentions using the Reynolds and Cain Ditch rights to water landscaping. The pasture's rights are not senior so it's not realistic to believe there will be enough water to keep landscaping green. I have seen very low water levels in that ditch from year to year and with climate change this is of concern. It will not likely get better.

I hope you see these statements from the developer as the typical sales maneuvers that they are.

I hope that each of you, our City Council members, see your own Council legacy as one that provides a benefit for our entire community. Community includes those who already live here - seniors, families, dogs, kids with kites, tourists and even each of you. More concrete structures, overcrowding, and our already existing safety issues are a very poor legacy. Do we really need to provide more housing for more people?

Please consider this: **At some point continuing to build, and also protect your friends and neighbors' quality of life, the very reason for your jobs, are mutually exclusive. That time is here.**

Just got home to West Glenwood. We are so fortunate to live here. It is friendly, family oriented, and the sunniest place in town. R2 development, from Cincinnati, wants to build some 330 unaffordable units in West Glenwood, behind the mall. This will destroy us. They have lawyers, architects, traffic engineers, and even a PR lady. She says this massive development will bring "A new future to a blighted area." Wow! Thanks for the info. How about the traffic nightmares. What about our small town character. How about our safety, our welfare, and quality of life. Do they plan on 4 laneing Melray, Donegan, and storming road? Will the roundabouts be widened so we can escape the next fire. It is just money to them. It is our home and our future for us. Please join us on Facebook at West Glenwood pasture development and on Thursday, August 19, for Glenwood Springs city council meeting on annexation. Michael Hoban, West Glenwood

August 11, 2021

Dear Ms Wanatowicz:

Your recent appeal on Instagram for investors in the 480 Donegan Project -- "...a new future for a blighted area" is how you portrayed it -- interested me. As a resident as well as a business owner in West Glenwood, I was offended, but not entirely surprised, to see my community described as "blighted." A pasture hardly qualifies as blight, nor do the unpretentious older homes and small businesses in the neighborhood. The Mall, yes -- but the Mall is not part of the 480 Donegan project. Then I realized you're probably thinking of the mobile home parks in the area -- not because they *are* blighted, but because, I suspect, they embody your very definition of blight.

There are at least 8 mobile home parks in West Glenwood, and they represent the only truly affordable housing in the entire region for a diverse and contributing segment of the greater community. I'm one of those trailer owners, living here since 2003. To avoid speaking for others, let me tell you what this housing option has meant for me. My partner and I bought our trailer when we decided to lease the space on Highway 6 & 24 to start our business. We needed to be close enough to walk to work, knowing how frequently weather and accidents close roads here. Our business was our investment; our 20 year old trailer was for living. Its affordability let us put our limited financial resources into the new business. High Tails has been a valued community resource ever since, surviving the great recession and my partner's illness and death. During the lock-down phase of the pandemic, we continued to serve our neighbors as an essential business, and to provide employment during a hard time. Over the years, the trailer parks in West Glenwood have been home to many of our customers and employees. There is no other "affordable" housing within a hundred miles where we would have been able to live and do what we do. If there were more such housing, we would not have lost so many good employees over the years who couldn't find a place they could afford to live.

The residents of these mobile home parks are a diverse group, but one thing many of us have in common is a way of looking at our homes, our living situations, not primarily as real estate, but as homes for living that enable us to do what gives our lives meaning. We are trades-people, social workers, teachers, contractors, small business owners. We feel lucky to be part of this community, whether as singles, couples, families or retirees. We value the combination of conviviality, comfort and frugality that this type of housing affords. Many of us work in fields that don't pay a lot of money, but we enjoy what we do and are content. And we've turned these parks into stable, friendly neighborhoods.

There is a place for developments like the 480 Donegan Project, and there are certainly people who would like living there. Most would be short-termers, looking at tenancy as a temporary living situation. They'd be working middle-income jobs, or starting out in a profession. I would never denigrate their priorities or what they bring to a community. But not everyone would choose to live that way, even if they could afford to. I could not afford to, nor would I choose to. The breadth of human diversity that enriches everyone encompasses more than racial, ethnic and socio-economic differences.

So while the city and county have shown West Glenwood decades of benign neglect, its residents and businesses have managed to forge a kind of tolerant appreciation for each other. We don't crave the kind of cookie-cutter development R2 wants to sell us. We're an independent lot, not into enforcing a bland, uniform, lowest-common-denominator-of-taste aesthetic. We're the kind of community where working people can have their work trucks and equipment in plain sight. Sure, we'd

like better roads, an adequate fire station, maybe sidewalks. We need serious emergency evacuation and sheltering-in-place planning and infrastructure, but we like our neighborhoods as idiosyncratically diverse as they are, and aren't too proud to include trailer parks. Although we're happy enough with the pasture, we'd love a park with some shared garden space; but our priorities have been shaped by recent experience with wildfires. Some new life injected into the Mall would be welcome, but not if it comes at a price of basic safety..

Maybe R2 isn't aware, but in Colorado, over 100,000 people live in trailer parks. They are the largest type of unsubsidized affordable housing, by far, in Colorado. Since passage last year of 2 new laws respecting their economic importance, maybe this is a ripe field for some new kinds of community investment or public/private partnerships. Consider how tax and zoning changes could facilitate a renaissance in this and other types of housing, like adu rental units. I know that isn't the kind of development R2 does, but there are better locations for their kind of project in the valley. Places where, just for example, emergency planning would present fewer intractable challenges.

To Glenwood Springs City Council:

The city of Glenwood Springs is at a turning point with the decision you make on the West Glenwood housing project. Understanding that housing is a critical issue, this proposal does nothing to address the real problem. While this project may be part of the solution in the future, voting to annex this property and allowing this project to be built is premature before other areas of concern are addressed first. Until essential infrastructure upgrades are completed, and a legitimate evacuation plan is implemented, proceeding with this project is a recipe for disaster. I have seen a lot of changes in the more than 60 years I have lived in Glenwood, some good, and some bad, but I know that your decision on whether this project proceeds is a heavy burden that will directly impact us West Glenwood residents for the rest of our lives.

From my firsthand experience, evacuating for the Coal Seam fire was complete chaos. There was no evacuation plan. My wife and I reside at 200 Cedar Crest Drive, and it took us 2 hours to get to North Glenwood, after first being routed east on Donegan, then back west toward the fire on Hwy 6, and finally onto 170 where we sat in stopped traffic as the fire burned directly across the river from us. It was a complete cluster, and we were all lucky that no one died. Even without this proposed project, we already have all the additional vehicles from Six Canyons that are sure to compound our paths to safety. By adding additional traffic with no new solution in place, evacuating West Glenwood will become deadly.

The small-town character of Glenwood has passed for the fulltime residents. We are now a bedroom community for Aspen. The tight housing market was pinched tighter by the city's allowance of VRBOs that turned neighborhoods

into motels, so that ship has already sailed. Adding more sardines to a can that's already full will ruin the little we have left. South Bridge and city infrastructure need to be the priority for your residents. Tourism is necessary and wanted, but please consider the needs of current residents first. The addition of a new fire station may certainly be needed, but the lure of free land or 20% cost sharing is not worth the other costs to the city. The additional load to streets, parks, water, electric, police, and fire departments is sure to impact the already understaffed departments and city budgets.

I ask you to please take a moment and try to solve some of the concerns and problems we have before new ones are created for the betterment of all of us.

Sincerely,

Gregg Velasquez

Please include my letter in the City Council packet for August 19.

This proposal calls for too high a density for this area.

Whenever I-70 is closed for wildfires, accidents, mudslides we have gridlock in west Glenwood Springs and sometimes

the bridge in town is also affected. Adding another 900 vehicles/day to this is a safety issue.

It doesn't make sense to me that the city considers the south bridge project a safety issue but doesn't address safety when adding such density to the other side of town.

Traffic and gridlock will be a nightmare.

We need a fire evacuation plan in place before any more building is planned.

Another question is does Glenwood Springs have the infrastructure to handle more development?

Think about climate change. Water is getting more scarce.

How much additional building can we absorb?

The comprehensive plan need to be updated first.

Dear Council members,

I am a resident of Glenwood Springs. I was virtually present at the council meeting last Thursday, when this project was discussed. I too feel strongly that this development is not feasible.

A valley this small and narrow is not able to add more housing without compromising the safety of the residents. There are not enough escape routes to handle the current residents in case of an emergency.

I can see from my house on Traver Trail how traffic stands still on Wulfson, Midland and I 70 due to fire, flood and accidents.

We are experiencing daily how crucial it is to have our interstates and highways open for people to be able to come and go, and also, how often this is impossible. Closures have become the norm.

In addition to not enough ways to leave the city, I am also concerned about the placement of the roundabouts. In my experience, the roundabouts do not work smoothly in heavy traffic or with large trucks. All of us on the north side of the Colorado River need to go through one of the two roundabouts to access either highway.

I have seen how one semi brings all traffic to a halt while it enters and leaves the roundabout. If traffic were to back up in the short distance from the roundabout to the on ramp, cars would wait in the roundabout, blocking all vehicles. We also have the many large trucks servicing the RMI mine.

The city has already added the high rise between Donagan and Hwy 6, and the 3 developments at the Meadows. Our roads and roundabouts can't handle the addition of an estimated 1,000 more vehicles.

The majority of commuter traffic drives up valley each day to work. These commuters would add to the heavy traffic passing through Glenwood each morning and evening.

While I agree that housing is important, we must find reliable roadways that can handle the current residents in an emergency, before we add another housing unit.

Please choose safety.

Subject: Annexation, Rezoning and Development of 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz and Development of 480 Donegan Road by R2 Partnership. Please include this in the city council packet for the next meeting on this project.

Dear City Counsel,

First, I would like to thank your time and efforts in serving. Balancing short term needs and requests

with the long term well being of a community, is a difficult job. I have a few comments concerning the West Glenwood proposal currently being considered.

1. Affordable housing is a common problem in resort communities as well as many urban areas in the country. While it needs to be continually addressed, when considering growth, it should be partly addressed, by providing space available for businesses to provide employment within the community. Removing commercial zoned property from the comprehensive plan limits the future of the entire community.
2. The Aspen times recently stated the valley is in need of 2000 units for employees in the valley. Do we know what percentage of those 2000 units would provide housing for people actually working in Glenwood? Evolving into a bedroom community for up valley is not scenario most Glenwood residents are looking for.
3. If the need is housing for up valley workers, there isn't a worse place in Glenwood to put this kind of density from a traffic movement perspective. The up valley workers would need to travel the entire length of the town twice a day into and out of a dead end, bottle neck situation. Is Midland being considered, as a bypass, for the additional traffic associated with this type of density?

I would encourage you to say no the current proposal.

Thank you for your time and attention in this matter.

Kind Regards,

Steve Boat

Subject: Annexation, Rezoning and Development of 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz and Development of 480 Donegan Road by R2 Partnership. Please include this in the city council packet for the next meeting on this project.

How many high-density housing units have been approved for the City of Glenwood Springs in the recent past? Over 1000? How many single-family

homes have been built or vacant lots approved in the recent past? 0? What is the addition of all of these high-density units and no low-density housing doing to our community? I don't believe the continual addition of only high-density housing to our community is meeting our goals of livability and small-town character. It feels like anything that is advertised as affordable housing gets approved by the City, even though they are not actually affordable, they are not actually housing employees working in Glenwood Springs and they are not meeting our goals of livability and small-town character. These high-density housing projects are not bringing families to our community that stay here for generations. Since these high-density units are not required to be occupied by Glenwood Springs based business employees, they are likely providing housing for up-valley workers, which is helping solve up-valley housing problems but not helping Glenwood Springs workers. By providing housing for up-valley workers, we are changing our community from small-town to urban and allowing the up-valley communities to maintain their small-town character. We are becoming a bedroom community for up-valley. I think we should be our own community, not someone else's bedroom community.

Drastically changing the zoning on a piece of property is not fair to the community and nearby homeowners who have relied on a property's zoning to determine if the neighborhood is livable in the future, only to have that changed in a moment.

Other problems with this proposal: emergency evacuation, daily traffic impacts, lack of open space, excessive building height, impacts on our schools, lack of parking, drain on city services and infrastructures... This project will aggravate all of our current problems.

What if this proposal was in your neighborhood? It might be easy for you to make this type of decision when it isn't in your backyard but please consider how it will affect this neighborhood. What would you do, how would you feel, if it was in your backyard?

Thank you for your time and consideration.

This is Jean Smith and I live on Mel Rey. My street is simply too narrow to include a sidewalk without taking my property parking. Also my highest utility is the West Glenwood sanitation bill and I understand that has not been taken and consider ration. Also pictured were four-story buildings directly behind me at the south end of the property. That would be immense. Clearly two stories taller than my building. Way out of context for the whole neighborhood. This project is simply too dense and too huge for West Glenwood. Thank you

4728 County Road 154

Glenwood Springs, Co. 81601

Community Development Department

Members of the City Council,

I am a 60 year resident of Glenwood Springs. I recently bought a townhouse close to the proposed 214 Center Drive development and plan to move in within a year. While there have been many changes in Glenwood since I moved here, Glenwood is still a desirable place to live. I think we need to take a hard look now to see what the future Glenwood will look like. I feel that the annexation and the proposed build out of this property is totally inappropriate for the long term good of Glenwood. I think that we are building too many apartments for the city population and many of the occupants of these apartments are not invested in their neighborhood or the city. We are housing the up valley work force. We need more places for families to move into a first time house and to reap the benefits of home ownership. All of the things that people are against in any development are doubly true for this monstrous development. The increased traffic; noise and light pollution; school, road, infrastructure impact; and water and sewer issues are all negative reasons to question this development.

The existing roads in the area are totally inadequate for increased traffic. This includes Donegan and Mel Ray Roads. Safe pedestrian and bike infrastructure along both of these roads needs to be included. The increased density from 4-5 units/acre to 29/acre is very inconsistent with the surrounding Western Hills subdivision area. The abrupt change between single unit residential to a four story building is stark. I agree with the Garfield County Community Development Director that a transition density should be considered consisting of townhouses, duplexes and single family houses. The other part of the development should be decreased to 3 stories and moved closer to the mall to preserve site lines of the existing homes. As always, parking will be an issue and it needs to be determined that each unit needs a minimum of 2 parking spaces. A three bedroom unit could have up to 6 drivers living in it. There should be no parking along any of the streets.

Because Glenwood is looking to increase its sewer and water rates a total of over 100% in the next 10 years, I feel that adding 1000+ residents is a slap in the face to the citizens who have been saddled with providing the services. We are looking at potential water issues from the fire

and adding more demands is inappropriate. The developer will come to the city and ask for reduced impact fees for roads, schools, water, etc., etc. They always do and it's always granted. I think most of us are tired of that.

There was a recent study done on the potential for lives and structures lost unless the South Glenwood bridge was built. I don't think a study even needs to be done for this subdivision because there will be a stark increase in potential loss of life and property from fires if this annexation and development is allowed as envisioned. I have seen nothing that has been discussed about improved evacuation of the entire West Glenwood area.

While I believe that eventually this development will be passed, I hope that the county's recommendations and citizens input will be considered and a much lower density with a variety of housing units will be seen as more appropriate for the neighborhood and city.

Thank you,

A handwritten signature in cursive script that reads "Cindy Ryman". The signature is written in black ink and is positioned below the "Thank you," text.

Cindy Ryman

**To:** <[trent.hyatt@cogs.us](mailto:trent.hyatt@cogs.us)>

Dear Mr. Hyatt,

I am writing in opposition to the proposed development located in the pasture behind the Glenwood Springs Mall.

Glenwood has always been a small city with a balanced mix of single family homes, townhomes and condominiums, and apartments. Glenwood is known for it's small town atmosphere and I fear we are now in danger of losing that .The enormous size of this proposal threatens to change forever the atmosphere of our town. Along with the other large apartment projects recently approved, I see us becoming a bedroom community for up valley workers and fear we are at risk of losing the reasons we all came here in the first place. The Western Slope is desirable to developers and we residents rely on our elected officials to protect our community by acting as a check on uncontrolled growth.

I also believe approving this development is a slap in the face to the residents of West Glenwood , especially those living north of Donegan Road ,as this will change what has been a family area to a high density area having more in common with the large front range communities than the small western slope town we all love.  
I think the local residents deserve better.

We have been evacuated twice during our time here and I agree with the comments and concerns that if we have a fire or other emergency, Donegan, Mel Rey and the other roads in this area can't handle the projected traffic safely. Last summer , a small fire in South Canyon created chaos in West Glenwood. If this development is approved, such chaos will become a common event. This situation could quickly become more than just an inconvenience. We could actually face a dangerous situation in case of fire or other emergency..

Also, West Glenwood lacks amenities such as a grocery store, coffee shops, parks, and open space that are necessary for a large concentrated population.The entire Glenwood community doesn't have the infrastructure to support such a massive influx of new residents. Good planning should seek to avoid the necessity of reliance on automobiles and encourage pedestrian use. A development of this size will create many auto trips per day for routine services that are not available nearby.

I am also concerned about our future water needs as climate change continues to impact us all.

I realize that this area will not remain a pasture forever, although I and many others believe leaving the pasture as a park or open space would be a good idea. I am asking that the city not approve this project and instead look for alternatives that may result in a smart development that will complement and not destroy our neighborhood..

James Conway

**Subject:** West Glenwood pasture development

Hello. My name is Michael Hoban and I have been a resident of Glenwood Springs for over 50 years. I would like to state a few reasons why we sincerely believe this project should not be annexed into the city. It would be like dropping a bomb onto West Glenwood. Our infrastructure is completely unable to handle this project. Our roads are totally inadequate. Schools, the grocery store, the clinic, the hospital etc. would be overwhelmed. The scary part is the safety issue with fire. Last summer was total gridlock due to the fire in South Canyon. Our only escape was either to run or ride a bike. The South Canyon fire and The coal seam fire we're terrifyingly close to our homes. We had to be evacuated and were close even then, to not be able to escape.

We have other important and useful projects for those 12.3 acres. A senior center and a small amount of senior housing. A new fire station. Baseball field. Soccer. It is also a great place to grow food. We love West Glenwood dearly and we refuse to let our part of town be destroyed. Please Deny the applicants annexation. Thank you, Michael Hoban.  
Sent from my iPad

this is for the Aug 5th, 2021

To: Trent Hyatt, city planner /o debra Figueroa #cc packet 215 Center Drive  
annexation

- If what is now a simple Pasture is built out to stated numbers .. the Project would represent approx 10 % of Glenwood's entire population .. A small "city " within 12,000 acres.

West Glenwood is a typical mountain /rural community with a proud and varied history . This is not Denver . What surrounds these acres ? A quiet neighborhood with the imperiled Mitchell Creek drainage flowing through it ..just a short distance upstream , is a fish hatchery . Storm King mountain and the Canyons define our history and touch our daily lives with their power. Here, in the Mountain West, Mountains , canyons and streams set the rules of what can be done . They must be respected .

- City could choose to pause .. to plan better , to look at the big picture . The Old Glenwood Mall in under proposal . There should be a master plan for both . Glenwood must not lose its wonderful identity , it must remain .. a special place. And a place that working people call their home .

To provide publicly assessable Parkland for this area does NOT preclude the Diemosz family parcel from being developed.

The Pasture area simply represents what is beautiful about the natural world. Places like this are endangered.

They are necessary .

Parklands could provide the relief of SHADE instead of more concrete. West G needs a buffer between the residents , the blazing Sun , Wildfire and Storms that blow in on powerful Western Winds.

- Dedicated School land is also needed for existing schools.

The only public park around is Gregory Park , (funded by Great Outdoors CO ):It has ONE small public shelter. The Two Rivers school, many times seek out the Park for Shade. Children deserve more than hot concrete.

- Based on the density of this Project city code would determine what the size of this parkland would be.

[Aprox 6 acres parkland / + 4 acres school land = total 10 acres of dedication out of the existing parcel. ]

- Before continuing to allow multilevel buildings of any size , residents should feel confident that infrastructure is in place . The city will be in obligated to mitigate the costs imposed by Big development. Water is scarce , fire fighting response very expensive . Pavement is cheap . What arrangements would benefit Glenwood the greater ? With big projects, come escalating costs to everyone and everything involved.

We are very skeptical that there will be adequate 1.) fire fighting capability as well as 2) reliable city water supply +including irrigated water . When the steams run low or are turbid from rain , fish cannot breathe . They die. It is clear that finite resources need protection , not exploitation.

- Mike Samson commented at a recent meeting . No dissension came from his other two board members.. he said that he supports a "...coalition of groups, organizations, governments that could come together and work with the Diemoz family to make that a more beneficial area to the people that already live there...he would even be in favor as a County Commissioner to be part of that.

\*\*\*\*\*

At a nearby school , there is a very small , tucked away plot with a few volunteer , straggly trees .. children built a natural area , touchingly simple. They keep it tidy . It has a "comfortable" rock under a shade tree . painted with letters on the seat that say " sit here".

City council, would you pause and think what kind of city you will plan around their future. We ask for you to " Do the right things" . . They , as well as you deserve time to consider a sustainable future.

Sincerely, Britta Meriwether  
152 Orchard Lane  
GWS, CO 81601

## PETITION: KEEP GLENWOOD SAFE – STOP THE OVERDEVELOPMENT

The undersigned residents urge Glenwood Springs City Council to stop the overdevelopment of Glenwood Springs and to advocate for smart growth practices. Glenwood Springs is being destroyed by the addition of large multi-family developments and endangering the safety of **ALL** of its residents. In the last three years 800 multi-family units have been built or approved and all but 29 of those are for rental.

We ask that you reject the current petition for annexation and the subsequent development by R2 Partnership of Cincinnati to build 360 units on the 12.285-acre plot of land behind the West Glenwood Mall. If this is approved it will add 1100 rental tenants (a population increase of 10% in one small plot of land) and their vehicles. We urge you to see that West Glenwood is incapable of handling a development of this density with major concerns over safe evacuation when another fire, flood or rockslide occurs as well as inadequate infrastructure, density five times the size of the adjacent community, traffic congestion, pollution and over-priced rentals. During the last two wildfires our roads were gridlocked and lives could easily have been lost.

As a follow on to our previous emailed comments (already included in last week's packet) we have some more comments to add.

1. All along R2 has been quoted as talking about "providing affordable housing" and the fact that there is "such a demand for affordability in this market", yet we noticed at the City Council meeting on 29 July for the first time R2 referred to this development "to provide middle-income housing" (YouTube video mark 53 minutes). Maybe this development isn't going to meet a need for people to live closer to their workplace at all because many families rely on two or three jobs just to live anywhere in the valley yet alone live in Glenwood Springs.
2. That being said it would be good to have clarity on the rental prices and square footage for microunits, 1, 2 and 3 bedroom units and the asking price for the 35 townhomes "they will attempt to sell".
3. Despite the reduction of 28 units we want to reiterate that this development will be EIGHT times the density of the neighborhood to the north of the property. There is NO WHERE in Glenwood Springs where you have a development of this size next to single family homes.
4. As others pointed out at last week's meeting how will the City enforce the number of tenants? Will variance officers go in once a month to check each and every unit to make sure that only the legal contracted amount of tenants are living there?
5. In Erin Talkington's memo to R2 Partners she talks about how on average 200 new households are projected to move to Glenwood each year over the next five years. We have noted the following recently completed projects or other projects in the pipeline:
  - a. Buffalo Valley - 54 units
  - b. The Lofts - 181 built and 300 more approved
  - c. Bell Rippy Apartments - 100 units
  - d. Six Canyon - 116 units

- e. Real America (behind Discount Tires on Hwy 6) - proposing 54 units
- f. Other development sites potentially being bought and (over)developed: Ami's Acres, the Mini Golf Course on Hwy 6, Rivers Restaurant site etc.

When is enough ENOUGH? The decisions you our City Council make can destroy not only the small town character of Glenwood Springs but seriously jeopardize the safety of your citizens.

- 6. We would urge you not to “accept fees in lieu of” for parkland/school dedication.
- 7. We continue to urge you to deny both the annexation and rezoning of this land. First revisit the Comprehensive Plan and make sure that the Wildfire Evacuation Plan is in place (not just for West Glenwood but for all of the citizens of Glenwood Springs).

Thank you

Randy & Annie Stephens

Copy of our 3-minute speech

My name is Annie Stephens. My husband and I live in West Glenwood

We're opposed to this development for many reasons the main one being SAFETY but I'd like to address some of the other impacts this development will have on our small town and quality of life.

If you take the exact acreage of land immediately to the north of this property you will count 43 residential houses compared to the 332 units the developer is proposing. That's almost EIGHT times the density. There is nowhere in Glenwood with a development of this size next to single family homes.

R2s proposed development will be TRIPLE the units of Six Canyon apartments. I question how this fits in with “health, safety and welfare” and the City's vision of “small town character”

The residents on this development could bring in 1000 or more vehicles. Consider the traffic impact to Glenwood Springs but specifically to the three narrow roads surrounding this property and the two nearby roundabouts used by the majority of people in the valley.

On top of the daily road trips by the residents themselves, you will have

- delivery vehicles - Post Office, Fed Ex, UPS
- department stores delivery vehicles
- U-Haul vehicles/removal/storage vehicles
- trash/snow removal vehicles
- emergency vehicles
- restaurant workers
- food delivery vehicles
- people dining at the restaurant
- customers and clients utilizing the 13 live/work units
- and lastly people visiting all of the residents living on this development

Even with road improvements West Glenwood is incapable of handling a development of this size. These additional vehicles will have a devastating impact on the infrastructure, clogging the streets and turning our city into a parking lot.

Your Planning and Zoning Commission denied this unanimously, County Commissioners had considerable concerns over its impact, almost 600 Facebook members and 1,500 petition signatories oppose this development. We urge you to place a moratorium on these large scale developments until plans are in place to keep all of us safe. We are urging you to make a decision that you can live with - not one that some of us could die by.

Put safety first

To Glenwood City Council;

I cannot speak again and yet had more to say after thinking about it....

The Meadows was a super large project and the first developer comes along and shows the city their opportunity and the city jumped all over it...I was on P&Z when this vote took place and I was the lone dissenting vote and would vote that way again today if it was my choice for the simple reason that it was the first design and project we had seen....there were more and better opportunities to make something better than what we ended up with...we didn't take the time to look down the road and see other projects and opportunities to build a better development....So my point is this...This is the first concept we have seen drawn out and shown....is there a better opportunity from another developer who can put together a better project on this parcel?...this parcel will be developed and my hope is that Council have the foresight to look down the road and see that there may be several possibilities for this and there may be something much better out there yet to be seen...are we in a big hurry? Slow down and reject this development and there will be others trying to bring a better project to us in West Glenwood .... As the Meadows was and this will be, Monster projects affecting our Community and we need foresight to wait....the right project will come!

**Subject:** West glenwood pasture development

Allvalley residence, please take a walk or a drive around the old pasture behind the mall in West Glenwood Springs. especially all of Glenwood city Council. Imagine what 330 units in the pasture would be like. It is mine boggling! Try to imagine 1000 people and over 900 vehicles. We are tired of hearing the R 2 developers telling us how wonderful these 330 unaffordable units would be. This is a lie. It goes against all the goals of Glenwood Springs. Our small town character, our safety, our welfare, and our quality of life. We have been through the fires and the evaluations.If approved,we will be trapped and some of us could die in the next fire. Our infrastructure is not capable of handling these impacts. Traffic will be a nightmare. Gridlock twice a day. Schools overwhelmed. Smiles will disappear. Water, roundabouts , water treatment facility, will be at capacity. This project just not just does not fit in West Glenwood.Too much for our narrow Valleys, and especially in the west, we need some elbow room. This is an extremely serious issue for us. Like planning and zoning, we are asking the city council to deny this application. Please join us at 6 PM on Thursday, August 5 for Glenwood Springs city Council meeting. We need everyone's support. Also please join us on Facebook at West Glenwood pasture development.thank you.

## CITY COUNCIL LIST OF MOTIONS

Date: August 19, 2021  
To: City Council  
From: Trent Hyatt, Senior Planner  
Subject: #09-20- Consideration of an Annexation and the initial zoning/Rezoning of 15.818 acres to Commercial (CO) District and Planned Unit Development (PUD) District at 214 Center Drive (PIN: 2185-061-00-042).

### ACTION ITEMS AND STAFF RECOMMENDATIONS

Section 070.060.030(g)(1)d outlines the review and decision procedures for applications being considered by the Commission and/or City Council stating, "the applicable review body shall approve, approve with conditions, or deny the application based on the applicable approval criteria listed in the application-specific procedures. The body may also continue the hearing..."

---

#### **Action 1:**

**Action 1 – Ordinance 2021-08 - Annexation** – of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs.

#### **Staff Recommendation**

Staff recommends approval (with conditions) of the Annexation with the findings and conditions outlined on the following page. Please note, the recommended conditions include significant changes related to the revisions to the proposal and by the applicant's potential purchase of the Glenwood Mall site.:

#### **Recommended Findings:**

1. The annexation conforms to applicable state statutes.
2. The annexation is consistent with the Comprehensive Plan; and
3. The annexation minimizes potential adverse impacts to the City and does not negatively impact the City's public health, safety, and welfare.

#### **Recommended Conditions:**

1. Prior to second reading of the annexation ordinance, the applicant shall revise the annexation map to include adjacent Mel Ray, Storm King, and Donegan Roads rights-of-way roadway sections related to the project.
2. The applicant shall comply with/address all City staff comments related to the proposal prior to submittal of any future development permit application.
3. Future development shall comply with the various requirements outlined in the PUD, where applicable, related items such as uses, building heights, densities, minimum open space, parking, and/or landscaping.
4. The exact locations site features may change upon site/architectural plan review. The Glenwood Springs Municipal Code is otherwise applicable to any standards not addressed therein.
5. The applicant shall comply with all verbal representations made in the public hearings, as outlined in all application materials, and/or as revised per conditions herein and approved by the Community Development Director.

6. Prior to approval of any future development review application, the applicant shall apply for and receive the approval of a CDOT access permit, where applicable. The applicant shall amend the annexation agreement to address the following:
  - a. The applicant shall provide a payment in the amount of \$40,000 to aid in the planning for and implementation of necessary emergency evacuation measures.
  - b. The applicant shall amend the development proposal as is necessary to include not less than one acre of land for the future construction of a new fire station for the Glenwood Springs Fire Department. Said land shall be dedicated to the City.
  - c. The applicant shall deed restrict a minimum of 20 percent of the residential units at 100 percent of area median income or 10 percent of the residential units at 90 percent of area median income. A minimum of 20 percent of the total residential units shall be resident occupied.
  - d. The applicant shall amend the development proposal as is necessary to include access to Highway 6 through the parcel to the south.
  - e. All offsite transportation and pedestrian related improvements to the Mel Ray, Storm King, and Donegan Roads rights-of-way.

#### **Alternative Motion**

\*\*\*A member of City Council has requested that land use applications include suggested motions for both approval and denial. In most instances, staff has worked diligently with the applicant to address requirements outlined in the *Glenwood Springs Municipal Code* (Code) applicable to any given proposal. Therefore, we are usually in support of an application by the time it reaches the Planning and Zoning Commission and/or City Council. However, if City Council does not believe the application meets the Code's minimum standards, your denial motion should be based on one or more of the same approval criteria applicable to the application. You should support your findings with information outlining the shortcomings of the request as shown in the example below:

#### **MOTION TO DENY**

##### **Action 1:**

**Action 1 - Annexation** – of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs.

I move to **deny finding that** –

1. The annexation **DOES NOT** conform to applicable state statutes.
2. The annexation is **NOT** consistent with the Comprehensive Plan; and
3. The annexation **DOES NOT** minimize potential adverse impacts to the City and **DOES** negatively impact the City's public health, safety, and welfare.

**Action 2 -Ordinance 2021-09 - Initial Zoning/Rezoning** – of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

**Staff recommendation:** Staff recommends **approval (with conditions)** of the Initial Zoning/Rezoning request with the findings and conditions below:

**Recommended Findings:**

1. The rezonings are consistent with the City's comprehensive plan and the purpose of the *Glenwood Springs Municipal Code*;
2. The rezonings are consistent with the purpose statements of the Commercial (CO) and Planned Unit Development (PUD) zoning districts;
3. Substantial changes in the area warrant a zoning change;
4. The intensity of existing and proposed development in the new zoning districts is not expected to create significantly adverse impacts to surrounding properties or the neighborhood.
5. The PUD rezoning will meet any and all applicable standards of this Code not expressly modified by the PUD application; and
6. The PUD provides multiple, varied residential housing types and densities.

**Recommended Conditions:**

1. The applicant shall submit a Minor Subdivision application to create the two lots outlined in the request.
2. Future development shall comply with the various requirements outlined in the PUD, where applicable. The *Glenwood Springs Municipal Code* is otherwise applicable to any aspect not addressed therein.
3. The applicant shall comply with all verbal representations made in the public hearings, as outlined in all application materials, and/or as revised per conditions herein and approved by the Community Development Director.

**Alternative Motion**

\*\*\*A member of City Council has requested that land use applications include suggested motions for both approval and denial. In most instances, staff has worked diligently with the applicant to address requirements outlined in the *Glenwood Springs Municipal Code* (Code) applicable to any given proposal. Therefore, we are usually in support of an application by the time it reaches the Planning and Zoning Commission and/or City Council. However, if the Planning and Zoning Commission does not believe the application meets the Code's minimum standards, your denial motion should be based on one or more of the same approval criteria applicable to the application. You should support your findings with information outlining the shortcomings of the request as shown in the example below:

**MOTION TO DENY**

**Action 2 - Initial Zoning/Rezoning** – of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

I move to **deny finding that** –

1. The rezonings are **NOT** consistent with the City's comprehensive plan and the purpose of the *Glenwood Springs Municipal Code*;
2. The rezonings are **NOT** consistent with the purpose statements of the Commercial (CO)

and Planned Unit Development (PUD) zoning districts;

3. Substantial changes in the area **DO NOT** warrant a zoning change;
4. The intensity of existing and proposed development in the new zoning districts **IS** expected to create significantly adverse impacts to surrounding properties or the neighborhood.
5. The PUD rezoning will **NOT** meet any and all applicable standards of this Code not expressly modified by the PUD application; and
6. The PUD **DOES NOT** provides multiple, varied residential housing types and densities.

**VIA ELECTRONIC SUBMISSION**

Trent Hyatt, Planning Director  
City of Glenwood Springs  
Community Development Department  
101 West 8<sup>th</sup> Street  
Glenwood Springs, Colorado 81601

**RE:** 214 Center Drive/480 Donegan  
Supplemental Annexation and Zoning Submission

Dear Trent:

214 Center Drive, LLC (“Applicant”) previously submitted applications for the annexation and zoning (collectively, the “Application”) of the property currently known as 214 Center Drive, Glenwood Springs, Parcel Number 218506100042 (the “Property”). Applicant is proposing that, upon annexation, the developed portion of the Property be zoned Commercial (CO) and the vacant portion be zoned as a planned unit development (PUD). On July 9, 2021, Applicant submitted a revised PUD plan for the Property. This revised PUD plan eliminates the two apartment buildings adjacent to Donegan Road and replaces them with 20 townhome units across four townhome buildings. This brings the total townhome count to 40. The maximum height of the buildings adjacent to Donegan Road has also been reduced from 30 feet to 27 feet to be consistent with existing townhomes in the immediate vicinity.

Applicant anticipates that it will attempt to sell all 40 townhomes for individual ownership and not include them as part of the rental complex. Whether the townhomes will be rented in the future will be decided by future owners of each unit.

By replacing the apartment buildings with townhomes, the overall density of the project has been reduced by 28 units, for a total unit count of 332. Six parking spaces were removed at the northeast corner of the Property to add additional open space. That leaves 579 on-site parking spaces within the PUD portion of the Property. With the reduced density, only 566 spaces are required, meaning that the new development will more than satisfy all of its parking needs on-site. The revised PUD plan still shows new on-street parking on Donegan and Storm King, but those spaces are not needed to meet the development’s parking needs.

Please contact us if you need additional information or have questions regarding the revised PUD plan. We look forward to discussing this new plan and the Application generally with City Council at the July 29, 2021, public hearing.

Sincerely,  
GARFIELD & HECHT, P.C.

## **ANNEXATION AGREEMENT**

THIS ANNEXATION AGREEMENT made and entered into this \_\_\_\_ day of \_\_\_\_\_, 20\_\_\_\_ by and between the CITY OF GLENWOOD SPRINGS, COLORADO, a Colorado home-rule municipality (hereinafter “City”), GLENWOOD PARTNERSHIP LLLP, a Colorado limited liability limited partnership (“Owner”), and COMMERCIAL DEVELOPMENT SERVICES GROUP, LLC, a Delaware limited liability company (“CDSG”). Each of the City, Owner, and CDSG may be referred to as a Party, and all of the foregoing may be referred to hereinafter as the “Parties.”

### **W I T N E S S E T H:**

WHEREAS, Owner is the owner of certain real property currently located in unincorporated Garfield County, Colorado, more particularly described on Exhibit A attached hereto and incorporated herein (the “Property”); and

WHEREAS, CDSG is under contract to purchase a portion of the Property and develop that portion as mixed-use, multi-family housing development; and

WHEREAS, the portion of the Property to be retained by Owner is currently developed for office and warehouse purposes; and

WHEREAS, Owner desires to annex the Property and connect it to the City of Glenwood Springs and has filed a Petition for Annexation (“Petition”) to do the same; and

WHEREAS, along with the Petition, Owner and CDSG submitted a zoning application for the Property asking that the City approve (i) Commercial (CO) zoning for Owner’s retained portion of the Property and (ii) Planned Unit Development (PUD) zoning for CDSG’s portion of the Property as more fully described in Exhibit B hereto; and

WHEREAS, on June 3, 2021, the City Council held a duly and properly noticed public hearing at which time the City Council adopted a resolution finding Owner’s Petition to be in substantial compliance with the statutory requirements for annexation of the Property to the City; and

WHEREAS, on July 29 and \_\_\_\_\_, 2021, the City Council held a duly and properly noticed annexation hearing at which time the City Council approved the annexation and zoning of the Property as set forth in Ordinance No. \_\_, Series 2021, and Ordinance No. \_\_, Series 2021; and

WHEREAS, C.R.S. §§31-12-101, *et seq.*, authorizes the City and Owner to enter into an Annexation Agreement; and

WHEREAS, the City and Owner desire to enter into this Agreement to set forth their agreements in writing concerning the terms and conditions of annexation of the Property to the City.

NOW, THEREFORE, for and in consideration of the mutual promises and covenants contained herein, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

1. **Purpose.** The purpose of this Agreement is to set forth the terms and conditions of the annexation of the Property to the City. Except as expressly provided for herein to the contrary, all conditions herein are in addition to any and all requirements concerning annexation contained in the Municipal Code of the City of Glenwood Springs (hereinafter “City Code”) or the Municipal Annexation Act of 1965, as amended, C.R.S. §§31-12-101, *et seq.* This Agreement is intended to provide a contractual relationship between the City and Owner to ensure compliance with the City Code, state statutes, and all terms and conditions set forth herein. This Agreement includes additional terms and conditions for the purposes of the Municipal Annexation Act.

2. **Annexation.** The annexation of the Property shall be in accordance with the Colorado Municipal Annexation Act of 1965, C.R.S. §§31-12-101, *et seq.*, as amended.

3. **Zoning.** The PUD Plan attached hereto as Exhibit B shall govern the development of that portion of the Property designated as “PUD” in the Plan. The remaining portion of the Property shall be zoned as Commercial (CO) and subject to the regulations set forth in the City’s Municipal Code. The City agrees that, upon annexation of the Property, the zoning of a portion of the Property as PUD and the remaining portion as Commercial (CO) would be consistent with the City’s Comprehensive Plan.

4. **Specific Conditions.** In consideration of the annexation of the Property, and in further consideration of the City providing municipal services to the Property, as hereinafter provided, the Parties agree that it is appropriate that the following payments, dedications and other exactions be made:

(a) CDSG or its successor or assign shall pay Fire and Emergency Services Impact Fees for the PUD portion of the Property in accordance with Section 070.040.030(g)(5) at the time of building permit for each phase of development. Said fees will be paid by Owner or its successor or assign on the Commercial (CO) portion of the Property if required at the time of any future development.

(b) CDSG or its successor or assign shall pay and the City shall accept fees in lieu of land dedication for the benefit of schools in the RE-I School District (the “District”) pursuant to Municipal Code Section 070.040.030(g)(4), or any amended version thereof in force and effect at the time of the final development permit approval for the PUD portion of the Property. Such fees shall be applicable to the number of units proposed for all residential phases scheduled for development and shall be payable upon the issuance of a building permit for a residential dwelling unit. No school land dedication or fee in lieu thereof will be required for the Commercial (CO) portion of the Property unless and until the Property is redeveloped as residential.

(c) CDSG or its successor or assign shall pay and the City shall accept fees in lieu of parkland dedication pursuant to Municipal Code Section 070.040.030(g)(2), or any amended version thereof in force and effect at the time of the final development permit approval for the PUD portion of the Property, subject to reductions: (i) for private

recreation facilities to be constructed on the PUD portion of the Property; (ii) for the design and installation of the northern bike lane along Donegan Road from the western edge of the Property east to Soccer Field Road; (iii) for the design and installation of the southern bike lane and wall (where necessary) along Donegan Road from the eastern boundary of the Property east to Soccer Field Road; and (iv) on any other basis approved by the City under Municipal Code Section 070.040.030(g)(2). No parkland dedication or a fee in lieu thereof will be required for the Commercial (CO) portion of the Property unless and until the Property is redeveloped for residential purposes.

(d) CDSG or its successor or assign shall pay all water tap fee and water system improvement fees required under Municipal Code Section 080.040.010(c) and Article 080.060, respectively, applicable to the development of the PUD portion of the Property. No water tap fees or water system improvement fees will be required for the Commercial (CO) portion of the Property unless and until additional water capacity is needed therefor. Should a change in use of any structure on any portion of the Property occur in the future that causes an increase in water usage, the owner of the structure will be required to pay the system improvement fee associated with the increased use in accordance with Municipal Code in effect at the time of the change in use.

(e) Owner agrees to pay all actual costs incurred for notice publication, recording fees, attorney fees and similar reasonable administrative charges related to the annexation of the Property.

5. **Affordable Housing.** CDSG shall deed restrict a minimum of 20 percent of the residential for rent units at 100 percent of area median income or 10 percent of the residential for rent units at 90 percent of area median income. A minimum of 20 percent of the total residential units shall be resident occupied. The deed restricted unit mix shall be dispersed amongst the unit types and bedroom configurations.

CDSG shall construct a minimum of thirty-five (35) for sale units, all of which shall be resident occupied. Ten percent of the for-sale units constructed shall be deed restricted as to sale price. CDSG and the City shall negotiate the terms of said deed restriction and the financial contribution of the City as a part of the affordable housing deed-restriction agreement referenced below.

6. **Affordable Housing Agreement.** The Parties shall enter into an affordable housing deed-restriction agreement to be finalized and recorded at the earlier of (a) the closing of CDSG's purchase of the PUD portion of the Property or (b) issuance of the first building permit for the same.

7. **Dedication of Water Rights.** At or before the time of recordation of the final plat subdividing the Property as shown in the PUD Plan, Owner and/or CDSG, as appropriate, shall assign to the City, free and clear of all liens and encumbrances (subject only to the provisions of Section 8, below), all of Owner or CDSG's right, title, and interest in and to \_\_\_\_ shares of Reynolds & Cain Ditch Company stock (the "Shares") historically used on the undeveloped portion of the Property. By this conveyance, Owner and CDSG shall fully satisfy any and all water rights dedication requirements of the City for annexation and development of the Property as set forth in the Municipal Charter and Municipal Code and as approved by the City Council.

8. **Lease-Back of Water Rights.** As consideration for the Shares, the City hereby leases all of the water represented by the Shares to Owner and CDSG in the proportion mentioned in Section 7, above, for irrigation of the Property at the rate of \$1.00 per year. The City agrees to lease the Shares to Owner and CDSG until such time as the City may be required to use the Shares for another purpose. In the event the City can no longer lease the Shares to Owner and CDSG, the City will provide notice to Owner and CDSG thereof at least sixty (60) days prior to the termination of use of the Shares and will waive any tap or service improvement fees Owner and CDSG would otherwise be required to pay for increasing their use of City water as a result of losing use of the Shares.

9. **Resource Conservation.** CDSG shall revise the PUD landscaping to provide drought resistant xeriscaping and design all improvements to provide leading edge and best management practices for conservation, fixtures, and practices for the development. In addition, the development shall not use natural gas unless CDSG can demonstrate to the satisfaction of the City that it is the only alternative.

10. **Off-Site Improvements and Other Obligations.** As an element of the City's approval of (i) the Petition, (ii) the PUD zoning application, and (iii) acceptance of this Agreement, CDSG has agreed to design and, upon approval of the City Engineer, construct certain improvements to the surrounding street system, namely:

(a) Install a bike lane along the north and south sides of Donegan Road for the length of the Property and extending east to Soccer Field Road;

(b) Install parallel parking and a detached 6-foot sidewalk on the south side of Donegan Road and extend the sidewalk and related improvements east to Soccer Field Road;

(c) Stripe bike lanes on the east and west side of Storm King Road south of Center Drive.

(d) Widen the east side of Storm King Drive north of Center Drive to add a northbound bike lane, parallel parking, and a detached 6 foot wide sidewalk.

(e) Install an eastbound left turn lane and an eastbound acceleration lane from the southbound left turn lane at the State Highway 6 and Donegan Road intersection consistent with recommendation set forth in CDSG's traffic study.

(f) Install a five foot sidewalk to the west side of Melray Road between SH 6 & 24 and Donegan.

(g) CDSG shall either amend the PUD as is necessary to include not less than one acre of land for the future construction of a new fire station for the Glenwood Springs Fire Department or provide such land at a location acceptable to the City. Notwithstanding the foregoing, the land to be dedicated to the Fire Department may be less than one acre only to the extent that shared parking for the fire station is located on adjacent property. Said land shall be dedicated to the City.

(h) CDSG shall provide \$40,000 to be used for emergency planning and 20% of the costs to construct emergency access and egress improvements.

- (i) Amend the development proposal as is necessary to include emergency access to Highway 6 through the parcel to the south.
- (j) Amend the annexation map to include the annexation of Storm King to Donegan to Mel Ray and Mel Ray from Donegan to 6 & 24.
- (k) Reconstruction of the foregoing streets before acceptance by the City.

The improvements described in this Section 10 shall be completed prior to or contemporaneously with the issuance of a final and permanent certificate of occupancy for the first building to be constructed within the PUD portion of the Property. Parkland dedication fees required in connection with development of the PUD portion of the Property shall be reduced by the total actual costs incurred by CDSG to (i) engineer, design, and install the northern bike lane along Donegan Road from the western edge of the Property east to Soccer Field Road; (ii) engineer, design, and install the southern bike lane, sidewalk, and wall (where necessary) along Donegan Road from the eastern boundary of the Property east to Soccer Field Road.

11. **Phasing.** The Project will be phased as shown on Exhibit C. Construction of Phase 2 cannot be commenced until there is an approved redevelopment plan for the West Glenwood Mall site to the south.

12. **Vested Rights.** In order to allow Owner and CDSG a reasonable opportunity to develop the Property in accordance with this Agreement and the PUD Plan, the development rights and uses approved hereby shall, to the extent allowed by law, constitute a “site specific development plan” under C.R.S. §§24-68-101 *et seq.*, as amended. The site specific development plan shall be vested for a period of ten years beginning on the date the final plat subdividing the Property as shown in the PUD Plan is recorded (the “Vested Period”). The Property as to which rights have been vested shall be immune from changes in the City’s land use regulations for the duration of the Vested Period except as provided in this Section 12. Except in instances of force majeure, the requirements of federal or state law, cases of preemption or other superior jurisdictional mandate, the City shall not initiate any zoning or land use action which would alter, impair, prevent, diminish, impose a moratorium on development, or otherwise unreasonably delay any of Owner’s or CDSG’s rights set forth in this Agreement or their plans for development or zoning, as approved by the City. Notwithstanding the foregoing, the establishment of vested property rights under this Agreement shall not prevent the City from enacting and enforcing regulations of general applicability (including, but not limited to, building, fire, plumbing, electrical and mechanical codes, including the preliminary plat and final plat subdivision requirements under the Municipal Code and other City ordinances), except where the approved plans for development of the Property or state or federal regulations provide otherwise, as all of such regulations exist on the date of this Agreement or may be enacted or amended after the date of this Agreement.

13. **Conditions Precedent.** Notwithstanding the date set forth in the introductory paragraph of this Agreement, annexation of the Property shall not be effective, and this Agreement shall not be in force, until:

- (a) Final Approval has occurred, meaning the thirtieth day after the effective date of the latest of the motion, ordinance, and/or resolution by which the City Council approves (i) this Agreement; (ii) publication after final passage on second reading of the ordinance by which City Council approves the annexation of the Property; (iii) the zoning

of the Property as PUD and Commercial (CO) as provided in Exhibit B; and (iv) subdivision and major site plan approval for the PUD portion of the Property consistent with Exhibit B; and

(b) The affordable housing agreement called for in Section 6 hereof has been approved by both the City and CDSG; and

(c) The annexation map has been recorded with the Garfield County Clerk & Recorder; and

(d) The Parties have executed and delivered this Agreement for recordation with the Garfield County Clerk & Recorder.

14. **Failure of Conditions.** Until all of the conditions set forth in subsection 13 above have been satisfied, this document shall constitute an offer by Owner and CDSG and the City to enter into this Agreement (notwithstanding the Parties' mutual execution and delivery of this document), and the annexation and zoning of the Property shall not be effective. Consequently, at any time before such conditions are satisfied, Owner may withdraw the Petition and Owner and/or CDSG may withdraw its offer to enter into this Agreement. If Owner withdraws the Petition or Owner and/or CDSG withdraw its offer to enter into this Agreement, or if final approval does not otherwise occur for any reason, then this Agreement shall be deemed void and of no force or effect, and the Property shall be deemed not annexed to the City. Owner and CDSG may exercise their rights under this Section 14 independently.

15. **Deannexation.** The provisions of this Agreement, as well as acceptable City zoning of the Property, are material considerations of Owner's agreement to annex the Property to the City. Therefore, in the event (a) the City fails to perform under the terms of this Agreement, or (b) Owner, CDSG, or both are unable to obtain, either before or after annexation proceedings are complete, Commercial (CO) and PUD zoning of the Property as described above and/or subdivision and/or development approval for development of the Property which they in their sole discretion find acceptable, Owner, CDSG, and the City stipulate and agree, pursuant to C.R.S. §31-12-501, that it shall be in the best interest of the City that the Property (or a portion thereof) be de-annexed from the City. In such event, the City agrees that it shall initiate de-annexation proceedings, and to take all steps necessary to effect the de-annexation. The City further acknowledges and agrees that de-annexation is not prohibited by the City Charter or Municipal Code and ordinances, and that the City will not amend its ordinances to preclude a de-annexation permitted hereunder. The Parties' right to de-annex shall be in addition to any other rights available to them at law or under this Agreement. Upon the de-annexation of the Property (or portion thereof) from the municipal boundaries and specific jurisdiction of the City, the City agrees that it shall convey, assign, transfer and quitclaim to Owner or their successors and assigns, any and all water rights (the public dedication of which is more fully described by Section 6 hereof) previously dedicated by Owner hereunder to the City for the public use and benefit.

16. **Assignment.** The parties agree and acknowledge that the rights and obligations of Owner and CDSG under this Agreement may be assigned by them to persons or entities acquiring title to the Property or a portion thereof without the prior consent of the City if, and only if, such assignee agrees in writing to be bound by the terms and conditions of this Agreement, and the Owner or CDSG, as applicable, shall give notice to the City of any such conveyance, together with the assignee's written agreement to be bound by the terms and conditions of this Agreement.

17. **Waiver of Defects.** In executing this Agreement, Owner and CDSG waive all objections either may have concerning defects, if any, in the formalities whereby it is executed, or concerning the power of the City to impose conditions on Owner or CDSG as set forth herein, and concerning the procedure, substance and form of the ordinances or resolutions adopting this Agreement.

18. **Final Agreement.** This Agreement supersedes and controls all prior written and oral agreements and representations relating to the annexation of the Property to the City, and is the total integrated agreement between the City, Owner, and CDSG.

19. **Modifications.** This Agreement shall not be amended except by subsequent written agreement between the Parties hereto.

20. **Release of Liability.** It is expressly understood that the City cannot legally be bound by the representations of any of its officers or agents or their designees except in accordance with the City Code, City ordinances and the laws of the State of Colorado. Owner and CDSG, when dealing with the City, act at their own risk as to any representation or undertaking by the City officers, agents or their designees which is subsequently held unlawful by a court of law.

21. **Captions.** The captions in this Agreement are inserted only for convenience and in no way define, limit, or prescribe the scope or intent of this Agreement or any part thereof.

22. **Binding Effect.** This Agreement shall be binding upon and inure to the benefit of the Parties hereto and their respective heirs, successors, and assigns.

23. **Severability.** If any provision(s) of this Agreement shall be determined to be void or invalid by a court of competent jurisdiction, then such determination shall not affect any other provision hereof, all of which other provisions shall remain in full force and effect. It is the intention of the parties hereto that, if any provision of this Agreement is capable of two constructions, one of which would render the provision void, and the other of which would render the provision valid, then the provision shall have the meaning that renders it valid.

24. **Governing Law.** The laws of the State of Colorado shall govern the validity, performance, and enforcement of this Agreement. Should either party institute legal suit or action for enforcement of any obligation contained herein, it is agreed that the venue of such suit or action shall be in Garfield County, Colorado.

25. **Attorneys' Fees; Survival.** Should this Agreement become the subject of litigation between the City and Owner or CDSG, the prevailing party shall be entitled to attorneys' fees and costs of suit actually incurred, including expert witness fees. All rights concerning remedies and/or attorneys' fees shall survive any termination of this Agreement.

26. **Gender.** Whenever the context shall require, the singular number shall include the plural, the plural the singular, and the use of any gender shall be applicable to all genders.

27. **Counterparts.** This Agreement may be executed in counterparts, each of which shall be deemed an original and all of which, when taken together, shall be deemed one and the same instrument.

28. **Notice.** All notices required under this Agreement shall be in writing and shall be hand-delivered or sent by first class mail postage prepaid, to the addresses of the parties set forth herein. All notices by hand delivery shall be effective upon receipt. All notices by mail shall be considered effective seventy-two (72) hours after deposit in the United States Mail with the proper address as set forth below. Either party by notice so given may change the address to which future notices may be sent.

Notice to the City:                      City Manager  
                                                    City of Glenwood Springs  
                                                    101 West 8<sup>th</sup> Street

## **ANNEXATION AGREEMENT**

THIS ANNEXATION AGREEMENT made and entered into this \_\_\_\_ day of \_\_\_\_\_, 20\_\_ by and between the CITY OF GLENWOOD SPRINGS, COLORADO, a Colorado home-rule municipality (hereinafter “City”), GLENWOOD PARTNERSHIP LLLP, a Colorado limited liability limited partnership (“Owner”), and COMMERCIAL DEVELOPMENT SERVICES GROUP, LLC, a Delaware limited liability company (“CDSG”). Each of the City, Owner, and CDSG may be referred to as a Party, and all of the foregoing may be referred to hereinafter as the “Parties.”

### **WITNESSETH:**

WHEREAS, Owner is the owner of certain real property currently located in unincorporated Garfield County, Colorado, more particularly described on Exhibit A attached hereto and incorporated herein (the “Property”); and

WHEREAS, CDSG is under contract to purchase a portion of the Property and develop that portion as mixed-use, multi-family housing development; and

WHEREAS, the portion of the Property to be retained by Owner is currently developed for office and warehouse purposes; and

WHEREAS, Owner desires to annex the Property and connect it to the City of Glenwood Springs and has filed a Petition for Annexation (“Petition”) to do the same; and

WHEREAS, along with the Petition, Owner and CDSG submitted a zoning application for the Property asking that the City approve (i) Commercial (CO) zoning for Owner’s retained portion of the Property and (ii) Planned Unit Development (PUD) zoning for CDSG’s portion of the Property as more fully described in Exhibit B hereto; and

WHEREAS, on \_\_\_\_\_, 2021, the City Council held a duly and properly noticed public hearing at which time the City Council adopted a resolution finding Owner’s Petition to be in substantial compliance with the statutory requirements for annexation of the Property to the City; and

WHEREAS, on \_\_\_\_\_, 2021, the City Council held a duly and properly noticed annexation hearing at which time the City Council approved the annexation and zoning of the Property as set forth in Ordinance No. \_\_, Series 2021, and Ordinance No. \_\_, Series 2021; and

WHEREAS, C.R.S. §§31-12-101, *et seq.*, authorizes the City and Owner to enter into an Annexation Agreement; and

WHEREAS, the City and Owner desire to enter into this Agreement to set forth their agreements in writing concerning the terms and conditions of annexation of the Property to the City.

NOW, THEREFORE, for and in consideration of the mutual promises and covenants contained herein, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

1. **Purpose.** The purpose of this Agreement is to set forth the terms and conditions of the annexation of the Property to the City. Except as expressly provided for herein to the contrary, all conditions herein are in addition to any and all requirements concerning annexation contained in the Municipal Code of the City of Glenwood Springs (hereinafter “City Code”) or the Municipal Annexation Act of 1965, as amended, C.R.S. §§31-12-101, *et seq.* This Agreement is intended to provide a contractual relationship between the City and Owner to ensure compliance with the City Code, state statutes, and all terms and conditions set forth herein. This Agreement includes additional terms and conditions for the purposes of the Municipal Annexation Act.

2. **Annexation.** The annexation of the Property shall be in accordance with the Colorado Municipal Annexation Act of 1965, C.R.S. §§31-12-101, *et seq.*, as amended.

3. **Zoning.** The PUD Plan attached hereto as Exhibit B shall govern the development of that portion of the Property designated as “PUD” in the Plan. The remaining portion of the Property shall be zoned as Commercial (CO) and subject to the regulations set forth in the City’s Municipal Code. The City agrees that, upon annexation of the Property, the zoning of a portion of the Property as PUD and the remaining portion as Commercial (CO) would be consistent with the City’s Comprehensive Plan.

4. **Specific Conditions.** In consideration of the annexation of the Property, and in further consideration of the City providing municipal services to the Property, as hereinafter provided, the Parties agree that it is appropriate that the following payments, dedications and other exactions be made:

(a) CDSG or its successor or assign shall pay Fire and Emergency Services Impact Fees for the PUD portion of the Property in accordance with Section 070.040.030(g)(5) at the time of building permit for each phase of development. Said fees will be paid by Owner or its successor or assign on the Commercial (CO) portion of the Property if required at the time of any future development.

(b) CDSG or its successor or assign shall pay and the City shall accept fees in lieu of land dedication for the benefit of schools in the RE-I School District (the “District”) pursuant to Municipal Code Section 070.040.030(g)(4), or any amended version thereof in force and effect at the time of the final development permit approval for the PUD portion of the Property. Such fees shall be applicable to the number of units proposed for all residential phases scheduled for development and shall be payable upon the issuance of a building permit for a residential dwelling unit. No school land dedication or fee in lieu thereof will be required for the Commercial (CO) portion of the Property unless and until the Property is redeveloped as residential.

(c) CDSG or its successor or assign shall pay and the City shall accept fees in lieu of parkland dedication pursuant to Municipal Code Section 070.040.030(g)(2), or any amended version thereof in force and effect at the time of the final development permit approval for the PUD portion of the Property, subject to reductions: (i) for private

recreation facilities to be constructed on the PUD portion of the Property; (ii) on any other bases approved by the City under Municipal Code Section 070.040.030(g)(2). No parkland dedication or a fee in lieu thereof will be required for the Commercial (CO) portion of the Property unless and until the Property is redeveloped for residential purposes.

(d) CDSG or its successor or assign shall pay all water tap fee and water system improvement fees required under Municipal Code Section 080.040.010(c) and Article 080.060, respectively, applicable to the development of the PUD portion of the Property. No water tap fees or water system improvement fees will be required for the Commercial (CO) portion of the Property unless and until additional water capacity is needed therefor. Should a change in use of any structure on any portion of the Property occur in the future that causes an increase in water usage, the owner of the structure will be required to pay the system improvement fee associated with the increased use in accordance with Municipal Code in effect at the time if the change in use.

(e) Owner agrees to pay all actual costs incurred for notice publication, recording fees, attorney fees and similar reasonable administrative charges related to the annexation of the Property.

5. **Affordable Housing.** CDSG shall deed restrict a minimum of 20 percent of the residential for rent units at 100 percent of area median income or 10 percent of the residential for rent units at 90 percent of area median income. A minimum of 20 percent of the total residential units shall be resident occupied. The deed restricted unit mix shall be dispersed amongst the unit types and bedroom configurations.

CDSG shall construct a minimum of thirty-five (35) for sale units all of which shall be resident occupied. Eight (8) of said units shall be deed restricted as to sale price. CDSG and the City shall negotiate the terms of said deed restriction and the financial contribution of the City as a part of the affordable housing deed-restriction agreement referenced below.

6. The Parties shall enter into an affordable housing deed-restriction agreement to be finalized and recorded at the earlier of (a) the closing of CDSG's purchase of the PUD portion of the Property or (b) issuance of the first building permit for the same.

7. **Dedication of Water Rights.** At or before the time of recordation of the final plat subdividing the Property as shown in the PUD Plan, Owner and/or CDSG, as appropriate, shall assign to the City, free and clear of all liens and encumbrances (subject only to the provisions of Section 7, below. By this conveyance, Owner and CDSG shall fully satisfy any and all water rights dedication requirements of the City for annexation and development of the Property as set forth in the Municipal Charter and Municipal Code and as approved by the City Council.

8. **Lease-Back of Water Rights.** As consideration for the Shares, the City hereby leases all of the water represented by the Shares to Owner and CDSG in the proportion mentioned in Section 6, above, for irrigation of the Property at the rate of \$1.00 per year. The City agrees to lease the Shares to Owner and CDSG until such time as the City may be required to use the Shares for another purpose. In the event the City can no longer lease the Shares to Owner and CDSG, the City will provide notice to Owner and CDSG thereof at least sixty (60) days prior to the termination of use of the Shares and will waive any tap or service improvement fees Owner and CDSG would

otherwise be required to pay for increasing their use of City water as a result of losing use of the Shares.

9. **Resource Conservation.** CDSG shall revise the PUD landscaping to provide drought resistant xeriscaping and design all improvements to provide leading edge and best management practices for conservation, fixtures, and practices for the development. In addition, the development shall not use natural gas unless CDSG can demonstrate to the satisfaction of the City that it is the only alternative.

10. **Off-Site Improvements and Other Obligations.** As an element of the City's approval of (i) the Petition, (ii) the PUD zoning application, and (iii) acceptance of this Agreement, CDSG has agreed to design and, upon approval of the City Engineer, construct certain improvements to the surrounding street system, namely:

- (a) Install a bike lane along the north and south sides of Donegan Road for the length of the Property and extending east to Soccer Field Road;
- (b) Install parallel parking and a detached 6-foot sidewalk on the south side of Donegan Road and extend the sidewalk and related improvements east to Soccer Field Road;
- (c) Stripe bike lanes on the east and west side of Storm King Road south of Center Drive.
- (d) Widen the east side of Storm King Drive north of Center Drive to add a northbound bike lane, parallel parking, and a detached 6 foot wide sidewalk.
- (e) Install an eastbound left turn lane and an eastbound acceleration lane from the southbound left turn lane at the State Highway 6 and Donegan Road intersection consistent with recommendation set forth in CDSG's traffic study.
- (f) Install a five foot sidewalk to the west side of Melray Road between SH 6 & 24 and Donegan.
- (g) CDSG shall either amend the PUD as is necessary to include not less than one acre of land for the future construction of a new fire station for the Glenwood Springs Fire Department or provide such land at a location acceptable to the City. Said land shall be dedicated to the City.
- (h) CDSG shall provide \$40,000 to be used for emergency planning and 20% of the costs to construct emergency access and egress improvements.
- (i) Amend the development proposal as is necessary to include access to Highway 6 through the parcel to the south.
- (j) Amend the annexation map to include the annexation of Storm King to Donegan to Mel Ray and Mel Ray from Donegan to 6 & 24.
- (k) Reconstruction of the foregoing streets before acceptance by the City.

The improvements described in this Section 8 shall be completed prior to or contemporaneously with the issuance of a final and permanent certificate of occupancy for the first building to be constructed within the PUD portion of the Property. Parkland dedication fees

required in connection with development of the PUD portion of the Property shall be reduced by the total actual costs incurred by CDSG to (i) install the northern bike lane along Donegan Road from the western edge of the Property east to Soccer Field Road; (ii) install the southern bike lane, sidewalk, and wall (where necessary) along Donegan Road from the eastern boundary of the Property east to Soccer Field Road.

11. **Phasing**. The Project will be phased as shown on Exhibit \_\_\_\_\_. Construction of Phase 2 cannot be commenced until there is an approved redevelopment plan for the West Glenwood Mall site to the south.

12. **Vested Rights**. In order to allow Owner and CDSG a reasonable opportunity to develop the Property in accordance with this Agreement and the PUD Plan, the development rights and uses approved hereby shall, to the extent allowed by law, constitute a “site specific development plan” under C.R.S. §§24-68-101 *et seq.*, as amended. The site specific development plan shall be vested for a period of five years beginning on the date the final plat subdividing the Property as shown in the PUD Plan is recorded (the “Vested Period”). The Property as to which rights have been vested shall be immune from changes in the City’s land use regulations for the duration of the Vested Period except as provided in this Section 9. Except in instances of force majeure, the requirements of federal or state law, cases of preemption or other superior jurisdictional mandate, the City shall not initiate any zoning or land use action which would alter, impair, prevent, diminish, impose a moratorium on development, or otherwise unreasonably delay any of Owner’s or CDSG’s rights set forth in this Agreement or their plans for development or zoning, as approved by the City. Notwithstanding the foregoing, the establishment of vested property rights under this Agreement shall not prevent the City from enacting and enforcing regulations of general applicability (including, but not limited to, building, fire, plumbing, electrical and mechanical codes, including the preliminary plat and final plat subdivision requirements under the Municipal Code and other City ordinances), except where the approved plans for development of the Property or state or federal regulations provide otherwise, as all of such regulations exist on the date of this Agreement or may be enacted or amended after the date of this Agreement.

13. **Conditions Precedent**. Notwithstanding the date set forth in the introductory paragraph of this Agreement, annexation of the Property shall not be effective, and this Agreement shall not be in force, until:

(a) Final Approval has occurred, meaning the thirtieth day after the effective date of the latest of the motion, ordinance, and/or resolution by which the City Council approves (i) this Agreement; (ii) publication after final passage on second reading of the ordinance by which City Council approves the annexation of the Property; (iii) the zoning of the Property as PUD and Commercial (CO) as provided in Exhibit B; and (iv) subdivision and major site plan approval for the PUD portion of the Property consistent with Exhibit B; and

(b) The annexation map has been recorded with the Garfield County Clerk & Recorder; and

(c) The Parties have executed and delivered this Agreement for recordation with the Garfield County Clerk & Recorder.

14. **Failure of Conditions.** Until all of the conditions set forth in subsection 10 above have been satisfied, this document shall constitute an offer by Owner and CDSG and the City to enter into this Agreement (notwithstanding the Parties' mutual execution and delivery of this document), and the annexation and zoning of the Property shall not be effective. Consequently, at any time before such conditions are satisfied, Owner may withdraw the Petition and Owner and/or CDSG may withdraw its offer to enter into this Agreement. If Owner withdraws the Petition or Owner and/or CDSG withdraw its offer to enter into this Agreement, or if final approval does not otherwise occur for any reason, then this Agreement shall be deemed void and of no force or effect, and the Property shall be deemed not annexed to the City. Owner and CDSG may exercise their rights under this Section 11 independently.

15. **Deannexation.** The provisions of this Agreement, as well as acceptable City zoning of the Property, are material considerations of Owner's agreement to annex the Property to the City. Therefore, in the event (a) the City fails to perform under the terms of this Agreement, or (b) Owner, CDSG, or both are unable to obtain, either before or after annexation proceedings are complete, Commercial (CO) and PUD zoning of the Property as described above and/or subdivision and/or development approval for development of the Property which they in their sole discretion find acceptable, Owner, CDSG, and the City stipulate and agree, pursuant to C.R.S. §31-12-501, that it shall be in the best interest of the City that the Property (or a portion of thereof) be de-annexed from the City. In such event, the City agrees that it shall initiate de-annexation proceedings, and to take all steps necessary to effect the de-annexation. The City further acknowledges and agrees that de-annexation is not prohibited by the City Charter or Municipal Code and ordinances, and that the City will not amend its ordinances to preclude a de-annexation permitted hereunder. The Parties' right to de-annex shall be in addition to any other rights available to them at law or under this Agreement. Upon the de-annexation of the Property (or portion thereof) from the municipal boundaries and specific jurisdiction of the City, the City agrees that it shall convey, assign, transfer and quitclaim to Owner or their successors and assigns, any and all water rights (the public dedication of which is more fully described by Section 6 hereof) previously dedicated by Owner hereunder to the City for the public use and benefit.

16. **Assignment.** The parties agree and acknowledge that the rights and obligations of Owner and CDSG under this Agreement may be assigned by them to persons or entities acquiring title to the Property or a portion thereof without the prior consent of the City if, and only if, such assignee agrees in writing to be bound by the terms and conditions of this Agreement, and the Owner or CDSG, as applicable, shall give notice to the City of any such conveyance, together with the assignee's written agreement to be bound by the terms and conditions of this Agreement.

17. **Waiver of Defects.** In executing this Agreement, Owner and CDSG waive all objections either may have concerning defects, if any, in the formalities whereby it is executed, or concerning the power of the City to impose conditions on Owner or CDSG as set forth herein, and concerning the procedure, substance and form of the ordinances or resolutions adopting this Agreement.

18. **Final Agreement.** This Agreement supersedes and controls all prior written and oral agreements and representations relating to the annexation of the Property to the City, and is the total integrated agreement between the City, Owner, and CDSG.

19. **Modifications.** This Agreement shall not be amended except by subsequent written agreement between the Parties hereto.

20. **Release of Liability.** It is expressly understood that the City cannot legally be bound by the representations of any of its officers or agents or their designees except in accordance with the City Code, City ordinances and the laws of the State of Colorado. Owner and CDSG, when dealing with the City, act at their own risk as to any representation or undertaking by the City officers, agents or their designees which is subsequently held unlawful by a court of law.

21. **Captions.** The captions in this Agreement are inserted only for convenience and in no way define, limit, or prescribe the scope or intent of this Agreement or any part thereof.

22. **Binding Effect.** This Agreement shall be binding upon and inure to the benefit of the Parties hereto and their respective heirs, successors, and assigns.

23. **Severability.** If any provision(s) of this Agreement shall be determined to be void or invalid by a court of competent jurisdiction, then such determination shall not affect any other provision hereof, all of which other provisions shall remain in full force and effect. It is the intention of the parties hereto that, if any provision of this Agreement is capable of two constructions, one of which would render the provision void, and the other of which would render the provision valid, then the provision shall have the meaning that renders it valid.

24. **Governing Law.** The laws of the State of Colorado shall govern the validity, performance, and enforcement of this Agreement. Should either party institute legal suit or action for enforcement of any obligation contained herein, it is agreed that the venue of such suit or action shall be in Garfield County, Colorado.

25. **Attorneys' Fees; Survival.** Should this Agreement become the subject of litigation between the City and Owner or CDSG, the prevailing party shall be entitled to attorneys' fees and costs of suit actually incurred, including expert witness fees. All rights concerning remedies and/or attorneys' fees shall survive any termination of this Agreement.

26. **Gender.** Whenever the context shall require, the singular number shall include the plural, the plural the singular, and the use of any gender shall be applicable to all genders.

27. **Counterparts.** This Agreement may be executed in counterparts, each of which shall be deemed an original and all of which, when taken together, shall be deemed one and the same instrument.

28. **Notice.** All notices required under this Agreement shall be in writing and shall be hand-delivered or sent by first class mail postage prepaid, to the addresses of the parties set forth herein. All notices by hand delivery shall be effective upon receipt. All notices by mail shall be considered effective seventy-two (72) hours after deposit in the United States Mail with the proper address as set forth below. Either party by notice so given may change the address to which future notices may be sent.

Notice to the City:

July 19, 2021

City of Glenwood Springs  
c/o Jenn Ooton, Assistant City Manager  
101 West 8<sup>th</sup> Street  
Glenwood Springs, CO 81601

Dear Ms. Ooton,

Thank you for submitting an Annexation Impact Report (dated July 2, 2021) for the 214 Center LLC annexation of a 15.8 acres parcel into the City. The proposed annexation is located in west Glenwood Springs north of the Glenwood Mall, south of Donegan Road, and east of Storm King Road.

The County's Future Land Use map designates the property Urban Growth Area, and the County Zoning is Commercial Limited. The Glenwood Springs 2011 Comprehensive Plan designates the property as a Secondary Commercial.

According to the Annexation Impact Report, the applicant 214 Center Drive LLC, is proposing a Planned Unit Development (PUD) that will include the construction of 360 residential units (a mix of apartments, townhomes, and live work units), along with 12,000 SF of restaurant and clubhouse.

The Garfield County Board of County Commissioners held a public meeting on July 19, 2021, to discuss the annexation. Based on that discussion the Commissioners have the following comments/concerns to be shared with the Glenwood Springs City Council:

1. The proposed project will have considerable impacts on Mel Ray Road, Donegan Road and Storm King Roads. Portions of these roads are currently within the County. If the City annexes the subject property, the County portions of Mel Ray, Donegan and Storm King are to be annexed into the City.
2. The proposed project will increase traffic volumes at the intersections of SH 6 and Donegan Road, SH 6, and Mel Ray Road along with SH 6 and Storm King Road. Improvements to these CDOT intersections should be in place prior to introducing significant project-based traffic into the system.
3. Because the project will exacerbate congestion issues that arise during required evacuations/interstate closure, consideration should be given to the development and implementation of improved evacuation plans.

4. The density and building heights of the proposed project are incompatible with and will have a significant impact on the existing residential neighborhoods.

Sincerely,

John Martin, Chairman

A large, stylized handwritten signature in blue ink, likely belonging to John Martin, Chairman. The signature is written over the "Sincerely," and "John Martin, Chairman" text.

July 23, 2021

Dear members of the Glenwood Springs City Council,

We agree with the Glenwood Springs P&Z who voted 4-0 to recommend denial of both the annexation and rezoning of the 15 acres in a pasture north of the Glenwood Springs Mall in West Glenwood Springs, CO for the proposed housing development. I also learned that apartments are to be constructed on Hwy 6 where the miniature golf course is now located and on land behind Discount Tires. The roads, intersections, and roundabout are not adequate for the increased traffic that would come with this and the other two developments. Will adequate parking off the road be available? Water and sewage infrastructure is not adequate. How about parks and sidewalks to accommodate the increase in population?

A. William Mischlich

PLEASE INCLUDE THIS LETTER IN THE CITY COUNCIL PACKET FOR 29 JULY 2021

City Manager & City Clerk  
101 8th Street  
Glenwood Springs CO 81601

Dear Glenwood City Council

In the 20 years that I have been a Glenwood City resident I have never written a letter to my City Council before, however the annexation, rezoning and development of 480 Donegan Road by R2 Partnership compels me to do so.

These are my concerns:

1. Is There Enough Water? We have just had our water fees raised over 30% this year with further increases to come in future years. The drought appears to be occurring in many regions of our country and with that drought and high temperatures comes wildfires. Our supply of water isn't a given. We must be resourceful and responsible with how our city uses its water supply and consequently we must build responsibly, not driven by the dollar but by safety.
2. Fire Evacuations. In the last 25 years there have been two dangerous fires in West Glenwood Springs. I lived in Mountain Mobile Home Park during the Coal Seam Fire evacuation. During the 111 Fire, West Glenwood was in total gridlock until 10.30pm. If you allow R2 to build 332 more homes in one small area with easily 900 more people evacuation will be even more compromised.
3. Traffic. I have lived off Midland for about nine years now. Increased traffic makes it more and more difficult to turn onto Midland in either direction. How many more cars might be added with 332 more homes several miles away – maybe 600, maybe 900?
4. This development will require MORE school space, medical care, law enforcement, fire responders, grocery stores, parks, and affordable recreation.

Each time you approve these large developments to be built in our small town it exacerbates all of these conditions. I urge you our City Councilors to put a halt on this type of large development and take the safety of your current residents seriously. In the light of Glenwood Canyon being closed every time there is a mudslide consider what you would do if there were another wildfire in South Canyon – how would people escape?

I urge you to protect the current population of Glenwood (both city and county) and help keep residents safe by rejecting the application to annex, rezone and develop this property.

Yours

A handwritten signature in cursive script that reads "Marsha A. Hutson".

Re: Annexation of a 15.818-acre parcel into the municipal limits of the City of Glenwood Springs and Initial Zoning/Rezoning of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

I am writing to express my opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley does need more affordable housing, but to allow 360 units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable.

**Safety:**

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The lack of emergency services in West Glenwood needs to be addressed before adding a significant increase to the population. The new reality is extreme fire danger.

West Glenwood residents got a taste of just how helpless we are last summer after the 111 Fire. Plans are necessary in the event of a natural disaster to counteract how people actually behave in the event of an emergency with no guidance. We, as a community, must start planning now. Our community, neighborhood by neighborhood, household by household, must begin now to organize adequate emergency responses. The physical layout of West Glenwood makes dependence on official services hopelessly inadequate.

**Impact on Traffic:**

COVID has drastically reduced traffic, therefore the traffic study done during these months, no matter the algorithm used to calculate the increase, cannot properly reflect the reality of this area. The addition of 1000+ vehicles and a minimum of 2,200 trips per day to our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

**Comprehensive Plan:**

How is it possible "that the benefits of development are distributed evenly across society" when this building is the equivalent to 7 large complexes here in town? Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23rd Street, and Six Canyons is 381 units in total. This is a proposal of 360 in one location! If sustainability is the key foundation to the plan, it's clear that

the social and environmental aspects of sustainability cannot be met through the proposal now under consideration.

Since 2011, when the current Comprehensive Plan was adopted, there have been monumental shifts in perception of the hazards it left out. It's hopelessly inadequate to meet today's needs, let alone tomorrows. We are fortunate having local resources for cutting edge technologies. We must enlist them. Development and design should demand working with the existing land features, infrastructure, demographic shifts and foreseeable challenges like climate effects on regional weather patterns and drought. Designing for energy efficiency, water conservation, defensibility against fire and flood, ease of maintenance on critical systems – while being minimally dependent on outside services, is possible in this day and age. It's past time that we integrate land use regulations that prioritizes safety and optimally dense communities.

In closing, the neighborhood opposition to these proposals is about a recognition that we have much to do before responsible development on *any* scale makes sense here, from a basic safety perspective. If there is one thing our world has learned during COVID it is that no matter how economically stable we are, how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization to protect ourselves from their most dire impacts. How much we plan for the future, we are nothing if we don't protect our people.

It is my opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated.

Floyd Diemoz has served Glenwood Springs well over the decades, including contributions to public safety, efficiency and community well-being. Designing for the present and future needs of this West Glenwood neighborhood is a challenge worthy of his experience and talents. But this proposed development is not it, and this is not the time to stand on property rights over public safety. Both *can* be served, but only if both are embraced.

I urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

Roberta Elvick

7-19-21

I may not live in West Glenwood, but my job is here. Something as minor as a traffic cop pulling someone over in the west bound lane near Canyon Creek will back up traffic. If there is ever a serious evacuation, people will be running on foot for their lives.

Dear Ms. Stepp,

I am writing to ask you to vote against this development as it is now planned. Our neighborhood can't support the density of proposed housing.

I am not against development of this piece of property, but in my opinion it is better suited to about 50 single family homes, not the over 300 units that are currently proposed.

Thank you for your time and attention to my concern.

PLEASE INCLUDE THIS LETTER IN THE CITY COUNCIL PACKET FOR 29 JULY 2021  
City Manager & City Clerk  
101 8th Street  
Glenwood Springs CO 81601  
Re: Annexation of a 15.818-acre parcel into the municipal limits of the City of Glenwood Springs and  
Initial Zoning/Rezoning of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

Dear Council Members,

We live on Donegan Road, so our concerns about this proposed development are many--and by now you're familiar with them. So I'll be specific about a few things:

Our townhomes (Apple Glen) allow 1-2 cars per unit. Extra vehicles must park elsewhere, and there are many extra vehicles already. So people park on nearby streets in front of other homes. Imagine hundreds more such extra vehicles?

Seriously--water. These are times of drought. Please consider how the situation is likely to get progressively worse and we're already implementing cut-backs.

West Glenwood is not an “Urban” environment. It’s small town-rural. There’s no walkability here other than to Culver’s, Tractor Supply and the car dealerships (people could walk across the street to buy a car, so they could drive across the bridge to the City Market!) Each of those new units will need at least 2 cars and there will be multiple trips a day. This is an Urban proposal. It’s different at the Meadows—where there are shops and restaurants, but dropping a city-block development into our residential neighborhood will be an shock radiating to the entire town of Glenwood.

Rentals are needed but there are other rental developments happening in the vicinity. Meanwhile, markets have changed and it’s nearly impossible for families to find homes to buy. Maybe we need to rethink and shift focus to include more units for purchasing? From a neighborhood perspective it’s better for folks to have some pride of ownership—things stay safer and well taken care of. Hundreds of rental units will mean hundreds and hundreds of people not invested in our neighborhood long-term. And as property values continue to rise, these owner/developers of dense rental complexes will maintain ownership and control—they will benefit financially, not current and future citizens. We also need more units that citizens can own, so they can improve their lives.

Thank you for your service! Thank you for carefully considering all options carefully.

Please listen to your actual constituents who already live here. We should matter more than the folks who might inhabit the future units we’re all imagining right now.

Please consider waiting for a greater-Glenwood Citizen’s consensus about the nature (and density) of future developments.

Please wait.

Thank you,

Trary LaMee, West Glenwood Springs

Hi Jonathan,

I am requesting my concerns in this email be added to the packet for the City Council meeting on July 29th.

In regard to the recent survey of this last week you were quoted in the Glenwood Post Independent as saying:

"I know we on the City Council have a very good understanding of the housing crisis, but it was surprising and interesting to see the rest of the community by and large saw that this was one of the biggest issues in the community."

The same article said that the poll sampled 309 registered voters of the city of Glenwood Springs and one of their top concerns was workforce housing for local workers.

Certainly workforce housing is important, and 309 registered voters should certainly be heard, but I hardly think that they are the "rest of the community by and large".

I have read that there are at least 1,000 plus signatures on a petition to stop this poorly planned development. This "free survey" should tell you of the concern over this development and that it is currently "one of the biggest issues in the community."

In closing, I would urge you to consider the Planning & Zoning Commissions advice to decline this development. They are, after all, your advisory board and well versed in what is best for our community and future growth.

Thank you.

Subject: Annexation, Rezoning and Development of 214 Center Drive owned by Glenwood Partnership/ Floyd Diemoz and Development of 480 Donegan Road by R2 Partnership

PLEASE INCLUDE THIS IN THE CITY COUNCIL PACKET FOR THE 29 JULY 2021 MEETING I am writing to express my opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley does need more affordable housing, but to allow such a large number of units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable.

Safety:

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The lack of emergency services in West Glenwood needs to be addressed before adding a significant increase to the population. The new reality is extreme fire danger.

West Glenwood residents got a taste of just how helpless we are last summer after the 111 Fire. Plans are necessary in the event of a natural disaster to counteract how people actually behave in the event of an emergency with no guidance. We, as a community, must start planning now. Our community, neighborhood by neighborhood, household by household, must begin now to organize adequate emergency responses. The physical layout of West Glenwood makes dependence on official services hopelessly inadequate.

Impact on Traffic:

COVID has drastically reduced traffic, therefore the traffic study done during these months, no matter the algorithm used to calculate the increase, cannot properly reflect the reality of this area. The addition of 1000+ vehicles to our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

Comprehensive Plan:

How is it possible "that the benefits of development are distributed evenly across society" when this building is the equivalent to 7 large complexes here in town? Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23rd Street, and Six Canyons is 381 units in total. This is a proposal of 279 multi-family apartments, 40 townhomes for sale and 13 live-work units in one location! If sustainability is the key foundation to the plan, it's clear that the social and

environmental aspects of sustainability cannot be met through the proposal now under consideration.

Since 2011, when the current Comprehensive Plan was adopted, there have been monumental shifts in perception of the hazards it left out. It's hopelessly inadequate to meet today's needs, let alone tomorrows. We are fortunate

having local resources for cutting edge technologies. We must enlist them. Development and design should demand working with the existing land features, infrastructure, demographic shifts and foreseeable challenges like climate effects on regional weather patterns and drought. Designing for energy efficiency, water conservation, defensibility against fire and flood, ease of maintenance on critical systems – while being minimally dependent on outside services, is possible in this day and age. It's past time that we integrate land use regulations that prioritizes safety and optimally dense communities.

In closing, the neighborhood opposition to these proposals is about a recognition that we have much to do before responsible development on any scale makes sense here, from a basic safety perspective. If there is one thing our world has learned during COVID it is that no matter how economically stable we are, how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization to protect ourselves from their most dire impacts. How much we plan for the future, we are nothing if we don't protect our people.

It is my opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated.

Floyd Diemoz has served Glenwood Springs well over the decades, including contributions to public safety, efficiency and community well-being. Designing for the present and future needs of this West Glenwood neighborhood is a challenge worthy of his experience and talents. But this proposed development is not it, and this is not the time to stand on property rights over public safety. Both can be served, but only if both are embraced.

I urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

Kind regards,  
Corina Jones

**Subject:** Childcare and the 480 Donegan Project

Caution! This message was sent from outside your organization.

[Allow sender](#) | [Block sender](#)

Dear City Council Members,

My name is Penny McDill and I am a retired elementary principal from the Roaring Fork School District. I have always been concerned about the lack of child care in the Roaring Fork Valley and particularly in Glenwood Springs. I see the development of the 480 Donegan Project as a unique opportunity to include a quality Childcare facility in the plans. A Childcare facility would be a great amilety for Glenwood and the area.

A quality childcare facility would include roughly 12,000 square feet of indoor space as well as some outdoor space. There are excellent examples on the front range which include apartments above the facility to help address housing shortages at the same time.

Presently I and others from the community are forming a task force to work with the developer on this initiative provided that the City Council approves the annexation.

I strongly encourage you to approve the annexation of this property.

Sincerely,

Penny McDill

[Allow sender](#) | [Block sender](#)

Dear City Council:

Thank you for taking time to read this email. In short, I am **AGAINST** the proposed development by R2 Partnership and here is why:

1. **SAFETY** – an increase in residences will cause a need for an increase in police officers and firemen. Who is going to pay for this? How will this be addressed?
2. **CAPACITY** – West Glenwood does not have the water and sewer capacity to serve these apartments and their families. Our system is already at capacity thanks to homes housing many more people than what they were originally built for stretching sewer and water capacity.
3. **I 70** – I 70 is closing almost daily. Those of us in West Glenwood will be trapped and not able to get out. Add the increase in cars from the proposed project and we will never get through the ill-planned round

about to get anywhere! And in the case of another fire? Burn scar run-off will continue for a few more years meaning 170 closures.

4. **TRANSIENT POPULATION\*** – by building these apartments, you are only inviting a transient population and that is not how this town was built. You are inviting an increase in the use of our social services coupled with our education, medical and judicial system all with no “return on investment” for the town.
5. **R2 LABOR** – I understand labor will come from Denver or Grand Junction so wages earned will not even stay in the Valley. Where will laborers stay while on the job?
6. **BUILDING MATERIALS**– there is a shortage of building materials and appliances across the country. We do not need R2 to start this project and then walk away leaving a hole in the ground because the project cannot be completed due to shortages in labor or materials.
7. **POOR PLANNING** – you are a “day late and a dollar short” in your planning for “needed” housing; however, do not shove it down the throats of those of that have been in West Glenwood for decades. Lack of planning on your part does not constitute an emergency on our part! Glenwood is not cheap, but why do West Glenwood residents have to be the ones to pay for “affordable” housing?

We moved to Glenwood in 1968 and my mother still lives in the home she and my dad built in 1970. We live above the West Glenwood Golf Club so you are looking to impact our future and safety. This project has been ill-conceived with no thought given to safety, impact on existing West Glenwood residents and the overall quality of life of current Glenwood residents. **DECLINE** this project as nothing good will come of it and due to the reasons cited above.

Thank you!

Katie Fischer Mosquera  
GSHS Graduate 1979

- Glenwood Springs was built by generational families like Bosco, Bolitho/Bell, Diemoz (Adolph & Floyd), Beattie, Hubbard, Nieslanik,

Gerbaz ... other non-generational families such as – Reeves, Delaney, Zimmerman, Petre, Zeder, Fischer, Fergian, Griffenberg etc. These families were not transient – THEY STAYED and BUILT A COMMUNITY! (Do any of you know who started Mid-Continent Coal and Coke? Or Bighorn Toyota? Or LP Gas?)

- A transient population, by definition, sees no need, and has no interest, in being part of the community and making contributions towards a town's future.
- We are out of people who built this town and there is no one coming behind!

Subject: Annexation, Rezoning and Development of 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz and Development of 480 Donegan Road by R2 Partnership

PLEASE INCLUDE THIS IN THE CITY COUNCIL PACKET FOR THE 29 JULY 2021 MEETING

I am writing to express my opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley does need more affordable housing, but to allow such a large number of units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable.

Safety:

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The lack of emergency services in West Glenwood needs to be addressed before adding a significant increase to the population. The new reality is extreme fire danger.

West Glenwood residents got a taste of just how helpless we are last summer after the 111 Fire. Plans are necessary in the event of a natural disaster to counteract how people actually behave in the event of an emergency with no guidance. We, as a community, must start planning now. Our community, neighborhood by neighborhood, household by household, must begin now to organize adequate emergency responses. The physical layout of West Glenwood makes dependence on official services hopelessly inadequate.

Impact on Traffic:

COVID has drastically reduced traffic, therefore the traffic study done during these months, no matter the algorithm used to calculate the increase, cannot properly reflect the reality of this area. The addition of 1000+ vehicles to our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

Over run open space:

Gregory Park in West Glenwood is a small, and very beautiful. My kids and I enjoy spending time there. This little park has been quite magical for my children as the stream and all the trees have helped set a wonderful scene for my kids to use their vivid imaginations to create hours of play. When the urban development crash lands on our side of Glenwood it will definitely upset the quietness, and openness of this small area. There are very few places in Glenwood now where kids can go to play , or where families of our community can go

To be with one another. Basalt has Crown Mountain park, Rifle has a splash park, even New Castle has a decent skate bike park. We need more open space or at least not to overrun what little space we have now.

Comprehensive Plan:

How is it possible “that the benefits of development are distributed evenly across society” when this building is the equivalent to 7 large complexes here in town? Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23rd Street, and Six Canyons is 381 units in total. This is a proposal of 279 multi-family apartments, 40 townhomes for sale and 13 live-work units in one location! If sustainability is the key foundation to the plan, it’s clear that the social and environmental aspects of sustainability cannot be met through the proposal now under consideration.

Since 2011, when the current Comprehensive Plan was adopted, there have been monumental shifts in perception of the hazards it left out. It’s hopelessly inadequate to meet today’s needs, let alone tomorrows. We are fortunate having local resources for cutting edge technologies. We must enlist them. Development and design should demand working with the existing land features, infrastructure, demographic shifts and foreseeable challenges like climate effects on regional weather patterns and drought. Designing for energy efficiency, water conservation, defensibility against fire and flood, ease of maintenance on critical systems – while being minimally dependent on outside services, is possible in this day and age. It’s past time that we integrate land use regulations that prioritizes safety and optimally dense communities.

In closing, the neighborhood opposition to these proposals is about a recognition that we have much to do before responsible development on *any* scale makes sense here, from a basic safety perspective. If there is one thing our world has learned during COVID it is that no matter how economically stable we are, how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization to protect ourselves from their most dire impacts. How much we plan for the future, we are nothing if we don’t protect our people.

It is my opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated.

Floyd Diemoz has served Glenwood Springs well over the decades, including contributions to public safety, efficiency and community well-being. Designing for the present and future needs of this West Glenwood neighborhood is a challenge worthy of his experience and talents. But this proposed development is not it, and this is not the time to stand on property rights over public safety. Both *can* be served, but only if both are embraced.

I hope that this development is not being taken lightly? Growth has to occur but to what extent do we let revenue motivate our decisions? I hope that our concerns are being heard and taken very seriously. This valley is a gem and every bit of land here is priceless. As a community we need to think hard about what Glenwood Springs should look like in the years to come. Do we want a city in a small town or do we still want to keep all the charm and beauty that many have moved to this valley for. As of right now we are a rural city and not a urban city but these developers want to create a urban monstrosity. They do not live here and honestly have no investment in our community other than making money off of it. We need a fire department first, some shared open space and then maybe a nice little housing community. Make it tasteful and also protect the citizens who live on this side of Glenwood first.

As our population grows and the need for housing increases, let's also consider our environment and where most of these people are working. If we as a community are housing most of Aspen's workers then perhaps, for the sake of emissions, consider not making it our priority or problem to build more affordable housing, perhaps, instead, let Aspen create more affordable housing for their employees.

We need jobs in Glenwood and workers here too.

I urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

**PLEASE INCLUDE THIS LETTER IN THE CITY COUNCIL PACKET  
FOR THE JULY 29 MEETING**

I am writing to add my voice to those of the many fellow residents of West Glenwood Springs who have expressed their deep concerns about, and opposition to, the annexation and rezoning of the pasture property at 214 Center Drive by R2 Partnership. As a long-time home-owner in West Glenwood Springs who plans to live my remaining years here, I implore you to seriously consider the following critical issues:

**1. Evacuation routes.** The recurring and seemingly inevitable wildland fires that continue to threaten our area require that we have effective evacuation routes to protect us. Recent history has shown that such routes do not exist. *What is the plan* to take into account the approximately 500-600 additional vehicles that this 300-unit complex will add to currently inadequate evacuation routes?

**2. Traffic.** Recurring closures of I-70 because of mud slides, traffic

accidents, other emergencies continue to cause massive, lengthy back-ups of traffic in West Glenwood. These closures and gridlocks prevent medical and police services from reaching homes in this area of 3,500 residents, which is more than one third of the population of the entire city of Glenwood Springs. *What is the plan* to address the issue of access into and out of West Glenwood during such closures, when approximately 600-900 (25 percent) more residents are added?

I respectfully urge you to deny the development of this or any other proposal that would bring significant numbers of additional vehicles to West Glenwood until these and doubtless other negative impacts are addressed and the solutions implemented. Before increasing our population by approximately 25 percent, we need improved evacuation routes, an updated and better equipped fire department, and upgraded local roads capable of safely and efficiently handling additional traffic.

Thank you for taking these issues into consideration.

PLEASE INCLUDE THIS LETTER IN THE CITY COUNCIL PACKET FOR 29 JULY 2021

Re: Annexation of a 15.818-acre parcel into the municipal limits of the City of Glenwood Springs and Initial Zoning/Rezoning of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

There are a number of reasons to oppose the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and the 12.285-acre PUD proposal that's currently under contract with R2 Partnership LLC. I know that you have both received letters addressing the safety, the impact on traffic especially here in West Glenwood, and how this proposal fits into (or does not) the city's comprehensive plan.

So I'll not repeat all of the information that you've already received. Instead I wish to speak from a very personal perspective that addresses the issue of safety. Living here in West Glenwood in 2002 when the rapidly growing and rapidly approaching Coal Seam Fire resulted in hurried evacuations, my biggest fear about this proposed development centers around the ever-growing incidence of wildfires. It is hard to imagine the fear and the panic we West Glenwood residents were feeling as well as what we were seeing as we evacuated, the fire reaching so close to us as our cars inched along the roads to safety.

There was also the dilemma: which way do we go to get out of the fire's path- south to get on I-70 east or south through downtown Glenwood Springs? Certainly not west on I-70! Our family and the many other residents who lived through this wildfire will not forget looking back at our homes wondering if we'd return to them still standing and then, looking forward hoping that all of us on the roads trying to evacuate would come to no harm.

So now imagine this same scene with the recent increasing threat of wildfires and add perhaps hundreds and hundreds more vehicles into the mix. How can we possibly approve this proposal?

Thank you for your consideration.

Thelma Zabel

**Reply-To:** [lindyenwold@aol.com](mailto:lindyenwold@aol.com)

To whom it concerns: I am in Texas and unable to get to meetings in person. I recently experienced visiting Aspen by car from Glenwood. The traffic was horrendous going into, out of, and with trying to find parking close to stores and restaurants. We gambled that they were not checking the 2 hour very inadequate limit! The town of Glenwood and West Glenwood already have traffic issues. The Donegan project will compound that. I have previously written about concerns about that, especially concerning emergency evacuations. Years ago, I was caught in one of the fire traffic jams and had to drive over the highway grass areas and shoulders to escape West Glenwood, with children. Orange smoke was showing in my back window...only to get into another traffic jam on 1-70 East into town. Going West on 1-70 was closed. The frontage road into town was also jammed. What will happen with that many more residents that are proposed too occupy the units? We bought the Mountain Shadows property because it was a family friendly area, with mountain views, horses in pastures, country roads, other home and quiet streets. We didn't buy in town, didn't want the 'city traffic' atmosphere. My children and now their grandchildren enjoy riding bikes and such from our home around the neighborhood, down to Gregory Park. That will not be possible with the development, as drivers on Donegan and lower Mel Rey have increased useage with additional houses already here, coming from Storm King area...this is very predictable! We still have children's chalk drawings on Mt. Shadows Drive, families walk to local restaurants, they walk to enjoy the peace and quiet, in the safety of our area! We recently experienced power outages after a mild storm. Is the city planning on taking care of the electrical impact, sewer, improved roads, traffic load, improved evacuation plans that the proposed development will require ??? We just experieinced I 70 problems, the canyon shut downs Those problems aren't being handled well with the popluation we already have! They shut access to us from Dotsero to Rifle! Why? To stop bottlenecking.....we already have bottlenecking with workers/travelers/homeowners in the morning and afternoon shifts! Enough! It's only going to get much worse! I have made some points that I hope will be considered, but there are many more. I regret that I willl be out of town and not able to show up in person. Respectfully, Belinda (Lindy) Enewold, 266 Mt. Shadows Drive, Glenwood Springs, CO, 956-346-2660

Please include these concerns and/or this letter in the City Council Packet on the Annexation of 214 Donegan.

I am writing to express my opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley does need more affordable housing, but to allow such a large number of units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable.

**Safety:**

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The lack of emergency services in West Glenwood needs to be addressed before adding a significant increase to the population. The new reality is extreme fire danger.

West Glenwood residents got a taste of just how helpless we are last summer after the 111 Fire. Plans are necessary in the event of a natural disaster to counteract how people actually behave in the event of an emergency with no guidance. We, as a community, must start planning now. Our community, neighborhood by neighborhood, household by household, must begin now to organize adequate emergency responses. The physical layout of West Glenwood makes dependence on official services hopelessly inadequate.

**Impact on Traffic:**

COVID has drastically reduced traffic, therefore the traffic study done during these months, no matter the algorithm used to calculate the increase, cannot properly reflect the reality of this area. The addition of 1000+ vehicles to our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

**Over run open space:**

Gregory Park in West Glenwood is a small, and very beautiful. My kids and I enjoy spending time there. This little park has been quite magical for my children as the stream and all the trees have helped set a wonderful scene for my kids to use their vivid imaginations to create hours of play. When the urban development crash lands on our side of Glenwood it will definitely upset the quietness, and openness of this small area. There are very few places in Glenwood now where kids can go to play, or where families of our community can go to be with one another. Basalt has Crown Mountain park, Rifle has a splash park, even New Castle has a decent skate bike park. We need more open space or at least not to overrun what little space we have now.

**Comprehensive Plan:**

How is it possible "that the benefits of development are distributed evenly across society" when this building is the equivalent to 7 large complexes here in town? Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23rd Street, and Six Canyons is 381 units in total. This is a proposal of 279 multi-family apartments, 40 townhomes for sale and 13 live-work units in one location! If sustainability is the key foundation to the plan, it's clear that the social and environmental aspects of sustainability cannot be met through the proposal now under consideration.

Since 2011, when the current Comprehensive Plan was adopted, there have been monumental shifts in perception of the hazards it left out. It's hopelessly inadequate to meet today's needs, let alone tomorrows. We are fortunate having local resources for cutting edge technologies. We must enlist them. Development and design should demand working with the existing land features, infrastructure, demographic shifts and foreseeable challenges like climate effects on regional weather patterns and drought. Designing for energy efficiency, water conservation, defensibility against fire and flood, ease of maintenance on critical systems – while being minimally dependent on outside services, is possible in this day and age. It's

past time that we integrate land use regulations that prioritizes safety and optimally dense communities.

In closing, the neighborhood opposition to these proposals is about a recognition that we have much to do before responsible development on *any* scale makes sense here, from a basic safety perspective. If there is one thing our world has learned during COVID it is that no matter how economically stable we are, how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization to protect ourselves from their most dire impacts. How much we plan for the future, we are nothing if we don't protect our people.

It is my opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated.

Floyd Diemoz has served Glenwood Springs well over the decades, including contributions to public safety, efficiency and community well-being. Designing for the present and future needs of this West Glenwood neighborhood is a challenge worthy of his experience and talents. But this proposed development is not it, and this is not the time to stand on property rights over public safety. Both *can* be served, but only if both are embraced.

I hope that this development is not being taken lightly? Growth has to occur but to what extent do we let revenue motivate our decisions? I hope that our concerns are being heard and taken very seriously. This valley is a gem and every bit of land here is priceless. As a community we need to think hard about what Glenwood Springs should look like in the years to come. Do we want a city in a small town or do we still want to keep all the charm and beauty that many have moved to this valley for. As of right now we are a rural city and not a urban city but these developers want to create a urban monstrosity. They do not live here and honestly have no investment in our community other than making money off of it. We need a fire department first, some shared open space and then maybe a nice little housing community. Make it tasteful and also protect the citizens who live on this side of Glenwood first.

As our population grows and the need for housing increases, let's also consider our environment and where most of these people are working. If we as a community are housing most of Aspen's workers then perhaps, for the sake of emissions, consider not making it our priority or problem to build more affordable housing, perhaps, instead, let Aspen create more affordable housing for their employees. We need jobs in Glenwood and workers here too.

I urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

Subject: Annexation of 214 Center Drive

To Glenwood Springs City council,

I am writing this letter about the proposed annexation of 214 Center Drive. I am not against developing this site. I am against this specific development and its impact on the small community of Glenwood Springs, for the reasons below.

I know that most letters will include this and it is the biggest safety

issue, fire safety and evacuation is the main concern for most of the population of West Glenwood Springs, as it should be with the severe drought of the last couple of years and the limited amount of ways to evacuate and adding more people and cars to this will only make that problem worse. Their needs to be a comprehensive fire study done. It needs to be completed and implemented before anything gets built on this site.

Their needs to be a new West Glenwood Springs fire station built before anything gets built on this site. As Fire Chief Tillotson stated in the Planning and Zoning meeting the West Glenwood Springs fire station is currently far too small for the area that it supports and is obsolete. That is a scary thing to hear not only from a fire standpoint but for all medical emergencies as well.

The impact on local traffic and roads will be massive and the small city streets that we use to access West Glenwood Springs will not be able to handle the increased traffic. The infrastructure will have to be majorly improved to be able to support something like this. I still do not believe that any of the traffic studies R2 has done to this point is anywhere near accurate.

Also, at this point in time I do not believe the City of Glenwood Springs can provide enough water for this development. We had an emergency notification go out at 5:30 in the morning for residents of Glenwood Springs to cut water use inside and out because levels had fallen dangerously low. This is on top of all the restrictions we have been under this spring and summer. You expect the citizens of West Glenwood Springs to believe the added residents wouldn't effect our water supply that already is strained and having issues?

Another issue is, the current residents of West Glenwood Springs only have Gregory Park which is one of the smallest city parks in town and we are going to add all these new units without providing current and new residents with any more open space or parklands. This little park won't be able to handle the increased demand from something of this size. As per the developer in the Planning and Zoning meeting any open space areas would be available ONLY to the residence of the complex. This does not meet the necessary regulations for open spaces.

As for the specifics of the actual development proposal. It's WAY too big! It's that simple, the buildings are way too tall; from the apartment complexes to the townhomes. Their are way to many units. They don't have enough parking inside the development so the streets around it will become a parking lot along with the mall for all the vehicles from this proposed development. It does not fit Glenwood Springs small town feel. It feels more like Denver or any other major city on the front range, not our small mountain town. The developer in the P&Z meeting regularly referred to the development as an "urban" development. We are not an urban community, we are a rural community surrounded by other rural communities. We want to keep this feel for our area. Our families and children live here and we want it to remain a sweet community. There were many from this area that are not wanting this size of a complex going in in our back yard. We love our people, neighbors and community.

I believe that if the City of Glenwood Springs keeps approving developments like the one proposed for 214 Center Drive and all the other ones around town, this city will be nothing but apartment complexes and hotels, and the people that work and own houses in Glenwood Springs would rather move then stay in a city like that. So I hope that you members of the city council take the advise of the people that live here, and the planning and zoning commissioners and vote this down in its current format. Their has to be something better that will benefit the city, the residents of Glenwood Springs, and the people who visit here. Not just some developer from back east.

Thank you for reading my concerns and opinions about the proposed annexation and development of 214 Center Drive.

Carrie Bowen  
35 Gamba Dr, Glenwood Springs

Sent from my iPad

I would like to set the record straight. We the residents of West Glenwood are NOT against the Diemoz family selling their property, like many of you have been told. What we are concerned about is the magnitude of the development that R2 Partnership/Mr. Rosenberg is proposing. R2 is planning a 360 unit complex that Mr. Rosenberg claims that he can keep at 600 residents. Just last summer Mr. Rosenberg stated he could not control the number of residents. We all know what it is like here. Multiple families living in single family homes. Two of the buildings in this proposed development would be 53 feet, that is five stories. That is the same height as Six Canyons. Four stories is code. The GWS fire chief has even said that our fire department can not fight a fire in a building of the height. Our very own Mayor was on CNN telling about our drought and fire danger in our region. Mayor Godes even commented that no more people should move here. Another concern is the amount of traffic this development will produce. They are guesstimating 2200 additional trips on Donegan a day. Which would in turn mean down Mel Rey into the 114 round about. You county residents that commute up valley everyday should be furious with the additional cars in the West Glenwood round about. The state of Colorado must do a traffic study before anymore residential units are allowed to be built. Mr. Rosenberg has also decided that he would rather pay a fine in lieu of providing green space and dedicated land for schools which is required. A housing study was done that Mr. Rosenberg keeps referring to. Yes, it says that we are short 2000 rental units. BUT what Mr. Rosenberg is leaving out is that the "study area" included Aspen to Glenwood, Edwards to Parachute. So this entire region is supposedly low on rental units, not just Glenwood! If you have ever had to flee your home from a wildfire like many of the residents of West Glenwood you should understand the fear and stress we are experiencing. I believe that R2/Barry Rosenberg is trying to push this development through on the good name and the coat tails of the Diemoz family. Something to think about, look at the legacy that Doc Jackson has left for our valley. What kind of legacy is the Diemoz family leaving?

**Subject:** West Glenwood Annexation

>> Dear Paula,

>> I write to express my opposition to the West Glenwood Development and Annexation. I have just come from hiking the No Name Jess Weaver trail. While there is still beauty on this trail, the creek has changed significantly in its flow as well as in the quality of the water. I could palpably smell the chemicals from the slurry dropped last August as a result of the Grizzly Creek fire in the areas where the fresh slides have occurred on this trail. I noticed that the intake for Glenwood Springs Water has been shut off, thankfully, given the quality of the water that is currently running from the creek. I encourage you, if you have not already done so, to take a walk up this trail and consider the future of Glenwood Springs.

>> Water is life and I am concerned at the consequences of the fire last summer. It is long overdue that Glenwood Residents stand up for a vision of our city that puts our quality of life and the preservation of our environment in front of and prioritised over a vision of economic growth and mechanistic utilitarianism. The West Glenwood Pasture Development is only a symptom of our out of balanced action favouring economic growth over the protection of our resources. It is important and my hope that the Glenwood Springs City Council will support responsibly built infrastructure that protects these resources and the people that live in this town. The time is now for our city leaders, to step up and oppose continued large scale high density housing growth without having the infrastructure in place to support it. The planning and zoning commission has voted no for the annexation and my hope is that the council will honor these views and do the same.

>> Respectfully,

>> Jane Szucs

Council members ,  
STORM KING July 6, 1994 :

At this meeting we in W. Glenwood , can finally say to you that we are relieved to have a chance to tell you what it means to us when the decisions you make have the potential to change and impact our lives ....forever.

The wonderful thing about a community.. is that most people already know, or have come to know , the significance of this mountain .

For some , a memorial anniversary for Storm King is a special occasion , one day a year .. Others can never forget ..

lessons learned long ago. In the aftermath of that fire , city officials vowed to  
“never forget “

There was a year long investigation shortly after , A COMPREHENSIVE manual was published as well as a continually UPDATED website . That website is full of stories about what happened along the “ chain of command :

“ NOT paying attention “

.. to current reality was the overriding conclusion of the report. There is a firefighter’s training manual UPDATED every day online . Hotshot jumpers are reminded daily to PAUSE and REFLECT before jumping into situations that are out of their control.

This applies to both leaders and those hotshots on the line. The investigation moved from finger pointing , to CONTINUOUS online learning and training in order to seek BETTER outcome. Knowing that perfect safety is not possible , still we say “ let it never again happen. Thousands of lives is a lot of lives to lose .

•PRINCIPAL FINDINGS•

.....”No simple solution or novel approach exists that will significantly improve safety

..... The tragedies of 1994 were a WAKE UP CALL. No amount of sophisticated equipment and technology can replace personal and institutional VALUES that place safety above all else.

..... BOTH management and individuals are expected to be responsible and accountable for their actions. “

•The entire manual really is a lesson in Leadership The primary message to all individuals in the chain of command :

•PAUSE and REFLECT before jumping into the line of danger .

\*\*\*\*\*

Citizens DO have a right to ask of our officials that reasonable efforts be made to provide safety ABOVE all else for the greater good of Glenwood. Adding thousands of more people near exits 114 and 116.. will certainly some day , result in avoidable tragedy .

**Subject:** Annexation and Rezoning of 214 Center Drive and the Development of 480 Donegan Road.

I am writing to oppose the development of this Pasture for many reasons but mainly because the possibility of the SAFETY of the residents in West Glenwood with the fire danger.

West Glenwood had a taste of how helpless we are when last summer with the 111Fire and the gridlock went on for 5+ hours. Thousands of lives could have been

lost and this seems to be on deaf ears with the Rosenberg's and including the Diemoz's for the sake of what? I happened to leave the Meadows and entered Midland at 7:00pm at Target's exit only to pull into my driveway 2.3 miles distance at 10:30 pm. To think of developing still this large of a development with the impact of the traffic during a fire and human life could be lost is unconceivable to me. An evacuation plan needs to be addressed before any further discussion of the Development of this 12.5 acres. I understand there is not a water shortage so why am I a consumer for 49 years restricted by the tenants in these units will have plenty of water.

The number of supposed shortage of housing is 2,000 and 6 Canyon has been built after P&Z said NO, the Meadows are building more Lofts, land by Mtn. View Church has build housing and yet none of these get deducted from the 2,000.

The City of Glenwood has failed Senior Citizens in many ways and one in particular with home owned one-level homes. Many senior friends have had to move because of the lack of this type of housing. Population is growing but business are leaving and nothing is coming in. Target was going to buy the old Natural Grocers and they changed their minds-why did they not do that and what did they see. We need another Grocery Store and one that is in competition with Kroeger. Safeway is prime location land and hasn't been purchased. Rumors had it that Murdoch's was coming to town and occupy

the many vacant business by Wal-Mart and that did not happen. No movie theatre, good places for teenage to hang out but and overdose of Marijuana shops. And it goes on and on.

There is a letter to the Editor in today's paper from a Glenwood Park resident saying "the town is ruined enough from excessive growth" and also says " you all should be canned". Not complimentary to City Council (Tony usually does the right thing for the citizens). Just in case you haven't read it you need to know how most of Glenwood feels about the current growth.

In closing I pray you all will do the right thing and vote against this. Rumor has it that Steve Davis has bought a house in Texas so if that means you intend to move you should not be voting on the impact of this development, Jonathan was on CNN stating that we should not be building for growth (I paraphrased it as I did not see the interview), Ingrid has lived in West Glenwood along with many relatives and still has relatives here, so let's have the courage to do the right thing for the SAFETY of all of Glenwood.

I will leave you with a Bible message and hope that you read it: 1Timoth 6:10/

July 28, 2021

Dear Mr. Hyatt,

I am providing comments to the proposed annexation and rezoning of 15.8 acres of property located at 214 Center Drive, Project title 480 Donegan. 12.285 acres of the property is proposed for a high-density Planned Unit Development (PUD) consisting of 272 housing units. I have resided at the address above since 1989 and live within 0.2 miles from the property proposed for annexation/rezoning. I am not opposed to development of the subject property, but I am concerned about the level/intensity of the PUD being proposed by the applicant and developer. I recognize the applicant's right to develop the property in accordance with existing county zoning (commercial limited). It is not currently a right to develop high-density residential units. It is my preference that the subject property remain zoned as commercial or to a lower density residential area of single-family homes. In the event annexation and rezoning to PUD is approved, conditions must be established to protect public health, safety, the welfare of the City and surrounding neighborhood. Modification of the PUD will be necessary to be more compatible with and prevent irreparable harm to the surrounding neighborhood. My comments below are specific to the 12.285 acres proposed for PUD.

## **I. Safety**

### **Comment:**

An emergency evacuation study of West Glenwood Springs needs to be commissioned. The PUD would add approximately 800 people to the community. Safe and expeditious evacuation of the area in the event of wildfire, debris flow or another catastrophic event would be adversely impacted. Those impacts must be mitigated. An emergency evacuation plan should also be prepared. The City should select the contractor who will conduct the study to avoid any conflict of interest. The applicant should contribute all funding necessary for the study to the City of Glenwood Springs.

### **Background/Rationale:**

Having lived here for here for 32 years, I have experienced several wildfires near West Glenwood Springs including Storm King (1994), Coal Seam (2002), the 113 fire in South Canyon (2020), and Grizzley Creek (2020). My family and I were evacuated during the Coal Seam Fire. As you are probably aware, this region has experienced an approximate 20-year drying out period. According to the most recent U.S. Drought Monitor, our area is classified as being in exceptional drought. Climate data is clear that drought conditions are occurring with more frequency in this region, and I do not see that changing anytime soon. As a result, we can expect wildfires in this area to occur with more frequency, intensity and for longer duration. It is not a matter of if but when we will experience the next catastrophic wildfire.

During the 2002 Coal Seam fire, I can recall how difficult it was for residents in West Glenwood Springs to evacuate the area in an expeditious manner. The August 5, 2020 the 113 fire occurred on the north side of I-70, mile marker 113 (near South Canyon). That resulted in closure of the Interstate and backed up traffic in the West Glenwood Springs area along Mel Rey, Donegan and Storm King Roads. This left residents of the area trapped in the event of evacuation. According to reports by West Glenwood Springs residents, it took over three hours to reach their homes from the other side of town. A comment made by Trent Hyatt during the March 23, 2021 Planning and Zoning Commission meeting seemed to downplay the traffic issue indicating that most of the vehicles were associated more with people trying to get out of town that did not live here. They were not from people who live in West Glenwood. I assume the point was that increased population from the proposed PUD would not cause a traffic issue with fire evacuation. It does not matter where the traffic came from. We were still trapped and could not evacuate if conditions warranted. The problem also existed with the Coal Seam Fire. Since then, population and development (e.g., Two Rivers School, auto dealerships, etc.) of the area has increased and the addition of 800 people from the PUD will only exasperates the problem. The top priority of government should be to ensure the safety of its citizens.

## **II. Water**

### **Comment:**

A thorough analysis must be done to analyze impact to the water system of the City of Glenwood Springs from the PUD. As part of the study, the cumulative impact to the water system for all reasonably foreseeable future development needs to be addressed. The continued trend of increased frequency and duration of drought (i.e., aridification, mega-drought) must be addressed as well.

### **Background/Rationale:**

Last August, Glenwood Springs residents were placed on water restrictions. Those restrictions remain in place. Odd numbered home addresses water on odd days of the month, and even numbered home addresses could water on even days of the month. Watering can only occur before 10 a.m. or after 6 p.m. In addition, all lawn watering was prohibited for a brief period. Water restrictions were put in place because the Grizzly Creek Fire forced the closure of the Grizzly Creek water intake. While I acknowledge this was a unique situation, we must assume these events can and will occur in the future. In fact, two separate debris flows occurred on June 26 and 27, 2021 which impacted the City's water intake in No Name Creek. This resulted in limiting water use to essential uses from June 26 to June 30 (according to the latest update). Continued frequency and duration of drought will also result in reduced flows to streams, rivers, and lower water tables. Those scenarios must be considered when determining whether the City's water system will have the capacity to support the proposed PUD including any future developments.

## **III. Traffic**

### **Comment:**

Another traffic study must be conducted to better determine impacts from the PUD. At a minimum, the study should be expanded to include impacts to Mel Ray Road and the roundabouts in West Glenwood Springs. Cumulative impacts from traffic associated with the Two Rivers Charter School and possible redevelopment of the mall must also be addressed. Use of the easement through the mall should receive more serious consideration as a main entrance to the PUD. That would reduce traffic along Donegan, Storm King and Mel Ray Roads.

**Background/Rationale:**

Although a traffic study has already been conducted, it is my understanding that it was done during a time when the economy was shut down due to COVID. That is unacceptable because there was far less traffic during that time because many people were not working or working from home. Further, the contractor conducting the study concluded there would be no impact to traffic associated with the Two Rivers Charter School because PUD peak hour traffic would occur at different times. That ignores the impacts to other West Glenwood Springs residents who will be confronted with traffic from both the PUD and the school. Currently, traffic is backed up on Storm King Road and Center Drive every weekday morning and afternoon from parents dropping off or picking up their children. The school does not have sufficient space to accommodate all the traffic mentioned above. Additional traffic from the PUD will only compound the situation.

The current study also focused on impacts to Donegan Road, Storm King Road and Highway 6. Impacts to Mel Ray were glossed over because it was assumed most PUD traffic would be using Storm King Road. Since a main entrance to the PUD will be on Donegan (across from Chapparral Circle), it stands to reason that much of the traffic will also occur on Mel Ray Road. That is because Mel Ray offers the shorter distance (and fewer turns) to I-70, downtown Glenwood Springs, and up valley towards Aspen.

**IV. Parking****Comment:**

An in-depth analysis should be conducted to determine whether the current planned PUD parking will be sufficient to accommodate 800 tenants including visitors. Evaluation of exiting high-density developments should be conducted to determine if parking has adequate for residents and visitors.

**Background/Rationale:**

The PUD proposed 1.7 spaces/housing unit which include both internal and street parking. I do not have an exact figure for street parking included for the PUD. Since street parking will also be available to the public, those spaces should not be considered for meeting parking requirements of the PUD. Currently, most of the parking spaces along Donegan Road, Storm King Road (school buses), and Center Drive are utilized by the Two Rivers Charter School as that facility lacks sufficient parking. The PUD street parking will likely be occupied by the school as well. Sufficient internal parking be provided for the PUD to avoid turning West Glenwood residential streets into a parking lot. The applicant has indicated they plan to limit how many vehicles PUD residents are allowed. I do not believe it is possible to limit parking to 1.7 per unit (because no one drives 0.7 of a vehicle). They will have to say either one or two vehicles/unit.

**V. Neighborhood Compatibility****Comment:**

Construction of single-family homes within the proposed PUD would be a best option to blend in with the existing neighborhood. If the high-density PUD is approved, it should be modified to improve transition from existing homes along the north side of Donegan Road. Single-family homes should be constructed along the north side of the PUD which transition to a more high-density development further south of the property towards the mall. A visual impact analysis of the PUD must be conducted. Mitigation should be adopted so views from the adjacent west Glenwood residential units are not obstructed.

**Background/Rationale:**

City Planning and Development staff have indicated that the PUD provides a good transition from residential units (Western Hills Subdivision on the north side) to commercial development (mall to the south side). I disagree. Having high-density rental apartments and townhomes adjacent to single family one-story homes that are owned does not provide a good transition. It does not blend well with the existing neighborhood to the north. Construction of lower density single-family homes on the north side (adjacent to Donegan Road) of the PUD would improve the transition. The best alternative would have all PUD housing units be single-family residents to reduce density, improve safety, and mitigate traffic issues. Allowing ownership of those homes would also help satisfy a shortage need for the City. I understand that alternative would be less profitable for the landowner and developer. Higher density would maximize revenues; however, it is the City's responsibility to ensure the health, safety, and welfare of its citizens. That should not be compromised to satisfy the applicant's business model (i.e., construction of high-density rental units) or to maximize profits.

City Planning and Development staff also are supportive of the PUD with the rationale that the 29 to 30 units per acre are not inconsistent with other recent high-density development. My response - two wrongs do not make a right. In addition, there are no high-density developments of this magnitude present anywhere in the West Glenwood Springs area.

The PUD has building heights range from 30 feet adjacent to Donegan Road and 53 feet on the southern portion of the PUD near the mall. I appreciate design efforts to transition building heights corresponding to the slope of the property; however, all residential houses on the north side of Donegan Road are one-story. Efforts should be made to minimize the height of the PUD buildings along the north side of Donegan Road. Further, the 53-foot height proposed for the southern buildings would make them the tallest in West Glenwood.

## **VI. Other Impacts**

### **Comment:**

Impacts of the PUD to the fundamental facilities, services, and systems serving a city should be analyzed and mitigated. These include but are not limited to the following: fire department, police department, schools, sewer system, medical facilities, parks, grocery store, hiking/biking roads and trails (e.g., Mitchell Creek).

### **Background/Rationale:**

Proposed high-density housing developments can have impacts that are far greater than the immediate area. Impact analysis is often focused on the immediate area of the proposed development rather than the effects to a broader area (a classic - can't see the forest for the trees). Population growth can reach a point where the carrying capacity of the City's infrastructure, services, facilities are reached. That compromises the safety and quality of life to all citizens of the city.

This concludes my comments, issues and concerns.

Warm Regards,

Michael R. Kinser

Dear esteemed City Council members,

With yet another couple of related challenging decisions you are facing, I want to share a few thoughts on the proposed changes in West Glenwood Springs. I wanted to help long-time friends and neighbors living in that portion of our community. I dipped my toe into the waters and have become quite submersed with their efforts wanting to help guide, educate and inform them with the Annexation Petition by Glenwood Partnership/Floyd Diemoz and the PUD zoning request by R2 Partners.

As per the recent news of R2 being under contract to purchase the West Glenwood Mall and their “revisions” heard second-hand to their initial PUD proposal for the vacant portion of the parcel. I’d attended virtually some of the GS P&Z public hearings, another with some R2 representatives and also studied many of their submitted documents and the GS Municipal Code.

That said, at the time I began writing this, there was no agenda or related documents for the July 29<sup>th</sup> Special City Council meeting so want to share my concerns and suggestions based on previous documentation and some of what I have been able to review/digest within current context as things being “in flux”. I’ll try to be clear and accurate in my thoughts with reference to current information and the Municipal Code as needed.

First, with the “Annexation Petition”...as decision-makers you are in the “driver’s seat” and have the power to approve or deny and in my mind, if denial occurs, then perhaps there could be no time spent on the PUD portion of your agenda? OR IF the annexation is worthy, THEN I believe you should impose conditions on the annexation. Apparently public comments will not be “policed” and limited to just one or the other of the agenda items since they are so very inter-connected?

I, and others suggest you do not annex or allow ANY further development on the vacant portion UNTIL and UNLESS the following are required:

- 1) The GS Comprehensive Plan from 2011 is updated. Conditions have changed in your city and community/professional guidance should be sought to help guide responsive, up-to-date decisions for now and into the future.
- 2) An Emergency Response and Evacuation Plan be developed and ALL suggested improvements are in completed and in place. Lives, livelihoods and property are at stake as evidenced by so many examples locally, regionally and nationally.
- 3) Actual LAND is dedicated for Park/School Land. Currently none has been offered and the sense is they want to “wall” out non-residents and NOT honor and invite neighbors or school children who are a part of OUR community, but NOT THEIRS no matter how impactful the project is for the immediate vicinity and the city as a whole.

-4) NO reduction or offset in “fees in lieu of” land dedication or “fire and emergency impact fees” for off-site improvements.

I read through the Draft Annexation Agreement of March 12, 2021 and “hidden” in the documents are “gems” I discovered and have been a concern/issue with those I’ve shared. So much for being upfront, honest and transparent...

I’d asked follow up questions related to statements made by Barry Rosenberg at P&Z and our small-group virtual one. I am still somewhat in disbelief and hope a better development could be proposed.

-He stated whether they build 360 units or one unit, their costs would be “north of \$11 million!

-They said through lease agreements they would limit the number of residents at 600 or fewer. I think the cash cow/rental income would be more important than trying to physically count and enforce their “limit” which they based on their history of other rental properties in the Midwest and South. Their website show no developments west of the Mississippi. Using the Parkland Dedication Muni Code guidelines of “residents per unit type” I came up with approximately **877** residents. The newest proposal using their NEW unit types yielded **853.75** residents!!! I don’t know where they get their 600 maximum residents in their hoped-for-reality? (Live –Work 13, Townhouse 40, Multi-family 279 per their most recent PUD Site Plan)

(GS Code) “070.040.030 (g)(2)b.

Amount. Park land shall be *dedicated* in the ratio of 0.007 acres per resident or seven (7) acres per one thousand (1,000) residents of the proposed development, to be computed as follows:

1.

3.5 residents per single-family dwelling unit;

2.

3.0 residents per two-family dwelling unit; and

3.

2.5 residents per multi-family dwelling unit.

4.

1.25 residents per accessory dwelling unit (ADU). “

-With just two access/egress points in their PUD proposals, they suggested to reduce traffic impacts adjacent to Two Rivers Community School they would limit

traffic to just one of the two points, but didn't say if they would have someone close a gate twice a day or just post a sign which probably wouldn't be legally enforceable since it would be on a private street.

Other items in the initial Annexation Agreement that seem unpalatable include:

A) - "...the City shall accept fees in lieu of land dedication for the benefit of schools in the RE-1 School District...". Perhaps they do not consider Two Rivers Community School as a charter school and part of our school district and do not want to dedicate any school land to help with their needs since the school already uses a de facto "playground" at city-owned and maintained Gregory Park??? Similar to St. Stephens School and Sayre Park...I don't know if there is any "agreement" with the city? I've heard instances when someone having their vehicle in for service were suggested to wait at Gregory Park only to be descended on by hordes of schoolchildren

B) "...the City shall accept fees in lieu of parkland dedication...". BUT these "fees" they will pay to the City will be REDUCED/offset by their "actual costs "to construct off-site bike paths and pedestrian trails and sidewalks..." .

C) The biggest nugget found in the first Annexation Agreement was their hubris of constructing roadway improvements instead of paying fire and emergency impact fees to the City. I discovered this and shared with Chief Gary Tillotson who did not know of that intent. I shared this with him and other GS Rural Fire District board members and ALL agreed this idea was UNACCEPTABLE! And he shared beside the already current need for a larger, updated fire station there would be a need to purchase an additional aerial apparatus at an estimated costs of \$850,000 to one million dollars and perhaps was focused on the \$370,000 impact fees the developer would pay as no waiver was requested...the "reduction" for roadway improvements were "hidden" in the details. **Pavement will NOT save lives or put out fires!**

"...fire and emergency service impact fees required in connection with development of the PUD portion of the Property shall be reduced by the total actual costs incurred by CDSG to install the improvements at the Highway 6 and Donegan Road intersection."

Per the latest agreement it looks like they will pay the fire and emergency impact fees with no reduction for roadway improvements AND dedicate not less than one acre to the City for a fire station site. I would encourage you to be sure such is the case as that is a great concession. BUT those fees will "trickle in" "at the time of building permit for each phase of development. I believe this is still not desirable as the need for new apparatus, construction of a new station and increased staffing should NOT have to wait for funding over a prolonged period. The need arises sooner AND the costs of construction and acquisition of equipment will only rise

over time. Perhaps the City could apply “annual cost escalators” to not just this fee, but others as well?

Even with their offer of one acre for construction of a new fire station, I would remain wary of other such “reductions/sleights/we know best” legalese as they seek to annex, apply for development permits and justify their proposals as worthy of being a part of the City. To me these fees in lieu of (with reduction for improvements) and spreading out payment of impact fees are not worthy of acceptance and should be considered the “cost of admission/annexation” into the city. Except perhaps the dedication of land for a fire station, but it would be much more appropriate and provide better response times with a direct connection to Highway 6&24 and should be a part of future applications related to the mall or combined properties rather than be considered as part of the two items under consideration at your special council meeting?

They had also committed to roadway reconstruction near to their property. IF you choose NOT ANNEX, or IS ANNEXED with CONDITIONS, perhaps you or they may NOT CONSIDER the PUD item of your agenda but instead recommend/require an overall master plan for both parcels. Their “commitment” to do roadway improvements adjacent to, in the immediate vicinity and nearby (Hwy. 6&24 and Donegan Road) could be obviated with a **direct connection to 6&24**, thus potentially reducing their development costs AND be less impactful and disruptive to adjacent and nearby neighborhoods. They still show two access points on Storm King and Donegan Roads which will be disruptive to the school and neighbors.

And yet another thing that has come up is both in GarCo Referral Agency comments and at the recent BOCC meeting related to the 480 Donegan proposal, it has been advocated that the City annex ALL of West Glenwood (former) and annex the remainder of Storm King Road, Donegan Road adjacent to the project and ALL of Mel Rey Road from Donegan to Highway 6&24 (latter). Are you and the citizens of GWS willing to take on more infrastructure and lane miles whether near to or ALL of WGWS? Will this development and residents generate enough revenue over the years to make approval worthwhile? The old adage I recall has been “residential does not pay its own way”?

Whatever you choose to rule on, whether as proposed or with appropriate conditions, and support Glenwood Partnership (Floyd Deimoz) and Commercial Development Services Group with the **Annexation Petition**, and before you consider the **“Initial Zoning/Rezoning” to Commercial District and Planned Unit District (PUD)** at 214 Center Drive, I want to remind you of the purpose of a PUD per the Municipal Code and to honestly consider both the benefits and ramifications of your decisions and whatever is agreed to will truly offer GREATER BENEFIT to the City of GWS.

**(Development Code) 070.20.180**

**(a) Purpose. Planned unit developments (PUDs) are intended to allow for greater flexibility in the application of zoning and development standards than would otherwise be achieved through a base zoning district in exchange for greater benefit to the City of Glenwood Springs.**

Finally (if you can believe it) I was both heartened and amazed by the comments made by GarCo commissioner Mike Samson as detailed below (link to meeting):

[https://garfield-county.granicus.com/MediaPlayer.php?view\\_id=3&clip\\_id=1631](https://garfield-county.granicus.com/MediaPlayer.php?view_id=3&clip_id=1631)

This web link is of the Garfield County Commissioners meeting of July 19, 2021 included the review of the Annexation Impact Report by the City of GWS. The comments from commissioners begin at 5:21:07 and ends at 5:32. Of particular interest I especially wish to bring to your attention are the comments by Commissioner Samson (5:25) encouraging a **"...coalition of groups, organizations, governments that could come together and work with the Diemoz family to perhaps make that a more beneficial area to the people that already live there...I would even be in favor as a County Commissioner to be part of that, to work with the City, to work the family, to work with the other groups.... I think that would be a better solution for all of Garfield County..."**. This support, whether annexed or not is an enlightened awareness by a County Commissioner (and I expect many, many others) to acknowledge the density, impacts and shortage of undeveloped space in this area, and by extension the deficiency of parkland and to cooperate with others including our county government to pursue or include a different, greater potential for the vacant portion of this property.

I too agree with Commissioner Samson, and hope there can be a Creative, Respectful. Sustainable and Responsive future for this parcel AND the West Glenwood Mall property, especially if your Comprehensive Plan is **updated** AND both developers and decision-makers can work together on positive solutions now and into our future. The Town of Carbondale has made huge strides with sustainable development and recently began work on updating their Comp Plan. Habitat for Humanity has brought to fruition owner-occupied housing from Basalt to Rifle (their biggest hurdle finding affordable land to build upon) and both RE-1 and CMC have been working toward affordable staff housing. I have tried to make contact with both HFH and RE-1 for them to provide input but have not yet made contact.

As city council, you are in the "driver's seat" with the Annexation Petition and Zoning/Rezoning PUD proposal before you. I believe they are more than just "Yes or No" decisions, and hope there is a way **IF** accepting the request for whatever reasons, that **conditions** be placed on the owners and developers of the 15.818 acres.

Such things that come to mind and have been shared by others are:

- A) Allowing no further development on the vacant parcel if annexed into the city without the completion of an updated Comprehensive Plan (Carbondale is currently working on their update of a 2013 plan with an emphasis on HOUSING),
- B) Completion of an Emergency Evacuation Plan with ALL suggested improvements in place prior to the issuance of any Certificates of Occupancy,
- C) Actual Park/School Land Dedication to help address the shortage of both in WGWS.
- D) Impose appropriate conditions as desired to make this much better than a “cookie cutter” development such as requiring use of “fire resistant” building materials, energy efficient building construction and implementation of alternative energy technology such as solar panels, heat pumps, etc.
- E) Consider requiring development under an **existing** City Zone District like “Residential Transitional” as done with the Bell-Rippy development which WILL provide Public Parkland rather than under a PUD zoning request.

**RT) District.**

(a)

**Purpose. The RT district is intended to provide for transitional areas consisting of primarily residential uses at varied densities, with limited commercial uses that are compatible with surrounding neighborhoods. The RT district is intended to serve as a transitional buffer between residential and nonresidential zoning districts.**

- F) Require some land be dedicated (Parkland/School Land) to the City so you can partner with Habitat for Humanity to construct truly affordable, owner-occupied housing. Their biggest hurdle is finding land upon which to build.

Regarding the density of the PUD request and adding the new “twist” of R2 Partners being under contract to purchase the West Glenwood Mall, I believe things including traffic studies need to be looked at in a new light. I recall the developer did consider “full build out” of the mall, but under what scenario? As retail or as a mixed use development like Willits? Also I do not believe they projected any impacts of development on the unincorporated parcels west of Ami’s Acres. Maybe there will be a request to annex to the City there as well?

Glenwood has and will have much development, both approved and with other areas of “potential”. This includes more apartment units in Glenwood Meadows (300-400), the aforementioned Ami’s Acres area, redevelopment of mobile home parks, the unknown what may go on the recently sold Johnson’s Mini-Golf parcel, the 58 units proposed behind Discount Tire and whatever else might happen with other vacant commercial properties throughout GWS.

I did an analysis comparing the initial number (360) of units and types proposed at 480 Donegan on 12.285 acres with **SEVEN** existing multi-family complexes in West Glenwood. I tallied the number of units AND the estimated combined acreage of those existing and compared that to what is proposed on the vacant parcel.

**R2's current proposal has 332 units on 12.285 acres. Compare this with 310 units in six different complexes spread over approximately 21.5 acres. This highlights the density of units proposed on this vacant parcel plus the concentrated impacts to the surrounding neighborhoods including daily traffic volumes and the necessity of having Emergency Evacuation plans and improvements in place, even before any more development is ALLOWED.**

And they I believe inaccurately "justify" their proposal and density with their "RLCO Memo on Housing Demand" May 19, 2021:

"1.The Greater Roaring Fork study concluded that in 2019 that Glenwood Springs needed 2,000 additional housing units to meet demand.Their analysis already accounted for 487 units that were near-term planned or under construction. Therefore, while some of these new housing projects have delivered over the past two years, the identified 2,000 unit shortfall remains to be addressed."

I looked at the 2019 Greater Roaring Fork Regional Housing Study which is **"...a region that covers the Roaring Fork Valley and the Colorado River Valley; from Aspen and Snowmass Village to Glenwood Springs, and from Parachute to Edwards."**

The study does state for the Glenwood Springs AREA:

"Overall, the area has a 2,000-unit shortfall, which is projected to remain relatively the same over the next 10 years. That shortfall is also spread across every income level, and is projected to expand in the missing middle category (120 to 160 percent AMI) by 2027."

And perhaps an analysis of the following should be done to determine the true needs related to "affordability" and whether "rental" or "owner-occupied" units?

**Table 6. Glenwood Springs Area Housing Units Needed by AMI, 2017 & 2027**

| <b>Glenwood Springs</b> | <b>2017</b> | <b>2027</b> |
|-------------------------|-------------|-------------|
| Less than 60% AMI       | 1,126       | 483         |
| 61% to 80% AMI          | 107         | 688         |
| 81% to 100% AMI         | ---         | 403         |
| 101% to 120% AMI        | 169         | ---         |
| 121% to 140% AMI        | 157         | 597         |
| 141% to 160% AMI        | 381         | 436         |
| Greater than 160% AMI   | 301         | ---         |

Source: Economic & Planning Systems

**What is the “Glenwood Spring Area”???** Using the 81601 Zip Code it encompasses from just north of Aspen Glen to just east of the New Castle City Market. R2 wants us to believe the **CITY** of Glenwood Springs not the “**area**” is short 2000 units! Can we even consider that number within the corporate limits? it is an “obfuscation for justification” and deserves further analysis by the City rather than to rely on R2’s out-of-state consultants summary outlined in the very brief one-page memo included in council and P&Z packets.

There IS agreement that Glenwood Partnership has property rights and the property is Commercial Limited zoned in GarCo which DOES allow for certain types of development, NOT a 24-hour-a-day warehouse operation as has been “threatened”. Per the GarCo Land Use and Development Code:

**C. Commercial, Limited (CL). The Limited Commercial Zone District provides for a limited range of commercial uses needed to meet the shopping needs of residents in the adjacent neighborhoods. Businesses are to be oriented to the neighborhood and compatible with surrounding residential uses.**

Mr. Floyd Diemoz is a long-time resident of GWS, is influential and has been well-regarded. The opposition is not a personal attack on him and does not want to take away anything from him or his family. It is mainly this development proposal with a myriad of issues, alone and in context with the greater whole and what it can mean for both the near future and long-term future of GWS. Change

is inevitable, but better to seek change for the better, quality over quantity, lest the end result is for the worse.

This vacant parcel is a “blank slate”. R2 Partners website states “...**their interest is in positively evolving established neighborhoods to support their long term viability**” and their property management partners site says “**We do the Right Thing-One Project at a Time**”. Keep these in mind as you make your decisions and consider whether this proposal truly meets the purpose not only of a PUD providing “...greater benefits to the City of Glenwood Springs”. And whether this proposal is the best vision and use of this parcel for the whole of GWS.

Much is at stake for so many involved. From the risk/rewards of the property owner and developer, to the impacts for immediate neighbors, travelers, commuters, workers and for the future successes or failures for the City of GWS and its revenues, expenses and attractiveness. I stepped in to help neighbors and friends in WGWS in their David vs. Goliath fight of a grassroots, no budget group of citizens against the deep pockets and professionalism of an Ohio-based developer and their team of architects, engineers, financial advisors, Public Relations group and attorneys. I had hoped to educate, inform and organize them from a possibly perceived NIMBY opposition to encompass a broader spectrum of people in GWS and the greater region. We ARE linked in so many ways and share in the struggles and hopefully successes and uniqueness of our community wanting to build on those successes, not lose or degrade that what makes us want to fight for those here now AND for those yet to come whether home-grown or those drawn to what they see as “right”, desirable and attractive.

I hope my thoughts, ideas, concerns and details have not put you to sleep, give you glazed eyes/deer in the headlights look. And my experience as a former two-term city council person, a Parks and Recreation Commission member, “instigator” of a Housing for Tomorrow city commission and current GS Rural Fire Board member has shed some deeper light on what may be helpful and important to assist (and not hinder) your decision-making with these two items on your Special City Council meeting agenda.

I know I am “well past done”. I want to sincerely thank you for your time and consideration, not only reading this “missive/novelette”, but also with your decisions...those specific to this agenda and with the many more items in the near- and longer-term future.

I’ve spewed so much more here than I could touch on/convey in three minutes. I don’t apologize too much for my “keyboard diarrhea” but I wanted to share with you so much of what I’ve discovered in my quest to help the core group of residents and perhaps even you with so much on your plates.

I too want to extend thanks to P&Z Commission members and city staff for their time, dedication and energy given to this impactful development that in and of itself will increase the population of GWS from the 2019 by close to ten percent.

With gratitude, sincerity and hopefully accurate/detailed intentions,

Greg Jeung

**Subject:** West Glenwood pasture development

Hello. My name is Michael Hoban and I have been a resident of Glenwood Springs for over 50 years. I would like to state a few reasons why we sincerely believe this project should not be annexed into the city. It would be like dropping a bomb onto West Glenwood. Our infrastructure is completely unable to handle this project. Our roads are totally inadequate. Schools, the grocery store, the clinic, the hospital etc. would be overwhelmed. The scary part is the safety issue with fire. Last summer was total gridlock due to the fire in South Canyon. Our only escape was either to run or ride a bike. The South Canyon fire and The coal seam fire we're terrifyingly close to our homes. We had to be evacuated and were close even then, to not be able to escape.

We have other important and useful projects for those 12.3 acres. A senior center and a small amount of senior housing. A new fire station. Baseball field. Soccer. It is also a great place to grow food. We love West Glenwood dearly and we refuse to let our part of town be destroyed. Please Deny the applicants annexation. Thank you, Michael Hoban.

**Subject:** Annexation, Rezoning and Development of 214 Center Drive owned by Glenwood Partnership/ Floyd Diemoz and Development of 480 Donegan Road by R2 Partnership

PLEASE INCLUDE THIS LETTER IN THE CITY COUNCIL PACKET FOR 29 JULY 2021

We are writing to express our opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/ Floyd Diemoz and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. We recognize that Garfield County, Pitkin County & Eagle County as a whole does need more affordable housing, but to allow 279 units on this property , at this time, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable. As well as infrastructures that need basic reconstruction.

A great majority of my life & my family's lives have been in West Glenwood. We own a Towing/ Recovery business & have successfully operated on Mel Rey Road in West Glenwood for 40+ years, also living on Mel Rey road for 20+ years. We have seen and been part of the changes for many years. The one big thing that has changed over time is the huge increase in population as well as the traffic. Majority of the traffic are single occupants per vehicle. Our valley can barely handle the amount of population we already have because of our infrastructure issues. We have seasons, months, weeks & daily issues on the roads. ( Whether it be in town or on the interstate & highways.) With being in the towing/ recovery

business our response times to respond to an emergency/ accident, as a 2nd responder, are & have been getting harder to negotiate traffic & our response times are taking longer, all because of traffic jams. We are known as 2nd responders in most cases, but in some cases, we do respond as 1st Responders. It always results in something big/ heavy that needs to be stabilized or lifted to help in the assistance of extrication of victims that have been in an accident. It is getting extremely hard to respond to these scenes in a Large Tow Truck (semi-size) due to the traffic congestion. We strongly believe adding this many (279) units and their vehicles to this area/ neighborhood community would only impact all of us even worse than where we are now.

Mel Rey Road, Donegan Road & Storm King Road is a known designated truck route. We use this route with our business daily. Adding more people and vehicles at this density would definitely alter the designated truck route to being impassible because people do NOT understand the room that is needed to negotiate a Tractor - Trailer. Knowing that parking will be an issue with that many more units/ people/ cars. Bringing in more people only brings more issues in every direction of the spectrum. Whether its cars, parking, water issues, sewer issues, property tax issues with adjacent properties & privacy. All this will do for us property owners is raise our utilities and our taxes.

I am scared for my family's safety knowing that this many strangers are going to move in just feet away from my backyard.

What we know as West Glen Sanitation District, cannot handle this amount of units. West Glen Sanitation would have to overhaul its complete system and pump the sewer across the river to Glenwood Springs Sanitation. So this would result in another pipe crossing the river, subtracting from our beautiful area. Our water structures are already compromised. We have been on mandatory restrictions for water all summer. The issue up No Name Creek & Grizzley Creek is not going to fix itself for a long time. We will experience mandatory water restriction if not full water restrictions for the next decade. The spring that belongs to the property that R2 partnership keeps referring to is DRY due to our ongoing drought that keeps getting worse every year. Mitchell Creek is at an alarming trickle.

There are so many infrastructures that will need to be reconstructed to accommodate that many units & people, it will be big & costly. The local Fire Department would need to be reconstructed to house the new ladder truck, that they will be needing. Our designated truck route (Mel Rey Road, Donegan Road, Storm King Road) would need to be reconstructed. That is a lot of reconstructing and money spent to accommodate such a huge project.

Whatever the case maybe, we need to focus on the reconstruction of our infrastructures that is needed now before we can accommodate a mass increase in population.

Finally we can now discuss our ongoing threat of wildfire that seems to be getting worse every year. It is total chaos when we experience these wildfires in West Glenwood Springs Area. Evacuations of West Glenwood was out of control. Cars & trucks were going in every direction. Every traffic law known was broken with everyone trying to escape. Adding more vehicles & people in West Glenwood would threaten lives if and when another wildfire arises. We have to start thinking about safety for our already known citizens and let's not add to the existing problem that we are currently living with.

I strongly hope and pray that the community's voice and needs are heard. In the end we are all in this together, lets make the right step for our future.

Sincerely,  
Kevin & Kelly Ward

**From:** [Jeremy Gerbaz](#)  
**To:** [Trent Hyatt](#)  
**Subject:** Annexation of 214 center drive.  
**Date:** Wednesday, July 28, 2021 11:08:25 AM

---

To Glenwood Springs City council, I am writing this letter about the proposed annexation of 214 Center Drive. I am not against developing this site. I am against this specific development on this site, and I will list the reasons why below.

I know that most letters will include this but fire safety is the main concern for most of the population of West Glenwood Springs, as it should be with the severe drought of the last couple of years and the limited amount of ways to evacuate and adding more people and cars to this will only make that problem worse. Their needs to be a comprehensive fire study done. It needs to be completed and implemented before anything gets built on this site.

Their needs to be a new West Glenwood Springs fire station built before anything gets built on this site. As Fire Chief Tillotson stated in the Planning and Zoning meeting the West Glenwood Springs fire station is currently obsolete. That is a scary thing to hear not only from a fire standpoint but for a medical emergency as well.

The impact on traffic will be massive and the small city streets that we use to access West Glenwood Springs will not be able to handle the increased traffic. The infrastructure will have to be majorly improved to be able to support something like this. I still do not believe that any of the traffic studies R2 has done to this point are accurate.

Also, at this point in time I do not believe the City of Glenwood Springs can provide enough water for this development. We had an emergency notification go out at 5 in the morning for residents of Glenwood Springs to cut water use because levels had fallen dangerously low. This is on top of all the restrictions we have been under this spring and summer. You expect me to believe the added residents wouldn't effect are water supply that already is having issues.

Also, the current residents of West Glenwood Springs only have Gregory Park which is one of the smallest city parks in town and we are going to add all these new units without providing current and new residents with any more open space or parklands. This little park won't be able to handle the increased demand from something of this size.

So to the specifics of the actual development proposal. It's too big! It's that simple, the buildings are way too tall from the apartment complexes to the townhomes. There are way too many units. They don't have enough parking inside the development so the streets around it will become a parking lot along with the mall for all the vehicles from this proposed development. It does not fit Glenwood Springs small town feel. It feels more like Denver or any other major city on the front range, not our small mountain town.

I feel that if the City of Glenwood Springs keeps approving developments like the one proposed for 214 Center Drive and all the other ones around town, this city will be nothing but apartment complexes and hotels, and the people that work and own houses in Glenwood Springs would rather move then stay in a city like that. So I hope that you members of the city council take the advise of the people that live here, and the planning and zoning commissioners and vote this down in its current format. There has to be something better that will benefit the city, the residents of Glenwood Springs, and the people who visit here. Not just some developer from back east.

Thank you for reading my concerns and opinions about the proposed annexation and development of 214 Center Drive.

Sincerely  
Jeremy Gerbaz  
West Glenwood Springs Homeowner.

Hey Paula.

Just a quick note to thank you for responding. It is good to be "heard".

Another thought that we didn't really mention in our letter is how this development would affect the entire town. On a daily basis the effects would be immense for local neighbors, and surely fanning out to all of West Glenwood in different ways. But in an emergency, this is a situation that could affect the safety of **everyone** in Glenwood Springs, commuters from the entire valley, and also tourists. This is not a case of disgruntled neighbors who oppose growth and low-income housing only because it's in their backyard,

We hope the City Council will listen to the Planning and Zoning Commission, as it is our understanding that they wisely advised against this project.

Our best to you,

Ken and Erin

**Subject:** Annexation, Rezoning and Development of 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz and Development of 480 Donegan Road by R2 Partnership

We are writing to express our opposition to the annexation, rezoning and development of the property known as 480 Donegan currently under contract with R2 Partnership LLC. To allow 360 units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place,

is unconscionable and dangerous.

West Glenwood residents got a taste of just how helpless we were last summer during the 111 Fire. The total gridlock of vehicles on all of the West Glenwood streets precluded any chance of evacuation. If the fire would have progressed into West Glenwood, the outcome would have been tragically far different.

COVID has drastically reduced traffic, therefore the traffic study done during these months, cannot properly reflect the reality of this area. The addition of 1000+ vehicles and a minimum of 2,200 trips per day on our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

Water usage throughout the Western States is at a level that experts claim is unsustainable for our future. Glenwood Springs has been on water restrictions for an extended period of time. Continued drought conditions serve to exacerbate the situation. Serious consideration must be given to the water supply regarding all aspects of future growth.

It is our opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated.

We urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

Please include in packet for the City Council Meeting on July 29th. Thank you

\* Please note as in Wednesday's edition of the Post Independent, the R2 developers state they have reduced the numbers of units included on the 15 acre land to 272 units. This is only approximately 88 less units than their original 360 units and on less acreage by 3.5 acres.

My husband Bob and I have lived in our home in West Glenwood since 1981. In that time, we've seen many changes and much growth throughout Glenwood Springs and in particular, West Glenwood. Change is inevitable we know, as is growth in our small town. Our concerns with the proposed R2 Partnership development lies in the safety, density and effect it will have on our neighborhood, Western Hills subdivision, in addition to all of Glenwood Springs as well.

In other letters we have written in regards to this development, I questioned the need for the amount of building that has occurred in our town since 2018, (when the Lofts at Glenwood Meadows were built). Since that time, there has been approximately 467 apartment units constructed, none that I'm aware of, offering low-income/reasonable housing with any option to buy. The number built over the past 3 years is only 107 more than the recent 360 units proposed by R2 Partnership now.

In addition to questioning the density of such a proposed development, I also question the need to build such an excessive number of apartments within a neighborhood. Looking at the other complexes listed above, I'm not aware of any established neighborhoods, such as ours, being in the midst of such developments.

Because of living in our neighborhood, an abundance of safety concerns are raised, number one being evacuation in case of a fire. This is something many of us have personally experienced in the past few years. We know it's not a matter of "if" but "when" and now always prepare before we leave for an extended time, in the case an evacuation is necessary.

Accidents and traffic on I70 also bring about a back up in West Glenwood making it difficult to leave our home if necessary.

Adding an additional 600-1200 people and cars I feel is really terrifying.

We've sat in on three Zoom meetings with the R2 developers, asking questions and making suggestions, (such as providing "story poles"), with out any clear answers or interest in ideas from the neighborhood. We'll definitely be a part of the audience for the upcoming July 29th City Council meeting as well.

As I shop and attend activities within our town, I'm very aware of single adults and seniors scraping by to live in this area. I wonder what the likelihood is of bringing more young families to our area, as long term residents. Providing affordable housing/homes to raise a family, in lieu of a loft, 1 or 2

bedrooms that may only be possible to rent with multi family and/or “roommates” to share the rent and expenses.

It makes me sad to realize, most of the kids who went to school and graduated from high schools in this valley, will never be able to return and raise families near their parents, all because of the high price of housing, whether rental or home owned.

Thank you for taking the time to read this long email, I’m sure it’s nothing you haven’t read before from residents of West Glenwood and others.

This is my 4th letter I’ve written defending my position of opposition to this development. Not sure the good it does, but I’ll be willing to write a 5th or 6th letter in the future if needed.

It’s really not about having a view or money....

I feel the #1 concern of Western Hills and other neighborhoods is safety...

S- security for schools and surrounding neighborhoods

A- awareness of our fellow neighbors and humanity

F- FIRE!

E- EVACUATION plans/routes needed

T- trauma already experienced in having to leave quickly

Y- yielding to the voice of the people...please!

Thank you,

Bob and Jamie Darien

19 Chaparral Cir.

Proud residents of West Glenwood

Please include my comments in the packet for the July 29, 2021 meeting.

Sometimes it takes something significant in our own backyard to wake us up. That is what happened to me with the 480 Donegan Road Project (West Glenwood Pasture Project) in West Glenwood. It was the realization that this project would create a density and safety issue that prompted me to dig deeper into our City's Planning Documents. It quickly became clear that the 480 Donegan Road Project was just another thorn in a much bigger problem. We believe we need to keep building to solve the growing housing shortage but have not paused long enough to study our road's limited capacity and inability to evacuate quickly. Safety should come first for the current citizens before we continue to build any additional housing projects. Yes, I oppose the 480 Donegan Road Project for the following reasons.

The 2011 Glenwood Springs Comprehensive Plan, adopted in March 2011, lists nine key goals on page 5. Safety is not listed! Why?

The 2020-2025 Strategic Vision lists five Strategic Goals. The 5<sup>th</sup> goal is safety. A new West Glenwood Fire Station is among the goals, but we must remember we need the station today to protect West Glenwood. According to our Fire Chief, the current station is not large enough to house the required personnel for the current population, let alone the additional proposed with the 480 Donegan Road Project. The new fire station and any new equipment should be in place before approving any new housing projects. The fire station is obsolete, and our firemen are stretched thin.

The Wildland Urban Interface Community Wildfire Protection Plan, April 2007, is 14 years old and outdated.

- Since the adoption of this document, the population has significantly increased along with drought conditions. On page 43, Mel Ray/Shady Acres has a Priority Level-High.
- I was discouraged to see on page 26 listed under Evacuation Routes the statement concerning alternative routes, stating, "Of the three, only one could be considered, and its usefulness may be compromised by rough terrain and poor surface conditions." While these roads were not in the West Glenwood area, they are part of our surrounding community. Any evacuation road requiring a 4-wheel drive is unacceptable. If these roads are considered evacuation routes, they must be maintained and useable by the average car.
- Page 29 mentions the designation and development of "Shelter-in-place" areas. While not ideal, a "Shelter-in-place" area could give hope for those cut off from evacuation routes. Fourteen years later, they do not exist.

In a YouTube interview titled "These Americans are fleeing the West Because of Extreme Heat - <https://www.cnn.com/videos/weather/2021/06/25/heatwave-west-drought-wildfire-us-orig-kj.cnn>," starting at 1 minute 22 seconds in, you can find a statement made by our Mayor. He states, "We have never seen fire restrictions this early in the year, ever. Last year we had three of the largest fires in Colorado in the States history. If that happens in our part of town, we are talking about 1,000 lives lost." This statement tells me that our City Government is aware of the danger looming over all of us. One life lost is a tragedy; 1,000 is devastating and

unthinkable. Is that me, my children, or maybe your own? Who would be among the dead?

The West Glenwood roads are not designed to handle the proposed density. During emergencies, the streets quickly become gridlocked and take hours to resolve. Should a fire start in the West Glenwood neighborhood, the existing residents could easily get cut off from evacuation. The addition of 600+ residents would compound the problem. West Glenwood has many roads, but they all lead to SH 6. SH 6 has two exits to I70 with small roundabouts. I am not an expert, but it seems the deep ditches between SH 6 and I70 might as well be 40-foot walls because they prevent escape. We need emergency exits with closure gates emergency personnel can control.

The Palisade, CA fire resulted in 85 deaths. This fire is an example of everything going wrong. Many of the survivors stated they never received the emergency phone alerts ordering an immediate evacuation. The data indicates all methods of notification were not used. People panicked in the suddenness of the emergency. The phone lines became sluggish with the number of notifications, and delivery was taking too long. We must remember we do not have cell coverage in many areas within our community. I grew up in the Midwest and relied on tornado sirens for timely notification. What about evacuation sirens?

During emergencies, people forget training, people panic, and make the wrong decisions. When our Infrastructure is lacking, those mistakes will increase. Our safety infrastructure is lacking! A plan on paper but not implemented does not help us. We must plan and design our city around the worst-case scenario.

I beg you to support our efforts to create a safer community for all of us. I beg you to pause, build our safety infrastructure, and then carefully consider future developments that fit into the safety measures required for our community. Today, the 480 Donegan Road Project does not fit within the safety requirements for West Glenwood. Glenwood Safe - Glenwood Strong.

Dear City Council Members,

I have been a Garfield County resident for nearly 40 years and business owner in Glenwood Springs for 30 years.

I am writing to express my opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley does need more affordable housing, but to allow 360 units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place, *is unconscionable*.

Safety:

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of “very high.” Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The lack of emergency services in West Glenwood needs to be addressed before adding a significant increase to the population. The new reality is extreme fire danger.

West Glenwood residents got a taste of just how helpless we are last summer after the 111 Fire. Plans are necessary in the event of a natural disaster to counteract how people actually behave in the event of an emergency with no guidance. We, as a community, must start planning now. Our community, neighborhood by neighborhood, household by household, must begin now to organize adequate emergency responses. The physical layout of West Glenwood makes dependence on official services hopelessly inadequate.

Impact on Traffic:

COVID has drastically reduced traffic, therefore the traffic study done during these months, no matter the algorithm used to calculate the increase, cannot properly reflect the reality of this area. The addition of 1000+ vehicles and a minimum of 2,200 trips per day to our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

Comprehensive Plan:

How is it possible “that the benefits of development are distributed evenly across society” when this building is the equivalent to 7 large complexes here in town? Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23rd Street, and Six Canyons is 381 units in total. This is a proposal of 360 in one location! If sustainability is the key foundation to the

plan, it's clear that the social and environmental aspects of sustainability cannot be met through the proposal now under consideration.

Since 2011, when the current Comprehensive Plan was adopted, there have been monumental shifts in perception of the hazards it left out. It's hopelessly inadequate to meet today's needs, let alone tomorrows. We are fortunate having local resources for cutting edge technologies. We must enlist them. Development and design should demand working with the existing land features, infrastructure, cost of fixes, demographic shifts and foreseeable challenges like climate effects on regional weather patterns and drought. Designing for energy efficiency, water conservation, defensibility against fire and flood, ease of maintenance on critical systems – while being minimally dependent on outside services, is possible in this day and age. It's past time that we integrate land use regulations that prioritizes safety and optimally dense communities.

In closing, the neighborhood opposition to these proposals is about a recognition that we have much to do before responsible development on *any* scale makes sense here, from a basic safety perspective. If there is one thing our world has learned during COVID it is that no matter how economically stable we are, how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization to protect ourselves from their most dire impacts. How much we plan for the future, we are nothing if we don't protect our people.

It is my opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated.

Floyd Diemoz has served Glenwood Springs well over the decades, including contributions to public safety, efficiency and community well-being. Designing for the present and future needs of this West Glenwood neighborhood is a challenge worthy of his experience and talents. But this proposed development is not it, and this is not the time to stand on property rights over public safety. Both *can* be served, but only if both are embraced.

I urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

Hello Trent

Sent this email to Paul Stepp several months ago and she just suggested I send it along to you.

We have witnessed an huge increase of opposition to this proposed development and even with the lesser numbers, it's still an huge impact on an already strained area. The traffic is already insane even on the best days. Factor in I 70 closures, which are happening regularly, the fear West Glenwood residents are feeling when we are faced with a wildfire evacuations... note: NOT IF but WHEN! We have two fires around us and I cannot express the terror we felt leaving our home. Our safety is at risk with this big developement.

I am weary beyond words, not to mention sad to see our wonderful community facing a massive change in the name of development. Our lives will be changed because of this "progress". It boggles my mind as I watch my garden dry out with watering restrictions. Global warming is here now. And we all need to step up and be responsible people or our town, our valley, our state, our planet will be destroyed for our children and their children.

Again I ask the City Council members. WHO DO YOU SERVE?????

Linda Drake

**Date:** Wednesday, July 28, 2021 9:43:20 AM

---

I am writing to express my opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with

> R2 Partnership LLC. I recognize that the Roaring Fork Valley does need more affordable housing, but to allow 360 units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable.

>

> Safety:

> According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of “very high.” Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The lack of emergency services in West Glenwood needs to be addressed before adding a significant increase to the population. The new reality is extreme fire danger.

>

> West Glenwood residents got a taste of just how helpless we are last summer after the 111 Fire. Plans are necessary in the event of a natural disaster to counteract how people actually behave in the event of an emergency with no guidance. We, as a community, must start planning now. Our community, neighborhood by neighborhood, household by household, must begin now to organize adequate emergency responses.

> The physical layout of West Glenwood makes dependence on official services hopelessly inadequate.

>

> Impact on Traffic:

> COVID has drastically reduced traffic, therefore the traffic study done during these months, no matter the algorithm used to calculate the increase, cannot properly reflect the reality of this area. The addition of 1000+ vehicles and a minimum of 2,200 trips per day to our streets will create a traffic nightmare of overwhelming proportions.

> Congestion near schools and safety concerns for our young children are inevitable.

>

> Comprehensive Plan:

> How is it possible “that the benefits of development are distributed evenly across society” when this building is the equivalent to 7 large complexes here in town? Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23rd Street, and Six Canyons is 381 units in total.

> This is a proposal of 360 in one location! If sustainability is the key foundation to the plan, it’s clear that the social and environmental aspects of sustainability cannot be met through the proposal now under consideration.

>

> Since 2011, when the current Comprehensive Plan was adopted, there have been monumental shifts in perception of the hazards it left out.

> It’s hopelessly inadequate to meet today’s needs, let alone tomorrows.

> We are fortunate having local resources for cutting edge technologies.

> We must enlist them. Development and design should demand working with the existing land features, infrastructure, cost of fixes, demographic shifts and foreseeable challenges like climate effects on regional weather patterns and drought. Designing for energy efficiency, water conservation, defensibility against fire and flood, ease of maintenance on critical systems – while being minimally dependent on outside services, is possible in this day and age. It’s past time that we integrate land use regulations that prioritizes safety and optimally dense communities.

>

> In closing, the neighborhood opposition to these proposals is about a recognition that we have much to do before responsible development on any scale makes sense here, from a basic safety perspective. If there is one thing our world has learned during COVID it is that no matter how economically stable we are, how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization to protect ourselves from their most dire impacts. How much we plan for the future, we are nothing if we don’t protect our

people.

>

> It is my opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents,

> (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated.

>

> Floyd Diemoz has served Glenwood Springs well over the decades, including contributions to public safety, efficiency and community well-being. Designing for the present and future needs of this West Glenwood neighborhood is a challenge worthy of his experience and talents. But this proposed development is not it, and this is not the time to stand on property rights over public safety. Both can be served, but only if both are embraced.

Dear Shelly

I am writing in regard to the proposed annexation of property in West Glenwood .. Many residents of that area are very concerned about the fire danger in that area when more people will be living there. During a recent accident that closed I-70, many people were marooned for hours because of the traffic pileup. This city in this small canyon is beautiful,

but too congested in case of a disaster for evacuation. During the 20 years I have lived here, there have been 3 major fires affecting our town. There was a very devastating fire before we moved here as well. Because of the worry people have about their safety , I think it is a very reasonable reason for denying the annexation of that property that will allow many rental and other use units to be built. Another reason for denying that annexation is that it impacts the ambiance of the residential areas in that part of the county; these homes are in a quiet peaceful area that is attractive and allows for lovely walks and hiking. Adding more housing would be noisy and attracting less permanent residents. There is land available on the south side of the river for more units if they are needed.

I appreciate your consideration of my concerns for these local residents.

Thank you,

Sincerely,

Marlis Laursoo

Glenwood Springs City Council Members  
City of Glenwood Springs  
101 W. 8<sup>th</sup> Street  
Glenwood Springs, CO 81601

Dear Council,

Glenwood is at a crossroads. Glenwood Springs is a wonderful place to live and call home but continued dense infill development may change the charm of our community. I am writing you in opposition to the current development proposal at 480 Donegan Road. R2 Partners is asking to annex a parcel into the city with the caveat of granting a variance to the height restrictions defined within the design standards as part of the annexation approval. These two items should not be linked. Design standards were developed and implemented to maintain the characteristics and charm of the community we call home. I believe it's inappropriate to request a 50% increase in the allowable building height as part of a request to annex in a parcel of land. These items should be divested from each other.

The proposed development continues the trend of dense housing infill. The Post Independent reported that there are 587 units in the current development pipeline. The units in the pipeline coupled with the recently completed Oasis Creek Apartments, Red Mountain Lofts and others will represent about a 30% increase in the total number of housing units within our community. This is significant. The infrastructure required to support these additional residences is not present. The roadway system, utility system, school system and recreational opportunities are not keeping pace. Glenwood is a landlocked community and adding infrastructure to match the growth trajectory is not possible. Roads cannot be expanded and the amount of land available for schools and parks is ever decreasing. While having a study that states there is demand for an additional 2,000 house units is interesting, it fails to dig into the impacts of what happens if those demands are met. The proposed units are not affordable for the working community and only a small percentage of them (with the latest development revision) offer people the opportunity to own and invest in the community.

The traffic study commissioned by the developer is one sided. It shows the impacts to the West Glenwood area with current volumes but fails to calculate the potential traffic at the Glenwood Springs Mall site. The mall will be revitalized (perhaps by R2) and if the retail is filled in its current format, no PUD modifications or city approvals may be necessary. There is more than 100,000 sf of existing retail space. Though traffic is currently minimal, the already approved mall retail space has the potential to deteriorate the service factors of the surrounding intersections further. The study commissioned by R2 Partners should recognize the potential traffic that may be generated from this site and incorporate it into their study since it is already approved retail space.

Property owners have rights, but it is up to you to afford them the opportunity to develop their properties within the confines of the design standards and city requirements. Granting approval of this

annexation proposal essentially ties the city's hands on the future approval of the project (height restrictions, etc.). Please listen to the constituents you represent as you make the decision on which road to take the City of Glenwood Springs down. This city is a desirable place to call home. Glenwood's desirable qualities are driving the insatiable demand for growth. Please recognize the importance of pacing growth with the infrastructure necessary to support it as you make these tough decisions.

Thank you for your service to the community!

Sincerely,

Dear Mayor Godes and City Council Members,

I am writing to you to offer my support for the 480 Donegan project located in West Glenwood Springs. As we all know, the need for housing for our local work force and local families is an issue of critical concern for our community. The demand for housing in our mountain communities is strong, and 480 Donegan will keep people living and working in Glenwood Springs. I support the annexation and rezoning.

The City's Comprehensive Plan identifies a need for more housing. 480 Donegan will result in substantial and much needed new housing opportunities in West Glenwood. The developers have agreed to a thoughtful and thorough project that factors in affordability, public safety, traffic impacts and open space. It will create a sense of community for residents, and planned area safety improvements and enhancements will be far-reaching for the West Glenwood community. The developers have listened carefully and addressed specific concerns raised by the city and neighbors, and the project has been thoughtfully and responsibly designed. The annexation plan conforms to state statute. The property is served by City water and sewer by the West Glenwood Sanitation District.

480 Donegan puts an emphasis on the type of livable community that will benefit Glenwood Springs. I support the 480 Donegan application, because it will keep our workforce and their tax dollars in Glenwood Springs. I encourage your favorable consideration.

Sincerely,

  
Julie Kaufman

To whom it concerns: I am in Texas and unable to get to meetings in person. I recently experienced visiting Aspen by car from Glenwood. The traffic was horrendous going into, out of, and with trying to find parking close to stores and restaurants. We gambled that they were not checking the 2 hour very inadequate limit! The town of Glenwood and West Glenwood already have traffic issues. The Donegan project will compound that. I have previously written about concerns about that, especially concerning emergency evacuations. Years ago, I was caught in one of the fire traffic jams and had to drive over the highway grass areas and shoulders to escape West Glenwood, with children. Orange smoke was showing in my back window...only to get into another traffic jam on 1-70 East into town. Going West on 1-70 was closed. The frontage road into town was also jammed. What will happen with that many more residents that are proposed to occupy the units? We bought the Mountain Shadows property because it was a family friendly area, with mountain views, horses in pastures, country roads, other home and quiet streets. We didn't buy in town, didn't want the 'city traffic' atmosphere. My children and now their grandchildren enjoy riding bikes and such from our home around the neighborhood, down to Gregory Park. That will not be possible with the development, as drivers on Donegan and lower Mel Rey have increased useage with additional houses already here, coming from Storm King area...this is very predictable! We still have children's chalk drawings on Mt. Shadows Drive, families walk to local restaurants, they walk to enjoy the peace and quiet, in the safety of our area! We recently experienced power outages after a mild storm. Is the city planning on taking care of the electrical impact, sewer, improved roads, traffic load, improved evacuation plans that the proposed development will require ??? We just experieined I 70 problems, the canyon shut downs Those problems aren't being handled well with the popluation we already have! They shut access to us from Dotsero to Rifle! Why? To stop bottlenecking.....we already have bottlenecking with workers/travelers/homeowners in the morning and afternoon shifts! Enough! It's only going to get much worse! I have made some points that I hope will be considered, but there are many more. I regret that I willl be out of town and not able to show up in person. Respectfully, Belinda (Lindy) Enewold, 266 Mt. Shadows Drive, Glenwood Springs, CO, 956-346-2660 Please include these concerns and/or this letter in the City Council Packet on the Annexation of 214 Donegan.

July 26, 2021

Dear Glenwood Springs City Council Members,

RE: Diemoz Property Annexation / R-2 Partners Development

We are writing this letter to implore you to take a breath, and not annex this property into Glenwood Springs at this time.

This development just does not belong in this neighborhood on so many levels. Your Planning and Zoning committee completely agreed, and DID NOT recommend this annexation. I hope you all have looked and driven around the area for perspective that is not on paper, and if so you will have reached the obvious conclusion-this development just DOES NOT FIT this neighborhood.

We have lived in Glenwood Springs since the 1970's, and West Glenwood since 1993. Having lived through all of our local wildfires from Storm King to Coal Seam to the "little" 111 Fire and then Grizzly Creek, our lack of evacuation routes is becoming noticeably worse with each passing year.

The most personal reason for us opposing this development is safety due to wildfire threat with no updated infrastructure (roads) and planning since 2007. The "little" 111 fire last year by I-70 and Canyon Creek bottled traffic for hours, and had the fire blown our way we would have had to walk to where we could hitch a ride. This isn't a "what if" situation but a "when will it happen again" situation.

The housing issue is of major concern, and the Red Mtn. Lofts and Six Canyon developments have helped reduce those numbers, but they have also contributed to the crazy congestion that we face daily. The actual numbers of people living in these units is grossly underestimated, people must share to afford these rents, and with people come cars.

We know there is no magic bullet to solve many of our issues, but we must remember that we do live in an area that has to be protected more than ever due to the changing climate/drought issues. We are not ready for a wildfire in Glenwood, and if watching the small towns in California burn isn't enough....remember our own fires! Please, TAKE A BREATH! (although not a deep one - the smoke will get you!)

Sincerely,

Susie and Mark Straus

**A reminder of what can happen,  
please see the next page.**

To Whom It May Concern:

Regarding the Proposed 400 Person Residential Development on the Property to the North of the Glenwood Springs Mall

We are writing at the behest of a local Glenwood Springs Resident because of an experience which overwhelmed us on November 8<sup>th</sup>, 2018. On that date a rapidly moving wildfire consumed much of the town of Paradise and the neighboring communities of Magalia, Concow and Butte Creek Canyon, displacing nearly 50,000 residents, destroying over 18,000 structures and killing 86 people in less than 8 hours.

Although the residents of Paradise had been preparing for a major wildfire event for years the rapidity and force of that event overwhelmed the community. In the aftermath of the wildfire the community has come together and identified aspects of community planning that needed to be addressed.

Among those aspects were issues of access from the community. A single four-lane divided highway led from this mountain community to the valley below. One other highway which was four-lanes within the town narrowed to two winding lanes just out of town as it headed to the valley below. A third two-lane road within the community wound down the mountain through another break in the hills to the valley below. And, a fourth two-lane road headed up the mountain to the north over a ridge out of town. Within town many cross-streets were narrow with dead-end single-lane branches along both sides of the street.

Early-warning reverse 911 phone calls began being sent at 8 am in the morning just as the town was awakening. Although those that had received the calls began reacting by 8:30 am the streets were beginning to fill. We were one of the fortunate ones because we had signed-up for the reverse 911 calls. Many residents had not signed-up and had to rely upon friends and relatives to warn them of the danger. Public media was of no help since the fire encroached and expanded with such rapidity that media was unaware of the developing disaster. Many residents were trapped within the fire and struggled to escape.

The Paradise community has come together since the disaster and is working to solve the transportation problems which kept the community hostage.

Following the fire we relocated to Colorado and temporarily lived with our daughter and her family in Carbondale for two-and-a-months before finding a permanent home in Grand Junction. Along with living with her and her family and, now, making frequent visits to them, we are familiar with Glenwood Springs and the surrounding area.

The message that we want to bring to your community is that it is imperative to include adequate transportation planning, not only within a planned community, but, also in the surrounding community to ensure that residents have adequate avenues of escape in the event of an unplanned disaster. This is not only a developer issue. This is a community issue.

**Subject: Annexation of 214 Center Drive**

To Glenwood Springs City council,

I am writing this letter about the proposed annexation of 214 Center Drive. I am not against developing this site. I am against this specific development and its impact on the small community of Glenwood Springs, for the reasons below.

I know that most letters will include this and it is the biggest safety issue, fire safety and evacuation is the main concern for most of the population of West Glenwood Springs, as it should be with the severe drought of the last couple of years and the limited amount of ways to evacuate and adding more people and cars to this will only make that problem worse. Their needs to be a comprehensive fire study done. It needs to be completed and implemented before anything gets built on this site.

Their needs to be a new West Glenwood Springs fire station built before anything gets built on this site. As Fire Chief Tillotson stated in the Planning and Zoning meeting the West Glenwood Springs fire station is currently far too small for the area that it supports and is obsolete. That is a scary thing to hear not only from a fire standpoint but for all medical emergencies as well.

The impact on local traffic and roads will be massive and the small city streets that we use to access West Glenwood Springs will not be able to handle the increased traffic. The infrastructure will have to be majorly improved to be able to support something like this. I still do not believe that any of the traffic studies R2 has done to this point is anywhere near accurate.

Also, at this point in time I do not believe the City of Glenwood Springs can provide enough water for this development. We had an emergency notification go out at 5:30 in the morning for residents of Glenwood Springs to cut water use inside and out because levels had fallen dangerously low. This is on top of all the restrictions we have been under this spring and summer. You expect the citizens of West Glenwood Springs to believe the added residents wouldn't effect our water supply that already is strained and having issues?

Another issue is, the current residents of West Glenwood Springs only have Gregory Park which is one of the smallest city parks in town and we are going to add all these new units without providing current and new residents with any more open space or parklands. This little park won't be able to handle the increased demand from something of this size. As per the developer in the Planning and Zoning meeting any open space areas would be available ONLY to the residence of the complex. This does not meet the necessary regulations for open spaces.

As for the specifics of the actual development proposal. It's WAY too big! It's that simple, the buildings are way too tall; from the apartment complexes to the townhomes. Their are way to many units. They don't have enough parking inside the development so the streets around it will become a parking lot along with the mall for all the vehicles from this proposed development. It does not fit Glenwood Springs small town feel. It feels more like Denver or any other major city on the front range, not our small mountain town. The developer in the P&Z meeting regularly referred to the development as an "urban" development. We are not an urban community, we are a rural community surrounded by other rural communities. We want to keep this feel for our area. Our families and children live here and we want it to remain a sweet community. There were many from this area that are not wanting this size of a complex going in in our back yard. We love our people, neighbors and community.

I believe that if the City of Glenwood Springs keeps approving developments like the one proposed for 214 Center Drive and all the other ones around town, this city will be nothing but apartment complexes and hotels, and the people that work and own houses in Glenwood Springs would rather move then stay in a city like that. So I hope that you members of the city council take the advise of the people that live here, and the planning and zoning commissioners and vote this down in its current format. Their has to be something better that will benefit the city, the residents of Glenwood Springs, and the people who visit here. Not just some developer from back east.

Thank you for reading my concerns and opinions about the proposed annexation and development of 214 Center Drive.

Re.: Proposed West Glenwood Annexation

Hi:

I'm a member of the family that owns the land behind the West Glenwood mall. We've owned this land for over 60 years, it's zoned commercial. Over those years we've been asked many times to sell some of the land. A giant retailer wanted all of our land; their plans were to tear down our two existing office buildings to provide the land area they needed. We said no.

Others wanted to build apartments, condominiums, and one company wanted the land for a major auto dealership. Again, we said no.

We did say yes to Marv and Barry Rosenberg, and R2 Partners nearly two years ago. Why? Because we believed they had the proven track record and expertise to develop our property in a responsible manner. Over the past two years we have found the Rosenberg's and their people to be very straight forward and honest. We believe that R2 has made significant concessions and their plan would be a great contribution to Glenwood. We believe this project would be beneficial to the City by providing much needed housing.

If you read pages 41 and 46 of the City's Comprehensive Plan, as well as the City's Development Code, you'll know they are faithfully following the City's vision.

uses. Ideally however, the City encourages RFTA to develop a BRT station Downtown because this would provide seamless access to commercial areas, employment, recreation, as well as other modes of transportation.

#### ***Glenwood Mall***

This Plan envisions that the Glenwood Mall and the properties immediately north of it be integrated and redeveloped into a mixed-use community including a significant component of medium to high density residential uses with an internal system of sidewalks and community spaces thus creating a center focal point for the west end of town.

#### ***Glenwood Meadows***

The Glenwood Meadows development originally included a housing component south of Wulfsohn Road. This component of the project has been delayed. However, the Comprehensive Plan continues to identify the housing component of the Glenwood Meadows project as a logical and ideal place for much needed community housing within walking distance of commercial areas, recreation and open space. Therefore, the Comprehensive Plan strongly encourages that the housing component be constructed. Additional housing units are also strongly encouraged on other properties within the Glenwood Meadows development. Live / work units, where the unit is designed to have a living spaces as well as a work space for non-nuisance producing businesses, are seen as appropriate here.

### ***Hwy 6 Corridor***

The Hwy 6 / 24 corridor currently is comprised of many different uses—auto-oriented commercial and service uses along the highway and residential uses tucked behind. In spite of having an elementary school much of the area lacks true neighborhood character and walkability. This area has potential for significant redevelopment in the future. As it does so, it is expected that the immediate Hwy 6 / 24 corridor will continue to be a mix of uses. New development is expected to include pedestrian interconnectivity, bicycle access, landscaping and building placement so that the corridor is an attractive, accessible, community-oriented strip and not just focused on highway traffic. Multi-family housing is expected to continue to be developed north of the corridor.

### ***Residential Areas***

Existing neighborhoods in Glenwood Springs are mostly walkable and “talkable” and give much of the “small town” character to the community, with their smaller building sites, traffic calming, shaded sidewalks, front porches instead of garages, and small neighborhood parks.

Most existing residential neighborhoods are envisioned to remain substantially unchanged over the next planning period. Some minor infill and redevelopment is expected through the addition of accessory dwelling units and where sensitively designed duplexes, townhouses or small apartment buildings may replace a mobile home or bungalow on a large lot.

existing boundary south of town to encompass the Bershenyi Ranch (Elk Meadows) and the Four Mile Ranch subdivision (Figure 3-17). Here, along Four Mile Road the City has extended sewer treatment services to these parcels through a long-standing pre-annexation agreement and it is felt that the City will be able to bring about a land use configuration for these properties that will better meet the aspirations of the city than would be possible under county jurisdiction.

### Overall Annexation Position

1. Within the Urban Growth Boundary annexation is preferred over development through county jurisdiction, unless there are extenuating circumstances and significant public benefit to do otherwise.
2. Annexation will occur through petition of the land owner(s). While it is not the intent of the City to compel annexation, the City reserves the prerogative to initiate annexation if found to be in the best interest of the community.
3. The City will consider annexation only within the Urban Growth Boundary unless there is a compelling public benefit to consider annexation of a parcel outside the boundary.
4. The City is required to provide annexed parcels with infrastructure (electricity, water, wastewater) and services (police, emergency and other urban services) in a manner that is cost-effective and that does not unduly burden Glenwood Springs residents.
5. The City encourages and supports the annexation of the property immediately north of the Glenwood Mall to facilitate a compatible/coordinated mixed-use development.
6. The City should work with Garfield County to jointly adopt a major street plan for the Bershenyi Ranch / Elk Meadows property that will assure mutual commitment to a unified vision for development and open space.

Figure 3-16: The Urban Growth Boundary was extended to include on the west end of town. Properties here have a low density residential land use designation.

Figure 3-17: The Urban Growth Boundary was extended to include the Elk Meadows Properties south of town and additional property on the west end of the city.

# PETITION: KEEP GLENWOOD SAFE – STOP THE OVERDEVELOPMENT

The undersigned residents urge Glenwood Springs City Council to stop the overdevelopment of Glenwood Springs and to advocate for smart growth practices. Glenwood Springs is being destroyed by the addition of large multi-family developments and endangering the safety of **ALL** of its residents. In the last three years 800 multi-family units have been built or approved and all but 29 of those are for rental.

We ask that you reject the current petition for annexation and the subsequent development by R2 Partnership of Cincinnati to build 360 units on the 12.285-acre plot of land behind the West Glenwood Mall. If this is approved it will add 1100 rental tenants (a population increase of 10% in one small plot of land) and their vehicles. We urge you to see that West Glenwood is incapable of handling a development of this density with major concerns over safe evacuation when another fire, flood or rockslide occurs as well as inadequate infrastructure, density five times the size of the adjacent community, traffic congestion, pollution and over-priced rentals. During the last two wildfires our roads were gridlocked and lives could easily have been lost.

## PETICION: MANTENER SEGURO A GLENWOOD – PAREN EL SOBREDESARROLLO

Los residentes abajo firmantes urgen a el concilio de la ciudad de Glenwood Springs que paren el sobre desarrollo y que aboguen por prácticas de crecimiento inteligentes. El incremento de grandes desarrollos multe-familiares están destruyendo a Glenwood Springs y pone en riesgo la seguridad de todos sus residentes. En los últimos tres años 800 unidades multe-familiares han sido construidas o aprobadas y de estas solo 29 son para alquilar.

Les pedimos que rechacen la petición de anexar y la aparición posterior de R2 Partnership of Cincinnati para construir 360 unidades en el lote detrás del West Glenwood Mall, que mide 12.285 acres de terreno. Si esto se aprueba traerá un crecimiento de 1100 inquilinos (un incremento del 10% de población sobre un pequeño terreno) y sus vehículos. Les urgimos que consideren que West Glenwood es incapaz de manejar un desarrollo de esta densidad con los preocupantes de causa mayores como la evacuación segura cuando suceda el próximo incendio, inundación, o deslave así como también una infraestructura inadecuada con la densidad cinco veces mas que la comunidad adjunta, el congestionamiento de tráfico, contaminación y los alquileres excesivamente caros.

**PETITION: KEEP GLENWOOD SAFE – STOP THE OVERDEVELOPMENT**

The undersigned residents urge Glenwood Springs City Council to stop the overdevelopment of Glenwood Springs and to advocate for smart growth practices. Glenwood Springs is being destroyed by the addition of large multi-family developments and endangering the safety of **ALL** of its residents. In the last three years 800 multi-family units have been built or approved and all but 29 of those are for rental.

We ask that you reject the current petition for annexation and the subsequent development by R2 Partnership of Cincinnati to build 360 units on the 12.285-acre plot of land behind the West Glenwood Mall. If this is approved it will add 1100 rental tenants (a population increase of 10% in one small plot of land) and their vehicles. We urge you to see that West Glenwood is incapable of handling a development of this density with major concerns over safe evacuation when another fire, flood or rockslide occurs as well as inadequate infrastructure, density five times the size of the adjacent community, traffic congestion, pollution and over-priced rentals. During the last two wildfires our roads were gridlocked and lives could easily have been lost.

[illegible]

Dear City Manager and City Clerk:

I am writing to express my opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley does need more affordable housing, but to allow such a large number of units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place, is **unconscionable**.

**Safety:**

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of “very high.” Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The lack of emergency services in West Glenwood needs to be addressed before adding a significant increase to the population. The new reality is extreme fire danger.

West Glenwood residents got a taste of just how helpless we are last summer after the 111 Fire. Plans are necessary in the event of a natural disaster to counteract how people actually behave in the event of an emergency with no guidance. We, as a community, must start planning now. Our community, neighborhood by neighborhood, household by household, must begin now to organize adequate emergency responses. The physical layout of West Glenwood makes dependence on official services hopelessly inadequate.

**Impact on Traffic:**

COVID has drastically reduced traffic, therefore the traffic study done during these months, no matter the algorithm used to calculate the increase, cannot properly reflect the reality of this area. The addition of 1000+ vehicles to our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

**Comprehensive Plan:**

How is it possible “that the benefits of development are distributed evenly across society” when this building is the equivalent to 7 large complexes here in town?

Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23rd Street, and Six Canyons are a total of 381 units. This is a proposal of 279 multi-family apartments, 40 townhomes for sale and 13 live-work units in one location! If sustainability is the key foundation to the plan, it’s clear that the social and environmental aspects of sustainability cannot be met through the proposal now under consideration.

Since 2011, when the current Comprehensive Plan was adopted, there have been monumental shifts in perception of the hazards it left out. It’s hopelessly inadequate to meet today’s needs, let alone tomorrows. We are fortunate having local resources for cutting edge technologies. We must enlist them. Development and design should demand working with the existing land features, infrastructure, demographic shifts and foreseeable challenges like climate effects on regional weather patterns and drought. Designing for energy efficiency, water conservation, defensibility against fire and flood, ease of maintenance on critical systems – while being minimally dependent on outside services, is possible in this day and age. It’s past time that we integrate land use

regulations that prioritizes safety and optimally dense communities.

In closing, the neighborhood opposition to these proposals is about a recognition that we have much to do before responsible development on any scale makes sense here, from a basic safety perspective. If there is one thing our world has learned during COVID it is that no matter how economically stable we are, how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization to protect ourselves from their most dire impacts. How much we plan for the future; we are nothing if we don't protect our people.

It is my opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated. Floyd Diemoz has served Glenwood Springs well over the decades, including contributions to public safety, efficiency and community well-being. Designing for the present and future needs of this West Glenwood neighborhood is a challenge worthy of his experience and talents. But this proposed development is not it, and this is not the time to stand on property rights over public safety. Both can be served, but only if both are embraced.

I urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

Sincerely yours,  
Valorie L. Guanella Erion  
Silt, CO 81652  
[mverion@sopris.net](mailto:mverion@sopris.net)

P.S. I've used the form letter provided by the organized group opposing this development, but I wanted to add some of my own personal thoughts.

Instead of a massive housing development:

How about a cemetery? Another cemetery is needed in Glenwood Springs. You can make lots of money off of it! That's the goal these days it seems! I buried my mother in Littleton, Colorado 5 years ago, the amount I paid for her plot was astronomical, I'll share it with you if you want to contact me ([mverion@sopris.net](mailto:mverion@sopris.net)). I realize your fees would likely be less, but even so, this would be a BIG money maker for the city, while actually providing something the current citizens need, while preserving views, peace and quiet, and still providing refuge for wildlife.

How about a park? West Glenwood is sorely lacking in parks.

How about leaving it exactly as it is? A nice little horse pasture where wildlife in the area take refuge. A place where little kids can go on a walk with their parents to see horses grazing. What is wrong with maintaining a rural feel in West Glenwood? It's not broke, please don't fix it!

How about a conservation easement? Have you considered contacting Aspen Valley Land Trust to see if they can help with preserving this little piece of paradise for all residents of West Glenwood/Glenwood and Garfield County for perpetuity? The reason most people live here is to escape the big city. Why turn Glenwood Springs into a big city with all the accompanying problems? Everyone is talking about mental health these days. I sincerely believe that cramming everyone together in a tiny area just because you can is seriously detrimental to mental health. People need a little space, people need a little peace and quiet; both have been greatly diminished in Glenwood Springs and Garfield County these past few years. We need to say enough! Please say NO to this development and look for a more suitable and sustainable use for this very special parcel of land.

I am not a resident of Glenwood Springs but I am a resident of Garfield County and have been for nearly 30 years. I have worked for many years in Glenwood, my husband has worked for many years in Glenwood and still does. I shop in Glenwood at least a couple of days per week, our veterinarian is in Glenwood; however I do find myself finding excuses not to go to Glenwood more and more lately because it's such a stressful ordeal these days dealing with traffic, road closures, and inconsiderate, aggressive drivers. If this development is approved I will probably stop shopping in Glenwood and I know that doesn't really matter in the bigger picture but how many are like me? My husband is one who still can be trapped in traffic if a wildfire rages through the west end of town as it has many times before, so I do feel my opinion counts and appreciate your consideration of my point of view.

We live on Donegan Road, so our concerns about this proposed development are many--and by now you're familiar with them. So I'll be specific about a few things:

Our townhomes (Apple Glen) allow 1-2 cars per unit. Extra vehicles must park elsewhere, and there are many extra vehicles already. So people park on nearby streets in front of other homes. Imagine hundreds more such extra vehicles?

Seriously--water. These are times of drought. Please consider how the situation is likely to get progressively worse and we're already implementing cut-backs.

West Glenwood is not an "Urban" environment. It's small town-rural. There's no walkability here other than to Culver's, Tractor Supply and the car dealerships (people could walk across the street to buy a car, so they could drive across the bridge to the City Market!) Each of those new units will need at least 2 cars and there will be multiple trips a day. This is an Urban proposal. It's different at the Meadows—where there are shops and restaurants, but dropping a city-block development into our residential neighborhood will be a shock radiating to the entire town of Glenwood.

Rentals are needed but there are other rental developments happening in the vicinity. Meanwhile, markets have changed and it's nearly impossible for families to find homes to buy. Maybe we need to rethink and shift focus to include more units for purchasing? From a neighborhood perspective it's better for folks to have some pride of ownership—things stay safer and well taken care of. Hundreds of rental units will mean hundreds and hundreds of people not invested in our neighborhood long-term. And as property values continue to rise, these owner/developers of dense rental complexes will maintain ownership and control—they will benefit financially, not current and future citizens. We also need more units that citizens can own, so they can improve their lives.

Thank you for your service! Thank you for carefully considering all options carefully.

Please listen to your actual constituents who already live here. We should matter more than the folks who might inhabit the future units we're all imagining right now.

Please consider waiting for a greater-Glenwood Citizen's consensus about the nature (and density) of future developments.

Please wait.

Thank you,

Trary LaMee, West Glenwood Springs

I am writing this letter about the proposed annexation of 214 Center Drive. I am not against developing this site. I am against this specific development on this site, and I will list the reasons why below.

I know that most letters will include this but fire safety is the main concern for most of the population of West Glenwood Springs, as it should be with the severe drought of the last couple of years and the limited amount of ways to evacuate and adding more people and cars to this will only make that problem worse. Their needs to be a comprehensive fire study done. It needs to be completed and implemented before anything gets built on this site.

There needs to be a new West Glenwood Springs fire station built before anything gets built on this site. As Fire Chief Tillotson stated in the Planning and Zoning meeting the West Glenwood Springs fire station is currently obsolete. That is a scary thing to hear not only from a fire standpoint but for a medical emergency as well.

The impact on traffic will be massive and the small city streets that we use to access West Glenwood Springs will not be able to handle the increased traffic. The infrastructure will have to be majorly improved to be able to support something like this. I still do not believe that any of the traffic studies R2 has done to this point are accurate.

Also, at this point in time I do not believe the City of Glenwood Springs can provide enough water for this development. We had an emergency notification go out at 5 in the morning for residents of Glenwood Springs to cut water use because levels had fallen dangerously low. This is on top of all the restrictions we have been under this spring and summer. You expect me to believe the added residents wouldn't effect are water supply that already is having issues.

Also, the current residents of West Glenwood Springs only have Gregory Park which is one of the smallest city parks in town and we are going to add all these new units without providing current and new residents with any more open space or parklands. This little park won't be able to handle the increased demand from something of this size.

So to the specifics of the actual development proposal. It's too big! It's that simple, the buildings are way too tall from the apartment complexes to the townhomes. Their are way to many units. They don't have enough parking inside the development so the streets around it will become a parking lot along with the mall for all the vehicles from this proposed development. It does not fit Glenwood Springs small town feel. It feels more like Denver or any other major city on the front range, not our small mountain town.

I feel that if the City of Glenwood Springs keeps approving developments like the one proposed for 214 Center Drive and all the other ones around town, this city will be nothing but apartment complexes and hotels, and the people that work and own houses in Glenwood Springs would rather move then stay in a city like that. So I hope that you members of the city council take the advise of the people that live here, and the planning and zoning commissioners and vote this down in its current format. Their has to be something better that will benefit the city, the residents of Glenwood Springs, and the people who visit here. Not just some developer from back east.

Thank you for reading my concerns and opinions about the proposed annexation and development of 214 Center Drive.

Sincerely

Jeremy Gerbaz

West Glenwood Springs Homeowner.

I am writing to express my opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley does need more affordable housing, but to allow such a large number of units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable.

Safety:

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The lack of emergency services in West Glenwood needs to be addressed before adding a significant increase to the population. The new reality is extreme fire danger.

West Glenwood residents got a taste of just how helpless we are last summer after the 111 Fire. Plans are necessary in the event of a natural disaster to counteract how people actually behave in the event of an emergency with no guidance. We, as a community, must start planning now. Our community,

neighborhood by neighborhood, household by household, must begin now to organize adequate emergency responses. The physical layout of West Glenwood makes dependence on official services hopelessly inadequate.

#### Impact on Traffic:

COVID has drastically reduced traffic, therefore the traffic study done during these months, no matter the algorithm used to calculate the increase, cannot properly reflect the reality of this area. The addition of 1000+ vehicles to our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

#### Comprehensive Plan:

How is it possible “that the benefits of development are distributed evenly across society” when this building is the equivalent to 7 large complexes here in town? Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23rd Street, and Six Canyons is 381 units in total. This is a proposal of 279 multi-family apartments, 40 townhomes for sale and 13 live-work units in one location! If sustainability is the key foundation to the plan, it’s clear that the social and environmental aspects of sustainability cannot be met through the proposal now under consideration.

Since 2011, when the current Comprehensive Plan was adopted, there have been monumental shifts in perception of the hazards it left out. It’s hopelessly inadequate to meet today’s needs, let alone tomorrows. We are fortunate having local resources for cutting edge technologies. We must enlist them. Development and design should demand working with the existing land features, infrastructure, demographic shifts and foreseeable challenges like climate effects on regional weather patterns and drought. Designing for energy efficiency, water conservation, defensibility against fire and flood, ease of maintenance on critical systems – while being minimally dependent on outside services, is possible in this day and age. It’s past time that we integrate land use regulations that prioritizes safety and optimally dense communities.

In closing, the neighborhood opposition to these proposals is about a recognition that we have much to do before responsible development on any scale makes sense here, from a basic safety perspective. If there is one thing our world has learned during COVID it is that no matter how economically stable we are, how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization to protect ourselves from their most dire impacts. How much we plan for the future, we are nothing if we don’t protect our people.

It is my opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated.

Floyd Diemoz has served Glenwood Springs well over the decades, including contributions to public safety, efficiency and community well-being. Designing for the present and future needs of this West Glenwood neighborhood is a challenge worthy of his experience and talents. But this proposed development is not it, and this is not the time to stand on property rights over public safety. Both can be served, but only if both are embraced.

I urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

Sincerely,

Annie Uyehara

Hi Shelly.

I just tried to send an email to you and it was lost in sending

So I'm going to keep this short.

I know you are "up" on the issues that led P and Z to reject this proposal. We agree with all of them. This is too big for our community. We don't want Glenwood to just be a bedroom community for up valley workers.

Lets develop a new comprehensive plan and maintain Glenwood as a nice mountain community tor raise a family.

Thank You

Jim and Anne Conway

I sincerely hope that City Council will pay attention to the Planning and Zoning Commission's advice to decline the development. They are, after all, City Council's advisory board and their decision should be taken very seriously.

So far I don't see that the following concerns have been addressed:

- emergency evacuation and emergency response impacts
- water supply shortage impacts
- quality-of-life impacts
- the impact 600-900 tenants will have on traffic congestion
- how dense this development is and how totally inappropriate for the existing neighborhood (nine times the number of units compared to the adjacent properties to the north of the pasture)

Until such time that these concerns have been addressed and solved there should be no more building/new development in Glenwood Springs - period.

Thank you.

Erin Wiencek

123 Creekside Court

Dear City Council and Manager,

I am writing to express my opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive, and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership.

On this day, 27 years after the Storm King 14 lost their lives protecting Glenwood Springs, I find value in knowing that much was learned from that dreadful day. But how is it that locally after all this time and other threats of wildfire that we still have no well-known evacuation protocol in place within our tight mountain corridors? Road signs providing evacuation information in West Glenwood lie in the dirt for only those on foot to see. Under the shadow of Storm King Mountain at that. While I know the sign is a county issue, it is disheartening to see nonetheless.

Fire Chief Tillotson states the West Glenwood Fire Station is obsolete. That's a frightening statement when we reside in a "very high risk" area according to the Wildland Urban Interface Community Wildfire Protection Plan. Strategies such as the socio-ecological mitigation approach used by the Montecito Fire Protection District would help us better understand the special needs

of our community. Such action would provide citizens with hope that an organized effort will ensue in the event of the next natural disaster.

These efforts take much organization and time. Page 42 of the Comprehensive Plan (CP) states “in areas where multiple routes exist, consider separating access routes for responders and escape routes for citizens in pre-attack plans.” West Glenwood residents understand just how important this is after the experience of the 111 Fire last summer. These routes must be known before adding more people to an already vulnerable area. So, what are we waiting for?

Another question is how is it possible “that the benefits of development are distributed evenly across society” when this building is the equivalent to 7 large complexes here in town?

Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23<sup>rd</sup> Street, and Six Canyon is 381 units in total. A proposal of 360 units in one location is far from an even distribution. And what about water? Governor Polis “has formally declared a drought emergency for western Colorado by Proclamation...as counties continue to face evolving impacts and water shortages from a multi-year, severe drought episode.”

According to a document given to a member of the West Glenwood Pasture neighborhood group, an engineer with Sopris Engineering states, “If I use the fraction of sewer EQRs as outlined in Glenwood Springs code, the total average GPD (gallons per day) for the site is somewhere around 80,000-85,000 GPD.” While this was created for the initial proposal of 418 units, we can still gather the enormity of the amount of water this development would consume. Page 84 of the CP mentions a comprehensive energy and environmental audit of the entire municipal water system. Was this ever done? A thorough assessment of how the annexation will impact water supply now and into the future should be completed before any decision is made.

Mr. Rosenberg of R2 Partnership is a smooth talker speaking of things like a “sense of community” and a “love affair” with this valley, but dedicating sidewalks in lieu of actual parkland for our community to gather and bond, for children to fly kites, for dogs to run, is not building a sense of community. In fact, the social equity piece is another problem with this development. Allowing a development with a pool and park that cannot be used by neighborhood children is wrong. A pocket park will never make up for the division that would create. Take one look at Map 2.1 in the CP and you can see the lack of Parks Open Space in West Glenwood. Our children deserve better.

I’d love to see West Glenwood revitalized, as I know many others would. But the mall should be part of this project so amenities and places to work are more in relation to the development, designing a truly walkable and livable space. And in my opinion, if a development such as this were to go through, an acre should be set aside for a new fire station. That’s the kind of move that builds a sense of community.

But that sense is in your hands now, city council members. P & Z commissioners have done their job by respectfully realizing the myriad of issues this proposal comes with. I plea with you to do the same. There may be a day where a development like this is a great fit for West Glenwood, but that time is not now. I urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

Sincerely,  
Lacy King

Glenwood Springs City Manager and City Clerk

Regarding the annexation and rezoning of the parcel known as the West Glenwood Pasture located behind the Mall and the proposed PUD

**Please include this letter in the city council packet for July 29, 2021**

July 15, 2021

I'm writing to request that Council affirm the judgment of the Planning and Zoning Board in its denial of both these proposals, chiefly on safety grounds.

As a person who has lived and operated a small business in West Glenwood for 18 years, I have experienced many of the difficulties resulting from frequent conflicts between overburdened infrastructure and the impacts of weather events, traffic and geographic constraints. While I know we do need more housing in the Valley as a whole, West Glenwood's location, its population spread along narrow, winding and often dead-ending roads, and lack of capacity for both smooth and rapid emergency evacuation or accessibility for emergency vehicles, leaves it far too vulnerable to what has been acknowledged to be extreme fire danger. Hence, it would be irresponsible to proceed with a development such as this.

We are in a new situation since the current Comprehensive Plan was approved. 10 years of worsening drought, new awareness of rapidly diminishing water supply regionally, and a transportation system that has not been able to ease the traffic congestion that recent growth has exacerbated, leave us exposed to hazards not addressed in that plan.

Also, we have learned, often the hard way, that people panicking in an emergency behave differently than planners and authorities expect. They refuse to take the most expedient way out of town if that means leaving vulnerable pets, kids and disabled neighbors behind. As a pet services provider in my business, I have first hand experience with this.

The existing Comp Plan stresses "small town character" as a common value. Some construe this as favoring single family houses, but geographically we don't have room for "sprawl." And while we need housing that is both affordable and "neighborly" there is no reason why those values should be incompatible with some increased density, employing design and building techniques which can also mitigate known dangers. Instead, the developer of this project showed drawings for a lovely little complex that would have fit in nicely in Ohio in the 1950s. Irrigated lawns (and regardless of water rights, if there's just not enough water, how can there be "enough"?) and no mention of power or water conservation measures, energy efficient systems, or buildings designed for defensibility against fire. This is the arid West, a decade into a severe – now extreme – drought. The expertise to design for actual and anticipated conditions exists. It just wasn't even thought worth a mention by the developer contracting for this project.

The '07 Fire Safety assessment suggested the establishment of "shelter in place" locations in W. Glenwood because of the fact that features of this community which make it extremely vulnerable also make adequate evacuation planning unrealistic. Nothing has been done toward this approach, either. I have taken measures to prepare to handle, on a short term basis, pets stranded in our neighborhood or

up Mitchell Creek, who would need a safe place to await transport to a longer-term shelter. Our building is relatively defensible from fire, and our regular operations require that we routinely have staff and equipment on hand for such a need. I do believe we need to work neighborhood by neighborhood to get people talking and making plans for mutual assistance. Infrastructure and emergency response capacity can only go so far. During the shut in phase of the pandemic, because we were “essential service” providers, we learned how many elderly and disabled people live here. They needed pet food delivered, help with other things – and now I have a greater appreciation for how many vulnerable neighbors we have. Climate change is the biggie – with some unknowns as to when and how great the impacts will fall, and on whom soonest. But fire is closer and more immediate. We all need to be preparing to help each other.

But given all these conditions, it really makes no sense to bring in dense housing complexes, especially as ill-suited to local and regional needs as this one, before we address the threats that endanger our neighbors at the current population level. Please do not approve the annexation or development plan for the acreage behind the Mall until the Comprehensive Plan can be revised, brought up to date and encompassing the necessary changes to ensure safety, sustainability and stability for our beloved community. Thank you.

If there is one thing our world has learned during COVID it is that no matter how economically stable we are, how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization to protect ourselves from their most dire impacts. How much we plan for the future, we are nothing if we don't protect our people.

It is my opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated.

Floyd Diemoz has served Glenwood Springs well over the decades, including contributions to public safety, efficiency and community well-being. Designing for the present and future needs of this West Glenwood neighborhood is a challenge worthy of his experience and talents. But this proposed development is not it, and this is not the time to stand on property rights over public safety. Both *can* be served, but only if both are embraced.

I urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

Glenwood Springs CO 81601

Re: Annexation of a 15.818-acre parcel into the municipal limits of the City of Glenwood Springs and Initial Zoning/Rezoning of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

I am writing to express my opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley does need more affordable housing, but to allow 360 units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable.

**Safety:**

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The lack of emergency services in West Glenwood needs to be addressed before adding a significant increase to the population. The new reality is extreme fire danger.

West Glenwood residents got a taste of just how helpless we are last summer after the 111 Fire. Plans are necessary in the event of a natural disaster to counteract how people actually behave in the event of an emergency with no guidance. We, as a community, must start planning now. Our community, neighborhood by neighborhood, household by household, must begin now to organize adequate emergency responses. The physical layout of West Glenwood makes dependence on official services hopelessly inadequate.

**Impact on Traffic:**

COVID has drastically reduced traffic, therefore the traffic study done during these months, no matter the algorithm used to calculate the increase, cannot properly reflect the reality of this area. The addition of 1000+ vehicles and a minimum of 2,200 trips per day to our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

**Comprehensive Plan:**

How is it possible "that the benefits of development are distributed evenly across society" when this building is the equivalent to 7 large complexes here in town? Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23rd Street, and Six Canyons is 381 units in total. This is a proposal of 360 in one location! If sustainability is the key foundation to the plan, it's clear that

the social and environmental aspects of sustainability cannot be met through the proposal now under consideration.

Since 2011, when the current Comprehensive Plan was adopted, there have been monumental shifts in perception of the hazards it left out. It's hopelessly inadequate to meet today's needs, let alone tomorrows. We are fortunate having local resources for cutting edge technologies. We must enlist them. Development and design should demand working with the existing land features, infrastructure, demographic shifts and foreseeable challenges like climate effects on regional weather patterns and drought. Designing for energy efficiency, water conservation, defensibility against fire and flood, ease of maintenance on critical systems – while being minimally dependent on outside services, is possible in this day and age. It's past time that we integrate land use regulations that prioritizes safety and optimally dense communities.

In closing, the neighborhood opposition to these proposals is about a recognition that we have much to do before responsible development on *any* scale makes sense here, from a basic safety perspective. If there is one thing our world has learned during COVID it is that no matter how economically stable we are, how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization to protect ourselves from their most dire impacts. How much we plan for the future, we are nothing if we don't protect our people.

Since 2011, when the current Comprehensive Plan was adopted, there have been monumental shifts in perception of the hazards it left out. It's hopelessly inadequate to meet today's needs, let alone tomorrows. We are fortunate having local resources for cutting edge technologies. We must enlist them. Development and design should demand working with the existing land features, infrastructure, demographic shifts and foreseeable challenges like climate effects on regional weather patterns and drought. Designing for energy efficiency, water conservation, defensibility against fire and flood, ease of maintenance on critical systems – while being minimally dependent on outside services, is possible in this day and age. It's past time that we integrate land use regulations that prioritizes safety and optimally dense communities.

In closing, the neighborhood opposition to these proposals is about a recognition that we have much to do before responsible development on *any* scale makes sense here, from a basic safety perspective. If there is one thing our world has learned during COVID it is that no matter how economically stable we are, how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization to protect ourselves from their most dire impacts. How much we plan for the future, we are nothing if we don't protect our people.

It is my opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated.

Floyd Diemoz has served Glenwood Springs well over the decades, including contributions to public safety, efficiency and community well-being. Designing for the present and future needs of this West Glenwood neighborhood is a challenge worthy of his experience and talents. But this proposed development is not it, and this is not the time to stand on property rights over public safety. Both *can* be served, but only if both are embraced.

I urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

Re: Annexation of a 15.818-acre parcel into the municipal limits of the City of Glenwood Springs and Initial Zoning/Rezoning of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

I am writing to express my opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley does need more affordable housing, but to allow 360 units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable.

**Safety:**

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The lack of emergency services in West Glenwood needs to be addressed before adding a significant increase to the population. The new reality is extreme fire danger.

West Glenwood residents got a taste of just how helpless we are last summer after the 111 Fire. Plans are necessary in the event of a natural disaster to counteract how people actually behave in the event of an emergency with no guidance. We, as a community, must start planning now. Our community, neighborhood by neighborhood, household by household, must begin now to organize adequate emergency responses. The physical layout of West Glenwood makes dependence on official services hopelessly inadequate.

**Impact on Traffic:**

COVID has drastically reduced traffic, therefore the traffic study done during these months, no matter the algorithm used to calculate the increase, cannot properly reflect the reality of this area. The addition of 1000+ vehicles and a minimum of 2,200 trips per day to our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

**Comprehensive Plan:**

How is it possible "that the benefits of development are distributed evenly across society" when this building is the equivalent to 7 large complexes here in town? Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23rd Street, and Six Canyons is 381 units in total. This is a proposal of 360 in one location! If sustainability is the key foundation to the plan, it's clear that

the social and environmental aspects of sustainability cannot be met through the proposal now under consideration.

Since 2011, when the current Comprehensive Plan was adopted, there have been monumental shifts in perception of the hazards it left out. Impact on Traffic:

COVID has drastically reduced traffic, therefore the traffic study done during these months, no matter the algorithm used to calculate the increase, cannot properly reflect the reality of this area. The addition of 1000+ vehicles and a minimum of 2,200 trips per day to our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

Comprehensive Plan:

How is it possible "that the benefits of development are distributed evenly across society" when this building is the equivalent to 7 large complexes here in town? Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23rd Street, and Six Canyons is 381 units in total. This is a proposal of 360 in one location! If sustainability is the key foundation to the plan, it's clear that

the social and environmental aspects of sustainability cannot be met through the proposal now under consideration.

Since 2011, when the current Comprehensive Plan was adopted, there have been monumental shifts in perception of the hazards it left out. It's hopelessly inadequate to meet today's needs, let alone tomorrows. We are fortunate having local resources for cutting edge technologies. We must enlist them. Development and design should demand working with the existing land features, infrastructure, demographic shifts and foreseeable challenges like climate effects on regional weather patterns and drought. Designing for energy efficiency, water conservation, defensibility against fire and flood, ease of maintenance on critical systems – while being minimally dependent on outside services, is possible in this day and age. It's past time that we integrate land use regulations that prioritizes safety and optimally dense communities.

In closing, the neighborhood opposition to these proposals is about a recognition that we have much to do before responsible development on *any* scale makes sense here, from a basic safety perspective. If there is one thing our world has learned during COVID it is that no matter how economically stable we are, how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization to protect ourselves from their most dire impacts. How much we plan for the future, we are nothing if we don't protect our people.

It is my opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated.

Floyd Diemoz has served Glenwood Springs well over the decades, including contributions to public safety, efficiency and community well-being. Designing for the present and future needs of this West Glenwood neighborhood is a challenge worthy of his experience and talents. But this proposed development is not it, and this is not the time to stand on property rights over public safety. Both *can* be served, but only if both are embraced.

I urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

Re: Annexation of a 15.818-acre parcel into the municipal limits of the City of Glenwood Springs and Initial Zoning/Rezoning of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

I am writing to express my opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley does need more affordable housing, but to allow 360 units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable.

**Safety:**

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The lack of emergency services in West Glenwood needs to be addressed before adding a significant increase to the population. The new reality is extreme fire danger.

West Glenwood residents got a taste of just how helpless we are last summer after the 111 Fire. Plans are necessary in the event of a natural disaster to counteract how people actually behave in the event of an emergency with no guidance. We, as a community, must start planning now. Our community, neighborhood by neighborhood, household by household, must begin now to organize adequate emergency responses. The physical layout of West Glenwood makes dependence on official services hopelessly inadequate.

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The lack of emergency services in West Glenwood needs to be addressed before adding a significant increase to the population. The new reality is extreme fire danger.

West Glenwood residents got a taste of just how helpless we are last summer after the 111 Fire. Plans are necessary in the event of a natural disaster to counteract how people actually behave in the event of an emergency with no guidance. We, as a community, must start planning now. Our community, neighborhood by neighborhood, household by household, must begin now to organize adequate emergency responses. The physical layout of West Glenwood makes dependence on official services hopelessly inadequate.

**Impact on Traffic:**

COVID has drastically reduced traffic, therefore the traffic study done during these months, no matter the algorithm used to calculate the increase, cannot properly reflect the reality of this area. The addition of 1000+ vehicles and a minimum of 2,200 trips per day to our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

**Comprehensive Plan:**

How is it possible "that the benefits of development are distributed evenly across society" when this building is the equivalent to 7 large complexes here in town? Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23rd Street, and Six Canyons is 381 units in total. This is a proposal of 360 in one location! If sustainability is the key foundation to the plan, it's clear that

the social and environmental aspects of sustainability cannot be met through the proposal now under consideration.

Since 2011, when the current Comprehensive Plan was adopted, there have been monumental shifts in perception of the hazards it left out. It's hopelessly inadequate to meet today's needs, let alone tomorrows. We are fortunate having local resources for cutting edge technologies. We must enlist them. Development and design should demand working with the existing land features, infrastructure, demographic shifts and foreseeable challenges like climate effects on regional weather patterns and drought. Designing for energy efficiency, water conservation, defensibility against fire and flood, ease of maintenance on critical systems – while being minimally dependent on outside services, is possible in this day and age. It's past time that we integrate land use regulations that prioritizes safety and optimally dense communities.

In closing, the neighborhood opposition to these proposals is about a recognition that we have much to do before responsible development on *any* scale makes sense here, from a basic safety perspective. If there is one thing our world has learned during COVID it is that no matter how economically stable we are, how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization to protect ourselves from their most dire impacts. How much we plan for the future, we are nothing if we don't protect our people.

It is my opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated.

Floyd Diemoz has served Glenwood Springs well over the decades, including contributions to public safety, efficiency and community well-being. Designing for the present and future needs of this West Glenwood neighborhood is a challenge worthy of his experience and talents. But this proposed development is not it, and this is not the time to stand on property rights over public safety. Both *can* be served, but only if both are embraced.

I urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

Re: Annexation of a 15.818-acre parcel into the municipal limits of the City of Glenwood Springs and Initial Zoning/Rezoning of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

I am writing to express my opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley does need more affordable housing, but to allow 360 units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable.

# PETITION: KEEP GLENWOOD SAFE – STOP THE OVERDEVELOPMENT

The undersigned residents urge Glenwood Springs City Council to stop the overdevelopment of Glenwood Springs and to advocate for smart growth practices. Glenwood Springs is being destroyed by the addition of large multi-family developments and endangering the safety of **ALL** of its residents. In the last three years 800 multi-family units have been built or approved and all but 29 of those are for rental.

We ask that you reject the current petition for annexation and the subsequent development by R2 Partnership of Cincinnati to build 360 units on the 12.285-acre plot of land behind the West Glenwood Mall. If this is approved it will add 1100 rental tenants (a population increase of 10% in one small plot of land) and their vehicles. We urge you to see that West Glenwood is incapable of handling a development of this density with major concerns over safe evacuation when another fire, flood or rockslide occurs as well as inadequate infrastructure, density five times the size of the adjacent community, traffic congestion, pollution and over-priced rentals. During the last two wildfires our roads were gridlocked and lives could easily have been lost.

We urge you to see that West Glenwood is incapable of handling a development of this density with major concerns over safe evacuation when another fire, flood or rockslide occurs as well as inadequate infrastructure, density five times the size of the adjacent community, traffic congestion, pollution and over-priced rentals. During the last two wildfires our roads were gridlocked and lives could easily have been lost.

Hello,

I have attached an Excel document of signatures from a Change.org petition. Please include the signatures in the 480 Donegan/R2 Partners packet for the July 29th meeting. Let me know if you prefer them another way. I appreciate your time.

Best,

Lacy King

4728 County Road 154

Glenwood Springs, Co. 81601

March 16, 2021

Community Development Department

Members of the City Council,

I am a 60 year resident of Glenwood Springs. I recently bought a townhouse close to the proposed 214 Center Drive development and plan to move in within a year. While there have been many changes in Glenwood since I moved here, Glenwood is still a desirable place to live. I think we need to take a hard look now to see what the future Glenwood will look like. I feel that the annexation and the proposed build out of this property is totally inappropriate for the long term good of Glenwood. I think that we are building too many apartments for the city population and many of the occupants of these apartments are not invested in their neighborhood or the city. We are housing the up valley work force. We need more places for families to move into a first time house and to reap the benefits of home ownership. All of the things that people are against in any development are doubly true for this monstrous development. The increased traffic; noise and light pollution; school, road, infrastructure impact; and water and sewer issues are all negative reasons to question this development.

The existing roads in the area are totally inadequate for increased traffic. This includes Donegan and Mel Ray Roads. Safe pedestrian and bike infrastructure along both of these roads needs to be included. The increased density from 4-5 units/acre to 29/acre is very inconsistent with the surrounding Western Hills subdivision area. The abrupt change between single unit residential to a four story building is stark. I agree with the Garfield County Community Development Director that a transition density should be considered consisting of townhouses, duplexes and single family houses. The other part of the development should be decreased to 3 stories and moved closer to the mall to preserve site lines of the existing homes. As always, parking will be an issue and it needs to be determined that each unit needs a minimum of 2 parking spaces. A three bedroom unit could have up to 6 drivers living in it. There should be no parking along any of the streets.

Because Glenwood is looking to increase its sewer and water rates a total of over 100% in the next 10 years, I feel that adding 1000+ residents is a slap in the face to the citizens who have been saddled with providing the services. We are looking at potential water issues from the fire

and adding more demands is inappropriate. The developer will come to the city and ask for reduced impact fees for roads, schools, water, etc., etc. They always do and it's always granted. I think most of us are tired of that.

There was a recent study done on the potential for lives and structures lost unless the South Glenwood bridge was built. I don't think a study even needs to be done for this subdivision because there will be a stark increase in potential loss of life and property from fires if this annexation and development is allowed as envisioned. I have seen nothing that has been discussed about improved evacuation of the entire West Glenwood area.

While I believe that eventually this development will be passed, I hope that the county's recommendations and citizens input will be considered and a much lower density with a variety of housing units will be seen as more appropriate for the neighborhood and city.

Thank you,

A handwritten signature in cursive script that reads "Cindy Ryman". The signature is written in dark ink and is positioned below the "Thank you," text.

Cindy Ryman

In Regards to the West Glenwood Pasture development I would like to list some major concerns.

I honestly wonder how many people need to be packed into this valley. The traffic is already horrific. Any bump in the flow causes major backup.

This is supposed to be a place for tourism so I wonder how building more and more housing compliments coming here for vacation. We use to be the hub for entertainment and yes we have the pools and Adventure park, but no movie theatre (we use to have 2), no bowling alley, nothing for the locals to have activities for families. I would rather see some kind of retail in that pasture.

Most concerning is we have no evacuation plan for fires. I have property on the Mitchell Creek Road and have lived thru all the fires, but the last two fires we knew we had no way to escape. West Glenwood can't move and no one will get serious till we actually have a disaster and burn up. Last Fire I got the code for The Storm King Ranch gate as I knew if I had to evacuate the only way out was up, whether that would be the safest route or not.

Also the traffic at the school is horrendously backed up on all surrounding roads at drop off and pickup. We just CANNOT handle more traffic out here. The roads are parked up all around the school with teacher's cars which prohibits being able to see pulling out onto Donegan during school hours. Where are these additional people going to park? We know what they allotted for parking is not going to work as every family has several cars and sometimes work vehicles.

This is a huge area for walkers, walkers with their dogs, children and even the school walks the kids up the Mitchell Creek road occasionally. Donegan and surrounding roads have no sidewalks. It's already dangerous ensuring your not getting close when driving by the hikers, sometimes on both sides of the road. Cars drive too fast out here. Having that many more people on the road will guarantee we have some kind of accident.

Lastly we have lack of law enforcement. I have called the sheriff's office many times asking them to patrol the roads and rarely see them. We have many sketchy things going on in West Glenwood, but closer to home for me is the Mitchell creek Road. I see cars all thru the night going up and down a dead end road. Several pullouts up there are trashed with condoms, drug paraphernalia, and loads of beer bottles and additional trash. More people is going to add to this problem.

This is personal, but it's just quality of life. My husband was born and raised here and I have been here for over 40 years. We realize change is inevitable, but what Glenwood has become is a stressful place with the amount of people and building and such a joke as nothing is affordable housing. Our children born and raised here have been out priced to afford a house of their own. It used to have a small town atmosphere that is just getting lost with the almighty dollar. We still have some peace in W Glenwood and as our signs say still a place for open space. I beg the council to have some kind of vision for the town and people that live here.

Respectfully,

Lee Bowles

Gretchen Ricehill  
City Planning  
Glenwood Springs, Colorado

Dear Gretchen,

Since my last letter concerning the proposed large apartment complex on Floyd Diemoz' land in West Glenwood, there have been two fires that have involved huge traffic issues where residents have attempted to exit to I-70. Two of my friends were trapped for five hours. If there were another fire after these apartments were built there would be hundreds more cars attempting the exit and possible lives lost. The other bad traffic situation involves both the Charter School and the Middle School. Morning and afternoon both school buses and small children are driving and walking along a road with no sidewalks, with once again hundreds of cars from the apartments.

Glenwood cannot be expected to provide housing for Aspen, Gypsum, New Castle, etc. As they say "Build it and they will come!" Floyd and John Diemoz are wonderful contractors and could either sell the property or build single story patio homes which are greatly needed here. We have several friends who have moved away because they could not find those here. Just today, March 19, Rob Anderson wrote an excellent letter to the newspaper about how our narrow valleys will be ruined with over development. Do we want to look like another Vail? Floyd himself built our home on Mitchell Creek twenty five years ago and we have loved the rural feel yet are close to the downtown area. A giant apartment complex with people constantly moving in and out will spoil this ambiance!

I ask the city and P and Z to consider all these things and not allow this to be built.

Thank you,  
Nancy Brooks

**Subject:** Fwd: Proposed Annexation and Initial Zoning of 214 Center Drive, Glenwood Springs and Development by R2 Partnership

We have lived in Glenwood over 50 years. West Glenwood for 35 years. We used to have lots of open space here. The horse pasture is all we have left.

A Cincinnati developer wants to build 360 units in that pasture. This is 1200 people and 900+ vehicles.

This would be a 35% increase in our population in West Glenwood

The impacts would be enormous! All our infrastructure would be completely inadequate. Schools roads, traffic etc. would be overwhelmed!

Scariest and most dangerous impacts are with fire and flooding. If I 70 is closed in South Canyon, many thousands of commuters would be stuck. This happened last summer with a small, quickly contained (Thank goodness) fire close to South Canyon. I 70 closed and traffic backed up halfway to Carbondale.

Every road in Glenwood was full of parked traffic for almost 8 hours. People would have been running for their lives with, with death likely. This is extremely serious. We have no way to escape and our infrastructure is not even adequate for current residents. Please deny this application. Thank you,  
Michael Hoban

**Subject:** Proposed Annexation and Initial Zoning of 214 Center Drive, Glenwood Springs and Development by R2 Partnership

As long-standing members of the West Glenwood community, we are writing to express our opposition and concerns regarding the annexation and initial zoning of the above property as requested by

Glenwood Partnership LLC and the subsequent development of the 12.5 acre land currently under contract with R2 Partnership LLC.

We recognize that the Roaring Fork Valley may have a housing need, but to allow a developer to build 360 units with 1,200 rental tenants with only 650 parking spaces in such a rural neighborhood is a concern for us on many levels. We are in agreement with everything addressed by Garfield County in their referral comments letter but these are our top four concerns.

1. **Safety**

The wildfire on August 5, 2020, just west of Ami's Acres at approximately mile marker 111, was a clear demonstration of what happens in West Glenwood even during a small wildfire. Our home is on Ponderosa Circle just off Donegan Road and we witnessed first-hand how quickly traffic congestion occurred shortly after the emergency alert. The I-70 traffic, and almost every road in West Glenwood, was gridlocked and remained gridlocked until long after 10 pm. We have heard similar reports as a consequence of previous local wildfires.

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of “very high.” West Glenwood has many roads leading to **A SINGLE ROAD - Highway 6**. Depending on the location of the fire, emergency vehicles may block off one or more roads to enable their access to the fire, which further restricts safe evacuation of all of our residents.

To add another 1,200 residents to the rural area of West Glenwood, which according to the Census Department had almost 3,100 residents in 2018 and is now probably in the region of 3,500+ would be utterly catastrophic. Not only do all of these residents need to evacuate safely,

but there are elderly residents (12% of our population) who may need assistance, families with young children, as well as two schools and preschool or daycare facilities. Much like the residents of Four Mile/Oak Meadows/airport area we have **ONE SINGLE ROAD** to evacuate the area.

## **2. Impact on West Glenwood**

In the City's document "Rezoning to Planned Unit Development (PUD) Application Guide & Checklist" it states under Review Process item 4 "The intensity of development in the proposed zoning district is not expected to create significantly adverse impacts to surrounding properties or the neighborhood". To allow this land to be zoned to build approximately 360 units WILL significantly and adversely affect this area (which is mainly comprised of single family homes on 1/5-1/4 acre plots). Not only is the density far too high but the planned three/four level units will affect the nearby single family properties greatly both in terms of traffic, noise, lighting, pollution, privacy and views.

Most families in the Roaring Fork Valley use vehicles to get to work, some families have both personal vehicles and work vehicles. Adding 1,200 people to this area will bring in excess of 2,000 additional vehicles to our streets and will bring about a traffic nightmare of Californian proportions and will turn West Glenwood into a parking lot. The current infrastructure of West Glenwood and particularly the roads leading to Highway 6 are not built for this additional traffic. COVID has dramatically reduced traffic, and any traffic studies completed during this last year will not reflect the reality of the area. We urge you to take this into account.

## **3. Proximity to the Two Rivers and Montessori Schools**

Currently, the developers plan to have an exit immediately opposite these schools. Even if they move the exit to somewhere else on Storm

King, congestion and safety concerns for our young children is inevitable. Many of the Two Rivers students use the current roads to walk or bike to/from their homes. The developers original plans also had a swimming pool, gym and possible bar area within 100 feet of these schools.

#### 4. **Green space**

Glenwood residents value the beauty of the land and recognize the importance of green space; we will be losing yet another precious piece of land for our environment and the wildlife as well as removing land which can also serve as a fire break in the event of wildfires. Bike paths exist around town coming almost to this piece of property for both tourists and residents to recreate and enjoy this valley.

In conclusion, if there has been one thing our world has learned through COVID it is that no matter how economically stable you are, how fiscally responsible you are, how much you plan for the future, you are nothing if you don't protect your people and that is what we are asking the City of Glenwood to do - to protect its current population and keep its residents safe.

We urge you to reject this annexation and rezoning application or at the very least to limit the development of the land to a minimum number of buildings/units (ideally similar to the density of the properties in the neighborhood).

Thank you for your consideration.

Randy & Annie Stephens  
0041 Ponderosa Circle  
Glenwood Springs

Dear Ms. Ricehill and Planning and Zoning Commission,

I'm writing on behalf of the R2 Partnership proposal for the pasture behind the Glenwood Springs Mall. If urban renewal is the eventual plan for West Glenwood, please consider how this project "substantially impairs...the sound growth of the municipality...and is a menace to the public health, safety, morals or welfare" of West Glenwood residents. (This quotation was taken from the definition of a blighted area in the West Glenwood Springs Urban Renewal Plan.) West Glenwood is blighted enough. According to the West Glenwood Springs Urban Renewal Conditions Survey, "10 of the 11 total possible (blight) factors are present at varying degrees of intensity, but all at levels considered significantly adverse." Yes, West Glenwood is in need of improvement, but adding that many people to an area that already has evacuation problems is simply not safe.

The annexation and approval of a project this size requires you to think beyond monetary impact, and place yourselves in our shoes. The scope of this project puts West Glenwood residents in harms way. Recently a gas leak in south Glenwood Springs left many residents feeling trapped. This was the exact experience West Glenwood residents felt during the 111 Fire last summer. My dear friend wrote a letter to Mayor Godes after the gas leak incident. In his response he said, "Rest assured I am working to add a full-time Emergency Manager position to ensure our evacuation routes are established and fully known." This is great! But since many of us reside in county, would this position help us when another fire occurs?

Community education of evacuation routes is necessary. From 3:30 p.m. - 11:30 p.m. we were gridlocked out here due to the 111 Fire. And many of us don't even have access to sidewalks! Should that fire have jumped the ridge, what would we have done? It would've been absolute chaos. When do lives take precedence over profit? The time to work on these efforts is now. Please deny this project until further community education efforts of evacuation protocols are achieved. By now we know the question of another fire is not if, it's when. The developers are proposing a total of 360 dwellings. The addition of that many people and vehicles is an alarming thought when it comes to the occurrence of another fire, mudslide, etc.

In April 2007 a Wildland Urban Interface Community Wildfire Protection Plan was prepared for the Glenwood Springs Fire Protection District. Within that plan much of West Glenwood has a hazard rating of very high to extreme. The only extreme rating in all of Glenwood Springs! Do

these types of plans from previous years get discussed when such developments are on the table? If so, I hope this document provides enough information to make a decision in terms of safety for the residents of West Glenwood. This plan was created in 2007. Environmental conditions have only worsened. All one has to do is take a look at the U.S. Drought Monitor for Colorado to see that Garfield County is in extreme to exceptional drought on the intensity scale. Let us use this time after the Grizzly Fire to think more thoroughly about the impact of overdevelopment to not only the people within our community, but to the land, water and air we all share. The renewal of West Glenwood is needed. But the biggest question we must ask ourselves is, at what cost? The true cost, that is.

Thank you for your time,

Lacy King

**Subject:** West Glenwood pasture development proposal

To

Gretchen Ricehill

Outside of the fact that West Glenwood comprised of a large percentage of the city's population total , has only until recently been able to have adequate road and sidewalks built . There are no open space/park areas more than the size of a pitifully small pocket park not even part of the city , to bring it up to any comparison with other parts of the city. Two Rivers park serves that area across from the Colorado River. There's a large field behind the High School for that area.. there is the large park areas serving South Park. Please tell me where children can anywhere at all areas North and West of the Colorado River. Contemplating for more less than two minutes reveals to anyone the impact of this very large development proposed by R2partnership would have .

There is Nothing in the plans that reveal anything more than buildings and concrete with barely any publicly assessable green space at all . Where will these very large numbers of people go to walk their dogs? Or park their overflow cars? This is a development by an out -of -state developer. The plan shows that it's been unbelievably ill conceived. It will have a density far beyond what would allow for timely possibly life saving egress from our roundabouts to the rest of the city IN THE BEST OF TIMES .. let alone rush hour. There had better be law and code enforcement ready to take on more calls. One can only imagine the scenario : the ensuing traffic up and down the entire length of Donegan Rd, the length of Mitchel Creek. The traffic impact on Mel Ray, Soccerfield, Storm King, Center Drive. This development's impacts will affect every citizen in their daily commutes over roundabouts and bridges up and down our Valley and Canyon connections . Not to mention the people that daily travel from all over to use West Glenwoods schools .

I am a long time citizen of West G . I am a senior who simply seeks to walk safely on adequate sidewalks to continue to enjoy the advantages of living where I have chosen to live . I do not seek to move , nor can I simply up and move out of despair for what West G is developing into for lack of good foresight.

Very recently Mayor Godes , from his home , had experienced what it was like for thousands of citizens to feel trapped when / if emergency evacuation were necessary. This situation in South Glenwood involved the gas leak which shut down for hours the possibility for people to go about leaving their homes , businesses and schools . This was a gas leak . What about wildfire situations such as was visited upon our city for a very large part of last summer.

It simply gives me a great deal of distress to think that city officials cannot seem to think in terms of safety and environment , quality of life ( including safety from roaming dogs, impacts of homeless people: law and code not even barely adequate even now before thousand if more people descend upon the finite resources of space and negotiable terrain that exists in West G. Last summer (and for many previous summers ) was one of constant tension as to which way the wind would blow.

I am confident that I do not speak in hyperbole. Many Glenwood , as well as West Glenwood citizens feel as I do. Many feel defeated that the only thing that stands to gain , it seems are in the pockets of a very few people who could care less about any other consideration other than extremely shortsighted economic gain . Can our city move beyond an intellectually limited concept of what it means to promote and plan for a thriving , inviting , well organized community . It would seem that economic development

need not to be divorced from what is well planned, well paced , and meets the needs for quality of life and environment for most.

Respectfully,  
Bobbie Meriwether

Subject: West Glenwood pasture

Gretchen,

My name is Tim Porter and I live at 34Gamba Dr, Glenwood Springs CO 81601. If feel very strongly that any development of the pasture should only have car access thru the mall property and no access to Donegan rd . The mall will no doubt increase in value and occupancy if the pasture is developed and so even if that means that part of the mall is opened to create enough road sidewalk and bike paths this is necessary. Donegan cannot handle this traffic and it would bring values down. I also feel that maximum parking should be made and a park and possibly a small fishing pond like the tree farm development in Willits.

Thanks Tim Porter 505-553-2207

**To:** Gretchen E Ricehill <gretchen.ricehill@cogs.us>  
**Cc:** paul.schirmer@cdsg-us.com  
**Subject:** Proposed West Glenwood Pasture Development at 214 Center Drive

I have been a resident of 0060 Ponderosa Circle, West Glenwood Springs, CO for 49 years and have experienced much growth and changes. The proposed West Glenwood development of 360 units at 214 Center Drive is of great concern to me as it will be an enormous impact on our existing infrastructure, roads, utilities, emergency services (police, sheriff, fire department), schools, traffic, etc.

This will create a dangerous and safety situation for the students and teachers at the close proximity of the Two Rivers School which already has a traffic congestion problem and then to add another 500-1,000 vehicles from the proposed rental units.

I experienced the Storm King Fire and the Coal Seam Fire. West Glenwood was evacuated with the Coal Seam Fire and that caused an immense dangerous problem getting to I-70 even though it is within 1/4 mile from me and other residents. We were trapped and stuck in traffic for awhile. On August 4th of this year there was a small fire about 4:30pm on the north side of I-70 close to South Canyon. I happened to be at the Meadows Shopping Mall which is 2.3 miles from my house and decided at 7:00pm to come home knowing the fire was extinguished. Because of the traffic jams these fires create it took me 3 1/2 hours to be in my garage. This

was horrifying experience at the age of 80 who does not drive after dark. Never again do I want to be in that situation again with added vehicles in the neighborhood.

Patio homes or single dwelling homes would be much more complimentary to West Glenwood Pasture at 214 Center Drive and needed more than rental apartments as we have seniors moving away from Glenwood because of the lack of this sort of homes.

Homeowned dwellings would be a better choice than rentals.

I also am concerned that the contractors would not be from this area which would mean building costs and rental dollars leaving the area.

Pray that the residents of West Glenwood and all of Glenwood concerns would be heard and considered for the betterment of all.

Sincerely,  
Gwendolyn

**Cc:** Ingrid Wussow <ingrid.wussow@cogs.us>  
**Subject:** West Glenwood pasture annexation

Gretchen,

I'm writing you to express my concern about the potential annexation of the pasture behind the mall into city limits. While continued growth is necessary and there is a demand for it, I do not believe we as a community should be adding this type of density (at this rate). This land is not in the city limits and there are plenty of reasons to be concerned with this project. First, in my mind, is the impact it will have on the services that are already lagging behind. While I do not have precise numbers, I would estimate this approval would add approximately 15% more housing units into our community. We already have issues with road congestion, classroom sizes, water, and electric infrastructure, etc. Due to the landlocked nature of our community, it is not easy to expand these services and housing developments of any density do not pay for themselves. Over the last several years we have seen an enormous number of housing approvals – Oasis Creek Apartments, Red Mountain Lofts, Triumph-Bell Rippy apartments to name a few. Cumulatively these projects represent a massive increase in the number of housing units within Glenwood Springs.

Growth and change are inevitable. As a community, we need to expand slowly and in a sustainable manner that maintains the characteristics of why so many of us choose to call Glenwood Springs home. Annexing property into the city to facilitate unchecked growth is the wrong path forward. While it's a bit of a chicken and egg scenario, we need to work to balance growth with the expansion of the required underlying services. Roads and access cannot be expanded to facilitate this type of growth within a landlocked community. Schools and utility systems upgrades are already lagging (massive water rate increases proposed). These are only a few of many reasons to be concerned about projects like this. Please express my concern to the Planning and Zoning commission as they consider yet another massive housing project and annexation.

Regards,  
Jeff Peterson

**Subject:** West Glenwood Springs Pasture Development

Hi Gretchen,

We need your help please stop the 362 unit development!

Extreme stress to our current residents! Fire evacuation timing would be dangerous and life threatening to the current residents.

Our neighborhood is flooded with cars and 18 wheelers every time there is a closure on Hwy 70 which occurs several time a year either from south canyon, Glenwood canyon or Hwy 82.

Fire danger happens every year and evacuation timing with all the cars and 18 wheelers that already park in our neighborhood plus and an additional added multifamily unit 362 is dangerous and life threatening! Donagan and Mel ray were designed for single family residents not for multi family housing units.

Please stop this multi family housing project!

Sincerely,

Emilie Zepernick,DC

Subject: 360 mixed level units near Mel ray and donegan rd

As a home owner of over 20 years on chapparal cir- I have see a few fires.

In 2002 the cold steam fire - it took over an hour to get out of west glenwood springs to downtown glenwood (900 cooper ave - my office at the time).

Last year, 2020, when there was a fire between west glenwood and new castle, My friend stay at the house, till I-70 west bound was open - so she could go home to new castle. The I-70 west bound freeway entrance is only .3 miles away , a two minute drive- it took her over a hour to get to the I-70 west entrance ! I can not imagine what would happen if there were additional 360 housing units in the area!

The area of Donagen and Melray is a high risk fire danger areas- a 360 unit development could be deadly to all humans in the area.

Subject: West Glenwood Pasture development

Hello

My name is Nancy Brown and I've lived on Chapparral Circle since 1985. I'm writing to voice my very serious concerns with this development.

First off is the fire concern. Once I-70 is closed for anything (fires, mud slides, accidents) our West Glenwood neighborhoods become filled with cars and trucks waiting for the road to open. It's one big gridlock. I couldn't get in my car and get to safety if my life depended on it. And it easily could. This is very scary.

Another concern is the volume of traffic this will bring to our neighborhoods. With 1100-1200 new tenants it will be a ton more cars and trucks. These roads are small and narrow and for the most part have no curbs, gutters and sidewalks. It would just be too much of an increase.

Maybe the four story height has been addressed, but come on. Someone is being very greedy to want to squeeze so many units in that area. Even three stories would be too tall. There is nothing that tall out here. We like our views of the mountains across the river.

I realize that development is going to happen but it would be nice if some consideration would be given to the residents who don't want an over crowded development in our neighborhood.

Make these developers rethink their planning. Don't give in to them just to get this land developed. If they walk away maybe someone new with a smaller, less dense, even single family homes or duplexes plan will come along.

Thank you

Nancy Brown

**Subject:** West Glenwood Pasture Development

Attention Community Development Department

We have lived in West Glenwood on Ponderosa Drive for 13 years now and STRONGLY oppose the proposed 360 mixed level units that are projected housing 1100 to 1200 tenants.

We already suffer from bumper to bumper traffic on Grand Avenue and now add 800 (at least) cars to that mix???? The density is outrageous and I have not spoke to one west Glenwood resident that thinks this is a good idea. Our law enforcement department is already overwhelmed and this will create a terrible strain on them.

And if we are hit with wildfire or mudslides? That would create a nightmare traffic snarl and I for one, do not want to be stuck in traffic because of the traffic here in west Glenwood.

We are asking for sensible growth and planning because this town is not just about this developer's projected profit. We live here year round, we have invested in our town and area and do not want to see our safety or way of life impacted just to make money for some developer. Remember, you represent us not the developer.

Do the right thing for all of us. Not just a few investors.

Subject: West Glenwood development meeting

Hello Gretchen,

I'd like to express my concerns about the development proposal for the land adjacent to the West Glenwood mall.

As a citizen of West Glenwood I have many good reasons to oppose the idea, and one of the most crucial and undeniable is safety.

Those on the city council must know that when I-70 is closed for any reason—roadwork in the canyon, fires, or accidents—West Glenwood gets backed up and congested, as cars passing along the highway pull into our neighborhood, waiting for I-70 to reopen.

Last summer during the fires we had trouble leaving and re-entering our own neighborhood due to the I-70 traffic clogging our backstreets and the frontage road.

I ask the council to imagine a fire (God forbid) on the hills behind West Glenwood: how will fire trucks get in? Where would they stage a fire-fighting effort if there is no open space and no open roads? How will the residents get out?

This is already a concern now, as it is! If this new enormous development is allowed to pass, local daily congestion will be dramatically worse, and a wildfire would be a disaster.

Because there are regrettably few walkable amenities (other than automobile dealerships!), new families can be expected to bring 2 cars per household.

Our quality of life is on the line, for sure!

But so is our health and safety.

Trary LaMee

Subject: West Glenwood Development

To: Gretchen Ricehill

Subject: Annexation and Initial Zoning of 214 Center Drive, Glenwood Springs and Development by R2 Partnership

I am writing to express my opposition to the annexation, rezoning and development of the 12.285-acre property at 214 Center Drive currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley in general may have a housing need, but to allow 360 residential units, with 1200 tenants with only 650 parking spaces to be built on a plot of land next to a rural neighborhood is a concern for me on many levels.

**Safety:**

I'm confident that last year's wildfires in South Canyon and Glenwood Canyon have demonstrated the need for wise decisions to be made as you plan a strong and safe community for all residents of Glenwood Springs. Shortly after the South Canyon wildfire, the residents of West Glenwood saw firsthand how quickly gridlock occurred, leaving almost every road impassable until late into the evening.

To add another 1200 residents to the current 3500 residents of West Glenwood would be utterly catastrophic. Not only do all of these residents need to evacuate safely, but there are elderly and disabled residents who may need assistance, families with young children, as well as two schools and many daycare facilities. We are not talking IF a wildfire will happen again in Glenwood Springs but WHEN.

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." West Glenwood has many roads leading to A SINGLE ROAD - Highway 6. Highway 6 cannot allow for the safe evacuation of all the residents of West Glenwood as it stands today. Depending on the location of the fire, emergency vehicles may block off one or more roads to enable access to a fire or flood area, which would further restrict evacuation efforts.

**Impact on Traffic:**

The roads in West Glenwood are entirely inadequate to support a development of this size. The addition of 1000-1500 vehicles to our streets will create a traffic nightmare of overwhelming proportions and will turn West Glenwood into a parking lot. COVID has dramatically reduced traffic, and any traffic study done during these months will not reflect the reality of this area.

**Proximity to schools:**

Currently, the developer plans to have their main exit immediately opposite both the Two Rivers School and the Montessori School currently housed in the Glenwood Business Center. Even if the developer moves the exit street to somewhere else on Storm King, congestion and safety concerns for our young children, their parents, and our teachers are inevitable.

Green Space:

Glenwood residents value the beauty of the land and recognize the importance of green space; we will be losing yet another precious piece of land for our environment and wildlife. This pasture also affords West Glenwood with a good measure of protection against the spread of wildfires. Bike paths exist around town coming almost to this piece of property for both tourists and residents to recreate and enjoy this valley. Many tourists bike past the pasture to visit the area's Fish Hatcheries.

I urge you to protect its current population and help keep its residents safe by rejecting the application to annex and rezone this property.

**Subject:** Concerns with the West Glenwood Pasture Development

Dear Gretchen -

We live at 123 Creekside Court and use Donegan, Storm King, and Mel Rey roads to travel to town or out of town.

We already regularly experience speeding on Storm King and Donegan and cars not heeding stop signs at the corner of Mel Rey and Donegan. In a normal year, without the reduced traffic due to Covid, these roads can be crowded and difficult when accessing adjoining roads – such as Hwy 6 and 24, or the West Glenwood Roundabout. During last year's 111 fire, West Glenwood was in complete gridlock for several hours. Had there been a reason for us to evacuate we would not have been able to do so. We did read stories about emergency personnel – police and medical – not being able to traverse through that traffic.

We have seen that there is a traffic study camera at the corner of Donegan and Mel Rey and have read that the traffic study is being done by the developer. We hope that there will be studies at each area impacted by the proposed development, and that they will be done by a third party.

The current development plan shows the only entrance and exit on Storm King Road. This area is already a congested traffic problem during delivery and pick up of students attending the Two Rivers Community School. Of primary concern is the safety of the students, especially with the added traffic from a single entrance and exit to the development.

There is a lot of pedestrian traffic on Donegan and Mel Rey roads, but no sidewalks. This often requires vehicular traffic to move into the oncoming lane to safely pass.

The density proposed in the development is 360 dwellings with 1.5 parking spaces per unit. The parking is not sufficient to accommodate the projected numbers of dwellers.

Please consider all of the negative impacts this development would create in our neighborhood.

Thank you.

Ken and Erin Wiencek

**Subject:** Annexation and Initial Zoning of 214 Center Drive, Glenwood Springs and Development by R2 Partnership

I am writing to express my opposition to the annexation, rezoning and development of the 12.285-acre property at 214 Center Drive currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley in general may have a housing need, but to allow 360 residential units, with 1200 tenants with only 650 parking spaces to be built on a plot of land next to a rural neighborhood is a concern for me on many levels.

**Safety:**

I'm confident that last year's wildfires in South Canyon and Glenwood Canyon have demonstrated the need for wise decisions to be made as you plan a strong and safe community for all residents of Glenwood Springs. Shortly after the South Canyon wildfire, the residents of West Glenwood saw firsthand how quickly gridlock occurred, leaving almost every road impassable until late into the evening.

To add another 1200 residents to the current 3500 residents of West Glenwood would be utterly catastrophic. Not only do all of these residents need to evacuate safely, but there are elderly and disabled residents who may need assistance, families with young children, as well as two schools and many daycare facilities. We are not talking IF a wildfire will happen again in Glenwood Springs but WHEN.

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." West Glenwood has many roads leading to A SINGLE ROAD - Highway 6. Highway 6 cannot allow for the safe evacuation of all the residents of West Glenwood as it stands today. Depending on the location of the fire, emergency vehicles may block off one or more roads to enable access to a fire or flood area, which would further restrict evacuation efforts.

**Impact on Traffic:**

The roads in West Glenwood are entirely inadequate to support a development of this size. The addition of 1000-1500 vehicles to our streets will create a traffic nightmare of overwhelming proportions and will turn West Glenwood into a parking lot. COVID has dramatically reduced traffic, and any traffic study done during these months will not reflect the reality of this area.

**Proximity to schools:**

Currently, the developer plans to have their main exit immediately opposite both the Two Rivers School and the Montessori School currently housed in the Glenwood Business Center. Even if the developer moves the exit street to somewhere else on Storm King, congestion and safety concerns for our young children, their parents, and our teachers are inevitable.

Green Space:

Glenwood residents value the beauty of the land and recognize the importance of green space; we will be losing yet another precious piece of land for our environment and wildlife. This pasture also affords West Glenwood with a good measure of protection against the spread of wildfires. Many tourists bike past the pasture to visit the area's Fish Hatcheries.

I urge you to protect its current population and help keep its residents safe by rejecting the application to annex and rezone this property.

This property needs to be a Park which this city has a limited amount of for recreating. We already have a large population in a constrained geographical area and our traffic woes of today will grow and you don't need to grow them this way...

Having lived in this area throughout my life, it is imperative that we maintain and preserve this area as a safe environment for children and families that walk and ride bikes along Donegan Road. At any time in the summer, spring and fall families are walking, riding running on this road. This is to say nothing of the wildlife that could be affected. There are wild turkeys that live and migrate into yards on this road and the eagles that come every year to lay their eggs. The effects of building apartments in this area can be detrimental to the citizens and wildlife in this area.

I live on a very narrow road that is already has cars driving too fast. Have about been driven off road couple times. To add more cars to neighborhood will only have more people and cars taking that road for shortcut.

Subject: Annexation and Development Planning for 214 Center Drive

I am writing to express my opposition to the Development of the property located at 214 Center Drive in West Glenwood.

I recognize there may be a need for housing in the Glenwood Springs area. However, I do not believe the West Glenwood area can safely support the proposed Development. According to figure 2 of the Wildland Urban Interface Community Wildlife Protect Plan of April 2007, West Glenwood's has a hazard rating of "very high." The single road, Highway 6, is not sufficient to allow safe evacuation of all the residents currently living in West Glenwood today. Also, depending on the fire location, emergency vehicles may block one or more of the existing roads leading to Highway 6. As demonstrated on August 5, 2020, during the Mile Marker 111 Fire, West Glenwood quickly became gridlocked till approximately 11:30 pm. Had the fire progressed into the West Glenwood community, I do not believe the current 3,100 residents would have been able to evacuate quickly. The existing population contains elderly, disabled individuals who may need assistance, families with young children, two schools, and daycare facilities.

<sup>ii</sup>The Proposed Development plans illustrate 11' road lanes with street-side parking. The standard road lane width is 12'. I believe narrowing the limited roads leading to our one, and only exit will further compound our inability to evacuate. The road-side parking will add to the congestion and the feeling of crowding. Before we consider further Development, we must first address the safety concerns of West Glenwood. As it stands today, cars have limited ability to get from Highway 6 to I70. We must also consider that the roads serving this community also serve as a truck route. I'm not sure how to develop a workable plan considering the current layout of housing and roads. However, this is the discussion we must have before we consider further Development in West Glenwood.

To further support my concerns with the roads, the <sup>iii</sup>Referral Comments submitted to Trent Hyatt from the Garfield County Community Development stated, "Donegan and Mel Rey Road are not designed for the proposed traffic volume or impacts on pedestrians and cyclists." I agree the increased volume will negatively impact the character of the neighborhood. Predominately, Mel Rey Road is too narrow for the existing traffic and does not have bike lanes or sidewalks for pedestrians. As such, Mel Rey Road is the main road used by many residents living in West Glenwood. I would speculate that the proposed development residents would also use Mel Rey Road because it is the direct route off I70 and the round-about.

My last concern centers on the proposed density and impacts on our rural community. According to the <sup>iv</sup>COGS Strategic Vision\_v7 for the City of Glenwood Springs, the Vision and Mission clearly outline why the proposed Development does not fit our community. The Vision states, "...to maintain its small-town character and contribute to its culture and preserve our natural resources. The Mission states, "...meet the health, safety and welfare needs of our citizens and contribute to their quality of life..." The proposed project density does not fit with our current small-town character, nor does it address our ability to feel safe. It is not a matter of IF, but when we have our next wildfire. In 2018, <sup>v</sup>Paradise, California, experienced a disaster where seven residents died in their cars trying to flee a wildfire down a single road. I hope we can learn from their mistakes.

I urge you to seriously consider the safety and quality of life for the West Glenwood residents. I understand many of us in this community are considered County; I hope it does not mean our safety and quality of life are less important. Please deny this project and develop a viable evacuation plan that ensures the current West Glenwood Residents' safety.

Respectfully Submitted,  
Thomas and Karleen Clark  
570 Mel Rey Road,  
Glenwood Springs, CO 81601

Subject: West Glenwood Development

Dear Gretchen,

Please see the attached letter regarding my concerns over the development of 214 Center Drive in West Glenwood. Please forward this on to the entire planning and zoning commission. Now is the time for responsible growth, that allows for infrastructure and resources to keep pace; something this community is already lacking. Thank you for your time.

Sincerely,

Jennifer Zwickl

To: gretchen.ricehill@cogs.us  
Attn: Glenwood Springs, Colorado Planning and Zoning Committee

Regarding: Annexation and Initial Zoning of 214 Center Drive, Glenwood Springs and Development by R2 Partnership

Dear Gretchen Ricehill and Members of the Planning and Zoning Committee of Glenwood Springs Colorado,

I am writing today against the planned development of 214 Center Drive in West Glenwood. While you are considering this proposed development, I ask that you think about the following information carefully prior to allowing R2 Partnership LLC. to move forward with developing this 12.2 acre property with 360 residential units.

### **Safety**

During the South Canyon fire in August 2020 Mel Ray Rd, Donegan Rd and HWY 6 & 24 were turned into parking lots, and no evacuation orders had been initiated. The Glenwood Canyon Fire of 2020, Coal Seam Fire of 2002 and the deadly Storm King Fire of 1994 demonstrate how quickly a small wildfire can become catastrophic and deadly. If the South Canyon this last August had blown up like these other local fires, the entire West Glenwood community would have been locked into our homes, with no ability to evacuate with all exits blocked. In addition, a heated argument developed between a driver parked on Donegan and a home owner whose property was being disrespected and it took over 40 minutes for Glenwood PD to respond, **with the officer stating he could not get through traffic**. Help couldn't get in, and we couldn't get out if we needed to evacuate. PLEASE SEE ATTACHED PHOTOS AT THE END OF THIS LETTER.

### **Traffic**

Any traffic study completed during the current COVID-19 pandemic will be inaccurate at best! With many people unemployed, or having reduced hours, along with the number of people working from home due to office &/or school closures has significantly impacted the number of cars currently on the road in our community. Under the best conditions there were times it took 10 minutes for me to leave my house on Chaparral Circle, drive down Donegan to Mel Ray and through the round-about to access I-70 or Midland Ave during the morning commute at 7:15 am. When roads have been snow-packed there have been times that same distance took an hour during my morning commute. At the very least these impact studies need to be completed post pandemic before allowing this development to move forward.

### **Quality of Living for Glenwood Residents**

In addition to the negative impacts to the West Glenwood Community I want to discuss the overall quality of living in Glenwood, especially for our kids. We have only one grocery store, that under the best circumstances struggled to keep shelves stocked. We have only one affordable mental health facility for lower income individuals and families, Mind Springs. They are inaccessible to many due to location, in addition to the fact that counseling appointments are hard to make on a consistent basis, with it often taking months to see a psychologist if you need medications. Primary Medical Care facilities are scheduling 1-3 months in advance for routine care, some of which is critical for monitoring of chronic conditions, and these wait times would only increase with significant numbers of new residents.

Schools are already struggling with being over-crowded, especially as the number of choices decreases with only 1 High School being fed from 3 separate schools (Glenwood Springs Middle School, Two Rivers K-8 School and Riverview K-8 School) in addition to 2 Private Schools (Ambleside at Skylark and St. Stephens Catholic School). The quality of our kids' education is negatively impacted by over-crowded classroom and crowded hallways where bullying and vaping are easier to get away with (a former student of mine talked about

how her orientation at Glenwood High included a tour of the places where you could vape without being caught).

Garfield County has one of the highest suicide rates in Colorado, with Colorado ranking 7<sup>th</sup> Nationwide. Some of the things impacting these high rates is the quality of living. Garfield County, and Glenwood, has seen an increase in Drunk Driving, and driving High, among individuals under 21, several resulting in deaths. As an Intern in Addictions Counseling and a Masters in Clinical Social Work with a Mental Health Certificate candidate the increased drinking and drug activity is in part due to boredom. Glenwood has no movie theatre, arcade, bowling alley, bike/skate park that provides our youth with active healthy activities. If you want to participate in any of these activities you have to travel 30+ miles to El Jebel or Rifle. The lack of these healthy activities also impacts the mental health of our youth, leading more younger adolescents (10-18 years of age) to become depressed, anxious and suicidal. In the last month alone I know of 3 adolescents in Glenwood who have attempted suicide.

While the Glenwood Springs Community Center is improving, many of their activities are at times when working parents can't take their kids, especially during the summer. The Hot Springs pool is a tourist destination and unaffordable for many locals, and they don't offer local discounts.

The job market in Glenwood doesn't support additional residential building. Making a living wage in Glenwood has grown more difficult over the years as Glenwood has grown, and with it the financial stress of trying to provide for your family. This financial stress increases anxiety, depression, substance use (including alcohol and marijuana) and suicidal ideation in adults.

In closing, I urge you to think about the long-term impacts on the quality of life, and infrastructure (or lack of) when considering the proposed development at 214 Center Drive, or any additional residential project in the City of Glenwood. If the COVID-19 pandemic has taught me anything it's that we must take care of each other, and strive to improve access to resources for all residents of a community. Increasing the number of residents in a community without regard to the necessary infrastructure, which we already lack, to sustain a high quality of living is irresponsible.

Thank you for your time, and for carefully considering all the costs of uncontrolled residential development within our beautiful city.

Sincerely,  
Jennifer Zwickl  
Chaparral Circle, West Glenwood Resident

03/22/2021 Letter of concern to [Gretchen.ricehill@cogs.us](mailto:Gretchen.ricehill@cogs.us) Director of community development

Please include this in your minutes for tomorrows Planning & Zoning meeting.

Hello Gretchen, My name is Dave Chiarello, resident at 0404 Mel Rey Rd in west Glenwood springs. I've lived in Glenwood form 1977 to 1991 on 1809 Grand Ave, across from Sayre park. I raised a family of four on this busy street. After the City took down the trees and widened Grand Ave the noise and pollution caused us to move to West Glenwood from 1991 till present time. It was an essential step for a more peaceful, quieter environment. You can see the stars clearly at night. All developments in this area have been in keeping with normal R1 zoning to maintain appropriate traffic levels and our quality of life. Until this.

The infrastructure is already overtaxed, from my own experience.

The main sewer line backed up into my basement 3 times in the last two years. The density of this Proposal is beyond absurd! Glenwood Springs is already maxed out.. The experience of last years fire season showed what a huge safety issue for evacuation, as down valley gridlock blocked many residents from coming or going to their homes. This development must be paired down to a third of units proposed. 120 at the most.. I hope you understand what the word 'Community' means. That pasture was always a refreshing reminder of nature at its best. The horses were beautiful.

Thank for entering these to the notes, Dave Chiarello

**Subject:** West Glenwood Pasture Development

As advised we are submitting comments as members of the public being directly affected by the proposed annexation and rezoning of the land directly behind the Glenwood Springs Mall. In our view the proposed development will have serious adverse affects on our quality of life and personal sense of safety and security.

Our neighborhood consists primarily of single family homes. There are also four schools. County Road 130 features significant pedestrian and bicycle usage; it also provides a direct route to the frequently visited state fish hatchery.

Our concerns are vested in impacts on infrastructure (including water and sewer) increased traffic, lack of parking and inability to have safe egress in the event of emergency.

The neighborhood has been subject to serious wildfire activity including the storm King Fire where 14 lives were lost and the Coal Seam Fire where 39 structures were destroyed. There have been two mandated evacuations and numerous pre evacuation notices. These events have shown how extraordinarily difficult evacuation is.

We believe that adding approximately 800 to 1200 people to the neighborhood and an additional 800 to 1600 cars will compromise the sense of safety and security to the residents.

For these reasons, we ask the committee not to approve the proposed request of the annexation to the city.

Sincerely,  
Bob and Jamie Darien

0019 Chaparral Cir. Glenwood Springs, CO

**Subject:** West Glenwood Pasture Development

Hello Gretchen Ricehill, Director of the Community Development Department,

My name is Belinda (Lindy) Enewold and I am a home owner at 266 Mt. Shadows Drive, Glenwood Springs, CO. I just retired from teaching in Port Isabel, TX. My plans are to return to my West Glenwood home. I am very concerned about the change that is taking place in that mountain town. It seems it is no longer going to have the quaintness, the mountain flavor, nor have the peaceful and open scenery that I and so many others, moved there for, especially in that neighborhood. Instead, there are going to be buildings that block the very vistas I/we bought our properties for! We have no huge factories or big businesses as calling cards for 'the masses' of people to settle in our area. We mostly cater to seasonal tourist trades. Why should we sacrifice our town, our scenic views, tax our community services (police, fire, emergency, hospital, etc.)? Our streets and appropriate access for such services don't support such large constructions, specifically apartment complexes, to encourage them to come. Fire engines and snowplows hardly fit down our West Glenwood streets even today. From past experiences, we all know that forest fires require speedy evacuations. We had to turn highway I-70 and roads into one-way evacuation lanes, some of us, 4-wheel drive or not, drove over ditches and road shoulders, only 'to get in a traffic jam line'. Where were we to go? There weren't many safe places to head to! That was a very frightful experience for us. How are you going to evacuate even a larger number of people?

**Worst case scenario:** If West Glenwood home owners get trapped on the North side of Donegan because of a fire/disaster involving the proposed building area, what route do we take? Only two streets (Ponderosa Drive and Mel Ray) lead to Donegan Rd that abuts the site. It would not be available if blocked off by the disaster or by apparatus and personell responding to and fighting it, etc. Traffic flow would have to divert West onto 132 Rd., if we get past a part of Donegan, and then go down Mitchell Creek to Hwy 6.. If we get past the East Donegan part, we would continue down Mel Ray to Hwy 6. If blocked at the corner, we would have to continue towards the golf club and town via Donegan. If both those routes (Ponderosa Dr. and Mel Ray) are blocked, we can only head up into the mountain by foot, at the top of Ponderosa Drive. Keep in mind that all these roads are narrow. Storm King Rd (off of Donegan) is an exit to Hwy 6, assuming we reach it before it is unavailable. In a major disaster that involves the proposed building site and surrounding area, West Glenwood residents could be potentially trapped if things go horribly wrong. The memory of not having many escape routes is still vivid in my mind from the forest fire situation years ago. Imagine having no escape route!

Assuming every unit gets filled, our schools, school bus and other transportation services, grocery stores, clothing stores, etc. are not sufficient even now! The snowball effect won't be able to be stopped! Glenwood Springs and West Glenwood Springs will become cities, and all that that implies. That is not what I, and many others, moved here for. I am against such things happening especially to my neighborhood, where I planned on returning to. There are other locations that are more appropriate for such large complexes, instead of our more typically -sized family houses, if we. are not able to stop this development. Are all the units that have been built to date filled? Why build more?

I hope I have expressed my summarized feelings clearly. If you respond by phone, please leave a message as I don't answer phone numbers not recognized.

Thank you,

Belinda (Lindy) Enewold

Subject: Annexation and Initial Zoning of 214 Center Drive, Glenwood Springs and Development by R2 Partnership

I am writing to express my opposition to the annexation, rezoning and development of the 12.285-acre property at 214 Center Drive currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley in general may have a housing need, but to allow 360 residential units, with 1200 tenants with only 650 parking spaces to be built on a plot of land next to a rural neighborhood is a concern for me on many levels.

**Safety:**

I'm confident that last year's wildfires in South Canyon and Glenwood Canyon have demonstrated the need for wise decisions to be made as you plan a strong and safe community for all residents of Glenwood Springs. Shortly after the South Canyon wildfire, the residents of West Glenwood saw firsthand how quickly gridlock occurred, leaving almost every road impassable until late into the evening.

To add another 1200 residents to the current 3500 residents of West Glenwood would be utterly catastrophic. Not only do all of these residents need to evacuate safely, but there are elderly and disabled residents who may need assistance, families with young children, as well as two schools and many daycare facilities. We are not talking IF a wildfire will happen again in Glenwood Springs but WHEN.

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." West Glenwood has many roads leading to A SINGLE ROAD - Highway 6. Highway 6 cannot allow for the safe evacuation of all the residents of West Glenwood as it stands today. Depending on the location of the fire, emergency vehicles may block off one or more roads to enable access to a fire or flood area, which would further restrict evacuation efforts.

**Impact on Traffic:**

The roads in West Glenwood are entirely inadequate to support a development of this size. The addition of 1000-1500 vehicles to our streets will create a traffic nightmare of overwhelming proportions and will turn West Glenwood into a parking lot. COVID has dramatically reduced traffic, and any traffic study done during these months will not reflect the reality of this area.

**Proximity to schools:**

Currently, the developer plans to have their main exit immediately opposite both the Two Rivers School and the Montessori School currently housed in the Glenwood Business Center. Even if the developer moves the exit street to somewhere else on Storm King, congestion and safety concerns for our young children, their parents, and our teachers are inevitable.

**Green Space:**

Glenwood residents value the beauty of the land and recognize the importance of green space; we will be losing yet another precious piece of land for our environment and wildlife. This pasture also affords West Glenwood with a good measure of protection against the spread of wildfires. Bike paths exist around town coming almost to this piece of property for both tourists and residents to recreate and enjoy this valley. Many tourists bike past the pasture to visit the area's Fish Hatcheries.

I urge you to protect its current population and help keep its residents safe by rejecting the application to annex and rezone this property.

Cindy and David Gray

**Subject:** Annexation and Initial Zoning of 214 Center Drive, Glenwood Springs and Development by R2 Partnership

We are writing to express our opposition to the annexation, rezoning and development of the 12.285-acre property at 214 Center Drive .

From what we understand there will be 360 residential units occupying 1200 tenants with only 650 parking spaces. This is a concern! As members of the Glenwood Church of Christ, we have seen first hand the issue with inadequate parking spaces for the allotted units located directly east of the church. The church overflows with residents parking in the church lot as the parking is not sufficient within the boundaries of the townhomes. We have also seen the influx of cars backing up on Donegan while picking up from lift up and if you are ever at Two Rivers after school trying to pick up children, you will also see the traffic impact just from that. We can't imagine adding an influx of additional traffic from residents in these proposed units.

Safety is also a major concern. We lived on Ponderosa during the Storm King Fire and the line of cars back then was tremendous trying to get out of West Glenwood, then again after the Coal Seam fire. This is a safety issue!

To borrow from other concerned citizens words:

"Last year's wildfires in South Canyon and Glenwood Canyon have demonstrated the need for wise decisions to be made as you plan a strong and safe community for all residents of Glenwood Springs. Shortly after the South Canyon wildfire, the residents of West Glenwood saw firsthand how quickly gridlock occurred, leaving almost every road impassable until late into the evening.

Subject: correction on the last line.

I am writing to express my opposition to the annexation, rezoning and development of the 12.285-acre property at 214 Center Drive currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley in general may have a housing need, but to allow 360 residential units, with 1200 tenants with only 650 parking spaces to be built on a plot of land next to a rural neighborhood is a concern for me on many levels.

Hello My name is Todd Hurst. I reside at 547 Donegan Rd. I have lived at this property for 16 years. I am a lifelong resident of Glenwood Springs. I am 4 of 5 generations from Glenwood Springs. My family has been here since the 1890s. This is our home and the reason we all live here is for the small town atmosphere that Glenwood still has. I cannot emphasize enough how this project is just not the right fit for Glenwood, especially West Glenwood!

Just to list a couple of the problems with this project:

Traffic. To add another 900 to 1200 vehicles to an already overcrowded valley is irresponsible and dangerous! As it stands right now 300 vehicles a day go (many accelerating over the speed limit) by my house on Donegan. Adding this development would increase it to 2000+ a day, that is unacceptable! The evacuation of all these people in an emergency is impossible. If you annex this county land as city, you will be responsible for any and all deaths that may result from the inability to safely evacuate in an emergency.

Population. We do not need continuous growth! There is a finite amount of open space left here. We MUST preserve it at all costs. We do not want to become another CA. Nobody wants that, that is why we live here. We need more open

space, not less. This was proven by Covid in this last year. We have already added several huge apartment complexes in just the last couple years, and hardly any single family, owner occupied housing. We are not Aspens solution to their lack of housing for their work force.

Jobs. Where are all these people going to work? GWS does not have an abundance of jobs. The valleys economy is just barely recovering from this last year.

To allow an out of state developer, who has nothing but a profit based interest to develop one of the last open spaces we have in our community, is devastating. There is no benefit to the citizens of GWS, and the property taxes are not worth the loss of this space. This project is reminiscent of the strip mine for me, it destroys the small town atmosphere. We need to take a serious look at slowing the future growth rate, limited space and resources demand it. I truly hope that you hear my voice. This is the point of no return, and you as our elected officials need to put our best interests at heart, not profit.

Thank you for your time and consideration,

Todd Hurst

Subject: Pasture development in West Glenwood

Dear Ms RiceHill,

I am writing to strongly oppose the large development planned a block from my home. The impact of that many people with so little planning for emergency evacuation could very well prove deadly for me and many of my neighbors. I lived here through Coal Seam and South Canyon fires and the thought of 800 more families trying to escape our quiet community terrifies me. I have one way to I 70, I have run for my life before, I would not have escaped if there were 800 more families between me and the one exit to safety.

I mention our quiet community, this development would ruin that concept for good. The increase in traffic, noise and light pollution would negatively impact our community. Please do not let this happen.

**Subject:** West Glenwood development

Dear Ms. Ricehill,

I am a 33 year resident of West Glenwood Springs and I reside on the west end of Donegan Road. I have a few comments I would like to make regarding the proposed development behind the Glenwood Mall.

I am dismayed by all of the Apartment and condominium development in Glenwood the past few years. One of the best aspects of life here is our small town character. I'm afraid this is being lost. We are becoming a bedroom community for upvalley workers and a less rooted/more transient population. We are beginning to look a bit more like Aurora than the small town We love. This proposal is just too large.

It also is totally out of character with the neighborhood to the north. I realize that current zoning may allow non residential uses but now that We are looking at a residential use, I believe it should be in harmony with the existing neighborhood.

Additionally, the density will result in a large amount of increased traffic. There are no grocery stores, coffee shops or other amenities within walking distance.

I understand that this parcel will be developed. I am asking you to consider a more appropriate development. Perhaps an area of single family/patio homes would be much less destructive to the surrounding neighborhood and our community as a whole.

Thank you for the opportunity to comment.

James Conway  
147 Donegan Road

This property can and should be used more effectively. When do we as a community say enough is enough and quit prioritizing money and financial gain over quality life. These apartments would be damaging to our area. What is being proposed is significantly more than this small little area can handle and I say shame on our city council members for even considering it.

Let's be more thoughtful about how to develop this precious piece of land.

I love my home and the quietness and peacefulness of where I live. I do not live in a big city. Please keep it this way!

These apartments truly are a bad idea. Please protect my family, children and the beauty that surrounds us.

**Subject:** West Glenwood Pasture Development

We are writing to express our opposition to the annexation, rezoning and development of the property at 214 Center Drive. We have lived on Mountain Shadows Drive for over 30 years and my husband and I are Glenwood Springs natives.

We are not against development of this property if a project is presented that fits the spirit of our family oriented, quiet and safe neighborhood. However, we feel strongly that to allow 360 residential units with 1200 tenants and 650 parking spaces does not meet safety, traffic, infrastructure and greenspace priorities.

We have been evacuated from our home three times due to wildfires, and the traffic leading out of our West Glenwood neighborhood has made that a very stressful situation. In addition, we are concerned with water, sanitation, road maintenance and other infrastructure issues. One doesn't have to look far to note that Glenwood Springs hasn't maintained upkeep of current necessities, let alone could they, considering the additional stress and workload a project of this magnitude would present. We have been told by the city that we should expect our water bills to increase 38% next year, with another 5% increase yearly in future years. It is clear that we do not have a water system that can handle the current load, not to mention an increase in usage to the degree that another 1200 tenants would incur.

We urge you to consider the 3500 residents of beautiful West Glenwood and our concern for safety, traffic and lack of infrastructure when considering this development. It is simply not a good fit for our community.

Sincerely,

Roz and Jay Fowler

**Subject:** West Glenwood pasture

I have sent one form letter already but wanted to follow up with my own comments. I have now lived in west Glenwood for the past 6 months. I love how peaceful it is.  
I love being outside city limits.

It was decided many years ago to remain county and not to annex to the city. By doing so our roads are some of the best maintained.

I lived in south Glenwood for 5 years and lived on 21st street and in all that time never saw them once fill potholes on 21st or Blake Ave past the hospital. Also along 22nd street by Alpine bank.

I have lived here for over 40 years been through 4 major fires. West Glenwood has no way of evacuating the residents now as we witnessed during Glenwood canyon fire as well as Debeque fire last year. We as a small area have seen devastating fires. Storm King fire, Coal Seam, Basalt Fire and Glenwood Canyon to begin with. I have also seen to many mud slides that shut down I-70 as well. Adding more cars, traffic and people is just insane.

**Subject:** Re: Moratorium on development (This was a Letter to the Editor in the PI on Friday, March 19, 2021 titled Housing vs. carrying capacity)

Gretchen:   Housing vs. carrying capacity

Given the renewed discussion about affordable housing in Glenwood Springs, now would be a good time to step back and take a look at a larger housing concern: carrying capacity.

Surprisingly, the number of people we can stack in Glenwood is seldom discussed.

Simply put put, carrying capacity is the maximum amount of people that can live in a certain defined area and still have a good quality of life.

The concept is that after supplying all the fundamental needs to a community, there is a tipping point where, due to overpopulation, systems break down and people cease to thrive. I fear that we in Glenwood Springs are nearing that point.

Glenwood is located in one of the narrowest widths of the Roaring Fork Valley. It's growth depends on navigating around rivers, a railroad, an interstate and Highway 82. Glat, buildable land within the city limits is scarce.

**Subject:** Moratorium on development

f the Roaring Fork Valley. It's growth depends on navigating around rivers, a railroad, an interstate and Highway 82. Flat, buildable land within the city limits is scarce. We need to be mindful of these barriers as we don't have the luxury of expanding the town borders. I feel it's time for you, our leaders, to address carrying capacity as we move forward. As you approve massive apartment complexes in our city, I wonder if any of you consider the concept of carrying capacity? I wonder at what point the city should consider a development moratorium? I'd say the sooner the better.

Currently, there are several large development projects that have been approved (220 units). In the past two years there have been 301 units completed. There are five development projects in the pipeline that will add another 823 units. The above units, when added together, come to 1,344 new living units in Glenwood Springs. Given an average of 2.53 people per unit, Glenwood will have added 2,603 residents in just a few years. In a city of 10,000 souls, that is a population boost of 26%. Add potential projects not yet submitted — 104 units at Vogelaar Park, the airport property, the West Glenwood Mall property, and you should be able to visualize a

municipal implosion. We desperately need restrictions on development.

Given the rapid development in our town, the first breach in our quality of life will be transportation.

CDOT, which controls Grand Avenue, will have little choice but to remove parking on Grand Avenue. They will have to gradually increase the speed limit to 40 miles an hour. We will wait at all crossing streets for several minutes before getting 10 seconds to cross or merge.

Given this inevitability, I would urge city planners to include a bypass easement in the Confluence Plan. Not to do so would be ignoring the thousands of anticipated daily commuters coming in the not-so-distant future.

Long-term impacts of overpopulation include stress on city services, i.e. police, fire and schools. As you may know, residential units pay only 7% in property taxes. They consume more service dollars than they produce.

Therefore, additional residential units in Glenwood will only serve to increase taxes.

Glenwood's density of 10,000 people packed into approximately 6 square miles is already adding pollutants into the rivers via storm drains. Pollutants include magnesium chloride, oil, dust and trash. Air inversions happen from time to time. Adding more houses and people will only hasten a declining environment.

The goal of limiting numbers of new residents should include and focus on the ecology of the systems within Glenwood Springs.

The city owns quite a few buildable acres. Going forward, I believe there will be pressure to develop the property that we citizens own via public/private arrangements. I'm

against using our real estate equity to provide for more people, affordable or otherwise.

California was once one of the most desirable places on earth to live. Through mindless growth and expansion, they are making paradise undesirable in many places. I would hope we are smarter than that. Surely, we can learn from their mistakes and take a proactive approach to growth before we reach the rapidly approaching tipping point. Can any of you state the ideal population for Glenwood?

Recently, the city completed the 2020-25 Strategic Plan. The first paragraph of the plan states the Strategic Vision for Glenwood Springs' future.

It reads: The city of Glenwood Springs desires to maintain its small-town character and to preserve its cultural and natural resources. Implementing a proactive plan that achieves directed and balanced development, social and economic diversity and addresses transportation needs will (sic) move the city forward.

While I appreciate the time and energy spent on affordable housing, I feel we have a classic "forest for the trees" situation. Overpopulation of our precious town may not appear as pressing as some immediate issues, but I assure you the vitality of our town depends on actionable steps to stem the tide. Please consider a development moratorium.

Glenwood Springs

March 23, 2021

To: City of Glenwood Springs Planning & Zoning Commission  
Re.: 214 Center Drive, LLC/ Glenwood Partnership, LLLP- Consideration of an Annexation and the initial zoning/ Rezoning

Good evening,

I am Floyd Diemoz, the managing partner of Glenwood Partnership LLLP, a family-owned partnership. We are located at 214 Center Drive in West Glenwood Springs. My grandparents immigrated from Northern Italy and made the Roaring Fork valley their home in approximately 1900. My wife and I are both natives of Glenwood Springs.

We own approximately 15.8 acres of privately owned and commercially zoned land in West Glenwood Springs, that is not within the city limits. Today we are petitioning for the annexation of that land into the City.

We are under contract to sell approximately 12.3 acres of our vacant land to R2 Partnership, LLC. They propose to develop the land as a multi-family housing project. We know that they have worked diligently in their efforts to follow the vision of the City's Comprehensive Plan for our property, and we believe their project would be a beneficial addition to the City by providing much needed housing.

We are highly impressed with R2 Partnership, LLC, who have a proven track record on similar projects. We believe that they will develop our last remaining vacant land in a responsible manner, as well as be a good neighbor within the community.

We will be retaining from the sale, Glenwood Business Center, which encompasses approximately 3.5 acres and is also under petition for annexation.

Next, my son John will give some background history of our property.

March 23, 2021

Good Evening,

I am John Diemoz, a Glenwood Partnership partner.

- More than 60 years ago, in 1960, my grandparents, Adolph and Edith Diemoz, purchased approximately 30 acres of privately owned land in West Glenwood as an investment property.

At that time, an easement and right-of-way was established with the neighboring property owners to our west, for joint usage for a future road for development purposes. This future road would extend from Highway 6 and head north to Donegan Road. That road is now known as Storm King Road.

- Subsequently, my grandparents and their children formed Glenwood Partnership. In 1980, they sold approximately 14 acres of land for the Glenwood Springs Mall.
- In 1981, Garfield County issued a special use permit to Glenwood Partnership for a commercial park, with the ability to build 15 buildings on the remaining 15.8 acres of vacant land.
- That same year, construction began on our first phase of our Glenwood Business Center development, which was to include two office/ warehouse buildings of approximately 15,000 SF each, with associated landscaping and parking. In May of 1982, we completed our first building. At that time, we also built Storm King Road located west of our building and north to Donegan Road. The cost for the road's construction, including sidewalks and land, was paid for equally by Glenwood Partnership and the adjacent property owner to our west. The road was then deeded by Glenwood Partnership to Garfield County.

Additionally, in 1981, water, storm sewer, sanitary sewer, gas, electric and phone lines were installed into our property, primarily at our south property line which adjoins the mall property, to service all of our future development needs.

For landscape irrigation, Reynolds and Cain Ditch shares are utilized. No domestically treated water is needed for any current or future development on our parcel for landscape purposes.

- Construction on our second building was cancelled in 1982 due to an economic downturn, however in 2007, we built our second office/warehouse building at the Glenwood Business Center, and completed what you now see today.

- Our tenants include- construction contractors who utilize office and warehouse space; an interior design firm; a geotechnical engineering firm; Federal and State Government offices; Smart Start; and a Montessori pre-school. We do not propose any changes with usage on our retained property.
- Some public comments in opposition to this application describe our property as being open space, green space, and a future park and community meeting place; yet our property is privately owned, and has never been under any open space designation, parkland designation or conservation easement.
- The Partnership's buildings, site improvements and remaining undeveloped land have been commercially zoned for decades, as well as taxed at a commercial-not agricultural-rate. In April, we'll issue payment on a \$72,000 dollar property tax invoice from Garfield County which reflects the commercial assessment rate.

Thank you for your consideration.

**Sent:** Tuesday, March 23, 2021 12:28 AM  
**To:** Gretchen E Ricehill <gretchen.ricehill@cogs.us>  
**Subject:** 214 Center Dr. development

Dear Gretchen Ricehill and members of the Planning and Zoning Committee,

I live at 0036 Donegan Rd. I have been lucky enough to call Glenwood Springs my home for over 35 years.

My wife and I have lived there thru; Storm King Fire, Coal Seam Fire, Grizzly Creek Fire and the multiple "smaller" wildfires.

I am writing to voice my concerns regarding the proposed development at 214 Center Dr. in West Glenwood.

I am against such a massive development in this tiny tucked away corner of Glenwood. The reasons are many.

1) years ago an evacuation plan was underway with regards to safely getting the residents that lived here THEN out of harms way. To my knowledge its never been completed.

\*\*\*This development would add atleast 700 MORE vehicles

2) Traffic on Mitchell Creek and Donegan RD: there are more and more vehicles thinking this is a speedway

Near the elementary school on Storm King Rd. just before 8am is CRAZY, folks zooming in to drop kids off and then to get to work on time. Their buses are now parked in the narrowed roadway so moving traffic cant see past them to the corner in either direction. This is seriously dangerous with the traffic we have right now

\*\* 214 Center Dr is directly across the street from this school

3) the traffic circle is very dangerous even on off hours. There is just too much traffic, moving way too fast

and this is RIGHT NOW during the fires of last summer it was complete and total grid lock trying to exit

\*\* add 700+ MORE vehicles ?? that's very poor planning

the city will end up with the same issues they now have in South Glwd., trying to figure out an evacuation route

Lets PLAN now for THAT and then see what the traffic limits to that are, BEFORE we approve a MEGA development and a tragedy occurs. A tragedy that is completely preventable

4) infrastructure: according to the City Police Chief a few weeks ago they can't fill about 20 open positions now

\*\*\*add about 1400 more people ???

5) height of the structures proposed 4 STORIES???????????????? that is not in keeping with the neighborhood design

6) and maybe the most important reason to not approve any of this development: WATER we didn't have much before the

fires of last summer and according to the City it will be MANY years before THAT amount is restored.

Summary of my thoughts.

Development for the sake of development, only benefits the developer. There is nothing in this plan that benefits any part of our community. Glenwood has many challenges ahead; Water, Traffic, actual Affordable Housing, and Evacuation Route plans. We need to resolve those, BEFORE adding such a massive additional blow to our city.

Thank You

Joanne M Stanley

**Subject:** 3\_23\_2021 City of GWS P&Z Meeting - 09.20 Annexation & Zoning/Rezoning of 15.818 Acres

Good Evening Gretchen,

I am a resident of West Glenwood Springs since 1989, and native of Colorado.

In participating in tonight's P&Z meeting and reviewing the electronic meeting packet, I heard many concerns regarding the proposed development's impact related to evacuation of the neighborhood in an emergency situation (whether it be from fire, flooding, earthquakes, etc.). Commissioner Schachter raises many good questions and one in particular was whether the developer has commissioned a fire mitigation evacuation plan. I did not catch the name of the staff (female) who responded to Commissioner Schachter, but her response was no study has been commissioned. How does a resident ensure that the City look into and/or require that this particular study is performed and submitted prior to approval of this project?

Please consider this my request to require the developer to provide a study that would address evacuation mitigation of the West Glenwood Springs community. Please also acknowledge receipt of my request.

Stay safe, stay healthy

Subject: Annexation and Initial Zoning of 214 Center Drive, Glenwood Springs and Development by R2 Partnership

I am writing to express my opposition to the annexation, rezoning and development of the 12.285-acre property at 214 Center Drive currently under contract with R2 Partnership LLC. I have lived in Glenwood Springs since 1973, and have lived in my current home on Donegan Road since 1994. I recognize that the Roaring Fork Valley in general may have a housing need, but to allow 360 residential units, with 1200 tenants with only 650 parking spaces to be built on a plot of land next to a rural neighborhood is a concern for me on many levels.

**Safety:**

I'm confident that last year's wildfires in South Canyon and Glenwood Canyon have demonstrated the need for wise decisions to be made as you plan a strong and safe community for all residents of Glenwood Springs. Shortly after the South Canyon wildfire, the residents of West Glenwood saw firsthand how quickly gridlock occurred, leaving almost every road impassable until late into the evening.

To add another 1200 residents to the current 3500 residents of West Glenwood would be utterly catastrophic. Not only do all of these residents need to evacuate safely, but there are elderly and disabled residents who may need assistance, families with young children, as well as two schools and many daycare facilities. We are not talking IF a wildfire will happen again in Glenwood Springs but WHEN.

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." West Glenwood has many roads leading to A SINGLE ROAD - Highway 6. Highway 6 cannot allow for the safe evacuation of all the residents of West Glenwood as it stands today. Depending on the location of the fire, emergency vehicles could be blocked from access to a fire or flood area by hundreds of vehicles trying to flee.

Please review the news coverage and photos from the Glenwood Post Independent starting June 9, 2002. There are graphic photos of the evacuation of West Glenwood forced by the Coal Seam Fire, with dense smoke, wind, falling ash, and flames on the hillsides. There was bumper to bumper traffic evacuating through the smoke in 2002, and traffic, homes and businesses have increased dramatically since then. Consider that nightmare scenario when evaluating the total gridlock that occurred on August 3, 2020. There are frightening parallels to the Camp Fire in Paradise, CA, where the town was destroyed and people were burned alive trying to escape the flames. That's what keeps me awake at night.

**Impact on Traffic:**

The roads in West Glenwood are entirely inadequate to support a development of this size. The addition of 1000-1500 vehicles to our streets will create a traffic nightmare of overwhelming proportions and will turn West Glenwood into a parking lot. COVID has dramatically reduced traffic, and any traffic study done during these months will not reflect the reality of this area.

Proximity to schools:

Currently, the developer plans to have their main exit immediately opposite both the Two Rivers School and the Montessori School currently housed in the Glenwood Business Center. Even if the developer moves the exit street to somewhere else on Storm King, congestion and safety concerns for our young children, their parents, and our teachers are inevitable. Teachers at Two Rivers School routinely park on the streets near the school. Where will the teachers park when those spots are filled with overflow from the development?

Green Space:

Glenwood residents value the beauty of the land and recognize the importance of green space; we will be losing yet another precious piece of land for our environment and wildlife. This pasture also affords West Glenwood with a good measure of protection against the spread of wildfires. Bike paths exist around town coming almost to this piece of property for both tourists and residents to recreate and enjoy this valley. Many tourists bike past the pasture to visit the area's Fish Hatcheries.

Excessive Building Height:

West Glenwood has long been marketed as "Sunny West Glenwood." Four story, 40 foot tall buildings will create an "urban canyon," robbing residences north of Donegan Road not only of their views of our mountains, but of their access to sunlight, especially in the winter. Existing high rise buildings around Glenwood Springs have been backed up to hillsides, where surrounding neighborhoods have not been severely impacted by their height.

This proposed development is simply incompatible with the surrounding neighborhood at best, and at worst compounds the already existing danger to current residents, and to those hundreds of proposed new residents. The safety and quality of life of residents of Glenwood Springs should not be sacrificed to uncontrolled growth and the profit of an out of state developer. I urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

Marilyn Dorman

Follow the water: Lately, the City has been pitching the “necessary” upgrades that our town’s water/sewer lines “desperately” needs. We are in a messy situation here folks, because of outdated and poor oversight. Very poor planning and management if you ask me. Now, as the City considers the annexation and development of 360 additional new dwellings, IS the City really looking and planning and studying the impacts both negatives and positives of such a massive development. Lets just take a look at one very important issue to me. OK, let’s do some simple arithmetics First. According to the director of public works the average medium size home consumes 5,000 gallons a month. If one was to say, multiply 5,000 by the number of units being proposed what does that give us? That is 1.8 million NEW additional gallons of fresh water needed for basic home usage PER MONTH. About the same amount of sewer water that has to be processed and re-cleaned. Can these be put on a capacity model? 1.8 million gallons! this is just basic usage. It does not include the developers’ swimming pool/water area nor does it include irrigation for keeping up the many “grassy” knolls I’m sure they will have. This is Phase I. What of Phase II development of the WG Mall? A quote from one of my favorite movies “If you build it they will come” We live in a beautiful place, I get it. A lot of folks want to move here, I get it. There is not enough housing, I get it. But the fact remains that our current infrastructure is not limitless. Our beauty is limitless but our infrastructure IS NOT. The building of such a massive development WITHOUT projecting future use of existing limited resources is in line with decades of poor decision and planning by the City. It also means that these new dwellings will bring additional vehicles, water usage, sewer usage, pollution both air and noise. We have NO Supermarket in WG. This will also create a higher strain on our town’s ONLY supermarket. Where will these new children go to school? Can we have a capacity model for that? Can our only Hospital support “X” (x= unknown) amounts of new sick or injured new residents? I guess what I am trying to say & ask at the same time is “can our current infrastructure support these new dwellings” The City can’t keep up with current infrastructure on existing water/sewer lines. I will not even talk about our streets & pot/holes. The City’s poor planning and oversight has the old part of Glenwood Springs in a pickle because they have NOT been doing their jobs for DECADES. The City has been passing the infrastructure puck for decades. Not a single person in our City can/will stand up and own this particular problem. “They have Inherited the problem” the fact is: The City has not been monitoring old, outdated and decaying infrastructure and replacing it. They should have a working map replacing 500 or more feet per calendar year. Its called projecting and repairing aging infrastructure. All major cities have this, as their DUTY to their fellow TAX paying neighbors/citizens. Nothing speaks louder than the gratification the citizenry has, when our tax monies are well spent by having clean, dependable water/sewer and roads infrastructure. Think of ancient Rome, THE standard of a modern city with their water/sewer & roads. I will ask once more: can our City Officials look us in the eyes and tell us that the city can logistically support 360 new dwelling? My answer looking to the past, is I regret, an overwhelming no. I will leave you with one major “Food For Thought” Why do you think that the West Glenwood Sanitation District in West Glenwood has stayed uncomfortably quiet? I suspect, that in no way shape or form can this “little plant” could fathom to keep up with the water demands of 360 new homes.

I am in agreement with all these issues being a problem and we don't need to add to it...this will cost the city to annex this property and development...BAD IDEA!

Sure hope you read this entirely!

Dear Mr. Hyatt,

I am writing in opposition to the proposed development located in the pasture behind the Glenwood Springs Mall.

Glenwood has always been a small city with a balanced mix of single family homes, townhomes and condominiums, and apartments. Glenwood is known for it's small town atmosphere and I fear we are now in danger of losing that .The enormous size of this proposal threatens to change forever the atmosphere of our town. Along with the other large apartment projects recently approved, I see us becoming a bedroom community for up valley workers and fear we are at risk of losing the reasons we all came here in the first place. The Western Slope is desirable to developers and we residents rely on our elected officials to protect our community by acting as a check on uncontrolled growth.

I also believe approving this development is a slap in the face to the residents of West Glenwood , especially those living north of Donegan Road ,as this will change what has been a family area to a high density area having more in common with the large front range communities than the small western slope town we all love.

I think the local residents deserve better.

We have been evacuated twice during our time here and I agree with the comments and concerns that if we have a fire or other emergency, Donegan, Mel Rey and the other roads in this area can't handle the projected traffic safely. Last summer , a small fire in South Canyon created chaos in West Glenwood. If this development is approved, such chaos will become a common event. This situation could quickly become more than just an inconvenience. We could actually face a dangerous situation in case of fire or other emergency..

Also, West Glenwood lacks amenities such as a grocery store, coffee shops, parks, and open space that are necessary for a large concentrated population.The entire Glenwood community doesn't have the infrastructure to support such a massive influx of new residents. Good planning should seek to avoid the necessity of reliance on automobiles and encourage pedestrian use. A development of this size will create many auto trips per day for routine services that are not available nearby.

I am also concerned about our future water needs as climate change continues to impact us all.

I realize that this area will not remain a pasture forever, although I and many others believe leaving the pasture as a park or open space would be a good idea. I am asking that the city not approve this project and instead look for alternatives that may result in a smart development that will complement and not destroy our neighborhood..

**Date:** Monday, March 29, 2021 7:16:34 AM

---

Good morning Trent,

It is my understanding that I missed the meeting for public comment regarding the proposed development in West Glenwood Springs. It was suggested that I write to you in an attempt to share my concerns about this proposal. I ask that you please include my comments along with the other residents of Glenwood Springs.

First, I understand that some development is inevitable, and there is a need for affordable housing options in our community. There aren't many parcels of land left so it doesn't surprise me that this field is now being considered for development. I would like to propose that if we are to move forward with allowing the development of this land, that there would be a reduced number of units in the plans. This would decrease the traffic and environmental impact in our community, and I believe would be a fair compromise. In addition, parking plans that allow for 1.7 cars per rental unit is unreasonable. People who occupy these rental units will likely have at least two cars. When I look around my little neighborhood of Vista Drive, I see at least two cars per house, if not three or four. I moved back to Glenwood Springs in 2001 and have lived through several of our devastating fires. In 2002, I quickly packed up a few valuables, my twin 1 year old girls and our dog when we had to evacuate for the Coal Seam Fire. Getting all of us who live in West Glenwood safely out of the area took a while. Since then, we've seen more development in this side of town, and I can only imagine what an additional 600+ cars would do to an evacuation scenario. Lastly, why are we encouraging more development of rental units? Shouldn't some of these units be available for purchase?

My husband and I believe any development plans that are approved should be balanced, safe, and in line with the values we all share in our community. We do not agree with the scale of this development. If this particular developer is unwilling to consider fewer units and units that could be for sale, then perhaps we shouldn't accept their offer and open it up to other developers who are more in line with the values of our community. Glenwood Springs is a desirable place to live, and I would think that there will be more offers on the horizon where people can still make money on their investment with fewer units.

Respectfully,  
Kim and Andy Worline

Dear Trent,

My family lives on the west end of Donegan. We are not in the city.

This project has raised our awareness to the city's lack of a comprehensive emergency evacuation plan. None was mentioned at the meeting, leaving me to conclude that there isn't one. Please let me know if that is incorrect.

We like all our neighbors were stuck at our home during the fire last summer because of the instant gridlock at the roundabouts. There was no agency managing traffic in the roundabouts leading to panic, altercations and hours of fear. Regardless of what happens in the pasture this is a large issue that needs addressing. It seems that the city has an opportunity to seek assistance with any infrastructure for such a plan with this project and other pending developments in the city. I would like to hear how the city plans to avoid that situation in the future.

I like the plan submitted by the developers for the parcel in concept, assuming the city can prove that it can manage the traffic on Donegan and in an emergency.

It seems appropriate for the city to request a maintained access from the development through the mall for both cars and pedestrians.

I would prefer that all traffic use center drive or the mall.

Already people fly down Donegan. We have asked for speed bumps, signs, and more but nothing is there. With the proposed on street parking, traffic exiting the proposed development will not have sight lines without pulling into the proposed crosswalk and bike lane to be able to turn onto Donegan. This puts pedestrians and people on bikes at significant risk with every car turning into and out of the development.

Also the proposed 4 foot grass next to the sidewalk is not wide enough to plant a happy tree.

It wasn't clear to me from the presentation whether there will be sidewalks and a bike lane on both sides of Donegan. Can the city answer that?

Also will this PUD proceed in phases? If yes, has the city requested or considered requesting that the public areas be built first to avoid the problems from Cardiff glen where the amenities were never built? What requirements will the city consider in this regard before agreeing to annex?

Thank you for your time  
Jennifer Smith

Sent from my Verizon, Samsung Galaxy smartphone

Dear Commissioners,

Thank you for letting the people speak on your last meeting concerning the West Glenwood Pasture Development. I am sure you were sick of hearing the continuous talk of fire and fire evacuation. I hope you heard the plea in our voices on the seriousness of our situation out here. Please consider taking care of the residents that live here now instead of adding to the problem. That is all any of us are asking.

Unless you have lived in a fire evacuation with smoke and flames around you with being in gridlock, you will never understand the terror that one experiences. In my opinion we have been so lucky to not have had any big disaster thus far. If you add that many people out here you literally have our lives in your hands. I hope someday you won't need to live with regrets of this decision where people die because we can't get out. We live in such a precarious place, with a major interstate and the geography surrounding us. I can only ask you step back and look at the big picture. In the last fire we planned on going up thru Storm King Ranch, whether that was the smart thing to do or not, but we knew our chances of getting out of W Glenwood was slim to none. It was that or get in Mitchell Creek. We all know it's not if another wildfire will happen, it's when it will happen. We are living in a drought and again why does no one look at the future of what will happen when the water isn't here. I heard of several people who's springs had dried up that had them for generations. There are already water restrictions so it blows my mind to not have respect of our natural resources with everything we are experiencing in this time of climate change.

I want to personally thank Commissioner Schachter as he brought up the fire danger and we appreciated all the questions he asked. It felt like he was someone who actually listened to us and cared.

Also it doesn't have to be a wildfire, it can be a mudslide or even an accident on the interstate. Where do you think the cars go? They flood W Glenwood and no one can move. One gentleman brought up how semi's get lost when coming up Mel Rey onto Donegan. I have seen the same thing on the West end of Donegan, when the interstate shuts down. They try to follow GPS and it was total mayhem.

In fact it looked like a convoy with semi's and camper trailers stuck in gridlock, coming up that narrow road from Hwy 6 to Donegan.

We know after the Glenwood Fire, the canyon will be closed again & again the minute we have threats of hard rain. We will get the bulk of that traffic and no one can move thru that roundabout to even get into Glenwood Downtown.

I plead you have some kind of vision for Glenwood. My husband was born and raised here and I am here 42 years. It's hard to see our small town be diminished. We know change is inevitable, but even having some kind of retail there would be better than 24 hour rentals. A restaurant, a movie theatre I know is just a dream or better yet a grocery store. None of this matters, but I knew Adolph Diemoz when he owned all the land that is now built up with Car dealerships etc, and he would ride his horse thru W Glenwood when it all was pasture where the kids played in the creek. Whatever the current Diemoz plan is, this is not what Adolph envisioned. It's our joke he is rolling in his grave with what has happened.

Just because you put sidewalks around the complex doesn't address all of Donegan. Most hikers, dog walkers, bicyclists, go west down Donegan up Mitchell creek where we have no sidewalks. Cars drive too fast and sometimes you have hikers on both side of the road. It's very dangerous.

Also Trent said the traffic flow with the school has different peak hours. I am having a hard time believing people aren't headed to work at the same time children are being dropped off at school. I can tell you when school starts and ends the Storm king road and Donegan is totally backed up.

Enough people have sent statistics about water and parking and I know I speak a lot from the heart. I am sad to see what has happened to our town, so I am pleading for once can we say it's not a fit instead of bowing to the almighty dollar.

Respectfully

Bruce & Lee Bowles

Hello Trent

I received the comment below re: the West Glenwood Annexation and added it to the post hearing comment file.

Gretchen

Subject: Pasture

Gretchen,

I thought of some more problems with the pastor development this is not an order of importance just off the top of my head first the construction company is not from Colorado and I don't believe the apartment management would be from the depart from Colorado which would be essential. It seems as if there's no long-term plan we need to consider the future of the mall the future of the new mobile home park west of Ami acres run by the city of Glenwood. Also I would like to know what the city water and sewer (not to mention trash pick up and the amount of trash that I see in West Glenwood ) of this plan. The traffic and down again cannot handle this I was already concerned about the number of dump trucks driving on donegal going to dump dirt for the construction of the city of Glenwood RV park west of Ami's acres. There is also the matter of not just parking but sidewalks bike paths safe crossing for children walking to the schools on either side of this pastor development. I would also like to see the planning numbers for Glenwood Springs percentages of new apartment percentages of new homes for purchase. I think we should be considering affordable housing for purchase and if this development is on the future there should be a mixed use of rentals /purchase.

Thanks

**Subject:** New Developments Parking

## **Why do all new developments have limited parking?**

Why is 1.7 the magic number for parking spaces in large, new housing developments? I don't know anyone with 0.7 vehicles. What about the other 0.3?

Seriously, most families, even those that qualify for "affordable" housing, have at least two vehicles. And I imagine that residents of these developments periodically have friends over for dinner or family visiting.

So, why allow the developers to get away with only 1.7 parking spaces per unit? This is the number cited in the proposed development behind the Glenwood Springs Mall.

Other developments, such as the one at Buffalo Valley, the one on Highway 6 in West Glenwood, and the one behind the RFTA station on Highway 28, all have limited parking.

It seems that City Council and P&Z should face reality when approving these large and, granted, needed developments.

**Sharon Andersen**  
Glenwood Springs

This is a concern with the Proposed West Glenwood Pasture Development for me.

This Developer needs to have parking inside the property they are trying to develop and NOT on the Donegan Road. How in the world can you possibly put a sidewalk, bike path and then think you can park cars you are responsible for providing a space for and NOT on the Donegan Road.

I just heard that they are predicting the fire season to be bad. In my estimation there is no solution to the existing evacuation problem so this would be exaggerating the problem with the proposed West Glenwood Pasture Development adding hundreds more cars. Traffic jammed could cause hundreds of deaths and who would be responsible if this Proposal of 360 are allowed.

Sincerely,  
Gwendolyn Porter

April 6, 2021

Dear Mr. Hyatt,

I am providing comments to the proposed annexation and rezoning of 15.8 acres of property located at 214 Center Drive, Project title 480 Donegan. 12.285 acres of the property is proposed for a high-density Planned Unit Development (PUD) consisting of 360 housing units. I have resided at the address above since 1989 and live within 0.2 miles from the property proposed for annexation/rezoning. I am not opposed to development of the subject property, but I am concerned about the level/intensity of the PUD being proposed by the applicant and developer. I recognize the applicant's right to develop the property in accordance with existing county zoning (commercial limited). It is not currently a right to develop high-density residential units. It is my preference that the subject property remain zoned as commercial or to a lower density residential area of single-family homes. In the event annexation and rezoning to PUD is approved, conditions must be established to protect public health, safety, the welfare of the City and surrounding neighborhood. Modification of the PUD will be necessary to be more compatible with and prevent irreparable harm to the surrounding neighborhood. My comments below are specific to the 12.285 acres proposed for PUD.

## **I. Safety**

### **Comment:**

An emergency evacuation study of West Glenwood Springs needs to be commissioned. The PUD would add approximately 1200 people to the community. Safe and expeditious evacuation of the area in the event of wildfire, debris flow or another catastrophic event would be adversely impacted. Those impacts must be mitigated. An emergency evacuation plan should also be prepared. The City should select the contractor who will conduct the study to avoid any conflict of interest. The applicant should contribute all funding necessary for the study to the City of Glenwood Springs.

### **Background/Rationale:**

Having lived here for here for 32 years, I have experienced several wildfires near West Glenwood Springs including Storm King (1994), Coal Seam (2002), the 113 fire in South Canyon (2020), and Grizzley Creek (2020). My family and I were evacuated during the Coal Seam Fire. As you are probably aware, this region has experienced an approximate 20-year drying out period. According to the most recent U.S. Drought Monitor, our area is classified as being in exceptional drought. Climate data is clear that drought conditions are occurring with more frequency in this region, and I do not see that changing anytime soon. As a result, we can except wildfires in this area to occur with more frequency, intensity and for longer duration. It is not a matter of if but when we will experience the next catastrophic wildfire.

During the 2002 Coal Seam fire, I can recall how difficult it was for residents in West Glenwood Springs to evacuate the area in an expeditious manner. The August 5, 2020 the 113 fire occurred on the north side of I-70, mile marker 113 (near South Canyon). That resulted in closure of the Interstate and backed up traffic in the West Glenwood Springs area along Mel Rey, Donegan and Storm King Roads. This left residents of the area trapped in the event of evacuation. According to reports by West Glenwood Springs residents, it took over three hours to reach their homes from the other side of town. A comment made by Trent Hyatt during the March 23, 2021 Planning and Zoning Commission meeting seemed to downplay the traffic issue indicating that most of the vehicles were associated more with people trying to get out of town that did not live here. They were not from people who live in West Glenwood. I assume the point was that increased population from the proposed PUD would not cause a traffic issue with fire evacuation. It does not matter where the traffic came from. We were still trapped and could not evacuate if conditions warranted. The problem also existed with the Coal Seam Fire. Since then, population and development (e.g., Two Rivers School, auto dealerships, etc.) of the area has increased and the addition of 1200 people from the PUD will only exasperates the problem. The top priority of government should be to ensure the safety of its citizens.

## **II. Water**

### **Comment:**

A thorough analysis must be done to analyze impact to the water system of the City of Glenwood Springs from the PUD. As part of the study, the cumulative impact to the water system for all reasonably foreseeable future development needs to be addressed. The continued trend of increased frequency and duration of drought (i.e., aridification, mega-drought) must be addressed as well.

### **Background/Rationale:**

Last August, Glenwood Springs residents were placed on water restrictions. Odd numbered home addresses could water on odd days of the month, and even numbered home addresses could water on even days of the month. Watering could only occur before 10 a.m. or after 6 p.m. In addition, all lawn watering was prohibited for a brief period. Water restrictions were put in place because the Grizzly Creek Fire forced the closure of the Grizzly Creek water intake. While I acknowledge this was a unique situation, we must assume these events can and will occur in the future. Continued frequency and duration of drought will also result in reduced flows to streams, rivers, and lower water tables. Those scenarios must be considered when determining whether the City's water system will have the capacity to support the proposed PUD including any future developments.

## **III. Traffic**

### **Comment:**

Another traffic study must be conducted to better determine impacts from the PUD. At a minimum, the study should be expanded to include impacts to Mel Ray Road and the roundabouts in West Glenwood Springs. Cumulative impacts from traffic associated with the Two Rivers Charter School and possible redevelopment of the mall must also be addressed. Use of the easement through the mall should receive more serious consideration as a main entrance to the PUD. That would reduce traffic along Donegan, Storm King and Mel Ray Roads.

### **Background/Rationale:**

Although a traffic study has already been conducted, it is my understanding that it was done during a time when the economy was shut down due to COVID. That is unacceptable because there was far less

traffic during that time because many people were not working or working from home. Further, the contractor conducting the study concluded there would be no impact to traffic associated with the Two Rivers Charter School because PUD peak hour traffic would occur at different times. That ignores the impacts to other West Glenwood Springs residents who will be confronted with traffic from both the PUD and the school. Currently, traffic is backed up on Storm King Road and Center Drive every weekday morning and afternoon from parents dropping off or picking up their children. The school does not have sufficient space to accommodate all the traffic mentioned above. Additional traffic from the PUD will only compound the situation.

The current study also focused on impacts to Donegan Road, Storm King Road and Highway 6. Impacts to Mel Ray were glossed over because it was assumed most PUD traffic would be using Storm King Road. Since a main entrance to the PUD will be on Donegan (across from Chapparal Circle), it stands to reason that much of the traffic will also occur on Mel Ray Road. That is because Mel Ray offers the shorter distance (and fewer turns) to I-70, downtown Glenwood Springs, and up valley towards Aspen.

#### **IV. Parking**

##### **Comment:**

An in-depth analysis should be conducted to determine whether the current planned PUD parking will be sufficient to accommodate 1200 tenants including visitors. Evaluation of exiting high-density developments should be conducted to determine if parking has adequate for residents and visitors.

##### **Background/Rationale:**

The PUD proposed 625 parking spaces (1.7 spaces/housing unit) which include both internal and street parking. I do not have an exact figure for street parking included for the PUD. Since street parking will also be available to the public, those spaces should not be considered for meeting parking requirements of the PUD. Currently, most of the parking spaces along Donegan Road, Storm King Road (school buses), and Center Drive are utilized by the Two Rivers Charter School as that facility lacks sufficient parking. The PUD street parking will likely be occupied by the school as well. Sufficient internal parking be provided for the PUD to avoid turning West Glenwood residential streets into a parking lot.

#### **V. Neighborhood Compatibility**

##### **Comment:**

Construction of single-family homes within the proposed PUD would be a best option to blend in with the existing neighborhood. If the high-density PUD is approved, it should be modified to improve transition from existing homes along the north side of Donegan Road. Single-family homes should be constructed along the north side of the PUD which transition to a more high-density development further south of the property towards the mall. A visual impact analysis of the PUD must be conducted. Mitigation should be adopted so views from the adjacent west Glenwood residential units are not obstructed.

##### **Background/Rationale:**

City Planning and Development staff have indicated that the PUD provides a good transition from residential units (Western Hills Subdivision on the north side) to commercial development (mall to the south side). I disagree. Having high-density rental apartments and townhomes adjacent to single family one-story homes that are owned does not provide a good transition. It does not blend well with the existing neighborhood to the north. Construction of lower density single-family homes on the north side (adjacent to Donegan Road) of the PUD would improve the transition. The best alternative would have

all PUD housing units be single-family residents to reduce density, improve safety, and mitigate traffic issues. Allowing ownership of those homes would also help satisfy a shortage need for the City. I understand that alternative would be less profitable for the landowner and developer. Higher density would maximize revenues; however, it is the City's responsibility to ensure the health, safety, and welfare of its citizens. That should not be compromised to satisfy the applicant's business model (i.e., construction of high-density rental units) or to maximize profits.

City Planning and Development staff also are supportive of the PUD with the rationale that the 29 to 30 units per acre are not inconsistent with other recent high-density development. My response - two wrongs do not make a right. In addition, there are no high-density developments of this magnitude present anywhere in the West Glenwood Springs area.

The PUD has building heights range from 30 feet adjacent to Donegan Road and 53 feet on the southern portion of the PUD near the mall. I appreciate design efforts to transition building heights corresponding to the slope of the property; however, all residential houses on the north side of Donegan Road are one-story. Efforts should be made to minimize the height of the PUD buildings along the north side of Donegan Road. Further, the 53-foot height proposed for the southern buildings would make them the tallest in West Glenwood.

## **VI. Other Impacts**

### **Comment:**

Impacts of the PUD to the fundamental facilities, services, and systems serving a city should be analyzed and mitigated. These include but are not limited to the following: fire department, police department, schools, sewer system, medical facilities, parks, hiking/biking roads and trails (e.g., Mitchell Creek).

### **Background/Rationale:**

Proposed high-density housing developments can have impacts that are far greater than the immediate area. Impact analysis is often focused on the immediate area of the proposed development rather than the effects to a broader area (a classic - can't see the forest for the trees). Population growth can reach a point where the carrying capacity of the City's infrastructure, services, facilities are reached. That compromises the safety and quality of life to all citizens of the city.

That concludes my comments, issues and concerns. Thank you for the opportunity to comment.

Warm Regards,

Michael R. Kinser

Re: Donegan Annexation and Initial Zoning/ Rezoning #69-20-480

Greetings:

My wife and I are residents of Glenwood Springs, Colorado and are directly acquainted with the skill and craftsmanship of the Diemoz family since we have resided at 620 Hyland Park Drive since June 30, 1997. The dwelling on this property was built by Adolph and Floyd Diemoz in 1963. This home is as sound today as it was when built which reflects a commitment to excellence which is a hallmark of the Diemoz tradition. When a few questions arose after our acquisition of the property, I approached Floyd with these questions. He walked back to his records section and pulled a records binder on the construction of this property which he had maintained for over 30 years. I have little doubt that this binder is still in his possession and believe that is the standard practice for all of the construction projects in which he, his father, and his son John have been involved.

Through the years during which I practiced law in Glenwood Springs I was also acquainted with projects undertaken by Floyd and John for my clients throughout the local area. The attention to detail and diligence exercised by Diemoz Construction have been rarely exceeded.

Although the project before the Planning and Zoning commission involves a R2 Partnership as developer a newcomer to the Glenwood scene, I have taken the time to review the plans and specifications for this project with Floyd and John and have also learned about the background, reputation, and capability of the contract purchasers. Based on that review and confidence in the word of both Floyd and John, it appears the proposed project conforms in every detail with the Comprehensive Plan of the City of Glenwood Springs and, in fact, in many respects, exceeds the express goals and policies of the city for such a development. This proposal should be approved without reservation.

Thank you for your attention to these details.

Very truly yours,

John R Schenk

we are so angry about what has been going on with developments the last few years. Small town character is basically gone. For what is left, we need to stop developments and like a business, take stock and inventory. When we do this inventory we will see what we have, and later what we need.

To most of us, we are at the critical point of no return. The further on this path we go, the worse it gets.

Glenwood has always been a very special place. All the amenities we have are at least world class. Then why are we trying to choke ourselves to death?

Our job is not to provide high density units for the masses. Our job is to take care of the safety and welfare of our residents. Our job is to take care of our very special home. please.

To whom it may concern:

An application has been submitted by Glenwood Partnership, LLLP, for a property under 480 Donegan Road Annexation and Initial Zoning/Rezoning. There are two parcels, 3+ and 12+ acres, immediately north of the Glenwood Springs Mall. I would like to speak in favor of that application.

I served on the Transportation Commission for about 8 years, approximately 2003 thru 2011, and was chair for most of that time. That put me on the Steering Committee when the 2011 Glenwood Springs Comprehensive Plan was developed. As I remember, this property was on the planning radar from the prior comprehensive plan.

Affordable housing has been a top tier concern for this valley for years. Glenwood is geographically constrained, and cannot just spread as other communities might. A number of approaches have been tried or suggested. Closing the door to newcomers after one has arrived does not work. Rent control does not work. Public housing and deed restrictions have mixed success. Much of the new housing built in the area is targeted at move-up markets. Increased density, especially on infill sites such as this, is important. The proximity to public transportation means that personal vehicles may not be required at the level that they would be at other locations. The mix of studio, one, and two bedroom apartments will automatically serve a lower economic segment of the economy. Lack of supply has been a contributor to our high cost of housing. This project will help to increase the supply of more affordable units.

My one quibble with the project as currently envisioned is with the commercial segment. Rather than a restaurant, it seems that a small convenience or grocery store where one could get staples and perhaps fresh fruits and vegetables might better serve the neighborhood. But that could come with the redevelopment of the mall, whenever that might be.

There will be challenges with the project, but the owners have a demonstrated history of foresight and community mindedness and desire to work with the community to achieve a project that will be beneficial for all.

Respectfully submitted,

David Alcott

**Subject:** Letter to Glenwood City Council

Dear City Council Members,

Please consider my reasons for opposing the density of the apartment complex plans on the Diemoz property in West Glenwood. We all realize that it is the right of Floyd to develop his property, but the size will cause many major problems as well as spoil the rural feeling we have in this part of town. Some of the buildings will be four stories high, completely destroying any view of the mountains, and the apartments will add at least 1500 more vehicles to the traffic. There are only 1.7 parking places allocated per unit meaning that many cars will be parking along Donegan Road and in front of the Charter School. Most frightening of all is the possibility of everyone in West Glenwood having to evacuate because of a fire as they did a few months ago. Many people I know were stuck for hours trying to evacuate, and many lives could be lost. There is already a major problem with people from Oasis Creek and other subdivisions attempting to get on the roundabout during work hours to get into downtown.

Glenwood Springs has been discovered and is being over- developed. "Build it and they will come." What we desperately need are single story dwellings on that property, or even a senior living center that all other communities either already have or are building Thank you for all your many hours of work and consideration of my suggestions!

Sincerely yours,

**From:** [Jeremy Gerbaz](#)  
**To:** [Trent Hyatt](#)  
**Subject:** annexation of 214 center dr.  
**Date:** Monday, April 19, 2021 10:09:22 PM

---

Attn: Glenwood Springs, Colorado Planning and Zoning Committee  
Regarding: Annexation of 214 Center Dr. Glenwood Springs.

I am writing again because I have a few more thoughts after the last planning and zoning meeting.

First, let's say this project gets approved and there is not any further fire safety studies done, like all the residents of West Glenwood have asked for, and the worst happens. There is a fire and residents get stuck and can't evacuate and end up dying. The first thing I am doing if I am a relative is suing the City of Glenwood for negligence.

The second thing is, the buildings that face Donegan Rd, how tall are they? Not some estimated number. What is the height from Donegan to the top of the roofs? Also, what is the height of all of the other buildings from the ground to the top of their roofs?

Third, I have spent a lot of time on Donegan Rd since the last meeting and there is a ton of traffic. I do not think the traffic study the developers did is accurate by any means. I think they need to do a long term traffic study that covers several months and maybe even different times of the year.

Fourth, as noted before, having spent a lot of time on Donegan Rd since the last meeting. I do not think there should be any parking on Donegan at all. There should be adequate parking for all residents of the development inside of the development.

Sincerely,

Jeremy Gerbaz

Home for us is West Glenwood. A Cincinnati developer wants to build 360 units behind the old mall. This is so overwhelming for us. We are all in shock. We have no infrastructure for even 20 units. No way to widen our roads , no way to handle 900 more vehicles, no room in our two schools, grocery store ,clinic and tiny park. this development would crush us. We have been through all the terrifying fires and mudslides. Most of us have some things packed for the next one. Last Summers small South Canyon fire again showed us how vulnerable and dangerous our situation is. With I; 70west closed, we had total gridlock here and I heard halfway to Carbondale. If that fire raced into West Glenwood, we would have had no escape and some folks would have died . This is extremely serious !!! We need to get real about this situation. the proposed development would not work . This comes down to human rights versus development rights. The answer is the safety and welfare of our residents. We come first. Remember, these developments heavily impact all our valleys. Please join us on Facebook at [westglenwoodpasturedevelopment.com](http://westglenwoodpasturedevelopment.com).

RE: Consideration of annexation 214 Center Drive Glenwood Springs

The project looks like a well laid out concept that can help our community's housing shortage. One of the impressive aspects of this project is that does not rely on large taxpayer subsidies and enables free market solutions to significantly improve the housing availability in our community.

Thank you for considering my comments

Hello Gretchen,

I just wanted to share a few comments related to the above. Please share with Planning and Zoning Commission members and others as appropriate.

I have been periferally following this application and my concerns include the following:

-1) From the below Parkland Dedication requirements in the city code, this development would add approximately 900 residents. Estimating approximately 9000 current residents in the city of Glenwood, this would add another 10% in a very small parcel compared to the existing corporate limits. It seems like too much density adding to already existing issues in West Glenwood. In my cursory review of the P & Z application packet, it was not clear to me from whom these residents will be receiving potable water. If from the City of GWS, then that would represent a great demand on the already climate change, amounts and usage, and wildfire-related impacts on Grizzly and No Name Creeks that provide water to the city.

-2) Per the Parkland Dedication requirements, the number of units (360) in this multi-family development would require 6.3 acres of parkland dedicated (see code pasted below). As there is a shortage of parkland in that area there should be an actual dedication of public parkland, not just the "open space" offset proposed by the developer. As is the case with St. Stephens school and their use of the city-owned Sayre Park as their de-facto playground, and as I've heard Two Rivers Community School utilizes the City of Glenwood' Gregory Park in a similar manner, it could be another added "public" benefit to ensure an actual parkland dedication requirement of this development rather than "fee in lieu of" or "waiver of fees" in exchange for some "commitment".

070.040.030 - Site Development and Improvement Standards (g)

b.

Amount. Park land shall be dedicated in the ratio of 0.007 acres per resident or seven (7) acres per one thousand (1,000) residents of the proposed development, to be computed as follows:

1.

3.5 residents per single-family dwelling unit;

2.

3.0 residents per two-family dwelling unit; and

3.

2.5 residents per multi-family dwelling unit.

4.

1.25 residents per accessory dwelling unit (ADU).

c.

Applicability.

1.

Pre-Existing Development and Redevelopment. Except where there is an increase in intensity of use from a prior approval, the City Council shall waive all parkland dedication requirements where previous arrangements have been made and approved at the time of

annexation, subdivision, or development of the same property. In the event that there is an increase in intensity of use, an applicant shall only be required to dedicate additional lands based on the ratio of the existing approved intensity of use or development to the proposed new use or development.

2.

New Development.

i.

The provisions of this Subsection shall apply to all new residential development, including the residential component of mixed-use development.

ii.

Where mixed-use development (commercial/industrial/institutional and residential use) is proposed, the parkland dedication requirement shall be calculated based on the adopted residential per-acre value.

-3) As the proposal wants to utilize public right-of-way to meet their parking requirement, it may not be realistic as I've heard of issues currently with parking associated with the staff of Two Rivers Community School along the burden on the city to maintain and enforce the development's residents offsite parking area. Plus with the municipal code requiring parking time limit of 72 hours, it seems it would be an issue especially when encouraging people to use public transit or alternatives to single occupancy vehicles.

-4) With a cursory overview of the proposal, there does not seem to be any good provision/requirement for pedestrianism. I've seen people including students walking in Mel Ray Road which has NO sidewalks. As proposed it looks like pedestrians would have to continue walking within the roadway OR walking around to Storm King Road, then east in front of the mall using existing sidewalks to get to the nearest bus stop or to continue on current sidewalks or trails. The developer of ANY development on this sites should be required to negotiate, construct and maintain a sidewalk and privacy fence, along the eastern edge of the Glenwood Springs Mall property to the bus stop and existing trail/sidewalk connections.

-5) Again, as the shortest distance between two points is a straight line, this development with the number of residents and the anticipated 2200 vehicle trips daily should negotiate and be required to have direct access to Highway 6 & 24 rather than having the ONLY access/egress point onto Donegan Road. It seems that in the near future, the city of Glenwood would be acquiring more lane miles of roadway and utility infrastructure including more of Donegan and Mel Ray Roads with proven need for sidewalks. And as has been "encouraged/desired" in the past, the city could/should annex more of the remaining residential portions of West Glenwood. The proposal includes offsite roadway improvements ONLY at the extreme east end of Donegan Road and intersection of Highway 6 & 24.

From application "Referral Agency Comments": From: Wyatt Keesbery

<[wkeesbery@garfield-county.com](mailto:wkeesbery@garfield-county.com)> Sent: Monday, March 1, 2021 8:46

AMTo: Glenn Hartmann <[ghartmann@garfield-county.com](mailto:ghartmann@garfield-county.com)>Subject: RE:

City of Glenwood Springs Land Use Referral in West Glenwood Glenn, If they are going to annex anything they need to annex ALL of West Glenwood . I don't want them to annex just portions, it is ALL or nothing. Wyatt

-6) In my review, I did not see any comments from our Fire Chief. As a GS Rural Fire District board member, I asked Chief Gary Tillotson if there should be concern with the density and height of the proposed buildings in the development being up to five stories high including parking below? And if there may be a need to acquire another aerial apparatus and there was agreement there would probably be such a need. The last aerial was budgeted for \$1.2 million. Yet another expense that would be faced by the city. As there is need to replace the current West Glenwood fire station, perhaps some provision or negotiation can be included in the discussion with this development proposal?

-7) It has frequently been a life-safety problem related to wildfires and other incidents with South Canyon/I-70 closures where West Glenwood has become gridlocked and West Glenwood residents have been unable to evacuate. With three schools in the area along with existing residents, adding another projected almost 1000 residents in this area will add immensely to a frustrating and potentially life-threatening situation. With the South Bridge project and approval to hire a deputy fire chief, the city is aware of the need to work on evacuation planning, now primarily focused on residents in South Glenwood and the Garfield County Four Mile corridor residents. A plan needs to be formulated for West Glenwood residents as well, those both current AND future.

-8) The City of Glenwood is in the driver's seat related to this development proposal, especially with the request for annexation and Planned Unit Development (PUD) district request. The city staff, board members and elected officials now have the ability to request/dictate requirements to the benefit and NOT detriment to both the city as a governmental entity AND to all current and future residents. Does this proposal provide "... greater benefit to the City of Glenwood Springs"?

"070.020.180 - *Planned Unit Development* (PUD) District.

(a)

Purpose. *Planned unit developments* (PUDs) are intended to allow for greater flexibility in the application of zoning and *development* standards than would otherwise be achieved through a base zoning district in exchange for greater benefit to the City of Glenwood Springs. “

As a resident of No Name and not living within the municipal limits of the city, along with the many, many residents of West Glenwood who will be impacted by this development proposal, “WE” are not constituents of the elected officials of the city or its boards and commissions. But we are all parts of the greater Glenwood Springs community, benefiting from and contributing to this very special place. This proposal with its density and projected number of residents has many significant wide-ranging impacts both short and long term. Will any perceived or proposed benefits outweigh the many negative impacts? Loving the uniqueness of living in No Name, I really don't have a “dog in this fight” being not directly impacted by this development proposal, but I do care for those in West Glenwood who will be so impacted by what happens in their back and front yards and lives and safety. They have helped make my

living in Glenwood Springs for over forty years an integral and important part of my life and calling Glenwood Springs “home”, thus my desire to share my thoughts for your consideration.

Thank you for your time, attention, work and efforts,

Greg Jeung

Please forward to P & Z :

We believe the planned development is TOO dense.

The extra traffic is a concern especially for users trying to get on Donegan Road from Sunny Acres and Vista Drive with poor visibility. Also the extra traffic will make bicycle riding more dangerous.

Gridlock is a big problem now.

Whenever there's an accident or closure on I-70 you can't even get to town or anywhere else from HWY 6.

Fire evacuation will be the same. I was sharing my concern with a friend who lives downtown and he told me I could always hang out on the golf course and go into the pond if it came to that point.

More cars on the road won't help this situation.

Sincerely,

Jeanne and Dennis Dekoninck

Please send this to the city. We are permitted from individual contact on such matters. I can't read this if it is not part of the public record but can and will if it is out there for all to see.

You can find Gretchen Ricehill on the city website in the community development department.

Thanks

George

George and Sumner,

First I'd like to thank you for serving on P&Z. It is wonderful that you are willing to give to our community. I know that you have already heard many of the concerns of the West Glenwood residents. But I would like to share my concerns after living in my family home of 54 years.

Many of us evacuated for the Storm King and the Coal Seam fires. It was a frightening experience for me with three small children. My husband was a fireman at the time and stayed behind to fight for the neighborhoods of west Glenwood. This past summer was equally frightening when the streets of west Glenwood were inundated with bumper to bumper traffic and the south canyon fire burning. The residents

of west Glenwood were prepared to evacuate their homes but could not even get out of our driveways. If this development is pushed through the extra 1000+ residents will only compound the problem.

Last summer the developer met with a few of us. He listen to our concerns but they fell on deaf ears. Mr. Rosenberg said that there would not be a "main" entrance onto Donegan. Why would you put the main entrance up into our neighborhood. When the main goal would be to move the traffic south and toward town/I-70. Another concern is putting parking on Donegan. Why is he not planning to have all of the required parking inside of his development? Plus allowing parking on the south side of Donegan will give people the impression that they can park on the north side of Donegan. As one resident pointed out, there are many lost semi drivers that come up Mel Rey turn left onto Donegan drive down to Storm King Road. Make another left to get back to 6&24. We already have the problem with the buses parking on the shoulder now we'll have parked cars too.

I am also wondering where Mr. Rosenberg thinks that he can get away with a 53 foot building. The four story limit doesn't apply to him? Where else in this are is there a four story building? No where because we are a residential neighborhood made up of SINGLE FAMILY HOMES!!!!!!!!!!!! I am also concerned with the "work/live" units. Those units are located across the street from the Two Rivers School. That area is already a mess. So now he thinks more commercial space should be added there?

I know that many P&Z members did a drive through to check out our area. I'm wondering if either of you went down Center Drive towards Gregory Park? That over populated street is bumper to bumper with parked cars on both sides of the streets. During the day it is the teachers that park there. At night it is the residents that don't have room in their own garages or driveways, that take up that space. We already have too many vehicles parked everywhere. You can not even enjoy the tiny park that the city provided all of west Glenwood.

I believe that with our town and states concern with water supply we are asking for even more problems by allowing this huge development to proceed. West Glenwood does not have the infrastructure to handle a development of this size. Please understand that I am not against building. For goodness sake my husbands business relies on it. There are many other things that could be done in this beautiful pasture that would not negatively impact the lives of the residents of west Glenwood.

Thank you so much for your time.

Glenn, Wyatt, Gretchen,P&Z, County Commissioners and City Council,

Reading through some excerpts from the packet (page 416). Wyatt Keesbery makes a comment that the city should annex ALL of West Glenwood not just bits and pieces. Well Mr. Keesbery, the city has done nothing but annex bits and pieces of West Glenwood my whole life. We residents of West Glenwood do NOT want to be annexed into the city of Glenwood Springs. Many of us purchased out here because it was outside of city limits and had a "country" feel. The city and developers have screwed that up for us.

Mr. Rosenberg acts as if lowering the amount of units (360 down from 418) and offering 1.7 parking spots instead of 1.5 is a gift. He is also thinking that a 53 foot building isn't going to block our view. This entire development is out of character with the single family home neighborhood that surround it. I also believe that all of the parking for this development should be inside it's own boundaries. Donegan should not have parking on it's south side because then the residents of this disaster of a development will assume they can park on the north side. Mr. Rosenberg also told us that the main entrance would not be on Donegan. Now he has changed his tune. Why would you pump 2200 trips a day out into "our" neighborhood and down Mel Rey. You would be ignorant to believe that the residents would take a different route. I am wondering if story poles could be placed out in the pasture. So that everyone can see how high this monstrosity is going to be. Since this is going to affect the entire county by crowding the roads, clogging the round about, polluting our beautiful area I am wondering if we can take this to a vote of the people. For goodness sake we only have one grocery store. Lets add another 1000+ people. Why is it the responsibility of Glenwood Springs to provide employee housing for Aspen?

Lets take it to a vote!!

Dear Gretchen and P and Z Board,

I have lived in Glenwood Springs for over 30 years. Sometimes I think we forget we live in a very confined canyon. To the west is South Canyon and to the east is Glenwood Canyon and we all know what issues those presents: fires, accidents, road closures due to weather, etc. It is no one's fault, it is the environment we are presented with. If I 70 was not running through our community maybe we could afford to pack more people in but let's face it, we have limited space and limited resources. And of course we need the tourist that I 70 brings us but that is more traffic.

Sure we can allow someone from outside our community to come in and build housing and gain the financial benefits from it, but can we support these 600 + people with water, schools, roads, fire protection, sewer facilities, and on and on? Can we afford to have so many people in this space? Tough questions for you all and I appreciate all the work you have done and will continue to do to answer these questions.

If you build it they will come, no matter how much you build they will come, it's a beautiful and safe place to live, but if you allow so many people to be packed into a finite space there is no quality for anyone and "the beautiful and safe place to live" is no longer a beautiful, safe place.

Thank You  
Joni McGavock

Gretchen Ricehill  
Assistant Economic/Community Development Director  
City of Glenwood Springs  
101 W 8th Street  
Glenwood Springs, CO 81601

I have been following the 480 Donegan annexation proposal for some time. I have read through most of the documents, reviewed the maps presented by the Applicant and also read through the many letters, both pro and con, regarding the annexation. While important arguments have been made regarding impacts on the character of West Glenwood, the substantial increase in traffic, the strain on services, and the proximity of Two Rivers school to one of two exits from the property, I believe the decision on whether to move forward with this project comes down to one thing: what is the value of human life?

Like many in West Glenwood, I was also tied up in the total lockup of traffic due to the 111 Fire on August 5, 2020. We were all fortunate that a west wind didn't pick up and drive the fire through the dry grass into West Glenwood. If it had, the total gridlock on Donegan, Storm King, and other roads would have prevented any evacuation of residents in the area by car. The only exit would have been on foot, an unreasonable expectation for some of our older residents. And with the roads already blocked by cars, access to West Glenwood by firefighting personnel and vehicles would have been limited at best, hampering the ability to stop the spread of the fire further east into town.

While it occurred before we moved to West Glenwood, those who were here during the Coal Seam fire also tell of great difficulty in evacuating even as the fire approached. One only has to look at the number of fires in and around Glenwood Springs in the last 30 years to realize that these are not rare events, but rather something that seems to occur every few years.

West Glenwood suffers from an access problem due to mountains to the west and north and the interstate to the south. The only egress from areas west of Mel Ray Road is to the east on two roads: Donegan and US 6. All other high density developments approved by the city in the last few years have been in areas where residents could evacuate to safety in two or more directions.

Thus I am quite dismayed by the dismissive way the Planning and Zoning Commission addressed this issue in the April 27, 2021 Report:

"Emergency evacuation of Glenwood residents and visitors as well as those traveling through to/from surrounding communities is an existing regional issue for which better understanding of traffic management is needed. The City does not believe the current proposal will necessarily have a negative impact on this existing problem."

One only needs to evaluate what might happen if an event similar to the August 5, 2020 fire actually encroaches on West Glenwood. There are approximately 200 households (Mitchell Creek, Western Hills, residences along Donegan) for which the only exit eastward is Donegan between Mitchell Creek and Mel Ray. If the 480 Donegan project is allowed to proceed with the number of units proposed, there will be

people from 360 additional residences trying to use this same evacuation route. The jump from 200 residences to 560 residences would clearly "have a negative impact on this existing problem".

There is ample experience to know that emergency routes out of West Glenwood are already woefully inadequate to handle the existing population of the area. Before any high density development can proceed, a plan on how to safely evacuate West Glenwood must be established and implemented. This can't just be "traffic management". Whether it's the video showing the rapid spread of last year's Grizzly Creek Fire or the speed that the fire raced up Storm King Peak that disastrous day in July, 1994 (2/3rds of a mile in 15 minutes), it's readily apparent that in the event of a fire quickly encroaching on West Glenwood there may be insufficient time for appropriate safety personnel to respond in order to direct traffic. Instead it means creating a physical infrastructure to handle the traffic trying to evacuate from West Glenwood. Maybe it requires widening and adding a center turn lane on Donegan that can be converted to an emergency second eastbound lane all the way to US 6. Whatever solution is developed, it must be designed and built prior to any high density development in West Glenwood. Obviously if the Applicant were to reduce the number of residential units in the proposal from 360 to 100 or so, a less aggressive and less costly infrastructure plan might be feasible.

If Glenwood Springs elects to annex this property to allow for high density development, then clearly the obligation falls on the city to design, fund, and construct all the improvements required to ensure safe evacuation due to this substantial increase to the population of West Glenwood.

To approve this application as presented, given that it will significantly amplify an already dangerous evacuation situation, is to place the push for development over the safety of the residents of West Glenwood. While it may not be possible to save homes and property if such a fire event were to occur, it is unconscionable to place the value of development over lives.

**Subject:** Donegan Road apartment proposal

Gretchen Ricehill  
City Planning  
Glenwood Springs, Colorado

Dear Gretchen and P and Z,  
I have lived on Mel Rey Rd, just a few blocks above the proposed Donegan Road Apartments since 1995. In that time I have watched the steady pace of development above my house, along Donegan (east and west of Mel Ray), across the Colorado River, and along Hwy 6 and 24. I accept that development will happen. We all agree that housing is needed in our valley. Despite these forces and needs, there are many reasons why the density of the proposed development is inappropriate for this particular location. My neighbors and your planning board have described the variety of problems in great detail. We need to make sure that the density fits any proposed location. While something will occupy the Diemoz property, we need to insure that it doesn't have the consequence of choking and endangering the people who live in West Glenwood.

Since 1995 we have been threatened by multiple fires. I will never forget the evacuation we experienced in 2002 during the Coal Seam fire. One minute we were observing smoke on the south side of the Colorado River, the next we watched the fire drive up the north side and we were ordered to leave the neighborhood. Fortunately we were packed and ready to go. Unfortunately, we didn't get further than Glenwood Middle School where we joined a line with all our neighbors on Hwy 6 and 24. From that vantage we watched the

blaze drive across the Wolfshone property toward the community center. All we could do was to sit and watch the tornadoes of fire. We could feel the heat while traffic crawled east. It took over 40 minutes to cross the Grand Avenue Bridge (our only escape). I realize it is hard to believe that traffic could move that slowly (usually an 8 min drive). This was 2002, before the townhouses were built on Donegan, the Six Canyon Apartments, and many other single family dwellings built since that time. I shudder to think what will happen next time.

I write this detailed description because it is easy to underestimate the gravity of this problem. Many of us have described our experience and concern. We need you; the board to put yourselves in our place and plan for the worst. The pictures of the development are pleasing. The need for housing is unmistakable. We are not simply saying "not in our back yard". I am suggesting that, if the land is developed for housing, that the density be reduced. If there is not enough profit in such a low density plan, so be it.

We heard our fire chief say that there is a need for a new fire house in West Glenwood and that no suitable location has been located. If we can't find a home for a firehouse, there should be no home for additional development.

I thank you and the board for your work on this proposal.

**Subject:** Annexation and Rezoning of 214 Center Drive, Glenwood Springs, and Development by R2 Partnership

Hello, Gretchen,  
Please forward this letter to the Planning and Zoning Commission and others as appropriate.  
Thank you.

I am writing to add my voice to those of the many fellow residents of West Glenwood Springs who have expressed their deep concerns about, and opposition to, the annexation and rezoning of the pasture property at 214 Center Drive by R2 Partnership. As a long-time home-owner in West Glenwood Springs who plans to live here many more years, I implore the Planning and Zoning Commission to thoroughly consider the following critical issues:

**1. Evacuation routes.** The recurring and seemingly inevitable wildland fires that continue to threaten our area require that we have effective evacuation routes to protect us. Recent history has shown that such routes do not exist. What is the plan to take into account the 500-1,000 additional vehicles that this 360-unit complex will add to currently inadequate evacuation routes?

**2. Traffic.** Recurring closures of I-70 because of mud/rock slides, traffic accidents, other emergencies continue to cause massive, lengthy back-ups of traffic in West Glenwood. These closures and gridlocks prevent medical and police services from reaching homes in this area of 3,500 residents, more than one third of the population of the city.

What is the plan to address the issue of access into and out of West Glenwood

during such closures, when approximately 900 (25 percent) more residents are added?

**3. Benefit to the City.** What would be the economic benefit to the City of allowing this development to proceed? At a prior meeting of the Commission, this question was asked of City Attorney Karl Hanlon. He answered that historically a city does not enjoy an economic benefit overall from adding residential rental units; in fact, it often results in a negative economic impact. Why would the City allow this development to proceed if it likely will have negative economic consequences?

For these reasons, plus the many others already elaborated by my neighbors, I respectfully request the Planning and Zoning Commission to protect the safety, well-being, and quality of life of the 3,500 residents of West Glenwood by rejecting the application of R2 Partnership to annex, rezone, and develop this property.

Sent from my Verizon, Samsung Galaxy smartphone

To: City of Glenwood Springs Planning & Zoning Commission

We have several issues with the big development.

First would be fire safety. Our roads do not support evacuations. Evacuations have occurred in West Glenwood and have ended up in total chaos, it is extremely dangerous and life threatening. Adding that many more people, and their vehicles, would be a step in the wrong direction for human safety. The Fire Dept is not staffed or equipped to support such a project. Last year when south canyon closed due to wildfire, all roads in west glenwood were jammed up with vehicles so bad emergency services could not navigate through to respond to any other emergency calls if needed. They would have had to walk to respond to any calls carrying their equipment. This is really scary to think about if it was any worse than it was.

Our house, located on the west side of Mel Rey, will border the project, along with our business. The proposed project will take away views from us that we have enjoyed for 20 years, not to mention the night light pollution, which would increase 100 times more with this proposed project. Three story buildings are just way too tall and parking lots require a certain amount of lighting per lot and with the proposed development plans the building and landscape would take away from our property values.

They have shown plans behind our back yard fence for a parking lot. With us being in the Towing & Recovery business for 40 years, I know personally, I would want more protection then a wooden fence, because people can't be trusted with their driving abilities! We would request a safety wall

be built for our safety of our property, our house & most importantly my family. The proposed parking lot is way too close to my house.

Another concern would be the traffic study. We feel the traffic study is inaccurate. Living on Mel Rey for at least 20+ years as well as our trucking/ towing & diesel repair business 40+ years. There is significant truck traffic due to the designated truck route on Mel Rey, Donegan & Stormking Rd. Last year to this year, Mel Rey has been way calm due covid business & school restrictions, there was way less traffic then normal. After the old Post office on Stormking Rd. turned into a school, it has been hard to use the designated truck route because the school already lacks parking and has to park the school buses on the street. That is another issue all in itself but has been manageable with towing tractor-trailers with our heavy wrecker (tow truck). Now with the proposed development of adding thousands of people plus their vehicles, the proposed sidewalks will make it almost, if not impassable. We are not the only large trucks in this area that will have an issue trying to navigate the narrowing road with the proposed sidewalks on Melrey & Donegan. In all reality, the sidewalk should be built on the proposed property project and not on the designated truck route.

Our issue with the proposed sidewalks on Mel Rey is a big concern for us. Mel Rey Rd. is NOT wide enough to handle sidewalks. We for one cannot afford to lose any parking to our business, this would destroy my location of our business with my truck parking & the parking for our large vehicle customers. Semi's (tractor - trailers), dumptrucks, heavy equipment & various passenger vehicles. We would not even be able to park a normal sized pickup truck in our designated parking area let alone our heavy equipment. We are not the only business this would affect, it would hurt every business on the west side of Mel Rey with their customer/ employee parking. Parking is already an issue around Glenwood and this would be adding to the existing growing problem.

We also have a concern for lack of resources available. Lack of another Grocery store, water supply, fire, police/ sheriff personal. We have personally heard not too long ago from local law enforcement that west glenwood is getting rough and the laws do not protect us like they should. So in conclusion of all of this, we strongly oppose the annexation of the West Glenwood Pasture development. In our opinion it would not be the right move for our community at this time.

Sincerely,  
Kevin & Kelly Ward

To: Glenwood Springs Planning and Zoning Commission

You've previously been informed that more than 60 years ago, in 1960, my parents, Adolph and Edith Diemoz, purchased 30 acres of privately owned land in West Glenwood as an investment property.

- This land was not our family homestead. Our homestead was near El Jebel in about 1905. Our land behind the mall has been commercially zoned for decades, and has never been designated as open space.
- In 1980, the Diemoz Family sold about 14 acres of land for the Glenwood Springs Mall, and retained approximately 15.8 acres.
- Our Family, received county approvals for a commercial park and then built two commercial buildings. At that time, we installed all of the utilities needed to service all of the future development of our land.
- In 1982, 39 years ago, our Diemoz Family built and paid for our portion of the Storm King Road and deeded the road to the County, which all of West Glenwood uses.
- For nearly a year, R2 Partnership has worked in close cooperation with the City Planning Staff to refine the design of their proposed development, following suggestions and recommendations from the City's professional staff of planners and engineers.
- After extensive review, and revisions that included reductions to the density, the City Planning Department continues to recommend that you approve our proposed annexation.

Why?

Because the design has followed the *vision, goals and policies of Glenwood's Comprehensive Plan* as well as followed the City's Development Code. I've attached pages 41 and 46 of the City's Comprehensive Plan, and ask you to read the highlighted sections.

We believe the applicant has made significant concessions and their plan would be a great contribution to Glenwood. Our family believes it makes sense to be annexed within Glenwood's City limits with this proposal, however, our land will eventually be developed in some fashion in the near future, whether annexed into the City or not.

Thank you,

Floyd Diemoz, Glenwood Partnership, LLLP, Partner

uses. Ideally however, the City encourages RFTA to develop a BRT station Downtown because this would provide seamless access to commercial areas, employment, recreation, as well as other modes of transportation.

#### ***Glenwood Mall***

This Plan envisions that the Glenwood Mall and the properties immediately north of it be integrated and redeveloped into a mixed-use community including a significant component of medium to high density residential uses with an internal system of sidewalks and community spaces thus creating a center focal point for the west end of town.

#### ***Glenwood Meadows***

The Glenwood Meadows development originally included a housing component south of Wulfsohn Road. This component of the project has been delayed. However, the Comprehensive Plan continues to identify the housing component of the Glenwood Meadows project as a logical and ideal place for much needed community housing within walking distance of commercial areas, recreation and open space. Therefore, the Comprehensive Plan strongly encourages that the housing component be constructed. Additional housing units are also strongly encouraged on other properties within the Glenwood Meadows development. Live / work units, where the unit is designed to have a living spaces as well as a work space for non-nuisance producing businesses, are seen as appropriate here.

### ***Hwy 6 Corridor***

The Hwy 6 / 24 corridor currently is comprised of many different uses—auto-oriented commercial and service uses along the highway and residential uses tucked behind. In spite of having an elementary school much of the area lacks true neighborhood character and walkability. This area has potential for significant redevelopment in the future. As it does so, it is expected that the immediate Hwy 6 / 24 corridor will continue to be a mix of uses. New development is expected to include pedestrian interconnectivity, bicycle access, landscaping and building placement so that the corridor is an attractive, accessible, community-oriented strip and not just focused on highway traffic. Multi-family housing is expected to continue to be developed north of the corridor.

### ***Residential Areas***

Existing neighborhoods in Glenwood Springs are mostly walkable and “talkable” and give much of the “small town” character to the community, with their smaller building sites, traffic calming, shaded sidewalks, front porches instead of garages, and small neighborhood parks.

Most existing residential neighborhoods are envisioned to remain substantially unchanged over the next planning period. Some minor infill and redevelopment is expected through the addition of accessory dwelling units and where sensitively designed duplexes, townhouses or small apartment buildings may replace a mobile home or bungalow on a large lot.

existing boundary south of town to encompass the Bershenyi Ranch (Elk Meadows) and the Four Mile Ranch subdivision (Figure 3-17). Here, along Four Mile Road the City has extended sewer treatment services to these parcels through a long-standing pre-annexation agreement and it is felt that the City will be able to bring about a land use configuration for these properties that will better meet the aspirations of the city than would be possible under county jurisdiction.

### Overall Annexation Position

1. Within the Urban Growth Boundary annexation is preferred over development through county jurisdiction, unless there are extenuating circumstances and significant public benefit to do otherwise.
2. Annexation will occur through petition of the land owner(s). While it is not the intent of the City to compel annexation, the City reserves the prerogative to initiate annexation if found to be in the best interest of the community.
3. The City will consider annexation only within the Urban Growth Boundary unless there is a compelling public benefit to consider annexation of a parcel outside the boundary.
4. The City is required to provide annexed parcels with infrastructure (electricity, water, wastewater) and services (police, emergency and other urban services) in a manner that is cost-effective and that does not unduly burden Glenwood Springs residents.
5. The City encourages and supports the annexation of the property immediately north of the Glenwood Mall to facilitate a compatible/coordinated mixed-use development.
6. The City should work with Garfield County to jointly adopt a major street plan for the Bershenyi Ranch / Elk Meadows property that will assure mutual commitment to a unified vision for development and open space.

Figure 3-16: The Urban Growth Boundary was extended to include on the west end of town. Properties here have a low density residential land use designation.

Figure 3-17: The Urban Growth Boundary was extended to include the Elk Meadows Properties south of town and additional property on the west end of the city.

**Subject:** Annexation and Rezoning of 314 Center Dr., Glenwood Springs

To: Planning and Zoning Commission

I am a homeowner in West Glenwood Springs and I am opposed to the annexation and rezoning of the property behind the old mall, for the following reasons:

*Safety:* West Glenwood has a hazard rating of "very high" for wild fire. This means we MUST have safe evacuation routes. Adding more than 1,000 more residents, and possibly more cars and trucks, to this neighborhood would increase the danger to all in the case of evacuations, or detours when I-70 is closed as has happened multiple times recently. Gridlock is already a critical problem. We should not be increasing the potential danger by adding 1,000 or more vehicles to already inadequate evacuations routes.

*Traffic:* Our local streets cannot support 1,000 more vehicles coming and going daily, night and day, seven days a week. The existing traffic study does not accurately reflect the actual impact that would be felt. That study was conducted during a time when many people were either working from home or were unemployed and therefore not commuting to work. Also, schools were closed, which also reduced the traffic. The additional traffic caused by the proposed development would create unsafe conditions and congestion around the two nearby schools. Parking and driving near these schools are already difficult during school hours. In addition, using public parking space on Donegan Rd. is not at all realistic; all parking spaces are already full during school hours.

I am asking the Planning and Zoning Commission to please take these issues into consideration, and to protect the safety and well-being of the 3,500 current residents of West Glenwood by rejecting this application.

Respectfully submitted,

Walt Krom

**To:** Gretchen E Ricehill <gretchen.ricehill@cogs.us>  
**Subject:** Annexation and Rezoning of 214 Center Drive, Glenwood Springs, and Development by R2 Partnership

Hello, Gretchen,  
Please forward this letter to the Planning and Zoning Commission and others as appropriate.  
Thank you.

I am writing to add my voice to those of the many fellow residents of West Glenwood Springs who have expressed their deep concerns about, and opposition to, the annexation and rezoning of the pasture property at 214 Center Drive by R2 Partnership. As a long-time home-owner in West Glenwood Springs who plans to live here many more years, I implore the Planning and Zoning Commission to thoroughly consider the following critical issues:

**1. Evacuation routes.** The recurring and seemingly inevitable wildland fires that continue to threaten our area require that we have effective evacuation routes to protect us. Recent history has shown that such routes do not exist. What is the plan to take into account the 500-1,000 additional vehicles that this 360-unit complex will add to currently inadequate evacuation routes?

**2. Traffic.** Recurring closures of I-70 because of mud/rock slides, traffic accidents, other emergencies continue to cause massive, lengthy back-ups of traffic in West Glenwood. These closures and gridlocks prevent medical and police services from reaching homes in this area of 3,500 residents, more than one third of the population of the city.

What is the plan to address the issue of access into and out of West Glenwood

during such closures, when approximately 900 (25 percent) more residents are added?

**3. Benefit to the City.** What would be the economic benefit to the City of allowing this development to proceed? At a prior meeting of the Commission, this question was asked of City Attorney Karl Hanlon. He answered that historically a city does not enjoy an economic benefit overall from adding residential rental units; in fact, it often results in a negative economic impact. Why would the City allow this development to proceed if it likely will have negative economic consequences?

For these reasons, plus the many others already elaborated by my neighbors, I respectfully request the Planning and Zoning Commission to protect the safety, well-being, and quality of life of the 3,500 residents of West Glenwood by rejecting the application of R2 Partnership to annex, rezone, and develop this property.

See below for additional comments re: the annexation proposal.

Gretchen

---

Hi Gretchen. I realize you've been super busy getting ready for the Planning and Zoning meeting Tuesday May 25 th. I do appreciate you sending out a reminder on our Facebook page with the accessible links.

While scrolling through the comment links, I was really disappointed not to see the most recent letter my husband and I wrote and sent to you on May 10th.

Disappointed because I felt we gave some ideas/suggestions on ways to modify and accommodate our neighborhood if this development is approved.

Any idea why our letter wasn't included with the others?

Thanks for the time in responding to my concerns.

I'm sure you'll be so glad when this is all over.

Take care - thanks for all you do.

Jamie Darien

**To:** Gretchen E Ricehill <gretchen.ricehill@cogs.us>  
**Subject:** Letter re West Glenwood Pasture Development

To Glenwood Springs Planning and Zoning Commissioners;

We, my husband and I, know change is in the air, and with change sometimes comes growth.

Driving past all the new apartment developments in Glenwood Springs, we are well aware of change ;

Buffalo Valley Apartments (2021) - 116 units, The Lofts/Glenwood Meadows - 181 built, (2018), Six Canyons (2020) - 116 units, and the recently approved Bell Rippy development (2021)- 54 units ( in the process of being built), we question the need for more apartment developments in our town and question if the occupancy is 100% in each.

We're also painfully aware when added together, these developments are

smaller in the amount of units, than the 360 units requested by the R2 Partnership proposal.

However, aside from the size(s) of these existing and presently proposed developments, we do believe a major factor to be considered regarding the R2 Partnership proposal, is in the location(s), of these buildings. As far as we know, it's our understanding, the West Glenwood development is the only structure that is being constructed in an **actual neighborhood.**

As a neighborhood community, we have voiced, and will continue to voice, our concerns regarding the impact of this structure on our homes and families. Numerous concerns and comments have been expressed regarding traffic, parking, safety, fire evacuation(s), and major increase in population.

The impact of traffic, safety, and major increase of population, (by approx 400-1200 cars and people) not only effects West Glenwood, but will have major impacts on all of Glenwood Springs.

The so-called "Butterfly Effect" (theory of a small change resulting in larger differences in a later state) may be evident with the increase of traffic on 6&24, I-70, Midland, Hwy 6&24, the bridge, Grand Ave., Hwy 82, and in addition, the increase of shoppers at small businesses, ie. our one and only grocery store, City Market.

We realize our one letter will not stop this change in our neighborhood from happening. Nevertheless, it may cause Planning and Zoning Commissioners and the R2 Developers to pause and rethink the magnitude of such a project.

We're hoping all involved with this decision of annexation will ask themselves the following questions;

- Are 3 and 4 stories really necessary ?
- Can a Victorian style roofing (a style not found that I'm aware of, in West Glenwood) be modified to allow for less height ?
- Can the 360 proposed units be decreased to allow for more open space ?

- Can story poles be utilized to allow for a more clear understanding of how much of Red Mountain will still be visible after the development is built ?
- Could No Parking signs be distributed along Donegan and side streets across from the development, to minimize the overflow of parking impact ?

As we stated earlier, we know change is in the air, as is growth in our small town. We just want to do the very best to prepare for the inevitable, and still keep our little town in Western Colorado from being overdeveloped and overcrowded.

“Never doubt that a small group of thoughtful, committed citizens can change the world. Indeed, it is the only thing that ever has.” Margaret Mead

Respectfully,  
Bob and Jamie Darien

Dear Glenwood Springs Planning and Zoning,

I am a board member of the No Name Water Association. I also work with Roaring Fork Conservancy as Director of Education. I have lived in Glenwood Springs (and just outside of it in No Name) for the last 22 years. I would like to make a public comment, as a No Name resident regarding the proposed pasture development in West Glenwood Springs, behind the mall.

Spending the last two decades teaching in and around Glenwood Springs as a classroom teacher and then, as a Watershed Educator, I have deeply explored the watershed health and its effect on our community. I understand that the population of Glenwood Springs is growing, and when I moved here, I contributed to that growth. Increasing population inherently creates more need for water and resources while at the same time, squeezes the space we occupy, to contain more nonpoint pollution coming from multiple sources. Tackling this challenge is no easy feat. The question is how do we preserve what we love and not close the door behind us?

Glenwood Springs and the Roaring Fork Valley are sustained by the rivers and streams that allowed people to initially settle here. The rivers are truly our lifeblood. They also are a major driver in our economy as tourism is centered around water activities like skiing, rafting, golfing, and fishing.

Multiplex and high-density housing is a lot more water efficient than single residences. My concern is that approving multiple high density housing projects could result in drastically increasing the population of Glenwood Springs in a short amount of time. This could set Glenwood Springs and surrounding communities on a collision course. While high density housing and smart community development is essential in future planning, fast growth, when we are in the highest level of drought, could dry our rivers and streams to levels that render them unsustainable for aquatic species and recreation. We need a plan for lowering water consumption to reflect the water we have, versus the water rights, that if used, could compromise the health of our rivers and tourism. Balancing smart community growth with preservation is incredibly challenging. While the hope for gold and silver initially brought people here, it is the environment that creates our economic driver.

There are no easy answers, but if Glenwood Springs continues to consume water at current rates and increases population and housing, the result could be similar to communities that over developed and allocated water in Arizona and other population centers throughout the west. While municipal drinking water is not threatened, the depth of the water directly correlates to the temperature and oxygen levels that support the trout and aquatic species that sustain our ecosystems. We also need to avoid aridification to protect our communities from wildfires.

The green pasture field in West Glenwood also absorbs heat while adding moisture to an urban area. Open vegetated areas are buffer zones collecting and absorbing pollution from residential run off. Adding more concrete to West Glenwood does not increase the health of our current community. The Roaring Fork River and small creeks like No Name, sustain the riparian areas that create shade and increase moisture levels. We face increasing temperatures and shrinking water supplies. As a community, planning proactively to protect the beautiful gem that we live in, is an important part of sustainable and economic growth. I would like to recommend that existing developed areas be

redesigned and used for housing. I also would recommend that incentives for water conservation be offered to increase responsible landscaping.

Thank you for your time and consideration.

Megan Dean

Hi,

I'm writing to voice my objections to the proposed development of the land behind the mall. It's way too dense. We need a fire evacuation plan in place before any more building is planned. Whenever I-70 is closed for whatever reason we have gridlock in west Glenwood Springs and sometimes the bridge in town is also affected.

Another question is does Glenwood Springs have the infrastructure to handle more development? The comprehensive plan need to be updated first.

Sincerely,

**Subject:** West Glenwood Development

Dear Councilwoman Kaup,

My husband Bob and I have lived in our home in West Glenwood since 1981.

In that time, we've seen many changes and much growth throughout Glenwood Springs and in particularly, West Glenwood.

Change is inevitable we know, as is growth in our small town. Our concerns with the proposed R2 Partnership development lies in the safety, density and effect it will have on our neighborhood, Western Hills subdivision, in addition to all of Glenwood Springs as well.

In other letters we have written in regards to this development, I questioned the need for the amount of building that has occurred in our town since 2018, (when the Lofts at Glenwood Meadows were built). Since that time, there has been approximately 467 apartment units constructed, none that I'm aware of, offering low-income/reasonable housing with any option to buy.

The number built over the past 3 years is only 107 more than the recent 360 units proposed by R2 Partnership now.

In addition to questioning the density of such a proposed development, I also question the need to build such an excessive number of apartments within a neighborhood. Looking at the other complexes listed above, I'm not aware of any established neighborhoods, such as ours, being in the midst of such developments.

Because of living in our neighborhood, an abundance of safety concerns are raised, number one being evacuation in case of a fire. This is something many of us have personally experienced in the past few years. We know it's not a matter of "if" but "when" and now always prepare before we leave for an extended time, in the case an evacuation is necessary.

Accidents and traffic on I70 also bring about a back up in West Glenwood making it difficult to leave our home if necessary.

Adding an additional 600-1200 people and cars I feel is really terrifying.

We've sat in on three Zoom meetings with the R2 developers, asking questions and making suggestions, (such as providing "story poles"), with out any clear answers or interest in ideas from the neighborhood. We'll definitely be a part of the audience for the upcoming July 29th City Council meeting as well.

As I shop and attend activities within our town, I'm very aware of single adults and seniors scraping by to live in this area. I wonder what the likelihood is of bringing more young families to our area, as long term residents. Providing affordable housing/homes to raise a family, in lieu of a loft, 1 or 2 bedrooms that may only be possible to rent with multi family and/or "roommates" to share the rent and expenses.

It makes me sad to realize, most of the kids who went to school and graduated from high schools in this valley, will never be able to return and raise families near their parents, all because of the high price of housing, whether rental or home owned.

Thank you for taking the time to read this long email, I'm sure it's nothing you haven't read before from residents of West Glenwood and others.

This is my 4th letter I've written defending my position of opposition to this development. Not sure the good it does, but I'll be willing to write a 5th or 6th letter in the future if needed.

It's really not about having a view or money....

I feel the #1 concern of Western Hills and other neighborhoods is safety...

**Subject:** West Glenwood Development

Dear Ms Figuero,

I have already sent copies of my letter to the City Council members individually. I thought perhaps I should send one to you as well.

Sorry to be so redundant.

Take care.

My husband Bob and I have lived in our home in West Glenwood since 1981.

In that time, we've seen many changes and much growth throughout Glenwood Springs and in particularly, West Glenwood.

Change is inevitable we know, as is growth in our small town. Our concerns with the proposed R2 Partnership development lies in the safety, density and effect it will have on our neighborhood,

Western Hills subdivision, in addition to all of Glenwood Springs as well.

In other letters we have written in regards to this development, I questioned the need for the amount of building that has occurred in our town since 2018, (when the Lofts at Glenwood Meadows were built). Since that time, there has been approximately 467 apartment units constructed, none that I'm aware of, offering low-income/reasonable housing with any option to buy.

The number built over the past 3 years is only 107 more than the recent 360 units proposed by R2 Partnership now.

In addition to questioning the density of such a proposed development, I also question the need to build such an excessive number of apartments within a neighborhood. Looking at the other complexes listed above, I'm not aware of any established neighborhoods, such as ours, being in the midst of such developments.

Because of living in our neighborhood, an abundance of safety concerns are raised, number one being evacuation in case of a fire. **Subject:** West Glenwood Pasture Development

Please see attachment.

Thank you.

Dear City Council,

I am writing in regards to the development being proposed for the West Glenwood Pasture.

I would like to make some comments on the Reynolds Cain Ditch in which Floyd Diemoz has water rights that he is planning on selling to the developer so they can irrigate their open space. Floyd stated in the last P&Z meeting that his family has had those water rights for many decades and the water has been plentiful. My husband and I also have water rights out of Mitchell Creek. The golf course has 1<sup>st</sup> water rights on the Reynolds Cain ditch that is supplied by Mitchell Creek. I beg to differ on how plentiful the water is as everyone is ignoring the fact we are currently in a drought. This is the first year we have hardly seen Mitchell Creek rise due to runoff, again which feeds the Reynolds Cain ditch. Ever since my Husband turned on the ditch this year to irrigate our property he has been in constant contact with man who manages the ditch for the Golf course on what water he was utilizing and letting out from Mitchell Creek. Never before had we talked to him about our usage. If the Golf Course does not get enough of their allotted water they can call rights on the rest of us, which means it is possible the Diemoz water could be shut off. In the 31 years we have lived here we have only had our water called once, and it wasn't even as dry then as it is now. Also the Storm King Ranch has rights and the Sunlight church from Mitchell creek thru a ditch that runs thru our property. My main point is that the Diemoz water is not a for sure thing especially in these years of drought. We are not even sure how it would all get monitored if such a large development decides to utilize the ditch water. Right now we all work together and communicate any problems.

I am hopeful you will take seriously the comments on why P&Z turned down the proposal. Our lives are literally in your hands. You cannot continue to add to the problems that exist in West Glenwood with Fire evacuation and the gridlock we experience. I don't know if any of you have been thru a wildfire where you cannot move and have mountains on fire around you, but it's terrifying. Our geography goes against us in this small valley.

None of us can understand why over and over it's stated there is enough water in these times of drought. Maybe today, but does no one plan for future dry years? We need a new fire house and so many other things in this town besides more housing. We don't have the infrastructure to support such a development. Also we rarely see any law enforcement in our area even after calls to please patrol due to visually seeing drug exchanges going on.

The traffic in Glenwood is horrendous. We are supposed to be a tourist town but it's getting so congested it's not fun for anyone to try and get around, including the tourists. Right now I am afraid to go to town because if the interstate closes, which is happening more and more I will never get home.

There is so little open space in this valley and I understand the Diemoz family wants to sell but please take care of your citizens that rely on you to make the right decisions for us. We have been lucky so far, but in West Glenwood we truly have the fear of being trapped and burned alive. It's not if we will have another wildfire, but when. If you add more traffic to an already existing problem no one has a chance.

Just a reminder that there are no sidewalks on Donegan or up the Mitchell Creek Road. We have loads of hikers, bikers, dog walkers and lots of children walking the road with already too much traffic going over the speed limit. If you add all those people who will join the clusters already on a dangerous road someone is eventually going to get hurt. Since we have an outdated firehouse couldn't the city somehow buy that property for a new firehouse/senior-center/park....anything to give our city some life instead of just constant building of apartments. Please step back and think of your citizens and what is happening to our town and I beg you do the right thing for us.

Respectfully,

Bruce & Lee Bowles

Two properties on Mitchell Creek Road

We have lived in west Glenwood for 15 years and are really concerned about the proposed housing in the pasture along Donegan Road. Obvious reasons: fire evacuation bottle neck, I 70 closures that hugely impact west glenwood, and lack of water resources. We are on a watering restriction so they want to bring in 600 units MORE! I plead with City Council to serve your community here in west Glenwood. We feel totally ignored over big business - even worse, investors from out of state. Who do you serve???

**Subject:** **Subject: Annexation, Rezoning and Development of 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz and Development of 480 Donegan Road by R2 Partnership**

I am writing to express my opposition to the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz, and specifically the 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley does need more affordable housing, but to allow 360 units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable.

Safety:

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of "very high." Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The lack of emergency services in West Glenwood needs to be addressed before adding a significant increase to the population. The new reality is extreme fire danger.

West Glenwood residents got a taste of just how helpless we are last summer after the 111 Fire. Plans are necessary in the event of a natural disaster to counteract how people actually behave in the event of an emergency with no guidance. We, as a community, must start

planning now. Our community, neighborhood by neighborhood, household by household, must begin now to organize adequate emergency responses. The physical layout of West Glenwood makes dependence on official services hopelessly inadequate.

#### Impact on Traffic:

COVID has drastically reduced traffic, therefore the traffic study done during these months, no matter the algorithm used to calculate the increase, cannot properly reflect the reality of this area. The addition of 1000+ vehicles and a minimum of 2,200 trips per day to our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

#### Comprehensive Plan:

How is it possible “that the benefits of development are distributed evenly across society” when this building is the equivalent to 7 large complexes here in town? Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23rd Street, and Six Canyons is 381 units in total. This is a proposal of 360 in one location! If sustainability is the key foundation to the plan, it’s clear that the social and environmental aspects of sustainability cannot be met through the proposal now under consideration.

Since 2011, when the current Comprehensive Plan was adopted, there have been monumental shifts in perception of the hazards it left out. It’s hopelessly inadequate to meet today’s needs, let alone tomorrows. We are fortunate having local resources for cutting edge technologies. We must enlist them. Development and design should demand working with the existing land features, infrastructure, cost of fixes, demographic shifts and foreseeable challenges like climate effects on regional weather patterns and drought. Designing for energy efficiency, water conservation, defensibility against fire and flood, ease of maintenance on critical systems – while being minimally dependent on outside services, is possible in this day and age. It’s past time that we integrate land use regulations that prioritizes safety and optimally dense communities.

In closing, the neighborhood opposition to these proposals is about a recognition that we have much to do before responsible development on any scale makes sense here, from a basic safety perspective. If there is one thing our world has learned during COVID it is that no matter how economically stable we are, how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization to protect ourselves from their most dire impacts. How much we plan for the future, we are nothing if we don’t protect our people.

It is my opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current

Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated.

Floyd Diemoz has served Glenwood Springs well over the decades, including contributions to public safety, efficiency and community well-being. Designing for the present and future needs of this West Glenwood neighborhood is a challenge worthy of his experience and talents. But this proposed development is not it, and this is not the time to stand on property rights over public safety. Both can be served, but only if both are embraced.

I urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

Bryan and Shannon Derby  
West Glenwood residents

**Subject:** City of Glenwood opportunity?

Hello Gail,

I've been involved with an annexation and PUD development proposal here in Glenwood behind the old West Glenwood Mall. With a group of primarily neighbors in opposition to the planned 360 rental-only units on just over 12 acres. In one of my "drifting off/can't shut my brain down" moments, I thought of a possible "opportunity" for HFH/RF, the City of Glenwood Springs, the developer and residents.

The project is petitioning for annexation into the city and I believe the city council can impose requirements and conditions IF they decide to annex. A myriad of things come to mind, but for now I want to share with you thoughts that may be mutually beneficial. Also as a PUD zoning request, there is concern the 360 units with between 600-900 or more residents will NOT provide for a "... greater benefit to the City of Glenwood Springs.". The Municipal Code states:

### 070.020.180 - Planned Unit Development (*PUD*) District.

(a)

Purpose. Planned unit developments (*PUDs*) are intended to allow for greater flexibility in the application of zoning and development standards than would otherwise be achieved through a base zoning district in exchange for greater benefit to the City of Glenwood Springs.

Also in the Municipal Code are requirements for Parkland Dedication and School Land Dedication based on the number of residents. Per my neophyte calculations, the density of this proposal REQUIRES 5.9 acres of parkland and 4.4 acres of school land OR as desired by the developer, can pay

“fees in lieu of” actual dedications. City staff initial calculations for these fees respectively are \$1.45 million and \$890,000.

The “tickles in my brain” relate to the city elected officials being in the “driver’s seat” related to this housing proposal. Among the concerns I’ve voiced relate to the lack of actual land dedication where there is currently a serious lack of public parkland in this area, the Two Rivers Community School across the street from this parcel uses a very small city park as one of their de-facto playgrounds, the housing is proposed to ALL rental/no owner occupied AND they want to pay the fees-in-lieu of. They will provide a portion of “attainable housing” units, but again are just rent-restricted, not owned like the Habitat model.

As Habitat (and the Roaring Fork School District RE-1 in Carbondale) have a proven record of providing truly affordable housing I see an opportunity to work with the developer, current land owner and the city to find a way to make something work, whether to provide actual land to HFH and/or RE-1 to build units as part of the project and annexation. Or maybe the developer could agree to build “shells” for HFH to finish with volunteers and selected homeowner? RE-1 may be able to own a few of the new units in lieu of land dedications, both school and parkland? I believe if the annexation and PUD are approved, there should be provision for truly affordable/attainable housing controlled by non-profits such as HFH and RE-1.

I have no idea how to get from “thought to reality”, but I’m sharing this e-mail with city council, city staff and RE-1 board president and superintendent. The annexation petition and PUD zoning request are scheduled for a Special City Council meeting on July 29, 2021 at 6PM. It is a highly charged issue for many in combination with many other high density rental projects in and around Glenwood. I feel with the size of this project, the density per acre, the request to develop under a PUD rather than existing city zoning, because it is an annexation request, and the developer positing they cannot reduce the density and make it "work", there MAY be a special opportunity to benefit many in the neighborhood as well as those most in need, homeowners in affordable housing and school staff.

People need to throw out creative solutions such as the “net zero” energy upgrades done by HFH and energy-focused requirements done by the Town of Carbondale related to their new construction projects. The city needs to step up and pursue similar requirements and along with those, here may represent yet another “outside-the-box”, creative, imaginative and mutually beneficial solution.

I hope these thoughts may be of interest to you and the Board of HFH/RF and will be open to consideration and possible involvement.

Thank you so very much for your time, consideration and thoughts,

Greg Jeung  
970-319-7697

PS A very interesting aside I just discovered while I

**Subject:** Annexation, Rezoning, and Development of 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz and Development of 480 Donegan Road by R2 Partnership

I am writing to express my opposition to the annexation, rezoning, and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley has an additional need for affordable housing, but to allow the development of an additional 360 units on this property, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable.

Safety:

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of “very high.” Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The City of Glenwood Springs must address the lack of emergency services for West Glenwood Springs before adding a significant increase to the population. The current residents already live with the threat of extreme fire danger. As the population increases, this danger also increases.

The 111 Fire of 2020 emphasized our helplessness. Plans are necessary for the event of a natural disaster to counteract how people behave during an emergency with no guidance. We, as a community, must start planning now. Our community, neighborhood by neighborhood, household by household, must begin organizing adequate emergency responses. The physical layout of West Glenwood makes dependence on official services

hopelessly inadequate.

#### Impact on Traffic:

COVID has drastically reduced traffic. Therefore the traffic study completed during COVID, no matter the algorithm used to calculate the increase, cannot correctly reflect the reality of this area. The addition of 1000+ vehicles and a minimum of 2,200 trips per day to our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

#### Comprehensive Plan:

How is it possible “that the benefits of development are distributed evenly across society” when this project is the equivalent of seven existing complexes in town? Glenwood Greens, Machebeuf, Holiday House, Manor I, Manor II, 23rd Street, and Six Canyons have a combined total of 381 units. The 214 Center Drive Plan proposes a structure with 360 units in one location!

With the adoption of the 2011 Comprehensive Plan, our infrastructure and population density has changed. As a result, the outdated plan does not include the hazards related to the current community, let alone meet the needs of tomorrow. We are fortunate to have local resources with cutting-edge technologies. We must enlist them. Development and design should demand working with the existing land features, infrastructure, demographic shifts, and foreseeable challenges like climate effects on regional weather patterns and drought. Designing for energy efficiency, water conservation, defensibility against fire and flood, ease of maintenance on critical systems – while being minimally dependent on outside services, is possible in this day and age. It’s past time that we integrate land-use regulations that prioritize safety in dense communities.

The neighborhood opposition is about recognizing the preliminary work required to ensure safety before development. COVID has taught us that no matter how economically stable or how fiscally responsible we are, unprecedented changes create new demands on both basic infrastructure and community organization. Regardless of how much we plan for the future, we are nothing if we don’t protect our people.

It is my recommendation to place a moratorium for all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) update the Comprehensive Plan.

Floyd Diemoz has served Glenwood Springs well over the decades, including contributions to public safety, efficiency, and community well-being. I do not find fault with his selection of a

Developer nor the quality of the project plan. Unfortunately, the density of our existing population and lack of Community preparedness has placed him at a disadvantage. My opposition is founded strictly on safety concerns. I also recognize he has every right to sell and develop this land, but property rights do not exceed the fundamental right to safety. I believe we can serve both initiatives if we take a step back, address the underlying dangers, and then design a project supporting our community's safety.

I urge you to protect the current population's safety by rejecting the application to annex and rezone this property.

**Subject:** Annexation, Rezoning, and Development of 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz and Development of 480 Donegan Road by R2 Partnership

I am writing to express my opposition to the annexation, rezoning, and development of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz 12.285-acre PUD proposal (also known as 480 Donegan) currently under contract with R2 Partnership LLC. I recognize that the Roaring Fork Valley has an additional need for affordable housing, but to allow the development of an additional 360 units on this property, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable.

#### Safety:

According to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007, the area of West Glenwood has a hazard rating of “very high.” Fire Chief Tillotson claims that the West Glenwood Fire Department is undersized and obsolete, believing our concerns to be valid. The City of Glenwood Springs must address the lack of emergency services for West Glenwood Springs before adding a significant increase to the population. The current residents already live with the threat of extreme fire danger. As the population increases, this danger also increases.

The 111 Fire of 2020 emphasized our helplessness. Plans are necessary for the event of a natural disaster to counteract how people behave during an emergency with no guidance. We, as a community, must start planning now. Our community, neighborhood by neighborhood, household by household, must begin organizing adequate emergency responses. **Subject: Annexation, Rezoning and Development of 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz and Development of 480 Donegan Road by R2 Partnership**

We are writing to express our opposition to the annexation, rezoning and development of the property known as 480 Donegan currently under contract with R2 Partnership LLC. To allow 360 units on this property, at this time, before the Comprehensive Plan is complete and evacuation plans are in place, is unconscionable and dangerous.

West Glenwood residents got a taste of just how helpless we were last summer during the 111 Fire. The total gridlock of vehicles on all of the West Glenwood streets precluded any chance of evacuation. If the fire would have progressed into West Glenwood, the outcome would have been tragically far different.

COVID has drastically reduced traffic, therefore the traffic study done during these months, cannot properly reflect the reality of this area. The addition of 1000+ vehicles and a minimum of 2,200 trips per day on our streets will create a traffic nightmare of overwhelming proportions. Congestion near schools and safety concerns for our young children are inevitable.

Water usage throughout the Western States is at a level that experts claim is unsustainable for our future. Glenwood Springs has been on water restrictions for an extended period of time. Continued drought conditions serve to exacerbate the situation. Serious consideration must be given to the water supply regarding all aspects of future growth.

It is our opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment of how the annexation will impact water supply now and into the future, and (c) the Comprehensive Plan has been updated.

We urge you to protect the current population and help keep residents safe by rejecting the application to annex and rezone this property.

**Subject:** Comments - Proposed annexation, rezoning and PUD of property located at 214 Center Drive

To:  
[steve.davis@cogs.us](#); [jonathan.godes@cogs.us](#); [tony.hershey@cogs.us](#); [paula.stepp@cogs.us](#); [charlie.willman@cogs.us](#); [ingrid.wussow@cogs.us](#); [debra.figueroa@cogs.us](#); [shelley.kaup@cogs.us](#)

I am providing comments to the proposed annexation and rezoning of 15.8 acres of property located at 214 Center Drive, Project title 480 Donegan. 12.285 acres of the property is proposed for a high-density Planned Unit Development (PUD) consisting of 360 housing units. I have resided at the address above since 1989 and live within 0.2 miles from the property proposed for annexation/rezoning. I am not opposed to development of the subject property, but I am concerned about the level/intensity of the PUD being proposed by the applicant and developer. I recognize the applicant's right to develop the property in accordance with existing county zoning (commercial limited). It is not currently a right to develop high-density residential units. It is my preference that the subject property remain zoned as commercial or to a lower density residential area of single-family homes. In the event annexation and rezoning to PUD is approved, conditions must be established to protect public health, safety, the welfare of the City and surrounding neighborhood. Modification of the PUD will be necessary to be more compatible with and prevent irreparable harm to the surrounding neighborhood. My comments below are specific to the 12.285 acres proposed for PUD.

#### I. Safety

##### Comment:

An emergency evacuation study of West Glenwood Springs needs to be commissioned. The PUD would add approximately 1200 people to the community. Safe and expeditious evacuation of the area in the event of wildfire, debris flow or another catastrophic event would be adversely impacted. Those impacts must be mitigated. An emergency evacuation plan should also be prepared. The City should select the contractor who will conduct the study to avoid any conflict of interest. The applicant should contribute all funding necessary for the study to the City of Glenwood Springs.

##### Background/Rationale:

Having lived here for 32 years, I have experienced several wildfires near West Glenwood Springs including Storm King (1994), Coal Seam (2002), the 113 fire in South Canyon (2020), and Grizzley Creek (2020). My family and I were evacuated during the Coal Seam Fire. As you are probably aware, this region has experienced an approximate 20-year drying out period. According to the most recent U.S. Drought Monitor, our area is classified as being in exceptional drought. Climate data is clear that drought conditions are occurring with more frequency in this region, and I do not see that changing anytime soon. As a result, we can expect wildfires in this area to occur with more frequency, intensity and for longer duration. It is not a matter of if but when we will experience the next catastrophic wildfire.

During the 2002 Coal Seam fire, I can recall how difficult it was for residents in West Glenwood Springs to evacuate the area in an expeditious manner. The August 5, 2020 the 113 fire occurred on the north side of I-70, mile marker 113 (near South Canyon). That resulted in closure of the Interstate and backed up traffic in the West Glenwood Springs area along Mel Rey, Donegan and Storm King Roads. This left resident of the area trapped in the event of evacuation. According to reports by West Glenwood Springs residents, it took over three hours to reach their homes from the other side of town. A comment made by Trent Hyatt during the March 23, 2021 Planning and Zoning Commission meeting seemed to downplay the traffic issue indicating that most of the vehicles were associated more with people trying to get out of town that did not live here. They were not from people who live in West Glenwood. I assume the point was that increased population from the proposed PUD would not cause a traffic issue with fire evacuation. It does not matter where the traffic came from. We were still trapped and could not evacuate if conditions warranted. The problem also existed with the Coal Seam Fire and has occurred multiple times in 2021 from I-70 road closures. Population and development (e.g., Two Rivers School, auto dealerships, etc.) of the area has increased and the addition of 1200 people from the PUD will only exasperates the problem. The top priority of government should be to ensure the safety of its citizens.

#### II. Water

##### Comment:

A thorough analysis must be done to analyze impact to the water system of the City of Glenwood Springs from the PUD. As part of the study, the cumulative impact to the water system for all reasonably foreseeable future development needs to be addressed. The continued trend of increased frequency and duration of drought (i.e., aridification, mega-drought) must be addressed as well.

##### Background/Rationale:

Last August, Glenwood Springs residents were placed on water restrictions. Those restrictions remain in place. Odd numbered home addresses could water on odd days of the month, and even numbered home addresses could water on even days of the month. Watering could only occur before 10 a.m. or after 6 p.m. In addition, all lawn watering was prohibited for a brief period. Water restrictions were put in place because the Grizzley Creek Fire forced the closure of the Grizzley Creek water intake. While I acknowledge this was a unique situation, we must assume these events can and will occur in the future. In fact, two separate debris flows occurred on June 26 and 27, 2021 which impacted the City's water intake in No Name Creek. This resulted in limiting water use to essential uses from June 26 to June 30 (according to the latest update). Continued frequency and duration of drought will also result in reduced flows to streams, rivers, and lower water tables. Those scenarios must be considered when determining whether the City's water system will have the capacity to support the proposed PUD including any future developments.

#### III. Traffic

##### Comment:

Another traffic study must be conducted to better determine impacts from the PUD. At a minimum, the study should be expanded to include impacts to Mel Ray Road and the roundabouts in West Glenwood Springs. Cumulative impacts from traffic associated with the Two Rivers Charter School and possible redevelopment of the mall must also be addressed. Use of the easement through the mall should receive more serious consideration as a main entrance to the PUD. That would reduce traffic along Donegan, Storm King and Mel Ray Roads.

##### Background/Rationale:

Although a traffic study has already been conducted, it is my understanding that it was done during a time when the economy was shut down due to COVID. That is unacceptable because there was far less traffic during that time because many people were not working or working from home. Further, the contractor conducting the study concluded there would be no impact to traffic associated with the Two Rivers Charter School because PUD peak hour traffic would occur at different times. That ignores the impacts to other West Glenwood Springs residents who will be confronted with traffic from both the PUD and the school. Currently, traffic is backed up on Storm King Road and Center Drive every weekday morning and afternoon from parents dropping off or picking up their children. The school does not have sufficient space to accommodate all the traffic mentioned above. Additional traffic from the PUD will only compound the situation.

The current study also focused on impacts to Donegan Road, Storm King Road and Highway 6. Impacts to Mel Ray were glossed over because it was assumed most PUD traffic would be using Storm King Road. Since a main entrance to the PUD will be on Donegan (across from Chapparral Circle), it stands to reason that much of the traffic will also occur on Mel Ray Road. That is because Mel Ray offers the shorter distance (and fewer turns) to I-70, downtown Glenwood Springs, and up valley towards Aspen.

#### **IV. Parking**

**Comment:**

An in-depth analysis should be conducted to determine whether the current planned PUD parking will be sufficient to accommodate 1200 tenants including visitors. Evaluation of exiting high-density developments should be conducted to determine if parking has adequate for residents and visitors.

**Background/Rationale:**

The PUD proposed 625 parking spaces (1.7 spaces/housing unit) which include both internal and street parking. I do not have an exact figure for street parking included for the PUD. Since street parking will also be available to the public, those spaces should not be considered for meeting parking requirements of the PUD. Currently, most of the parking spaces along Donegan Road, Storm King Road (school buses), and Center Drive are utilized by the Two Rivers Charter School as that facility lacks sufficient parking. The PUD street parking will likely be occupied by the school as well. Sufficient internal parking be provided for the PUD to avoid turning West Glenwood residential streets into a parking lot. The applicant has indicated they plan to limit how many vehicles PUD residents are allowed. I do not believe it is possible to limit parking to 1.7 per unit (because no one drives 0.7 of a vehicle). They will have to say either one or two vehicles/unit.

#### **V. Neighborhood Compatibility**

**Comment:**

Construction of single-family homes within the proposed PUD would be a best option to blend in with the existing neighborhood. If the high-density PUD is approved, it should be modified to improve transition from existing homes along the north side of Donegan Road. Single-family homes should be constructed along the north side of the PUD which transition to a more high-density development further south of the property towards the mall. A visual impact analysis of the PUD must be conducted. Mitigation should be adopted so views from the adjacent west Glenwood residential units are not obstructed.

**Background/Rationale:**

City Planning and Development staff have indicated that the PUD provides a good transition from residential units (Western Hills Subdivision on the north side) to commercial development (mall to the south side). I disagree. Having high-density rental apartments and townhomes adjacent to single family one-story homes that are owned does not provide a good transition. It does not blend well with the existing neighborhood to the north. Construction of lower density single-family homes on the north side (adjacent to Donegan Road) of the PUD would improve the transition. The best alternative would have all PUD housing units be single-family residents to reduce density, improve safety, and mitigate traffic issues. Allowing ownership of those homes would also help satisfy a shortage need for the City. I understand that alternative would be less profitable for the landowner and developer. Higher density would maximize revenues; however, it is the City's responsibility to ensure the health, safety, and welfare of its citizens. That should not be compromised to satisfy the applicant's business model (i.e., construction of high-density rental units) or to maximize profits.

City Planning and Development staff also are supportive of the PUD with the rationale that the 29 to 30 units per acre are not inconsistent with other recent high-density development. My response - two wrongs do not make a right. In addition, there are no high-density developments of this magnitude present anywhere in the West Glenwood Springs area.

The PUD has building heights range from 30 feet adjacent to Donegan Road and 53 feet on the southern portion of the PUD near the mall. I appreciate design efforts to transition building heights corresponding to the slope of the property; however, all residential houses on the north side of Donegan Road are one-story. Efforts should be made to minimize the height of the PUD buildings along the north side of Donegan Road. Further, the 53-foot height proposed for the southern buildings would make them the tallest in West Glenwood.

#### **VI. Other Impacts**

**Comment:**

Impacts of the PUD to the fundamental facilities, services, and systems serving a city should be analyzed and mitigated. These include but are not limited to the following: fire department, police department, schools, sewer system, medical facilities, parks, hiking/biking roads and trails (e.g., Mitchell Creek).

**Background/Rationale:**

Proposed high-density housing developments can have impacts that are far greater than the immediate area. Impact analysis is often focused on the immediate area of the proposed development rather than the effects to a broader area (a classic - can't see the forest for the trees). Population growth can reach a point where the carrying capacity of the City's infrastructure, services, facilities are reached. That compromises the safety and quality of life to all citizens of the city.

This concludes my comments, issues and concerns.

Subject: Application for Annexation, Rezoning, and Development of 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz and Development of 480 Donegan Road by R2 Partnership

Having lived within the city limits of Glenwood Springs for many years, I am very concerned about the impact that recent growth has already had on traffic and water usage in our town.

I believe that a moratorium needs to be placed on development of any additional multi-family units in Glenwood Springs until (a) a current Wildfire Evacuation Plan is in place and can be implemented to allow for the safe evacuation of all Glenwood Springs residents, (b) a thorough assessment is done on how the annexation would impact water supply now and into the future, and (c) the current Comprehensive Plan has been updated.

For the protection of current residents, I ask you to please reject this application. To pass such a proposal would be dangerous and ultimately irresponsible.

Thank you,  
Sally Valin

**Subject:** Letter to City Council for 29 July 2021 Meeting

Caution! This message was sent from outside your organization.

Ryan

Very nice to talk to you this morning Ryan. As I said before we have already sent the attached letter to City Council Members but since I did not request that it be included with the packet I have now updated it slightly and am formally requesting that this be included in the City Council Packet for their meeting on 29 July and any following meetings covering the annexation, rezoning and development of the 15.818-acre property at 214 Center Drive.

Please let me know if you have any questions.

Thank you

Annie Stephens

TO:  
City Manager/City Clerk  
101 8<sup>th</sup> Street  
Glenwood Springs CO 81601

PLEASE INCLUDE THIS LETTER IN THE CITY COUNCIL PACKET FOR 29 JULY 2021

RE: Annexation of a 15.818-acre parcel into the municipal limits of the City of Glenwood Springs and Initial Zoning/Rezoning of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

We are writing to express our opposition to the annexation of the 15.818-acre property at 214 Center Drive owned by Glenwood Partnership/Floyd Diemoz and more specifically the 12.285-acre PUD proposal (also known as "480 Donegan") currently under contract with R2 Partnership LLC to build 360 residential units and on your City Council agenda for 29 July 2021.

We understand that although this complies with guidelines in the 2011 Comprehensive Plan (revised in 2014) there are already plans to revisit this outdated document. In the years since its writing many factors have changed, most notably our climate making the possibility of wildfires not just a once every few years event to a regular summertime occurrence. Already in mid-June we have registered temperatures of over 103 degrees in our north-facing yard. As we saw last year with both the 111 fire, which caused total gridlock in West Glenwood, and the Grizzly Creek fire, life in our valley can be changed in the space of a few short hours and our lives and homes threatened.

As you deliberate we would ask you to take into consideration several things:

1. **WILDFIRE RISK:**

The area of West Glenwood is already categorized as "very high risk" according to figure 2 of the Wildland Urban Interface Community Wildfire Protection Plan of April 2007. What we have in West Glenwood are multiple small roads leading to **ONE SINGLE ROAD** - Highway 6. Not only does Highway 6 need to have the capacity to safely allow evacuation of all the residents of West Glenwood but depending on the location of the fire, it may also block areas off so that emergency vehicles can access the fire. To add such a large number (or in fact any number) of residents to West Glenwood, which already has over 3,000 residents would be utterly catastrophic.

2. **WEST GLENWOOD FIRE STATION:**

The current fire station located on Mel Ray Road is now undersized and obsolete according to Chief Gary Tillotson. This 12.285-acre property would be an ideal location for Glenwood to build a large, state-of-the-art fire station that is adequately equipped and has room for the preparedness training needed by first responders but also offers the type of land around it that can serve as a shelter in place zone or land break to help slow down the progress of any fire that might come into the area.

3. **DENSITY:**

The development of the 12.285-acre plot of land will bring in almost 30 units per acre compared to the properties to the north where the average is 3.5 per acre – 43 homes compared to 360 units is unacceptable.

If approved this development would be THREE TIMES THE SIZE of the Six Canyon Apartments which has 116 units. All of these units next to 43 homes?

4. **TENANTS & PARKING:**

The developer has assured the community that this development will bring in under 600 tenants which we find hard to believe given the breakdown of the units. We predict there could be nearer to 900 tenants. Even with 625 parking spots both on site and off site, this will turn West Glenwood into a parking lot of Californian proportions.

5. **TRAFFIC:**

Consider the traffic that a development of this size will bring to the three “main” roads in this area - namely Mel Ray, Donegan and Storm King. Even if roads are improved, is it realistic to think they can handle the traffic from 600-900 (minimum-maximum) tenants coming and going to work, shop, take children to school and socialize; as well as delivery/removal/utility company vehicles; restaurant workers and guests; customers and clients utilizing the live/work units; and visitors to the residents living in this development? Yes the developer will make off-site improvements but as one of the commissioners said at the last P&Z meeting “without this development these improvements would not be necessary.”

6. **PROXIMITY TO LOCAL SCHOOLS:**

The proposed development is immediately opposite both the Two Rivers School and the Montessori School (located in the Business Center). Adding this amount of traffic to our relatively rural area will bring safety issues both for children and teaching staff. R2 developers are proposing a sidewalk and bike lane on Donegan to help with safety and traffic, but to our knowledge there has never been an injury on Donegan in the 20 years we have lived here.

7. **LAND DEDICATION:**

Normally with a development of this size a developer is asked to provide parkland and school land dedications, in this case 5.9 acres and 4.4 acres respectively, but will this really happen? Will the City allow them to make fees in lieu of which will do little to compensate the people of West Glenwood who already have just one tiny public park (often in use by Two Rivers School)?

8. **UTILITIES:**

Even though local authorities say we have sufficient capacity for water (and sewer) for this development, why then are we already on water restrictions? Yes they may have irrigation water for some months of the year, but 360 residential units, a swimming pool, clubhouse and a restaurant use an enormous amount of water.

9. **BENEFITS:**

And lastly ask yourselves how will this development be of “greater benefit to the City” and does it fit with your Comprehensive Plan Vision Statement “to preserve Glenwood's small-town character while maintaining livability.”

1. Yes it will bring in some tax dollars but overall this is not going to be a development like Glenwood Meadows which has robust retail, restaurant and

accommodation revenues (where retail sales tax collected is in excess of \$4.2 million per year for the past 15 years).

2. And yes it will bring in housing, a little of which will be affordable housing, but when will these large developments stop? In recent years we have seen The Lofts built (and another 300 units approved and still to be built), Six Canyons (a monstrosity of a complex), Buffalo Valley Apartments, Bell Rippy Apartments, Solstice Townhomes, Real America's Mountain View Flats proposal to build 54 units just north of Hwy 6 & 24, residential homes going up west of Ami's Acres and the possibility that condos will be built on the Rivers Restaurant site. With the exception of the 29 townhomes in Cardiff Glen ALL are rentals. We see recently announced affordable housing at four CMC locations including Spring Valley campus here in Glenwood Springs, which will also help with the housing need.

We urge you to look at the recommendations made by the City's Planning & Zoning and deny this annexation and PUD proposal. Some of the reasons cited by P&Z included the following:

1. Not suitable or compatible
2. Did not address opportunities for home ownership
3. Did not maintain or fit our small-town character as described by the Comprehensive Plan, directing growth inward, planning for civic spaces or encouraging infill and redevelopment
4. Significant life safety issues in this area of the city that would need to be addressed before a project like this could be approved, and the need for an evacuation study and plans in place before future large scale developments
5. Developer to dedicate parkland rather than pay parkland fees
6. Concerns regarding density and traffic
7. Issues with roof and gable designs
8. The need for a fire station in West Glenwood
9. Recommended additional traffic studies
10. Recommended installation of story poles
11. Recommended lowering maximum heights, removing false gables, and reducing density
12. Recommended that on-street parking not be counted towards the parking requirements
13. Recommended more inclusionary housing that the minimum required

It is our firm opinion that a moratorium needs to be placed on all non-single-family developments in Glenwood Springs until (a) a current Wildfire Evacuation Plan is not only in place but can be fully implemented to allow for the safe evacuation of all residents of Glenwood Springs and (b) the Comprehensive Plan has been updated.

If there has been one thing our world has learned through Covid it is that no matter how economically stable we are, how fiscally responsible we are, how much we plan for the future, **we are nothing if we don't protect our people**. We are urging you, our City Council, to do everything in your power to keep us safe.

Together we can build a safer community  
Glenwood Safe - Glenwood Strong

---

Caution! This message was sent from outside your organization.

Hi Shelley!

I am writing to encourage protection of the land in West Glenwood specifically with regard to the proposed development (360 apartments).

Though, we now live in New Castle, we used to live in GWS (as you know). I (Beth) have quite a few friends who do live in West Glenwood and who I frequently join to walk with in that area. I have always enjoyed seeing that field (open space) in the neighborhood especially with the horses. : )

My thoughts about the development of that field has to do with Two Rivers Community School. Both of my grandsons go to school there. I know one main concern regarding the increase of housing in that area has to do with the idea of an emergency exit, and I agree that this should be the most important issue.

The folks who live there, as well as the school population, need to be able to get out of there quickly in case of wildfires (or other emergencies). I doubt that even having an evacuation "plan" would really make much difference when it comes to truly getting people out quickly and especially if there were more people with more cars needing to get out. (nothing wrong with an emergency plan though!).

Gridlock can and does easily happen at the West Glenwood roundabout... which would also greatly impact people in that neighborhood who might need to evacuate. If the field needs to be developed, maybe first annexed by the city (I don't know why this could be something folks might oppose) and then have some kind of creative, enriching and more organic vision about the use of that land and the neighborhood.

Thanks, Shelley for your attention and time with this matter.

Sincerely,

Beth Dwyer

[Allow sender](#) | [Block sender](#)

When I sent you this letter on 6-18 I stated the Diemoz's were not using there irrigation water. They did start using the water in later June so I did want to correct that. I took that statement out of this attachment. I didn't know how much it mattered to send an updated copy but I didn't feel right saying something that wasn't correct. Just know Mitchell Creek is not flowing as in the past and if we have another year of drought it could be quite a different story next year.

I am disappointed I won't be able to attend your meeting. I can only hope you have read letters to the editor and other editorials in the post to feel our frustration with the constant building of Apartments and what has happened to our town. Glenwood needs a new direction, something to revitalize it. As already stated by many you can't keep adding to our existing problems, like fire evacuation for one without coming up with concrete plans first.

Thank you  
Lee Bowles

Dear City Council,

I am writing in regards to the development being proposed for the West Glenwood Pasture.

I would like to make some comments on the Reynolds Cain Ditch in which Floyd Diemoz has water rights that he is planning on selling to the developer so they can irrigate their open space. Floyd stated in the last P&Z meeting that his family has had those water rights for many decades and the water has been plentiful. My husband and I also have water rights out of Mitchell Creek. The golf course has 1<sup>st</sup> water rights on the Reynolds Cain ditch that is supplied by Mitchell Creek. I beg to differ on how plentiful the water is as everyone is ignoring the fact we are currently in a drought. This is the first year we have hardly seen Mitchell Creek rise due to runoff, again which feeds the Reynolds Cain ditch. Ever since my Husband turned on the ditch this year to irrigate our property he has been in constant contact with man who manages the ditch for the Golf course on what water he was utilizing and letting out from Mitchell Creek. Never before had we talked to him about our usage. If the Golf Course does not get enough of their allotted water they can call rights on the rest of us, which means it is possible the Diemoz water could be shut off. In the 31 years we have lived here we have only had our water called once, and it wasn't even as dry then as it is now. Also the Storm King Ranch has rights and the Sunlight church from Mitchell creek thru a ditch that runs thru our property. My main point is that the Diemoz water is not a for sure thing especially in these years of drought. We are not even sure how it would all get monitored if such a large development decides to utilize the ditch water. Right now we all work together and communicate any problems.

I am hopeful you will take seriously the comments on why P&Z turned down the proposal. Our lives are literally in your hands. You cannot continue to add to the problems that exist in West Glenwood with Fire evacuation and the gridlock we experience. I don't know if any of you have been thru a wildfire where you cannot move and have mountains on fire around you, but it's terrifying. Our geography goes against us in this small valley.

None of us can understand why over and over it's stated there is enough water in these times of drought. Maybe today, but does no one plan for future dry years? We need a new fire house and so many other things in this town besides more housing. We don't have the infrastructure to support such a development. Also we rarely see any law enforcement in our area even after calls to please patrol due to visually seeing drug exchanges going on.

The traffic in Glenwood is horrendous. We are supposed to be a tourist town but it's getting so congested it's not fun for anyone to try and get around, including the tourists. Right now I am afraid to go to town because if the interstate closes, which is happening more and more I will never get home.

There is so little open space in this valley and I understand the Diemoz family wants to sell but please take care of your citizens that rely on you to make the right decisions for us. We have been lucky so far, but in West Glenwood we truly have the fear of being trapped and burned alive. It's not if we will have another wildfire, but when. If you add more traffic to an already existing problem no one has a chance.

Just a reminder that there are no sidewalks on Donegan or up the Mitchell Creek Road. We have loads of hikers, bikers, dog walkers and lots of children walking the road with already too much traffic going over the speed limit. If you add all those people who will join the clusters already on a dangerous road someone is eventually going to get hurt. Since we have an outdated firehouse couldn't the city somehow buy that property for a new firehouse/senior-center/park....anything to give our city some life instead of just constant building of apartments. Please step back and think of your citizens and what is happening to our town and I beg you do the right thing for us.

Respectfully,

Bruce & Lee Bowles

Two properties on Mitchell Creek Road

**MINUTES**  
**City of Glenwood Springs**  
**Planning and Zoning Commission**  
**Regular Meeting**  
**May 25, 2021**  
**Zoom**  
**6:00PM**

**1. Roll Call**

Present at roll call were Commissioners: Marco Dehm, Amber Wissing, Joy White, Carolyn Cipperly, Sumner Schachter, George Shaver

Absent at roll call were Commissioners: Ben West, Joy White, Pete Waller

Also present were: Asst. City Manager Jenn Ooton, Asst. Community/Economic Dev. Director Gretchen Ricehill, Senior Planner Trent Hyatt, City Attorney Karl Hanlon, Assistant City Engineer Jessica Bowser, City Engineer Terri Partch, Public Works Director Matt Langhorst, Fire Chief Gary Tillotson,

**2. Receipt of the Minutes**

Commissioner Schachter made a motion to accept the minutes from the August 13, 2020 meeting. Commissioner Shaver seconded the motion. Commissioner Schachter asked if accepting the minutes from August 13<sup>th</sup> had any impact on item 09-21. Asst. City Manager Jenn Ooton confirmed that the approval of this minutes was procedural and not related to any items on the agenda for May 25<sup>th</sup>.

Commissioner Dehm called the item to question.

Motion passed unanimously.

Commissioner Schachter made a motion to accept minutes from the April 27, 2021 meeting. Commissioner Wissing seconded the motion.

Commissioner Schachter requested staff add Commissioner Cipperly's list of information requested from the developer on item 09-20. Commissioner Cipperly asked if minutes could be

approved even though some Commissioners had not been at previous meeting. City Attorney Karl Hanlon explained that a vote could proceed.

Commissioner Dehm called the item to question.

Motion passed unanimously.

### **3. Public Comments**

Comments from citizens appearing for items not on the agenda. No citizens presented.

### **4. Continued Items**

- a. Planning File 09-20: Consideration of an annexation and the initial zoning/rezoning of 15.818 acres to Commercial (CO) District and Planned Unit Development (PUD) District at 214 Center Drive (PIN: 2185-061-00-042) Continued from the March 23<sup>rd</sup>, 2021 and April 27<sup>th</sup>, 2021 meeting.

Commissioner Shaver attested to having watched the two previous meetings where this item was discussed. Commissioner Schachter attested to having watched the April 27<sup>th</sup> meeting. Commissioner Wissing recused from the item, citing previous involvement with the item.

Commissioner Schachter asked if it would be advisable to continue the item since there were only four P & Z members for this item. City Attorney Karl Hanlon recommended not continuing the item and advised the item move forward.

Senior Planner Trent Hyatt provided the Planning & Zoning Commission a brief summary of the staff report including the requests of Planning & Zoning Commission to the applicant and staff.

Applicant Floyd Diemoz discussed the history of the property, explaining the property was originally bought in 1960 as an investment property and that the property had never been officially designated as open space. Diemoz asked Commission to approve the item, citing the project's compatibility with the Comprehensive Plan. Diemoz also stated that the property was likely to be developed in the near future, whether annexed to the City or not.

Applicant Barry Rosenberg discussed the project and how in his opinion it aligned with goals in existing City Comprehensive and strategic plans. Rosenberg stated that the project would follow the affordable housing requirements and that the applicants were open to considering the Housing Commission's recommendations and discuss possible changes to the project with the Housing Commission. Rosenberg also stated the applicant was committed to assisting with any evacuation plans.

Applicant Matthew Fitzsimmons, Hord Coplan Macht provided the Commission with a short presentation with additional information, including site sections showing heights to the peaks and parapets as requested by the Commission. Fitzsimmons also provided additional views from the elevation of houses on north side of Donegan, as requested by the Commission.

Applicant Yancy Nichol, Sopris Engineering, provided the Commission with information on sight distances at intersections with Donegan, as requested by the Commission.

Commissioner Schachter asked for peak and midpoint heights for the different housing types. Applicant Matthew Fitzsimmons provided information on the revisions and the peak and midpoint heights for different housing types. Schachter also stated that comparing the density of this project could not be compared to the Lofts because the numbers provided by the applicant did not include the entire Meadows development. Applicant Rosenberg agreed that the numbers for the Lofts did not include the entire Meadows development and that Six Canyon would be a more similar comparison. Schachter also stated that in response to Floyd Diemoz comments on the Comprehensive Plan, that some of those items can be objective.

Commissioner Cipperly asked if the applicant could verify that the Reynolds Cain Ditch runs year round and that water would be available for site irrigation. Applicant Paul Schirmer verified that a letter confirming this was forwarded to staff but was sent after the packet was sent out. Applicant John Diemoz explained that letters from the Reynolds and Cain Ditch Company was sent to the City verifying the water situation. Applicant Floyd Diemoz provided a history of the usage of the ditch dating back to the family's purchase of the property. Floyd Diemoz also explained the ditch usually does not run during winter months.

Commissioner Schachter asked the applicant regarding potential meetings with the Housing Commission and any of the potential changes. Applicant Rosenberg explained that the applicant would be willing to exceed the required affordable housing requirements and open to working with the Housing Commission on these items. City Attorney Karl Hanlon stated that the Housing Commission acted in an advisory role and could not place stipulations or conditions on development, as that would be the role of City Council in an annexation. Senior Planner Hannah Klausman provided additional information on the recommendations made by Housing Commission.

Commissioner Shaver requested information on ADA access in the proposed design. Applicant Rosenberg stated specific plans had not been drawn up but that all designs would meet ADA requirements. Shaver also asked if specific units would be ADA accessible, which Rosenberg confirmed that a specific number of units would be required to meet those requirements. Applicant Fitzsimmons stated that several of the ground floor units would be designed with that in mind and that other units would be designed to be adapted for that use.

Commissioner Dehm reopened the item to public comment, citing that there had been some minor revisions to the item.

Erika Gibson, Attorney for the Diemoz Partnership, stated that the focus of the item was on annexation and that the property in the Comprehensive Plan was specifically identified for annexation and development.

Lacy King, questioned how the traffic study addressed potential future traffic from a redeveloped Glenwood Springs Mall.

Jamie Nims, Head of School at Two Rivers Community School, stated that the Two Rivers Board of Directors was not taking a position for or against the project. Nims stated concerns regarding traffic and density. Nims also stated that the school had difficulty filling positions due to the

regional housing shortage. Nims expressed a desire that any potential development on this site could be compatible with the community and neighborhood.

Laurie Raymond, supported denial citing wildfire evacuation concerns, traffic, water concerns, and lack of xeriscaping in project designs.

Greg Jeung, No Name resident, had questions on the impact fees for the project, including parkland fees and fire impact fees.

Jamie Darien asked if it were possible to model the heights of the buildings uses poles or similar physical visual on site.

Lisa Orosz asked if the item could be a referendum. Orosz cited concerns about traffic and wildfire concerns.

Todd Hurst, supported denial citing concerns on traffic and its effects on emergency response times, wildfire concerns, density, and neighborhood compatibility.

Michael Hoban, supported denial citing traffic, wildfire concerns, neighborhood compatibility, and density.

Mark Gibson expressed thanks to the Commission for their service. Gibson supported the use of story poles to model the visuals on site and commented on the density of the project.

Commissioner Dehm closed the item to public comment.

Applicant Barry Rosenberg provided responses to several community comments. Applicant Curtis Rowe, Kimley Horn stated that the traffic study was designed accounting for a fully redeveloped mall. Rosenberg also stated that the irrigation ditch provided sufficient water for landscaping. Rosenberg also stated that there was no waiver for development fees. Rosenberg also mentioned that the density had been decreased from the original proposed designs.

Commissioner Schachter requested City Attorney Karl Hanlon to clarify what the actions of the item signify. Hanlon explained that Planning & Zoning's role with this item was to provide a recommendation to City Council and was not acting as a deciding body. Hanlon explained that there will be additional public hearings in front of City Council regardless of P & Z recommendation. Hanlon explained that P & Z could not place conditions but could provide recommendations to City Council. Schachter also asked to which degree proposed design and zoning would resemble the final development. Hanlon explained that the approval of this item for zoning and annexation would be very specific to the proposed design.

Commissioner Shaver asked a question on the relation of the two items. Hanlon stated that the two items, annexation and zoning, were closely tied to each other. Shaver asked if the item were approved by Council, if the applicant was required to annex. Hanlon explained that if an applicant could not meet the conditions, then the annexation would not proceed.

Commissioner Schachter made a motion to recommend denial of Action Item 1 – Annexation of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs. Schachter based on recommendations with findings that the project was not compatible with Comprehensive Plan goals of livability, small town character, or safety. Schachter also stated that the item creates potential adverse impacts to the City and neighborhoods in terms of health, safety, and welfare.

Commissioner Cipperly seconded the motion.

Commissioner Schachter stated the proposal was well put together yet not suitable or compatible to the City of Glenwood Springs at this time. Schachter indicated it was the role of the community of Glenwood Springs to decide the definition of small town character, as described in the Comprehensive Plan and that it was not the role of a developer to make that determination. Schachter also stated the proposal did not adequately address opportunities for home ownership. Schachter also cited precedent for rejecting previous proposals for annexations in West Glenwood.

Commissioner Cipperly acknowledged the applicant's response to City, staff, and public comments. Cipperly stated that this development did not meet the following goals of the Comprehensive Plan including: maintaining small town character, directing growth inward, planning for civic spaces, and encouraging infill and redevelopment.

Commissioner Shaver stated general agreement with Commissioner Cipperly and Commissioner Schachter. Shaver stated that there were significant life safety issues in this area of the city that would need to be addressed before a project like this could be approved. Shaver also stated that the project did not fit small town character as described by the Comprehensive Plan.

Commissioner Dehm stated the project was well designed, and expressed support for some of the design aspects. Dehm also expressed concerns regarding the proposed density of the project and traffic.

Commissioner Dehm called the item to question, to recommend denial of Action Item 1.

Commissioner Cipperly mentioned issues with the roof and gable designs.

Commissioner Shaver agreed with Cipperly's opinion on the roof designs. Shaver encouraged Council to consider a reduction in development fees for a smaller project with more open space, including a reduction in units.

Commissioner Schachter suggested that Council consider completing a Comprehensive Plan update before any further annexations or large scale developments.

Commissioner Schachter made a motion to recommend denial of Action Item 2 – Initial Zoning/Rezoning of 3.533 acres to Commercial (CO) District and 12.285 to Planned Unit Development (PUD) District. Schachter stated based recommendation on findings that the proposed item has adverse impacts regarding traffic, evacuation plans, sightlines, expenses to the City, and other items that may be detrimental to rezoning at this time.

Commissioner Shaver seconded the motion.

Commissioner Schachter made suggestions, based on public input, that City Council consider the following items: installation of story poles, lowering maximum heights, reducing density, removing false gables, on-street parking should not be counted towards parking requirement, need for owner-occupied housing, more inclusionary housing than minimum required, need for evacuation study before future large scale developments, need for fire station in West Glenwood, need for Highway 6 entrance to the property, possibility of redeveloping this property and the mall simultaneously, and additional traffic studies.

Commissioner Cipperly suggested the Council consider encouraging the developer to dedicate parkland rather than pay parkland fees. Cipperly also suggested reducing surface parking by adding tuck in parking spots underneath buildings.

Commissioner Shaver cited concerns of approving this scale of development without adequate evacuation plans in place.

Commissioner Dehm called the item to question.

Motion to recommend denial of Action Items 1 & 2 passed unanimously.

- b. Planning File 12-21: Consideration of an Appeal of a Community Development Director Decision to not accept/process a Major Site/Architectural Plan Review application and a Minor Subdivision application due to the proposal exceeding the number of multi-family residential apartment units allowed by the Glenwood Meadows Annexation and Development Agreement and Zoning and Development Plan (GMADAZDP), as filed with the Garfield County Clerk & Recorder's office at reception #616083 and subsequent amendments thereto. The Appeal is filed pursuant to Municipal Code section 070.060.070(c). The subject property related to the Appeal is Lots 11 C-B (PIN: 2185-041-41-003) and 11 C-C (PIN: 2185-041-41-002) of the Glenwood Meadows Subdivision No. 6 and is zoned Residential High Density (RH) District (R/3 per the GMADAZDP) (Continued from May 10, 2021)

Community Development Director Jenn Ooton indicated that the applicant had withdrawn the application.

## **5. New Items**

- a. Planning File 09-21: Consideration of a Minor Site/Architectural Plan review of eleven multifamily units in a building that is currently vacant. The application includes consideration of an administratively reviewed Right-of-Way Encroachment License for building cornices that overhang the public right-of-way.

Assistant Community Director Gretchen Ricehill introduced the item and provided the Commission with a presentation on the application. Ricehill explained that the City Historic

Preservation Commission was required to review the application and that the Preservation Commission had issued a Consideration Landmark Alteration Certificate on March 1, 2021. Ricehill stated that staff recommended approval of the item with findings on page 8 and the suggested conditions on page 8 & 9 of the staff report.

Commissioner Cipperly asked why the replacement brick on the north elevation would match the adjacent building and not the existing building. Ricehill explained that this was a recommendation from the Historic Preservation Commission.

Commissioner Schachter requested what the allowed uses of the property would be. Ricehill explained that the property was zoned M2 Central Core.

Commissioner Shaver asked if the encroachment into public space would require Council review. Ricehill explained that some can be reviewed administratively, such as the cornices in this project. Ricehill indicated that previous encroachments had been handled similarly. Shaver also mentioned recent discussion on encouraging ground level retail.

Commissioner Dehm had questions on the rear façade of a neighboring building. Staff indicated that the neighboring building was not in the scope of work.

Applicants Seth Hmielowski and Randy Henrie, Architects with Z- Group provided the Commission with a brief description of the project, including details on the brick and other design details. Applicant Candace Whipple provided additional information on the application, expressing desire to develop the property, while preserving the historic character of the building. Applicant Henrie further explained the project and design.

Commissioner Shaver asked the applicant if there had been conversation with owner of neighboring Creamery building regarding a window. Shaver also asked if the parapet was sufficiently high to be a guardrail. Henrie explained that the parapet was high enough to be a guardrail. Shaver also asked if the encroachment would be required in the alley as well, which the applicant confirmed. Shaver also asked if an engineer had examined the historic cornices. Applicant Henrie explained that had not yet occurred and would likely occur prior to starting construction. Shaver also asked what the name of the building would be.

Commissioner Dehm asked if there were any applicable regulation to require ground floor residential. Ricehill confirmed there was no requirements. Dehm also asked for height restriction information. Ricehill stated that the maximum height by right was 40'. Dehm asked if this project could potentially meet the requirements for exceeding height restrictions for deed restricted housing. Ricehill explained staff could look at the potential for that, as a case study and not as a condition of approval.

Applicant Hmielowski indicated that they could be potentially interested in pursuing the option of adding height.

Commissioner Shaver pointed out that addition of another floor would likely incur further review by the Historic Preservation Commission.

Commissioner Schachter asked staff to confirm that this application was received before the inclusionary zoning ordinance was enacted and that the applicant had the option of participating in the deed restricted housing. Ricehill confirmed the application was received prior to the ordinance and was not subject to those requirements.

Commissioner Dehm opened the item to public comment.

No members of the public presented for comment.

Commissioner Dehm closed the item to public comment.

Commissioner Cipperly made a motion to continue the item to the June 22<sup>nd</sup>, 2021 regular meeting.

Commissioner Shaver seconded the motion.

Commissioner Dehm expressed the desire to see a retail space on the ground floor.

Commissioner Dehm called the item to question.

Motion passed unanimously.

- b. Planning File 16-21: Consideration of a Variance from Article 070.040.110(g)(4)a4 and 070.040.110(i)(3) to allow the installation of two signs in the RM-1 Residential Medium Density zoning district that exceed the maximum 10 square foot sign area allowed and to illuminate one of the two signs.

Assistant Community Development Director Gretchen Ricehill provided the Commission with a presentation on the application item. Ricehill indicated staff recommended approval with findings on pages 6 & 7 and conditions on page 7 of the staff report.

Commissioner Shaver asked if this was the same zoning district that had previous variances. Ricehill explained that the majority of previous sign variances had occurred in the RT Residential Transitional District and also further explained differences between RT and RM1 Zoning Districts. Commissioner Shaver asked regarding the existing unpermitted sign on the south side of property. Ricehill suggested that the applicant could include this sign in the variance application for the June meeting, if the meeting were re-noticed. Ricehill indicated the alternatives would be sign removal or requiring an entirely new application.

Commissioner Dehm asked staff for confirmation on the recent change of variance criteria. Ricehill explained that signs were not included as a design standard and were still required to meet all seven of the variance criteria.

Applicant Glenda Oliver, Principal at St. Stephen's, provided more information on the existing unpermitted sign. Oliver indicated they would be willing to remove that sign. Oliver stressed the need for having signs on both the east and west sides of the building.

Commissioner Dehm opened the item to public comment.

No members of the public presented for comment.

Commissioner Dehm closed the item to public comment.

Commissioner Schachter made a motion to continue the item to the June 22<sup>nd</sup> meeting.

Commissioner Cipperly seconded the motion.

Commissioner Wissing when St. Stephen's was looking to start class. Applicant Oliver stated June 22<sup>nd</sup>.

Applicant Rich Carter asked the timeline for approval following the potential approval. Ricehill indicated a short turn around time for a complete submitted sign permit.

Commissioner Dehm called the item to question to continue the item.

Motion passed unanimously.

c. Consideration of Planning & Zoning Commission By-laws: Consideration of Planning & Zoning Commission by-laws.

Community Development Director Jenn Ooton explained the item and need to update the Planning & Zoning Commission's existing by-laws to ensure that they accurately reflect current processes and procedures.

Staff requested that the Planning & Zoning Commission review the current by-laws and suggest updates or corrections as needed.

Commissioner Dehm requested staff to provide suggestions for potential changes. There was further discussion between Commission and staff regarding time limits, workshops, attendance, and other items.

**6. Commissioner Comments**

Commissioner Shaver and Cipperly thanked staff for reminder for the previous Special meeting.

**7. Director Comments**

Ricehill also provided the Commission on an update for the next month's regular meeting.

**8. Adjournment**

Meeting was adjourned at 10:00 PM.

## Planning and Zoning Commission Report

Date: July 29, 2021  
To: Planning and Zoning Commission  
From: Trent Hyatt, Senior Planner  
Subject: 09-20 Consideration of an Annexation and the initial zoning/Rezoning of 15.818 acres to Commercial (CO) District and Planned Unit Development (PUD) District at 214 Center Drive (PIN: 2185-061-00-042). Continued from the March 23, 2021 meeting.

|                              |                                                                                                                                                                                                                  |

### ACTION ITEMS

**Action 1 - Annexation** – of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs.

**Action 2 - Initial Zoning/Rezoning** – of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

### BACKGROUND

The Planning and Zoning Commission (Commission) first considered the proposal at the March 23, 2021 regular meeting where public comment was taken. Said meeting was continued to the next regular meeting on April 27, 2021, where the Commission received additional information from the applicant and comments from the public. All information/materials previously provided are attached for your review.

Additional issues and concerns regarding the proposal were raised by the Commission at the April 27, 2021 meeting. Consideration of the proposal was continued to allow staff and the applicant to address the items outlined below.

1. Provide proposed maximum heights of all buildings to the peaks of sloped roof and tops of parapets of all buildings.
2. Perspectives from points of view homes along Donegan Road with heights of proposed buildings with an overlay of Red Mountain depicting impacts of view.
3. Verification that Reynolds Cain ditch runs the full irrigation season confirming the lack of need for City water
4. City water availability meets all firefighting needs.

5. City fire services/equipment can be provided for the density and building heights proposed and/or where they are lacking.
6. Can and will serve letter from West Glenwood Sanitation District.
7. Completed wildfire assessment and evacuation plan (similar to plan completed South Bridge/Four Mile).
8. Formal agreement from emergency services related to evacuation routes and the developers financial contribution.
9. Confirm any flood, mud slides and/or debris flow path routes on the property.
10. Traffic analysis should include impact of proposed development at Ami Acres.
11. Pedestrian safety through crossing at roundabout at Mel Ray.
12. Line of sight at both exits along Donegan and Storm King.
13. Further consideration of park land dedication as opposed to fee in lieu.
14. Potential for future condominiumization of townhomes.
15. Financial feasibility of project compared to the density proposed and related infrastructure costs balance.
16. More information regarding partnership with Two Rivers Community School.
17. Grand Avenue bridge roundabout impacts.
18. Understanding of apartment units approved in the City to date since housing study.
19. Vehicle access through the mall site.
20. Housing Commission recommendations met.

Either staff or the applicant has addressed these matters via attached responses or updated drawings. Additional public comments received since the April 27 meeting are also attached for your consideration.

#### **PROJECT SUMMARY**

Please see the attached March 23, 2021 staff report and April 27, 2021 staff report memo for additional information.

#### **REVIEW CRITERIA AND STAFF ANALYSIS**

Please see the attached March 23, 2021 staff report and April 27, 2021 staff report memo for additional information.

#### **REVIEWING AGENCY COMMENTS**

Please see various attachments and/or the attached March 23, 2021 staff report and April 27, 2021 staff report memo for additional information.

#### **ACTION ITEMS & STAFF RECOMMENDATIONS**

Please see the attached March 23, 2021 staff report and April 27, 2021 staff report memo for additional information.

Suggested Findings:

Please see the attached March 23, 2021 staff report and April 27, 2021 staff report memo for additional information.

**REYNOLDS AND CAIN DITCH COMPANY**

**P.O. Drawer 790  
Glenwood Springs, CO 81602**

May 21, 2021

Address 480 Donegan Rd, Glenwood Springs, CO 81601  
Glenwood Partnership LLP

RE: Reynolds and Cain irrigation season

The Reynolds and Cain Ditch Company (Ditch) can serve irrigation water through the Ditch during the entire irrigation season. The Ditch has ample water rights on Mitchell Creek and reliability on the ditch to provide the water shares allocated to noted property for irrigation purposes only.

Mike Hoffman  
Reynolds and Cain Ditch Company, President

## Memorandum

To: Planning and Zoning Commission, City Council  
From: Glenwood Springs Housing Commission  
Hannah Klausman, Senior Planner, Commission Liaison  
Date: April 19, 2021  
Re: Planning Item 09-20, R2 Partnership LLC  
480 Donegan Development

On May 13, 2021 the Housing Commission met and further discussed Planning item 09-20. The Commission wanted to provide additional clarification on the previous recommendation.

**The housing commission supports the R2 Partnership project based on the need for more rental housing in Glenwood Springs.**

The Regional Housing Study completed in 2019 estimated Glenwood Springs housing shortfall at roughly 2,000 units in 2017, which was also predicted to remain relatively the same through the year 2027 even with assumed growth in the housing sector. The estimates showed significant need increases in the 60-100% AMI category, with a 1,000-unit shortfall predicted in 2027 in those income categories alone. For reference, 2021 Area Median Income statistics for a single person are as follows for Garfield County with additional salary information as collected by the Commission from area employers:

Garfield County, CO

|          |          |
|----------|----------|
| 60% AMI  | \$37,140 |
| 70% AMI  | \$43,330 |
| 80% AMI  | \$49,520 |
| 100% AMI | \$61,900 |

Correlating Professional Incomes

|                            |                                      |
|----------------------------|--------------------------------------|
| Certified Nurse Assistants | \$31,000-\$35,000                    |
| Teachers                   | Starting: \$41,000, Median: \$56,000 |
| Clinic Registered Nurse    | \$54,000-\$56,000                    |
| Police Officer             | \$53,000-\$75,000                    |

\*Not an exhaustive list. Information provided by Roaring Fork Schools, Valley View Hospital, and City of Glenwood Springs.

This is the basis for the commission's recommendation for additional units, or increased affordability within the project. The Commission's goal is to maximize the community benefit of housing options at different income levels. The housing commission's recommendation is intended to be an iterative process with the Developer to achieve the maximum community benefit while also maintaining a financially feasible project. The commission is open to reviewing a proposal from the Developer on how the project can best meet both needs.

Housing Commission's recommendation from April 19, 2021 is included below for reference.

---

Staff has recommended that the developer meet the minimum standards as outlined in Ordinance 1, Series of 2021, Inclusionary Housing, with 20% of total units designated for Resident Occupied, and 10% of total units designated affordable to 100% AMI rental prices as set by Colorado Housing and Finance Authority.

The Housing Commission is recommending the developer provide additional measures, as recommended in the Housing Strategy Plan, by providing one of the following:

1. Provide up to an additional 10% of deed restricted units limited to rental prices affordable to 100% AMI households.
  - a. If providing less than 10%, affordability shall be set to less than 100% AMI proportionate to percent of units being provided.
  - b. Units shall be equally distributed amongst unit types provided.
  - c. Additional units provided beyond Inclusionary housing requirements shall not be held to geographic employment requirements.
  - d. Unit locations may "float" within the development as long as the number of units is maintained.
2. Increase the affordability level of the 10% deed restricted units requested by staff to comply with the Inclusionary Housing Ordinance, to average 90% AMI.
  - a. units shall be equally distributed amongst unit types provided.

In addition, Planning and Zoning Commission and City Council should consider requiring a payment (annual or lump sum up front) to the City for the management of compliance and enforcement of deed restricted units.

# MEMORANDUM

DATE: May 19, 2021

TO: Barry Rosenberg, R2 Partners

FROM: Erin Talkington, Managing Director

SUBJECT: RCLCO Key Conclusions on Glenwood Springs, CO Housing Supply-Demand Balance

---

RCLCO completed a demand analysis in January 2020 for the apartment development proposed by R2 Partners at 480 Donegan Rd in Glenwood Springs, CO. Our work concluded that there was significant housing demand in the region and in Glenwood Springs in particular and that the market needs additional rental housing to be built to address the unmet demand identified in the Greater Roaring Fork Regional Housing Study.

As the site proceeds with the annexation and rezoning process, RCLCO revisited the supply and demand conditions in Glenwood Springs. Our key findings include:

1. The Greater Roaring Fork study concluded that in 2019 that Glenwood Springs needed 2,000 additional housing units to meet demand. Their analysis already accounted for 487 units that were near-term planned or under construction. Therefore, while some of these new housing projects have delivered over the past two years, the identified 2,000 unit shortfall remains to be addressed.
2. On average, 200 new households are projected to move to Glenwood Springs each year over the next five years. All of these households are expected to be age 45 or younger, which indicates that demand for smaller, attainably priced units such as apartments and townhomes will be needed to provide housing for the town's growth.
3. Excluding the subject site and the units counted in the Greater Roaring Fork study, there are 587 new units in the development pipeline, which is sufficient to supply only three years of future growth. The pipeline units are insufficient to address any of the 2,000 units of unmet demand.

## MEMO

**TO:** Planning and Zoning Commission

**FROM:** Chief Gary Tillotson

**CC:** City Engineer Terri Partch, P.E., Public Works Director Matt Langhorst, P.E., Senior Planner Trent Hyatt

**DATE:** May 25, 2021

**RE:** Planning File 09-20 Consideration of an Annexation and the initial zoning/Rezoning of 15.818 acres to Commercial (CO) District and Planned Unit Development (PUD) District at 214 Center Drive (PIN: 2185-061-00-042).

At the April 27, 2021 regular meeting, the Planning and Zoning Commission (Commission) voted to continue consideration of the above referenced application to the May 25, 2021 regular meeting. The Commission requested that staff and/or the applicant address certain issues or concerns, many of which were related to the Fire Department's ability to serve the proposal and anticipated impacts. Please find the Fire Department's response to applicable issues below.

### **Items Related to the Fire Department**

**4. Confirm City water availability meets all firefighting needs.** Per information provided by Public Works Director Matt Langhorst, the City of Glenwood Springs has 6,012,503-gallons of domestic/fire water holding capacity within its tank system. The North/West Glenwood Springs area that would supply water to the new development has 2,150,000-gallons of water storage capacity directly feeding the lines to the development. The City is also currently water modeling the entire city, including potential future demand areas, which will help the staff fully understand water movement through the system and help locate another 500,000-gallon water tank in the North/West Glenwood area which has been in the planning stages for several years now. On a high demand summer day, the City will use approximately 4,000,000-gallons of water within the system area and our water plant can process 8,650,000-gallons of water per day, thus the plant capacity to refill the tanks is sufficient to keep up with water usage and fire flow demands. At a usage rate of 4MGD per day the City plant is processing an average of 6.19 cubic feet per second (CFS) of water. The City has rights to 20 CFS of water from the No Name Creek and Grizzly Creek watersheds, along with the ability to pull 500-acre feet of water from our Ruedi storage capacity at any time if needed. Thus, the City has the capacity to store fire flow water, process water for fire protection capacity to refill tanks and we have enough water rights to keep up with current and foreseeable future demands. Once appropriate water mains and hydrants have been constructed as needed, the fire department will be able to provide adequate fire suppression to the proposed development.

**101 W. 8<sup>th</sup> Street      Glenwood Springs, Colorado 81601      970-384-6480      FAX 970-945-8506**  
**SERVICE THROUGH DEDICATION, PROFESSIONALISM AND EXCELLENCE**

**5. City fire services/equipment required for the density and building heights proposed and/or where they are lacking.**

The proposed development, with the increased number of tall buildings, drives the departments need for an additional aerial apparatus in the West Glenwood area. For the past several years, Glenwood Springs Fire Department has been trying to secure a location to replace the undersized West Glenwood Station No. 1, located at 0090 Mel Ray Road. Although the current station, is capable of housing the aerial apparatus it is incapable of housing additional personnel.

GSFD call volume has increased over 50% in the past ten years, while personnel have increased less than 15%. The ever-increasing call volume will inevitably require the need for increased personnel. However, the additional personnel may not be required to provide response initially to this proposed development as it builds out.

Based on the number of units and sizes proposed, we estimate a fire/emergency fee payment of \$377,002.50 for full buildout of the proposal per current regulations. Albeit, these fees, somewhat low, will help offset the cost of improved apparatus to serve the neighborhood. Additional property taxes generated from this development will help fund the construction of the new fire station.

**7. Completed wildfire assessment and evacuation plan (similar to the plan completed for South Bridge/Four Mile).** The cost benefit analysis prepared for the South Bridge project determined the increased egress and related lifesaving abilities that the improvements provide to the south end of the City and the adjacent areas of Three and Four Mile Creek Roads. The City is not able to prepare a similar evaluation for the traffic generation anticipated with the current development proposal as it does not propose a secondary evacuation route for comparison. Additionally, due to the interaction between the City's local road system and the State and Federal highways, any evacuation analysis done for the area would not show a different result with or without the development. Evacuation of the existing neighborhoods and the proposed development will be addressed in the process outlined in the paragraph below.

**8. Formal agreement from emergency services related to evacuation routes and the developer's financial contribution.** Recent fire related events have emphasized the need for the City to reevaluate traffic management plans for emergency evacuation situations. The City is currently investigating several options to improve our capabilities during these events including but not limited to: temporary and permanent access line breaks along Interstate 70 allowing increased egress capacity (i.e. along Highway 6 where grades allow), closing the Highway 6 roundabout near the Grand Avenue bridge to limit traffic entering west Glenwood, restricting movements at 8<sup>th</sup> or 27<sup>th</sup> Avenues, limiting traffic from being able to enter south end of the City, and/or developing vehicle storage areas. However, these decisions are not made in a vacuum and involve coordination and approval of local and regional emergency service providers and agencies such as City Fire/Police/Streets Departments, Garfield County Sheriff's Office, Colorado Department of Transportation, Colorado State Highway Patrol, Federal Highways Administration,

**101 W. 8<sup>th</sup> Street      Glenwood Springs, Colorado 81601      970-384-6480      FAX 970-945-8506**

**SERVICE THROUGH DEDICATION, PROFESSIONALISM AND EXCELLENCE**

etc. These conversations are ongoing and necessary for future evacuations regardless of the current development proposal. We are confident the forthcoming plans will be complete well in advance of any development of the subject property. However, the applicant's stated \$40,000 contribution towards planning/implementation of such plan, as per the recommended condition of approval, is beneficial to and will aid future evacuations.

Dear Trent,

We live on the west end of Donegan road and my business is in Glenwood. We are very concerned about the annexation proposal for "480 Donegan".

We do not have issues with the Diemoz family and their ability to try to sell the property. We take issue with the city's interest in annexing the parcel under the PUD proposed by the developer.

Our primary concern is lack of safety. There is no written or coordinated safety or evacuation plan for West Glenwood in an emergency. Last year when we were under a preavacuation order because of a fire in south canyon we could not leave our home. The roundabouts in west glenwood were at a total standstill. There was no traffic management by the city or the county or law enforcement to keep the roundabouts open to allow homeowners to get home and gather things and no ability to leave our homes once we had our things. I was lucky I was able to get home on my bike to my children and pets.

When I addressed this with the National Forest Service and the Fire Department at a zoom meeting organized by the city this summer on fire preparedness, they agreed that there was no plan and that I was told to take my family to the nearest irrigated pasture if I could not leave the area. This is appalling.

Why is the leadership unwilling to keep us safe? There is no acknowledgement that there is a traffic and evacuation crisis and no demand from the city to the Sherriff who is responsible for safe evacuation.

Because this is the current reality, I do not see how the city can knowingly approve a project that will hinder my safety and that of my neighbors.

I am not anti-development or anti-growth – we live in a place that will continue to see growth. However, the city has a responsibility to all people and their property to manage growth without sacrificing safety. Unfortunately, I do not think the city can approve any new housing project, especially one of this size, without a coordinated City and county safety and evacuation plan in place that is public and ensuring the funding to the agencies needed to enforce the plan. I want to know I am safe and can evacuate now before more people and complications are added to the mix. I want the city to show its commitment to safety by not relying on promises that remain undelivered over and over again.

The other safety issue is the parking for this project. First there is not nearly enough parking within the project itself. In an attempt to address this problem, the developer has stated that it counts on street parking to meet an already inadequate amount of parking in West Glenwood for current homeowners. This proposed on street parking for this development is to be on the south side of Donegan Road. This is the same side the exit from the development and the proposed bike lane. Children riding to school in the bike lane will not be visible to a car exiting the development as there will be parked cars on both side of the exit. There is no light planned for the exiting traffic, it is only a one way stop sign that would be set too far back to see anyone in the bike lane. This is not acceptable. There is not a 4

way stop nor is there a light. Too dangerous.

More importantly, having the only entry and exit point on Donegan Road is burdensome and dangerous to the community. The stretch of Donegan between Mel Ray and Storm King is the only way for kids to get to the two area schools. Adding traffic here will put pedestrians and cyclists at risk considering the significant traffic increase.

There is already a speeding problem on Donegan adding more people will only make this worse.

Mel Ray road is in terrible shape as noted by the commissioners. It cannot take the traffic such a project will generate.

If the city cannot guarantee that it can and will ensure it is in a position to continue to be able to address the safety of current owners in an emergency with each amount of residential growth, then it cannot move forward with this project.

Also, I just learned today that there is another residential project being considered in West Glenwood behind Discount Tire. How are all these people ever going to evacuate safely through the roundabouts without plans and leadership in place?

Thank you for your time and please add this to the packet for the meeting this week.

Warm regards,  
Jennifer M. Smith, Esq.

August 16, 2021

Dear Glenwood Springs City Council Members,

RE: Diemoz Property Annexation / R-2 Partners Development

I hope that the continuance of the R-2 Development decision has allowed all of you time to drive and familiarize yourselves with the neighborhoods impacted by this development.

The P&Z wholeheartedly rejected this application for annexation and precisely listed all of their reasons, foremost being safety (top being viable fire evacuation plans), and actual COSTS to the city. The promises of bike lanes, sidewalks (in their area), etc. SHOULD NOT give the developers ability to replace fees for space (in the project). The Roaring Fork Valley's need for *affordable*, not "what the market will bear" or "reasonably priced" housing is and has been a challenge for years. For me this is not a "Not in my backyard" scenario, but a true concern for our town. As we know, fire can make all of these points moot, and we now have the added burden of flash flooding in the canyon.

We have just recently heard the mall is "under contract" with R-2, so let's see what the developers do with that property first. The wording is very ambiguous when developers say they are creating a "town square village within the mall". Not sure what that means?

I do not envy the hard decisions you must make, but the can has been kicked down the road...now to you! Take a breath and update the Comprehensive Plan (from 2011), update the Fire Evacuation Plan (from 2007) and prioritize the citizens of Glenwood Springs, as this affects all of us who already live here, and get some real plans in place before annexing anything.

Sincerely,

Susie Straus  
Resident West Glenwood

Please place this in the packet

I am requesting that a community meeting be organized so the residents can ask questions of the developer, land owner, city staff, city council, fire chief, police chief, Matt Langhorst, West GWS sanitation etc.. {all parties involved} There are too many unknowns. We need to slow down, take a breath and make decisions for the betterment of our community. The comprehensive plan needs updated before this mess can be decided on.

Lisa Orosz

## West Glenwood

The blight here is Not with the pasture.. the great blight would be a city that would not care for its own workers , nor set a metric for sustainable growth . the blight is that there is no assessable , biologically diverse area to gather for shade. Room To walk their dogs, fly a kite, breathe . This does not mean 3 miles away . It means here. We see , taste , breathe and smell the smoke and dust of draught .There's an R-2 district school that has nothing but hot cement for kids to play on, no parking for that school on Center Dr . The only park near is Gregory Park . It is 1.17 acres Half the size of an average running track: A tot park at the development will not do to serve the public . It is the very least .

A short walk West of the Pasture along Donegan Rd are the narrow and steep grades of the Mitchell Creek drainage . This is where the rural road interfaces with the mountain west. An environmentally sensitive area. Future draught years will command a significant level of water infrastructure upgrades in order to meet the new regulatory water quality regulations that would meet new stream water quality stands by 2027. 6 years out..The 2020 census shows that CO population has doubled since 2000 and will exponentially double again in 10 To add thousands of car trips .. this we cannot comprehend .

Metro Developers like R2& cannot begin to "explain " what hard work , innovation or community means to the very people who have built it's values over their lifetimes.Utopian / Disney , outdoor fantastical paved over dreams has not been the character of Western CO. There is nothing to lose by taking a second measure and setting the metric planning for sustainable growth .

"Steve Beckley : I think that there is such a need in the future for western Colorado to take our water issues more seriously.

"I think there are so many things that are going to happen over the next 20 years with water and usage, that it's very important to weed through the issues"

City council , we who live here are wary of being pushed off the diving board into a future in which officials have not yet updated infrastructure. And are a long way out . The water dept had a close call by the when infrastructure upgrade was barely in place before the last devastating mudslide event than shut the Canyon down. And Mike Hendricks says the newly installed equipment " performed beautifully ". We doubt this city is "beautifully prepared". If you were , there would be an updated Comp Plan for our community .

This PUD would represent approx 10 % of Glenwood's entire current population ..Another small "city" within 12,000 acres . It is no exaggeration to says tens thousands lives right now stand to have their lives and sensitive lands, reconfigured forever.

I love my neighbors . I respect their stories, their investments , diversity , and KNOW, how much they ALL have benefitted Glenwood and love and respect their own modest neighborhood and what a simple pasture symbolizes , that less is far more. These are ASSETS. Character , values , esthetics providing "shade from the blazing sun" a barrier from the storms .. what is benefiting the city for the greater and not just for the few ? I would hope you balance the scales in the favor true assets. The in tangible that dollars alone can not weigh.

Related to city finance for example , city just completed a salary comparison study. At least with fire and they are below compensation plans. Perhaps a reason that there be city employee affordable housing ? ... when the city itself a called for TRULY affordable .

The city did layoff/reduce services during the early days of the pandemic. And now with canyon closures during peak tourist time ongoing closure cycles will have a big impact on city revenues.

this development will cost the city in mitigation alone far more than R2 proposes to compensate for.

The Storm K investigation put the responsibility to fully upon the community to be alert and with a plan of action . Leaders, residents , responders, all to pay attention and prepared to the Current Conditions .

This is not a time to indulge in metropolitan dreams.

Even in urbanized areas there are abandoned Mall and shopping complexes . Working people at every level have rerouted every aspect of their lives, have made extraordinary adaptations to current conditions in a very challenging 3 short years. Some have fought every battle and yet give back to the community in valiant ways. Some have barely survived . . This proposal is doesn't belong in this time , in this place . My neighbors have compiled the facts about R2diligently for over a year. Severe draught complications challenge every Western state. City officials have the stats and they are if serious concern . It is plain as the living day that updated plans and strategy to current and strategy is KEY. We are acutely aware how the Canyons have and should change lives and priorities .

S Related to city finance for example , city just completed a salary comparison study. At least with fire and police they are below comp plans Perhaps a reason that there be city employee

affordable housing ? when the city itself a called for truly affordable .

The city did layoff/reduce services during the early days of the pandemic. And now with canyon closures during peak tourist time ongoing closure cycles will have a big impact on city revenues. \*All the more reason to update city needs now .

Residents are rightfully skeptical about many details in R2s plans. Considerations for open space in West G which has almost none . mployee affordable housing ? when the city itself a called for truly affordable .

The city did layoff/reduce services during the early days of the pandemic. And now with canyon closures during peak tourist time ongoing closure cycles will have a big impact on city revenues. \*All the more reason to update city needs now .

Residents are rightfully skeptical about many details in R2s plans.

West G needs significant open space. the simple Pasture is representative of what is lost. when it exists no more a space for native grass and and those forgotten creatures that dwell there too? Remember the fallen migrating finches of last summer ? They we heat scorched and buffeted too. There comes a time when decisions all come due . Time has already run out for West G to update to code . Esthetics , space and sense of place must remain or our city will have devised a massive Urban blight.

When smoke from epic draught assaults all senses, one tiny park provides only a few brave shade trees whose draught wilted leaves even so, help filter smoke that obscures the Storm King view. Children, pets as well as adults both deserve ample room to enjoy the outdoors . Not burning hot concrete .

Based on the density of this Project , city code would determine what the size of this obligation :

[Aprox 6 acres parkland / + 4 acres school land = total 10 acres of dedication out of the existing parcel. ]

I •Mike Samson made comment a recent meeting with residents last month. No dissension came from his other two board members.. he suggested possibilities: that “ a coalition of groups, organizations, governments could come together and work with the Diemoz family to make that a more beneficial area to the people that already live there...he would be in favor as a County Commissioner to be part of that.

Traffic , roads , water treatment infrastructure , fire and emergency responders are daily being called on to do the superhuman in the face of change. Can Glenwood even consider what would happen when costs to mitigate developments could many times exceed ability to pay for ? Costs of mitigating poor planning would cost taxpayer much than avoiding making matters worse .

\*\*\*

In a schoolyard nearby ,there is a small plot of ground with a few straggly volunteer trees . Children built a natural area , a simple plot .

They keep it tidy , birds attend to a few fallen seeds. There is a comfortable rock under a shade tree . Painted with letters on the seat that say “ sit here” . We ask for you to “sit there “ with them. Rather than deny what has been happening preserve finite resources for their uncertain futures .

\*\*\*\*\*

Rebuttal to

Stuart Cerise (formerly of garco sheriff dept;

Bobbie Meriwether a year long investigation... comprehensive plan... leaders need to reflect... did you mention that several members of the investigation team refused to sign the final copy simply because the investigation failed to discipline those who failed their charges, the 14 lost,

the citizens, the nation and more.

Although some of the recommendations were spot on... it also failed to note that those policies were in effect long before that tragic day.

Such things as mudslides and debris flow are ALWAYS threats which follow larger fires. The threat didn't suddenly appear after that July day because the team suddenly discovered it. It appears after every fire.

Even noting that a debris flow may occur, we cannot prevent it. Even without a burn scar they may occur.

My next obvious question is: at what expense do we go to provide safety from every threat? Fire, flood, snow & ice, earthquake, rains, natural erosion... man can do simple things like avoid low, swampy areas... but he cannot fool proof an interstate highway nor prevent "acts of nature".

Build a tunnel through the rock say some. Great! Lots of \$\$\$\$\$\$ spent, years & years to complete... and 1 bad accident and its shut down... maybe for months. Oh... and where do our fuel truck go? They cannot use the 15 mile long tunnel due to the material they carry... so add the expense of 12 hours of additional transportation per load (and additional trucks, drivers and overhead costs).

But you don't see any of that...you only see that there is a comprehensive plan. Still doesn't change the inconvenience.

John Denver.... yep he said you couldn't build a highway in a narrow canyon. An exceptional feat of engineering made a great highway. John... didn't care about transportation of people, goods by the best option.... hell, he flew in and out of Aspen! John was an amazing man, great entertainer ... but no engineer!

.....

Bobbie& current realities .

•Every reasonable effort made towards safety is what report concluded with . It did not imply any challenge was too great. There was no room either to abandon or not plan for the greater community. Meeting a challenge means thoughtful preparation.

There are those. like CO's famous climber Tommy Calder .. who free climbs, with ropes for anchoring ( not assisting his climb). His partner and friend was and still is Alex Honnold .

Free solo . Either way these two exceptional men were prepared with hours of practice , dedication and skill and a plan for the challenge . They are of equal talents & work ethic. Both courageous by any measure . Calder' ethics respect the fact he has family and others to think about .Honnold goes free solo and depends completely on his skill. They remain friends that respect each other lest they ever lose confidence in each other Which .. I think removes that their collaboration is a contest of who's the more brave or skilled. There are always risks to meeting a challenge. One risk is not to overestimate your abilities Storm King Final report was addressed to both leaders and responders . It advised that no one abandon the challenge, ahead . Rather than descend into perpetual blame the report stressed continual assessments of current realities. It outlined procedures that would strengthen , not weaken trust and communication.. either between those who respond to duty and those who lead . There is not one resident in our city that has not been touch with challenge .The best is to respect everyone and every situation .

The website addresses both leadership and responders :

Both .

Arguments only lead to decent when disparaging anyone.

They deflect completely from others' good intentions and humanity . At what time do we call

for a pause for the best assessments before making the same costly mistakes ., compounded ..  
by placing thousands of more people and responders in harm's way.

August 16, 2021

Dear Glenwood Springs City Council Members,

RE: Diemoz Property Annexation / R-2 Partners Development

I am writing as a follow-up to my remarks from the July 29, 2021 meeting. I feel my comments were based on emotion and my thoughts may not have been as clear as I hoped.

Putting emotion aside, a few concerns remain. The R2 developers have contracted to purchase the mall property which I assume is based on approval to annex the Diemoz property. While I am skeptical of the timing of the purchase, I believe it would be beneficial if a plan for the development is provided prior to annexation. The plan needs to include some type of long term guarantee it would not be altered in the future. The developers cannot be permitted to add additional housing on the mall property.

The developers have offered to donate land for a new station in West Glenwood and to help monetarily with equipment upgrades. This is well and good but doesn't address the major issue of traffic and evacuation in case of wildfire. A new fire station and access road through the mall will not solve the congestion caused by the addition of hundreds of vehicles. The developers have reduced the number of potential residents in the development. Due to housing costs in the area, I foresee additional residents in units the developers are not considering in their proposal. If they are going to monitor this, I would be curious how they plan to do this.

The additional traffic on Donegan Rd and Hwy 6 is also an issue. The traffic plan includes a rt turn lane at the intersection of Donegan Rd. and Hwy 6. My personal experience shows a minimal number of rt turns at this intersection. Additional traffic increase on both roads will make left turns even more difficult.

There are substantial questions regarding costs to the city, infrastructure, and an increase in services that were outlined in the P&Z denial. Approval will involve coordination of City, County, and State resources. Getting 3 public entities to work together can be a difficult proposition.

The need for additional housing is not just a Glenwood issue but needs to be shared by the entire area. Nobody is denying the right of the Diemoz family to sell their property. The problem is the development as proposed is just too big for the neighborhood. What is the proper size, I don't know? I do know this isn't it.

I ask the council to look past the developer's sales pitch and deny the annexation and development as proposed. Thank you for your consideration.

Sincerely,

Mark Straus

All,

Wanted to share a few thoughts/questions related to your upcoming city council meeting items.

With the annexation request, staff and maybe some of you are leaning towards approving the annexation because perhaps the inclination is that the City would have some “control” over what happens to the annexed vacant parcel. If such is the desire, I believe it can begin a very problematic process for the City and citizens. The 214 Center Drive request MAY be in and of itself not a big issue, but larger issues loom:

-There are 50+ acres west of Ami’s Acres that may eventually request annexation to gain city services, plus other “under-developed” properties such as Mobile Home Parks.

-GarCo has stated the City should annex ALL of WGWS...currently it seems except for sanitary sewer, unincorporated WGWS IS served by City water and electric (an odd aberration)...the possibility exists where the City could be taking on so much more.

-At R2’s presentation the BOCC recommended at minimum the City should annex the remainder of Storm King Road, the portion of Donegan Road adjacent to this vacant parcel AND Mel Rey Road to the east of this parcel. As this is not a current part of the items under your consideration, it MAY be something that will come up in the future. Some “problems” I see are: 1) if this is done, that would leave a one block stretch between Mel Rey and Soccer Field Road that would NOT be part of the city

and could be problematic, 2) related to the current GarCo proposal to annex roads adjacent to the petitioned parcel is that it would create an “enclave” of around ten parcels along the west side of Mel Rey. AND if the one block section of Donegan is also annexed, then another ten or so enclaved to the east of Mel Rey. I do not know if there is a mechanism that allows property owners to either be “forced” into annexation possibly without their consent OR to allow an entity to enclave them with an annexation? May be worthy of consideration IF agreement is made to follow county recommendation?

-If you choose to annex, I encourage you to put conditions on annexation, many which have already been mentioned. The one that I feel would be VERY important is to require actual parkland dedication. There is a definite shortage of city-owned active parkland in this area of town. The closest outdoor basketball courts are at Veltus Park, close to three miles away as is Two Rivers Park! The offer of a “tot lot” as their parkland dedication to me is an insult when the needs/shortage is so great. As Two Rivers Community School is not part of RE-1, they may not benefit from either land or fees paid, but their use of city-owned Gregory Park highlights the need of parkland. Also I’ve heard reports that residents of Machbeuf Apartments regularly use the Middle School field for their active parkland use.

-The last staff calculations based on the 360 unit R2 iteration for parkland and school land dedication “fees-in-lieu-of” were \$1.48 million and \$884,000 respectively. My land calculations using the muni code and the proposed residential mix yielded 5.978 acres for parkland and 5.16 acres for school land. Unrealistic for this proposal, but highlights the density proposed AND the need to update the code to both give some flexibility to perhaps include some employee/staff housing or land to build as an option besides actual dedications or fees-in-lieu-of. AND to review the value of an acre of land per type...staff used “value of land per acre in 2017 for parkland as \$235,706.13 and for school land \$110,000 per acre. I did not see any comments from your Parks and Recreation Commission related to this proposal.

There IS a discrepancy and MUST be rectified prior to your acceptance of ANY fees-in-lieu of. The proposal for the parcel behind Discount Tires for 40 units on 1.3 acres exemplifies the “value” of an acre.

Regarding the PUD zoning/Rezoning item, I think it should be denied at this point in time.

With the WGWS Mall being under contract to the same development group, a Master Plan inclusive of both parcels should be done. There are many advantages to do this including:

-Requiring direct access to Highway 6&24 to include most of the residential proposal. The 40 townhomes proposed could use existing roads without major offsite improvements to Mel Rey Road AND the intersection of Donegan and 6&24. This could benefit the developer’s costs and the neighborhood, BUT disadvantage the CITY IF the City agrees to annex that portion of Mel Rey and if intersection improvements are eventually needed at Donegan and 6&24.

-As proposed, the “gift” of dedicating at least one acre for the construction of a new WGWS fire station comes to fruition either as part of these current action items OR as part of the redevelopment actions associated with the mall, then for efficiency sakes having direct access to the highway for emergency services would be critically important.

-I see nothing in the packet items formalizing the “agreement” for R2 to provide 20% towards the construction of a new fire station. Is that formalized and a valid offer since it may have only been verbalized and reported in the GSPI?

Finally related to the PUD zoning, I found nothing in the muni code requiring staff to formulate their recommendations based on the underlying zoning of a parcel. Thus believing that council is in the driver’s seat, I’d ask you to pause the PUD request and look at it in the context of other properties along 6&24 in the WGWS area. EXCEPT for the West Glenwood Mall as a PUD, the other commercial and residential properties along 6&24 between the highway and Donegan are zoned M1 Mixed Use Corridor. The could seem to justify the SAME M1 zoning rather than a PUD zoning be used for this parcel UNLESS it is done in conjunction with the mall property already zoned as a PUD.

070.020.090 - Mixed-Use Corridor (M1) District.

(a)

Purpose. The M1 district is intended to accommodate mixed-use development with walkable and active streetscapes on Glenwood's primary roadways. The mix of uses in the M1 district is intended to accommodate lighter-intensity commercial districts with limited auto-oriented uses compatible with surrounding residential neighborhoods. The M1 district is also intended to offer a diverse mix of housing opportunities at varying densities.

OR it may be preferable for you to zone this vacant parcel as “Residential Transitional R/T zoning” as the Bell-Rippy Triumph property is being developed under that zone district. AND they have agreed to dedicate public parkland unlike R2 with their 480 Donegan proposal.

070.020.080 - Residential Transitional (RT) District.

(a)

Purpose. The RT district is intended to provide for transitional areas consisting of primarily residential uses at varied densities, with limited commercial uses that are compatible with surrounding neighborhoods. The RT district is intended to serve as a transitional buffer between residential and nonresidential zoning districts.

Finally(!) an observation I made in their “Revised PUD Site Plan” is there MAY NOT be enough “snow storage” space for a typical snow year. i encourage you to take a close look at this plan and decide if trying to squeeze in so many units AND accommodate all required parking on-site is practical.

The final 2019 US Census numbers for the City of GWS show 9930 +/-30 residents in 4459 housing units with a median household income of \$66,693. This specific R2 proposal plus assorted others including the 300 or so in Glenwood Meadows would increase the population and housing units by ten percent and more on very limited parcels compared to the overall land area comprising the existing corporate limits. Your staff recommends approval of the two agenda items based on:

2. The annexation is consistent with the Comprehensive Plan; and
3. The annexation minimizes potential adverse impacts to the City and does not negatively impact the City's public health, safety, and welfare.

This 480 Donegan PUD would add 332 more units with (so they say) 600 residents. Muni Code calculations came to 854...what might the true numbers be? There will be with this proposal and already are with all the other residential projects under construction and planned within the city limits. What will this PUD add to your city beside MORE residents, MORE impacts, possibly some increase in sales tax revenues and utility revenues? Is it really worth it to annex when Glenwood Partnership is not precluded from developing something useful and less impactful? Such as mini-storage for all the other dense residential projects in the city or RV storage parking as I see many trailers, etc. on city streets that do NOT move per the 72 hour parking restriction?

I would urge you to really consider whether this AND other current proposals meet these findings. It seems worthy to pause this and any other large development proposals UNTIL the Comprehensive Plan from 2011 is updated, Emergency Services facilities, staffing, plans and improvements are in place and discussions are done with GarCo related to the future of WGWS.

Thank you,

Greg Jeung

To the members of the City Council :

My name is Ray Ciborowski I live at 471 MT Shadows Dr in West Glenwood.. Because of my immediate proximity to the backside if the mall and the pasture land I cannot believe that this has gone this far .I would like to know how (and this is for you Charlie) you can limit the amount of people living in a home you own.And with rentals we all know how that goes mainly because of the ridiculous rents that are supposedly affordable.

R2 could care less about Glenwood Springs and it's residents. Paying a fine instead of park and school land should not be an option.

Why can't Garfield County buy the land and ask the state of Colorado to use lottery money and make a park with soccer fields ,running track and so forth? This was done in Grand Jct right of I-70 at Canyonland park.

Please hear my plea and send these people back to there fantasy land.There's no room in Glenwood for dirt pimps that could care less about safety and sanctity of our great town.

Thank you for your time

Best regards

Ray Ciborowski

**Subject:** STOP AND THINK...  
**Importance:** High

Dear City Council,

Thank you for taking time to read this email and for encouraging our participation in the potential annexation of the "West Glenwood Pasture" and proposed PUD by R2. A couple words sum this up: STOP AND THINK!

Annex the land if you must; however, *evaluate* the over development of West Glenwood! Not only are you considering this high density housing project but you have *others in consideration* - Mountain View Flats and The Meadows. Do you see that you are cramming all this high density housing in ONE PART OF TOWN – West Glenwood.

**THINK** about the ability, in an emergency, of West Glenwood residents to evacuate. The Meadows feeds into the West Glenwood roundabout – too many cars in one spot.

**THINK** about fire mitigation. Will you REALLY build a new station or is your talk just *lip service* to the West Glenwood community?

**THINK** ABOUT THE **CUMMULATIVE IMPACT** OF ALL OF THESE ADDITIONAL DEVELOPMENTS ON THE ABILITY TO EVACUATE, OUR WATER SUPPLY, THE SCHOOL, FIRST RESPONDERS ETC.

In summary, it is as if R2 is the only one to ask you to the dance and now you think you have to marry them. Kiss more frogs and learn about ***other developmental opportunities*** before you marry R2. You cannot divorce them. Finally, consider the *strong opposition* to this project, the vote by your own P&Z committee and our safety.

Sincerely,

Katie Fischer Mosquera

Mr. Hyatt,

I have lived in West Glenwood for several years, and I don't believe, when issues have arisen in our town, a more unanimous feeling against a proposal, whether it be new taxes or a development of this nature have I ever seen.

I have talked to several people in and around Glenwood, and in other towns who are fervently against this development. The amount of traffic and congestion in this part of town (and others) is beyond what we can handle at the present.

I drove to Rifle on Tuesday evening around 6 o'clock, and the traffic was so backed up in the two West Glenwood roundabouts, that cars were stalled as far as the eye could see east toward town, and on Midland Avenue.

Many people who don't live anywhere near Glenwood are hoping you do the right thing for the present and deny this development. Myself and several others have entertained the possibility of selling our homes in the area of this development because it will literally be a nightmare for all.

The right thing for council to do is to stop this proposal and revisit something much smaller and community friendly in future years.

Thank you,  
Mike Vidakovich

PS Is it wise to associate with those that call West Glenwood “a blight” or “the little barrio”?

# Join us at City Council this Thursday 8/19 at 6:00 p.m. to oppose the annexation of 480 Donegan

*With close to 1,700 petition signatures WE must ask ourselves, is THIS for the "GREATER BENEFIT" to the City of Glenwood Springs?*

Currently within the city limits there are 500 rental units in the pipeline to be built. Are MORE needed? Should the City of GWS alone bear the many impacts of housing so many in our region?

*Now is the time to seek more creative solutions such as staff/employee housing for schools, government, non-profits, affordable tiny homes, Habitat for Humanity homes or senior housing options.*

- The City is already challenged with taking care of what is in the city limits, should MORE be annexed? Garfield County staff recommends the city annexing "ALL of West Glenwood!"
- How it is possible that R2 "will limit occupancy to ONLY 600 residents" given that their 332 units are comprised of studios, one, two and three-bedroom units, as well as townhomes?
- There MUST be an Evacuation Plan in place and improvements in fire mitigation before ANY further residential development in West Glenwood.
- With R2 Partners under contract to purchase the West Glenwood Mall, there SHOULD be a Master Plan for both adjoining parcels with direct access to Highway 6 & 24, NOT PRIMARILY through the neighborhood!
- The Comprehensive Plan is from 2011 and MUST be updated. Conditions HAVE changed and making decisions based on a decade-old plan is senseless. Citizens need to be involved!
- There is a shortage of public parkland in this area. Developers are required to dedicate both park and school land but R2 wishes to pay "fees in lieu" of actual land, offset by resident-use ONLY facilities, a public tot lot, and bike lanes/sidewalks. LAND IS PERMANENT!

*Paid for by the West Glenwood Pasture Development group.*

Will "greater benefits" be gained with this out-of-state development proposal AND rental revenues not staying locally? Can BETTER be achieved for Glenwood Springs?

Garfield County Commissioner Mike Samson at a recent meeting review of these proposals supports a "coalition of groups, organizations, governments that could come together and work with the Diemoz family to make that a more beneficial area for the people that already live there...I would even be in favor as a County Commissioner to be part of that... I think that would be a better solution for all of Garfield County." We agree, Commissioner Samson!

Please share your thoughts related to these items by attending the City Council meeting Thursday August 19th in-person, or remotely by Zoom. Email the City Clerk your concerns to forward to city council members at: [ryan.muse@cogs.us](mailto:ryan.muse@cogs.us)

RE: 480 Donegan – Response to 04/27 P&Z requested items.  
 SE Job No. 30017

Trent,

This letter responds to the items requested from the April 27, 2021 Planning & Zoning commission meeting considering the 480 Donegan application. The requested items pertaining are listed below and the response follows the comments in **Bold Font**.

1. Provide proposed maximum heights of all buildings to the peaks of sloped roof and tops of parapets of all buildings
  - **Refer to the Updated exhibits prepared by Hord Coplan Macht (HCM) transmitted separately**
2. Perspectives from points of view homes along Donegan Road with heights of proposed buildings with an overlay of Red Mountain depicting impacts of view.
  - **Refer to the Updated exhibits prepared by HCM transmitted separately**
  - **For reference screen shots of the Google Street view of the existing two story townhomes on Donegan west of Storm King are attached.**
6. Can and will serve letter from West Glenwood Sanitation District
  - **The will serve letter is attached.**
9. Confirm any flood, mud slides and/or debris flow path routes on the property.
  - **The site is on FEMA Firm panel 0800711043C. The entire panel was not printed as the area is in Flood Zone C, which is areas of minimal flooding, above the 500 year level. Drainage will be safely routed around structures and will be detained to the existing rate.**
  - **Mud Slides and Debris Flows have been previously studied for the City of Glenwood Springs in a March 2003 Stormwater Assessment & Education Report prepared by Matrix Design Group. The report includes a summary of recorded debris flow events from 1903 to 2003. None of the described events occurred in this area of West Glenwood. The report states in section 10.6 “The hazard is most severe on the upper parts of the debris fans, but extends to lesser degrees to the lower fans”. Given this report findings, the site is a low risk for mud slides or debris flow. Offsite storm water will be safely routed through the site, as will mud slides or debris flows if those occur.**
10. Traffic analysis should include impact of proposed development at Ami Acres.  
 (City staff clarified this request in a 05/18 meeting with 480 Donegan. Request the traffic analysis consider the proposed development west of Ami Acres.)
  - **The traffic analysis does include the impact of the existing Ami Acres. The existing counts include the development already in place and future traffic volume growth and projections take into account any additional traffic volume to be created by that project.**
  - **We are part of the development team on the parcel west of Ami Acres. A formal application has not been submitted to Garfield County, and the actual number of units has not been determined. It is not appropriate to guess what the offsite development will be and include that in the 480 Donegan traffic Study.**

11. Pedestrian safety through crossing at roundabout at Mel Ray.

- **The existing crosswalks are color concrete. White longitudinal lines should be added next to the colored concrete in order to comply with MUTCD standards. The applicant will coordinate with City Staff and CDOT to add the striping.**

12. Line of sight at both exits along Donegan and Storm King.

- **Preliminary line of sight analysis was completed during site design. Good sight triangles will be maintained at the existing Center Drive / Storm King intersection, and good sight triangles are proposed at the site intersection with Donegan. The roads are straight and the speed limit is 25 mph. An Intersection sight distance exhibit is attached. Further coordination with site and landscaping will occur as the design progresses.**

17. Related traffic impacts to Grand Avenue bridge/Highway 6 roundabout.

- **We obtained the scope (intersections to evaluate) from the City of Glenwood Springs staff when we began the project. It would not be typical or appropriate for a project of this size to evaluate that intersection being so far east of this proposed development.**
- **Per the 480 Donegan Traffic Analysis, there are 63 vph peak going east on Highway 6 east of Donegan Road. We do not have the existing traffic volumes (no recent actual counts that we are aware of for the Grand Avenue bridge/Highway 6 roundabout). But we do know that this roundabout has substantially more traffic trips than the Mel Ray / Highway 6 roundabout that we have traffic counts for. If all site traffic on Highway 6 goes through the roundabout, our rate of increase is assumed less than 2% at build out. We also know that some of those 63 trips will be to destinations before the roundabout including Deveraux Road and Linden Street. The 2% increase for sure would be considered incremental traffic volume growth at the Grand Avenue bridge/Highway 6 roundabout considering the years to get to full build out.**

If you have any questions or need any additional information, please call.

Sincerely,  
SOPRIS ENGINEERING, LLC

*Re: 840 Donegan Rd.  
Can and Will Serve*

Dear Jon and Yancy:

The District has the capacity in its wastewater treatment plant and can and will serve the above property with 360+ additional EQRs for 360 apartment units, a pool and a restaurant with a seating capacity of 100 with wastewater treatment service so long it is within the District subject to the following conditions:

1. The payment of all applicable tap fees (currently \$6,000/EQR); and
2. Pursuant to the District's Rules and Regulations, an applicant for sewer service shall reimburse the District for all costs incurred by the District regarding the project, including, but not limited to legal and engineering review.

If you have any questions, please don't hesitate to contact me. Office hours are limited so email is the best way to contact me. Or please contact the Plant Superintendent, Josh Hamel, at 970.945.6069 or 970.274.7805.

Regards,

*Kelly Mullane*

**MINUTES**  
**City of Glenwood Springs**  
**Planning and Zoning Commission**  
**Regular Meeting**  
**April 27, 2021**  
**Zoom**  
**6:00PM**

**1. Roll Call**

Present at roll call were Commissioners: Marco Dehm, Amber Wissing, Joy White, Pete Waller, Carolyn Cipperly

Absent at roll call were Commissioners: Sumner Schachter, George Shaver, Ben West

Also present were: Asst. City Manager Jenn Ooton, Asst. Community/Economic Dev. Director Gretchen Ricehill, Senior Planner Trent Hyatt, City Attorney Karl Hanlon, Assistant City Engineer Jessica Bowser, City Engineer Terri Partch, Public Works Director Matt Langhorst, Fire Chief Gary Tillotson,

**2. Seating of Alternate Commissioner**

Commissioner Cipperly made a motion to seat Alternate Commissioner Waller. Commissioner Wissing seconded the motion. Commissioner Dehm called the item to question.

Motion passed unanimously.

**3. Receipt of the Minutes**

Commissioner Waller made a motion to accept the minutes from the March 23, 2021 meeting. Commissioner Wissing seconded the motion. Commissioner Dehm called the item to question.

Motion passed unanimously.

**4. Public Comments**

Comments from citizens appearing for items not on the agenda. No citizens presented.

## 5. Continued Items

- a. Planning File 64-20: Consideration of a Minor Site Architectural Plan to add five new dwelling units at 405 Laurel Street, a property with five existing units. (PIN #2185-091-00-008) Continued from March 23 & April 6, 2021 meeting.

Assistant Community Director Gretchen Ricehill provided Commission with a short presentation on the item, continued from the March 23, 2021 meeting. Due to an error in creating the Zoom link, this item was not discussed at a scheduled meeting on April 6<sup>th</sup> and continued to April 27<sup>th</sup>.

Commissioner Waller had questions on the number of parking spaces provided. Waller also asked about the parking limits per lease for one-bedroom units. Applicant Romeo Baylosis provided more information on how the traffic generations counts were calculated.

Commissioner Cipperly had questions about the proposed sidewalk layout on the property. Applicant Romeo Baylosis provided more information on the design and layout of parking on the site.

Commissioner Dehm also had questions about the layout of parking on site, stating preference for adding another onsite parking space on the west side of the parking area. Applicant Romeo Baylosis explained that adding the extra space on the west could be possible.

Applicant Leah Mayer stated that the required change in design due to Code requirements for building transition would be difficult to achieve and that the likely result would be the loss of onsite parking.

Commissioner Waller asked about the status of the new designs and elevations. Applicant Leah Mayer stated that they had submitted new designs to the Community Development Department.

Ricehill provided more information on Code requirements for building transitions.

Commissioner White had questions about the differences in zoning and parking requirements. Staff explained the parking requirements for this property as compared to downtown.

Commissioner Dehm asked staff if additional public comment had been received. Staff confirmed that no additional comments had been received.

Commissioner Cipperly made a motion to continue the item to the next scheduled meeting citing concerns over revised designs and its effects on provided parking.

Commissioner Waller seconded the motion.

Commissioner Cipperly had questions on roof design and plate height.

Commissioner Waller had questions on the building transition requirements.

Commissioner Dehm expressed reluctance to further continue the item.

Commissioner Wissing expressed support to approve the item, acknowledging staff and applicant would continue to work on the design.

Commissioner White also expressed support to approve.

Commissioner Cipperly withdrew the motion to continue. Commissioner Waller withdrew the second.

Commissioner White made a motion to approve the item citing findings and conditions on page 9 and 10 of the staff report.

Commissioner Wissing seconded the motion.

Commissioner Waller proposed another parking space be added as a condition. Staff confirmed that this could be included in amended conditions.

Commissioner White amended the original motion to combine conditions C & D and amend them to add a parking spot to the existing 5 spaces. Commissioner Wissing amended the second.

Commissioner Dehm called the item to question.

Motion passed unanimously.

- b. Planning File 09-20: Consideration of an annexation and the initial/rezoning OF 15.818 acres to Commercial (CO) District and Planned Unit Development (PUD) District at 214 Center Drive (PIN 2185-061-00-042) Continued from March 23, 2021 meeting.

Commissioner West joined the meeting.

Senior Planner Trent Hyatt introduced the application, continued from the March 23<sup>rd</sup>, 2021 meeting. Hyatt indicated that the applicant had provided more information addressing feedback received at the March 23<sup>rd</sup> meeting. Hyatt also indicated additional public comment had been received.

Commissioner White requested staff to provide explanation about cost and benefits to annexation. Hyatt explained the process of annexation and how any future development on the site would have to go through the major site plan review process. Hyatt also explained potential development scenarios if the property remained in Garfield County.

Commissioner Waller had questions how the project related to the Comp Plan, particularly small town character. Waller also asked when and how the PUD regulations would be implemented.

Hyatt explained that the annexation would create a PUD as part of it becoming part of the City. Waller also expressed concern over timing of the traffic study. City Engineer Terri Partch explained that staff had confidence in the traffic counts, and stated applicant had taken traffic counts at multiple locations, including capturing school traffic. Commissioner Waller also asked about comments from Fire and Police Departments. Hyatt stated that no specific comments from Fire and Police were in the packet.

Commissioner White asked if there was a stipulation that proposed amenities in the design would be a part of the PUD. Hyatt explained that the design of any proposed development would be determined during the site review process following annexation.

Commissioner Dehm asked if a higher density were possible without a PUD. Hyatt explained the PUD was intended to give more flexibility in design and amenities. Dehm also asked about the open space requirement. Hyatt confirmed that the proposed development met code requirements for open space requirements. Hyatt also explained the PUD would be restricted to 360 units and that alternate densities under other zonings would require more analysis.

Commissioner Waller asked for more details on how this development would affect water demand. Public Works Director Matt Langhorst explained that this property had water rights to the Reynolds Ditch and that some of those water rights would be used for irrigation. Langhorst explained that this would reduce the amount of water consumed by the proposed development. Langhorst explained that the City would have capacity to serve the proposed development.

Commissioner Cipperly asked how the sprinkler system in this development could affect water capacity city wide. Langhorst explained that even prior to this proposal the City was looking at adding another water tank in North Glenwood to provide additional water capacity.

Applicant Barry Rosenberg provided the Commission with a presentation with responses to community concerns about growth, emergency evacuation, traffic, affordable housing, water, height, and overall infrastructure demands of the proposed project.

Applicant Curtis Rowe, Traffic Engineer with Kimley-Horn provided further explanation on the traffic study conducted for this proposal. Rowe stated that counts were conducted in March 2021 and summer of 2020. The second count was completed to incorporate school traffic. Rowe also explained that these traffic numbers were compared to previous counts and accounted for future re-development of the mall to create the traffic estimates. Rowe described proposed improvements to nearby streets and intersections.

Applicant Matthew Fitzsimmons, Architect with Hord Coplan Macht presented on the site design, included cross sections and elevations of the proposed development. Fitzsimmons explained how the grading of the site would affect perspective of the elevations as seen from the north.

Commissioner Wissing requested a recess. Commissioner Dehm called for a five minute recess.

Meeting resumed.

Commissioner Wissing asked staff how a PUD could be amended. Trent Hyatt explained a PUD would require approval by Planning & Zoning Commission and City Council.

Commissioner White asked the applicant if they had rent ranges for proposed units. White also asked if there had been proposed improvements to West Glenwood Fire Station. Applicant Barry Rosenberg explained that the goal for rents was to be \$1200-1400 for studios. Fire Chief Gary Tillotson stated that there had been no direct conversation regarding this development and a possible new station in West Glenwood. Tillotson stated that the existing station was obsolete and undersized. Tillotson also stated they were working with Garfield County and CDOT to minimize traffic gridlock associated with wildfire events.

Commissioner West asked if any domestic water would be used for irrigation. Hyatt confirmed that irrigation would come from the Reynolds ditch and that the systems would be separate. West also asked if the traffic study had included the 6<sup>th</sup> Street roundabout. Applicant Curtis Rowe explained that roundabout was beyond the scale of the study in relation to the size of the proposed development. West also asked about the proposed road improvements.

Applicant Yancy Nichol, Sopris Engineering clarified that the streets would be widened to provide additional space for bicycle routes and parking.

Commissioner Waller asked how much would be added to the width of the road. Nichol confirmed the street would have 10-11' additional space for travel lanes, 8' for parking, and additional space for landscaping.

Commissioner West asked for more information on the full development of the mall in use for traffic study. Applicant Curtis Rowe explained this was calculated as if the mall were at full retail capacity. West also had questions on height and asked about height restrictions. Hyatt explained that some zones allowed for building heights of 60'. West also asked how this development could affect the water capacity to support future developments. Matt Langhorst provided further explanation regarding system improvement fees and how those are utilized.

Commissioner Cipperly had questions about the proposed road improvements. Hyatt explained the improved roads would likely be annexed with this property. Cipperly also asked about traffic counts at the Mel Ray roundabout. Applicant Curtis Rowe explained 80% of traffic in the study was assigned to the roundabout.

Commissioner Wissing had questions on the traffic study as well.

Commissioner Waller had questions about which fire evacuation measures the City would take in relation to this development and the development's role in those measures. Hyatt explained this process would be driven by the City rather than this individual developer. City Engineer also stated that the process would be City driven. Fire Chief Gary Tillotson also expressed hope that these plans would be in place before this potential development would be completed. Waller also asked about the transition from the single family north of Donegan to the proposed development and the height of the buildings. Applicant Matthew Fitzsimmons provided more information to Waller's questions.

Commissioner Wissing asked who the anticipated residents of the development would be. Applicant Barry Rosenberg explained that it could be comparable to Six Canyons and the Lofts, with residents coming from a variety of sources. Hyatt explained that in speaking to developers, recent developments have been filled by approximately 1/3 existing Glenwood residents, 1/3 local resident relocating to Glenwood, and 1/3 coming from elsewhere.

Commissioner White asked when the Bell-Rippy project would be completed. Hyatt confirmed Bell Rippy would have 100 units and was starting construction in June 2021. White asked if they had considered home ownership options within the development. Rosenberg explained that was not a traditional part of their company's management model but could be considered.

Commissioner Wissing asked if some of the amenities such as the park would be accessible to the public. Rosenberg explained amenities were typically only available to residents. Rosenberg stated they were looking at working with Two Rivers School for a traffic management plan.

Commissioner Cipperly expressed concerns about how the proposed development would impede the view of the mountains from current Donegan residents. Cipperly requested a rendering made from ground level on Donegan Road.

Commissioner Dehm asked if this was the lowest density possible to make the project work. Applicant Barry Rosenberg explained that this project was designed at the lowest density to make the project feasible. Commissioner Dehm also asked if the developer had considered meeting the 20% resident restricted and 10% affordable restricted units. Rosenberg stated that the project was already providing the 10% affordable restricted units and could look into meeting the 20% resident restricted units.

Commissioner Dehm opened the item to public comment. Commissioner Dehm confirmed that public comments had been received and included in the packet for this item. Dehm requested that only members of the public that had not previously submitted comment present.

Mark Gibson, supported denial of the item, citing building height, traffic, and parking.

Todd Hurst, supported denial of the item, citing traffic, utility capacity, open space, lack of single family ownership options, among other concerns.

Joanne Stanley, supported denial of the item, citing wildfire concerns, management of site, density, affordability, and water concerns.

Sean Jeung, expressed concerns about lack of parkland, density, and size of development.

Anne Stephens, expressed concerns regarding the development citing density, size of development, wildfire concerns, and traffic.

Michael Hoban supported denial of the item, citing incompatibility of the project with existing neighborhood, traffic, and wildfire concerns.

Carlene Clark, supported denial of the item citing wildfire concerns and traffic.

Commissioner Dehm closed the item to public comment.

Applicant Barry Rosenberg stated that the property would limit the number of vehicles per lease and regulate use of outdoor patio space. Rosenberg also commented on the housing study, parking, traffic, and local population growth.

Applicant Curtis Rowe, Kimley & Horn provided additional information on the traffic generation calculations. Rowe also provided information on the daily trips currently generated on nearby streets.

Applicant Barry Rosenberg also described how the proposed project seemed to match the vision for this area as described in the 2011 Comprehensive Plan.

Commissioner Cipperly asked for confirmation for the Planning Item. Commissioner Cipperly asked to continue the item based on findings and conditions of March 23<sup>rd</sup> staff report. Cipperly cited the need for more information.

Commissioner Waller seconded the motion.

Commissioner Cipperly requested the developer provide more information on the project such as: developer provide heights to peaks of rooves and tops of parapets, rendering perspective from Donegan including Red Mountain, verification that the Reynolds Ditch runs and that no municipal water will be used for irrigation, fire protection details, can-and-will serve letter from West Glenwood Sanitation District, completed wildfire and evacuation plan, formal agreement with emergency services for evacuation routes, flood and mudslide debris flow routes, traffic study, pedestrian safety at Mel Ray, and dedication of parkland instead of fee-in lieu fees for parks.

Commissioner Waller also stated would like to see there be potential home ownership opportunities in this development.

Commissioner Wissing requested more information on the potential partnership with Two Rivers School and potential traffic effects.

Commissioner Waller had questions on density of the project and if this project could be lower density.

Commissioner Dehm expressed concerns over the need for an evacuation plan for the area as well as fire protection. Dehm also discussed the Housing Commission recommendations on page 138 and 139 of the staff report. Dehm also expressed the desire to see another connection to Highway 6. Dehm also asked the applicant how long the applicant would need to continue the meeting.

In total, Planning and Zoning Commission made the following requests of the applicant:

- 1) Provide proposed maximum heights of all buildings to the peaks of sloped roof and tops of parapets of all buildings.
- 2) Perspectives from points of view homes along Donegan Road with heights of proposed buildings with an overlay of Red Mountain depicting impacts of view.
- 3) Verification that Reynolds Cain ditch runs the full irrigation season confirming the lack of need for City water.
- 4) City water availability meets all firefighting needs.
- 5) City fire services/equipment can be provided for the density and building heights proposed and/or where they are lacking.
- 6) Can and will serve letter from West Glenwood Sanitation District.
- 7) Completed wildfire assessment and evacuation plan (similar to plan completed South Bridge/Four Mile)
- 8) Formal agreement from emergency services related to evacuation routes and developer financial contribution.
- 9) Confirm any flood, mud slides, and/or debris flow path routes on the property.
- 10) Traffic analysis should include impact of proposed development at Amy's Acres
- 11) Pedestrian safety through crossing at roundabout a Mel Ray.
- 12) Line of sight at both exits along Donegan and Storm King.
- 13) Further consideration of park land dedication as opposed to fee in lieu.
- 14) Potential for future condominium units such as townhomes.
- 15) Financial feasibility of project compared to the density proposed and related infrastructure costs balance.
- 16) More information regarding partnership with Two Rivers Community School.
- 17) Grand Avenue bridge roundabout impacts
- 18) Understanding of apartment units approved in the City to date since the housing study.
- 19) Vehicle access through the mall site
- 20) Housing Commission recommendations met.

Commissioner Cipperly amended the original motion to continue the item to the next scheduled regular meeting at the end of May.

Commissioner Waller amended the previous second.

Commissioner Dehm called the item to question to continue the item.

Motion passed unanimously.

## **6. New Items**

- a. Planning File 08-21: Consideration of an amendment to a Development Agreement for a Minor Site/Architectural Plan review for Caverns Village

Assistant Community Development Director Gretchen Ricehill provided the Commission with a presentation on the proposed project. Ricehill explained that the amendment was to convert 4 of the units in the building into hotel units.

Ricehill stated that staff recommended approval of the item citing finding and conditions on page 3 & 4 of the staff report.

Commissioner Waller asked for clarification on the differences in lodging as defined by Code. Staff provided more information on the differences between hotels and short-term rentals as defined by Code.

Commissioner Cipperly asked a question on the language of the original Development Agreement and the language on the four free market units.

Commissioner Dehm asked staff for more information on the Resort Zoning District.

Applicant Steve Beckley, Iron Mountain Hot Springs briefly discussed the project and how this request to amend the Development Agreement was developed.

Commissioner Dehm opened the item to public comment.

No members of the public presented.

Commissioner Dehm closed the item.

Commissioner Waller made a motion to approve the item citing finding and conditions on page 3 and 4 of the staff report.

Commissioner Wissing seconded the motion.

Community Development Director Jenn Ooton and City Attorney Karl Hanlon mentioned that Planning & Zoning Commission has been taking two meetings to decide on items.

Commissioner Waller amended the original motion to continue to the May 10<sup>th</sup> special meeting.

Commissioner Wissing amended the second.

Commissioner Dehm called the item to question.

Motion passed unanimously.

## **7. Commissioner Comments**

Commissioners thanked staff and applicants for their time.

## **8. Director Comments**

Director Jenn Ooton reminded the Commission of an upcoming CDOT meeting.

Ricehill also provided the Commission on an update for the next month's regular meeting.

**9. Adjournment**

Meeting was adjourned at 10:08 PM.

APPROVED

## Planning and Zoning Commission Report

Date: May 25, 2021  
To: Planning and Zoning Commission  
From: Trent Hyatt, Senior Planner  
Subject: 09-20 Consideration of an Annexation and the initial zoning/Rezoning of 15.818 acres to Commercial (CO) District and Planned Unit Development (PUD) District at 214 Center Drive (PIN: 2185-061-00-042). Continued from the March 23, 2021 meeting.

|                              |                                                                                                                                                                                                                  |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>REQUEST</b>               | Consideration of an Annexation and the initial zoning/Rezoning of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District at 214 Center Drive (PIN: 2185-061-00-042) |
| <b>APPLICANT</b>             | 214 Center Drive, LLC                                                                                                                                                                                            |

### ACTION ITEMS

**Action 1 - Annexation** – of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs.

**Action 2 - Initial Zoning/Rezoning** – of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

### BACKGROUND

The Planning and Zoning Commission (Commission) first considered the proposal at the March 23, 2021 regular meeting where public comment was taken. Said meeting was continued to the next regular meeting on April 27, 2021. The March 23, 2021 Commission staff report and all previously provided application materials are again attached.

Various issues and concerns regarding the proposal were raised at the March 23 meeting by both the Commission and members of the public in attendance. However, questions or comments regarding fire/emergency evacuation, existing condition of Mel Ray Road and lack of pedestrian amenities, and proposed building heights were raised by numerous Commissioners and/or public commenters. Since the previous meeting, the applicant has consulted with the City and/or provided additional information intended to address these matters.

Emergency evacuation of Glenwood residents and visitors as well as those traveling through to/from surrounding communities is an existing regional issue for which better understanding of traffic management is needed. The City does not believe the current proposal will necessarily have a negative impact on this existing problem. However, the applicant is willing to help the City work with regional partners (i.e. CDOT,

Colorado State Patrol, and local and regional emergency service providers) to develop a plan to better manage future evacuations by way of a financial contribution and/or the expertise of their traffic consulting engineer. That being said, staff believes a regional solution led by the City is the best way to develop a mitigation plan.

Many were concerned the existing condition of Mel Ray Road is not adequate to accommodate any increase in traffic related to the development proposal. Additionally, no pedestrian amenities current exist along said road. To combat this, the applicant proposes improvements addressing these issues as depicted in the attached drawing.

Understanding the height of various proposed site buildings also seemed difficult for some during the last meeting. Attached you will find cross sections depicting various buildings heights and the grade change north to south across the site from both Donegan and Storm King Roads.

Additional public comments have also been received since the March 23 meeting. These include comments from the City's Housing Commission and are attached for your consideration.

#### **PROJECT SUMMARY**

Please see the attached March 23, 2021 staff report for additional information.

#### **REVIEW CRITERIA AND STAFF ANALYSIS**

Please see the attached March 23, 2021 staff report for additional information.

#### **REVIEWING AGENCY COMMENTS**

Please see the attached March 23, 2021 staff report for additional information.

#### **ACTION ITEMS & STAFF RECOMMENDATIONS**

Please see the attached March 23, 2021 staff report for additional information.

Suggested Findings:

Please see the attached March 23, 2021 staff report for additional information.

## Memorandum

To: Planning and Zoning Commission, City Council  
From: Glenwood Springs Housing Commission  
Date: April 19, 2021  
Re: Planning Item 09-20, R2 Partnership LLC  
480 Donegan Development

The Housing Commission reviewed Planning Item 09-20 at their regularly scheduled meeting on April 14, 2021. Commissioners voted to provide the following recommendation to Planning and Zoning Commission and City Council for review and consideration.

---

The Glenwood Springs Strategic Housing Plan includes specific strategies aimed at keeping up with housing needs as growth occurs in the community. An annexation policy that provides community housing standards is the seventh identified strategy in the document.

The Plan identifies the following actions as recommended regarding new annexation policy:

- *Communities often require higher standards from developments in trade for providing the added amenities of city services through annexation.*
- *The number of affordable units required should be higher than if imposed under Inclusionary Zoning and linkage requirements for in-town parcels.*

Annexations are the best opportunity for the city to maximize its affordable housing percentage of overall newly created housing, because annexation agreements enable the City to achieve by contract negotiation what it cannot achieve by legislation. Given the large size and geographic importance of the project the Housing Commission agrees with the above recommendations in the Housing Plan and has provided the following recommendation for the proposed annexation.

Staff has recommended that the developer meet the minimum standards as outlined in Ordinance 1, Series of 2021, Inclusionary Housing, with 20% of total units designated for Resident Occupied, and 10% of total units designated affordable to 100% AMI rental prices as set by Colorado Housing and Finance Authority.

The Housing Commission is recommending the developer provide additional measures, as recommended in the Housing Strategy Plan, by providing one of the following:

1. Provide up to an additional 10% of deed restricted units limited to rental prices affordable to 100% AMI households.
  - a. If providing less than 10%, affordability shall be set to less than 100% AMI proportionate to percent of units being provided.
  - b. Units shall be equally distributed amongst unit types provided.
  - c. Additional units provided beyond Inclusionary housing requirements shall not be held to geographic employment requirements.
  - d. Unit locations may “float” within the development as long as the number of units is maintained.
2. Increase the affordability level of the 10% deed restricted units requested by staff to comply with the Inclusionary Housing Ordinance, to average 90% AMI.
  - a. units shall be equally distributed amongst unit types provided.

In addition Planning and Zoning Commission and City Council should consider requiring a payment (annual or lump sum up front) to the City for the management of compliance and enforcement of deed restricted units.

April 23<sup>th</sup>, 2021

RE: Water Capacity of West Glenwood Springs

The City of Glenwood Springs Water Department is currently completing a full water modeling of the City System, capacity of the system, pressure zones and overall ability to supply domestic/irrigation water to the existing and proposed developments within the service area. Staff's conversations with the modelling company and known capacities within the West Glenwood zone conclude that the City's has ability across the water system to support the 360 units being proposed at 480 Donegan Road. The development is planning to provide their own irrigation water for landscaping and green areas off their Reynold's and Cain ditch rights. This will significantly reduce their water consumption on the property. The City sees between a 3 and 4 fold increase in water usage during the summer months and a majority of that water usage increase is irrigation water. This development will be providing its own, reliable, irrigation water source.

Current Plant and System Capacities:

- City water plant capacity is rated at 8.65 million gallons per day.
- Recent updates to the plant's pretreatment building and filter building allow for that capacity, and slightly more, water to be pushed through the plant reliably.
- Standard City water usage during winter months is approximately 1 million gallons per day (indoor use mainly).
- Standard City water usage in the summer is approximately 3.6 to 4.2 million gallons per day (significant outdoor use).
- The City placed water restrictions on the system in 2020 not due to water availability, but due to intake structures being threatened by the Grizzly Creek Fire, the city moving toward the emergency water intake for a duration of time, and the need to keep water tanks as full as possible in case of the need for major fire suppression efforts within the City's limits.
- City water rights allow for up to approximately 13 million gallons per day to be processed.
- The City is in the process of upgrading the emergency intake so that it can be used on a daily basis if needed in conjunction with the two creek intakes to add another 500-acre feet of water per year to be utilized within the water system.

Staff will continue to monitor/review all new developments coming onto the system with our updated water model and will make case by case determinations on these developments and their impacts to our system.

Thank you,  
Matthew Langhorst  
City of Glenwood Springs, Director of Public Works

## ANNEXATION AND ZONING SUBMISSION

**MINUTES**  
**City of Glenwood Springs**  
**Planning and Zoning Commission**  
**Regular Meeting**  
**March 23, 2021**  
**Zoom**  
**6:00PM**

**1. Roll Call**

Present at roll call were Commissioners: George Shaver, Marco Dehm, Carolyn Cipperly, Ben West, Pete Waller, Sumner Schachter, Amber Wissing

Absent at roll call were Commissioners: Joy White

Also present were: Asst. City Manager Jenn Ooton, Asst. Community/Economic Dev. Director Gretchen Ricehill, Senior Planner Trent Hyatt, City Attorney Karl Hanlon, Assistant City Engineer Jessica Bowser

**2. Seating of Alternate Commissioner**

Commissioner Shaver made a motion to seat Alternate Commissioner Waller. Commissioner Cipperly seconded the motion. Commissioner Dehm called the item to question.

Motion passed unanimously.

**3. Receipt of the Minutes**

Commissioners Wissing, Shaver, and Waller all attested they had viewed the recording for the previous meeting and were prepared to discuss the continued items.

Commission reviewed the minutes from the 2/23/2021 meeting.

Commissioner Schachter made a motion to approve the minutes. Commissioner Shaver seconded the motion.

Motion passed unanimously.

#### **4. Public Comments**

Comments from citizens appearing for items not on the agenda. No citizens presented.

#### **5. Continued Items**

- a. Planning File 40-20: Consideration of a Special Use Permit to operate a Large Child Care Center at 536 S. Hyland Park Drive, a property in the RM1-residential medium density zoning district (PIN 2185-161-30-002 & 2185-161-21-006) Application withdrawn.
- b. Planning File 69-20: Consideration of a Special Use Permit for a Retail Marijuana establishment at 2114 Grand Avenue (PIN 2185-164-00-095)

Senior Planner Trent Hyatt introduced the application, continued from the February 23, 2021 meeting. Hyatt indicated that since the previous meeting, three letters of support were received by staff for the application. Hyatt also summarized the additional items which Planning & Zoning Commission requested of the applicant.

Applicant Chris Hawkins provided a short commentary on the additional items submitted and response to public comments.

Commissioner Waller asked for more detail on access to the site from Grand Avenue. Trent Hyatt explained that additional design to that access would occur in the future in collaboration with CDOT.

Commissioner Cipperly asked about the timing of the application in relation to the new buffers.

Commissioner Shaver asked if the neighboring property owner had agreed to the access agreement, which was confirmed by staff and the applicant.

Commissioner Schachter asked if traffic flow could be restricted into the property such as prohibiting left hand turns. Staff explained the City of Glenwood Springs did not have the authority to require the project to restrict traffic flow in a CDOT right-of-way. Schachter also asked staff to confirm that this application was being heard due to a City Council decision to allow the applicant to re-apply following Planning & Zoning Commission denial of a previous application by the applicant. Staff confirmed that City Council had voted to allow resubmittal of the application.

Commissioner Waller asked if the HVAC system for the store was separate from the residential uses. Applicant Chris Hawkins confirmed that there were 2 separate HVAC units for the different uses.

Commissioner Dehm indicated that there would be no further public comment as there had been a public comment period at the first meeting and the period afterwards.

Commissioner Cipperly made a motion to approve the application with the findings and conditions as listed on page 1 & 2 of the revised March 23<sup>rd</sup> staff report.

Commissioner Shaver seconded the motion.

Commissioner Dehm expressed concerns over the mixed use of the project, citing incompatibility between residential use and retail marijuana use.

Commissioner Dehm called the item to question.

Motion passed 4-1. Commissioners Shaver, Schachter, Wissing, and Waller voted to approve. Commissioner Dehm voted to deny. Commissioner West abstained from voting, citing absence at previous meeting.

- c. Planning File 66-20: Consideration of various code text amendments to Municipal Code Title 070 Sections including but not exclusive of Sections 070.030, 070.040, 070.060, and 070.070 regarding Use Regulations; Accessory Uses; Landscaping, Screening, and Fencing; Off-street Parking; Signs; Administration and Procedures; and Rules of Construction and Definitions. Continued from February 23, 2021

Assistant Community Development Director Ricehill provided a short presentation on the item. Ricehill explained that this item had been continued from previous meetings, going back to its original discussion at the December 2020 Planning & Zoning Commission meeting. Ricehill recommended approval of the amendments with all findings and conditions found on pages 1-26 of the staff report.

Commissioner Dehm has additional questions on the amendment for downtown wall signage. Ricehill stated that item could be split from the other items for further review.

Commissioner Schachter had questions on the size limit of location and extent review. Schachter also asked if there was a height limit on the storage containers. Schachter also asked for additional details on the maximum size of a commercial use in the Residential Transition (RT) Zoning District.

Commissioner Shaver expressed support for a height limit for the temporary storage containers. Shaver also asked for additional information on the solar panel amendments.

Commissioner Schachter made a motion to approve the amendments as presented and modified by staff including suggested verbiage from Commissioner Shaver on item 10 and placing a height limit of 10' on temporary storage containers on item 5.

Commissioner Wissing seconded the motion.

Commissioner Shaver suggested the maximum time following an event for a temporary sign would be 15 days rather than 45 days.

Commissioner Wissing asked for more clarification on the timeline suggested by Shaver. Staff provided additional information on the sign code's definition of temporary signs.

Commissioner Schachter made a motion to amend the original motion to include the change proposed by Commissioner Shaver to limit the timeline of a temporary sign to 15 days following an event.

Commissioner Wissing seconded the amended motion.

Commissioner Dehm asked to confirm if item 17, which contained language on wall signage in the downtown area, was included in this motion. City Attorney Karl Hanlon confirmed that it was.

Commissioner Cipperly stated support for item 17. Cipperly also expressed some concern with the 5,000 square foot limit of location and extent review.

Commissioner Shaver asked if any of the recent City projects exceeded 5,000 square feet. Staff explained majority of recent City projects were larger than 5,000 square feet.

Commissioner Dehm called the item to question.

Motion passed 6-0. Commissioner Waller abstained citing absence at previous discussion of the item.

## **6. New Items**

- a. Planning File 09-20: Consideration of an Annexation and the initial zoning/rezoning of 15.818 acres to Commercial (CO) District and Planned Unit Development (PUD) District at 214 Center Drive (PIN 2185-061-00-042)

Senior Planner Trent Hyatt provided a presentation to Commission on the application. Hyatt summarized the application including information on the annexation process as it related to City requirements and State of Colorado law. Staff recommended approval with findings and conditions listed on pages 15-16 of the submitted staff report.

Commissioner Shaver had questions on slope of the property and view of the proposed development from Storm King Road.

Commissioner Schachter had questions on the ability of Planning & Zoning to place conditions on the annexation, process of annexation, PUD process, location of City/County boundary, current County zoning regulations, traffic, long term costs of annexation to the City, owner-occupied housing, stormwater drainage, and road improvements.

City Engineer Terri Partch provided information on the traffic study, fire study, and stormwater drainage.

City Attorney Karl Hanlon stated that a potential fire study would be a large study area that may or may not relate to the size of this development.

Hyatt confirmed that the units added would be rentals and the maximum height of buildings would be 53'. Hyatt also provided additional information on the process of annexation as well as on the major site plan review that this project would require.

Karl Hanlon provided additional information on the potential cost benefit of annexation to a community and its effects on police, fire, utilities, and other city services.

Commissioner Schachter had additional questions on road maintenance of Donegan, building height, and opens space requirements. Staff provided more information on these items.

Commissioner Waller had questions on traffic, the City taking over County roads, water and sewer capacity, drainage and slope of site, and the PUD parcel intended for a restaurant.

Karl Hanlon provided additional information on sewer and water capacity for the City and stated that this area was served by West Glenwood for sewer. Hyatt provided additional information on the roads and PUD parcels.

Commissioner Dehm asked staff for additional information on the traffic generated for this potential project as detailed in the traffic study.

Commissioner Cipperly had questions on the potential for PUD amendments if there were changes to what was being proposed. Cipperly also asked if the open space would be available to only residents or to the general public.

Haley Carmer, Attorney at Garfield & Hecht, representing the applicant provided the Commission with an overview of the proposed project and application.

Applicants, John & Floyd Diemoz representing the Glenwood Partnership, current owners of the property, provided a short presentation on the proposed project and application for annexation.

Applicant Barry Rosenberg, representing R2 Partnerships provided a short presentation on the proposed project and application for annexation.

Applicant Matthew Fitzimmons and other representatives from HCN, a planning and design firm, provided a short presentation on the proposed project and application for annexation.

Applicant Yancy Nichol from Sopris Engineering provided a short presentation on the traffic and physical site design of the application.

Commissioner Schachter had questions for the applicants if deeded homes could be incorporated in the project, citing a lack of home ownership opportunities. Applicant Barry Rosenberg explained that the project was designed with a focus on long term management of rental properties.

Commissioner Shaver had questions on fence locations, building elevations, drainage design, and effect of the proposed development on the existing Montessori school.

Commissioner Waller had questions on the setbacks on Donegan, building elevations, physical characteristics of the site, open space requirements, bike path, traffic study,

Commissioner Cipperly had questions on roof heights, parking, traffic circulation, pedestrian connections,

Commissioner Dehm had questions on the gated connection to the south the Glenwood Springs mall property. Applicant Yancy Nichol stated that the gate was there to create a clear connection and circulation to the property. Nichol also explained that future redevelopment of the mall could affect this connection.

At 9:19 PM, Commissioner Dehm called a five minute recess.

At 9:24 PM, Commissioner Dehm called the meeting back to order.

Commissioner Dehm opened the item to public comment.

Jenn Zwickl supported denial citing fire evacuation concerns, traffic, and infrastructure concerns.

Lisa Orosz supported denial citing fire evacuation concerns, traffic, parking, police response times

Carlos Pinay supported denial citing traffic concerns especially in regard to school-generated traffic, as well as increases in infrastructure and service demands to schools, hospitals, police, and fire.

Lorie Raymond supported denial citing traffic, fire evacuation concerns, and increased density in West Glenwood.

Linda Holloway supported denial citing lack of perceived benefits of annexation to the City, parking, and traffic.

Rose Shepard supported denial citing fire evacuation concerns, traffic, infrastructure demands, and building heights.

Susie Strauss supported denial citing fire evacuation concerns, traffic, and increased infrastructure demands.

Don Bassett supported denial citing fire evacuation concerns, traffic and school traffic, and increased density.

Michael Hoban supported denial citing increased density, traffic, and incompatibility with the neighborhood.

Joanne Kesselring supported denial citing fire evacuation concerns, increased density, traffic, building height, increased infrastructure demands, and incompatibility with the neighborhood.

Thomas Clark supported denial citing traffic and capacity of existing roads.

Annie Stephens supported denial citing fire evacuation concerns and need for a wildfire evacuation study, scale of development, parking, building height, and traffic.

Todd Hurst commented that any development of this parcel should reflect the wants and needs of the community.

Sherri Tonozzi supported denial citing concerns over increased noise impacts and light pollution.

Karleen Clark supported denial citing concerns over fire evacuation and expressed need for a new fire evacuation study. Karleen also cited concerns over traffic and increased density.

Carlos Penay expressed additional concerns regarding wildfire evacuation.

Larry Raymond, supported denial citing concerns over fire evacuation and need for an evacuation plan and incompatibility with existing neighborhood.

Jennie Bassett supported denial citing fire evacuation concerns, increased traffic, and need for additional traffic study.

Jenn Zwickl commented a second time in support of denial citing fire evacuation concerns, traffic, and building heights.

Michael Hoban commented a second time, in support of denial and expressing desire for further public comment.

Commissioner Dehm closed the item to public comment.

Commissioner Schachter made a motion to continue the item to the next regularly scheduled Planning & Zoning Commission meeting.

Commissioner Shaver seconded the motion.

Commissioner Dehm called the item to question.

Motion passed unanimously.

- b. Planning File 64-20: Consideration of a Minor Site Architectural Plan to add five new dwelling at 405 Laurel Street, a property with five existing units (PIN#2185-091-00-008)

Commissioner West recused himself and left the meeting.

Assistant Community Development Director Gretchen Ricehill provided Planning & Zoning Commission with a presentation on the application. Ricehill recommended approval of the application with findings and conditions found in the staff report.

Commissioner Waller had questions on parking and design standards of the project.

Commissioner Cipperly asked staff to confirm the provided parking.

Commissioner Schachter asked staff about the Laurel Street sidewalk. Ricehill confirmed the applicant would be required to install a 5' sidewalk. Schachter also asked what would happen if the natural screening died and Ricehill explained that not maintaining the screening would be a violation of the original development agreement.

Applicant Leah Meyer provided the Commission with additional information in response to their questions. Meyer confirmed that two large trees would be kept on the property and that the colors of the development was intended to match the existing structures.

Commissioner Dehm opened the item to public comment.

Linda Holloway supported denial of the application citing concerns over parking and traffic.

Commissioner Dehm closed the item to public comment.

Commissioner Waller made a motion to continue this item to the April 6<sup>th</sup> meeting

Commissioner Shaver seconded the motion.

Commissioner Dehm called the item to question.

Motion passed 6-0. Commissioner West had been removed from the meeting.

## **7. Commissioner Comments**

Commission Schachter mentioned that he would not be present at April 6<sup>th</sup> meeting.

## **8. Director Comments**

Director Jenn Ooton had no comments.

## **9. Adjournment**

Meeting was adjourned at 10:46 PM.

## Planning and Zoning Commission Report

Date: March 23, 2021  
To: Planning and Zoning Commission  
From: Trent L. Hyatt, Senior Planner  
Subject: #69-20 – 480 Donegan Annexation and Initial Zoning/Rezoning

### ACTION ITEM:

The Planning and Zoning Commission (Commission) is the recommending body to City Council on all annexation and related initial zoning/rezoning applications. Action items are discussed in significant detail throughout the staff report.

**Action 1 - Annexation** – of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs.

**Staff recommendation:** *Staff recommends **approval (with conditions)** of the Annexation request with the findings and conditions on page 15.*

**Action 2 - Initial Zoning/Rezoning** – of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

**Staff recommendation:** *Staff recommends **approval (with conditions)** of the Initial Zoning/Rezoning request with the findings and conditions on pages 15-16.*

---

## BACKGROUND/ANALYSIS

### Proposal

The applicant, 214 Center Drive, LLC, proposes the annexation of a 15.818 acre parcel located in unincorporated Garfield County in west Glenwood Springs but outside of the municipal limits of the City. The subject property is located immediately north of the Glenwood Mall and bound by

Donegan Road and the Western Hills Subdivision to the north. Two Rivers Community School and Glenwood Subaru are adjacent to the west opposite of Storm Kind Road. Single-family homes fronting Mel Ray Road are adjacent to the east. A location/vicinity map of the site is provided below which depicts the current City limits in a yellow dashed line.

Vicinity map

A large portion of the subject property (pictured below) appears vacant but is used for storage and the grazing of animals in warmer months of the year.

Southeast view from Ponderosa Circle (Google Maps)

A business park consisting of two approximately 14,000 square foot buildings constructed in 1981 and 2006 occupies 22.3 percent of the south-westernmost corner of the parcel adjacent to Storm King Road. Referred to as The Glenwood Business Center, the area contains a daycare/school, office space, contractor yards, and storage/warehousing uses. No changes to this portion of site (pictured below) are proposed or anticipated in the immediate future.

Northeast view (Google Maps)

A planned development is proposed for the remaining 12.285 acres of the site including the construction of 360 mixed residential to include one, two, and three-bedroom multi-family apartments, townhomes, and live-work studio units in eight total buildings. A portion of various housing types to be set aside for rent restricted limits based on area median income. Other significant aspects of the project include a 2,000 square foot restaurant (open to the public), 10,000 square foot clubhouse and other park spaces for tenants.

Site layout and landscaping per Sheet LA3.0

Please note, the current proposal is not a request for a development approval. Instead, it is intended to explain proposed zone district standards (height, setbacks, densities, and use) site layout, circulation, building design (general architectural style, massing), landscaping, and identify the necessary infrastructure improvements (water/sewer/electric quantities and utility upgrades, bicycle/pedestrian connections, and traffic improvements) required to serve such a proposal this scope. Any specific not addressed in application materials will be generally subject to the Glenwood Springs Municipal Code (Code). If the annexation/rezoning is approved by Council, the applicant is still required to submit and receive approval of a Major Site/Architectural Plan Review application, and other applicable permits, prior to construction.

## **Annexation Process**

In most cases, the annexation of a property adjacent to a city's municipal limits is a voluntary process requested by a property owner. With sufficient contiguity, a property owner may petition City Council for inclusion into the City. Such a petition begins a series of analyses by the City to determine the impacts of an annexation, including both the positive benefits and potential negative impacts. Public input is solicited through the process as well. To mitigate impacts and to incentivize the annexation, both parties negotiate certain terms that are reflected in an annexation agreement. Many municipalities, including ours, require annexation as means of obtaining various services necessary to serve a development proposal (water and electric are needed in this circumstance).

The annexation process is codified in the Colorado Revised Statutes (CRS 31-12-107) and in Section 070.060.040(d) of the Code. To meet statutory qualifications, at least 1/6<sup>th</sup> of the annexing parcel's perimeter must be contiguous with existing city limits. In this case, approximately 2/6<sup>th</sup> of the parcel perimeter is contiguous with the existing city limits (see vicinity map above and attached draft annexation map for contiguous boundaries). City Council must pass a resolution determining an annexation request is in substantial compliance with CRS. Thereafter, a series of public notices and hearings are required. Staff has chosen to solicit the review and comments of the Commission regarding the proposal prior to moving forward with required City Council statutory annexation proceedings.

## **Annexation Review Criteria**

Section 070.060.040(d)3.b of the Code guides the Commission to ensure the following: ***“The final annexation plan shall conform to applicable state statutes, shall be consistent with the Comprehensive Plan, and shall include all information required by the City to evaluate whether and to what extent the annexation impacts the city and the public health, safety, and welfare of the city.”*** The Commission should base its recommendation on the anticipated impacts upon the City and surrounding neighborhood including consideration of traffic, open space, active recreational facilities, infrastructure capacity and the compatibility of the proposed development with the City's goals and policies as adopted by ordinance or resolution. Below is a discussion regarding potential impacts staff feels are applicable to the request and an analysis of how this project meets objectives expressed in various City plans and policies.

## **Roads and Traffic**

Traffic generation is always an important development consideration. According to the attached *Traffic Impact Study* completed by Kimley Horn, the project is expected to create 2,188 weekday daily trips (144 AM peak hour trips, 177 PM peak hour trips of these trip). Just as important as total trip generation is the distribution of these trips at access points and various roads in the neighborhood and adjacent areas.

Donegan Road, opposite Chapparral Circle, is anticipated to serve as the main full movement access to the development. An acceleration lane is needed here to accommodate traffic exiting right from the development. Full movement access to the western end of the site currently exists via Storm King Road opposite Center Drive and serves the existing business park. A four-way stop is required for the increase in use of this intersection. Finally, acceleration lanes are proposed eastbound left and westbound right turn Highway 6 and 24 from Donegan Road to accommodate anticipated traffic. Typical road cross sections and/or improvement areas are depicted below and on various attached plan sheets. It is the City's expectation the County will require a transfer of

ownership of applicable road right-of-way sections in order to make the identified improvements determined necessary for the project.

Donegan Road and Highway 6 and 24 intersection improvements

### Housing and Affordability

A total of 360 dwelling units are outlined in the PUD offering a mix of housing types and densities including townhomes (20 units in four buildings along Donegan Road), multi-family apartments (327 units in buildings A.1 and A.2 B.1, B.2, C.1, C.2 and D), and 13 live/work units in building D adjacent to Center Drive). At 29.30 dwellings units per acre, the proposed density is not unique compared to recent multi-family housing development trends in the City (averaging 51.06 per acre the last over seven multi-family projects).

One notable aspect of the housing proposal, however, is the inclusion of affordable options in each housing type provided, excluding live/work. Currently, the applicant proposes restricting 38 (10.6 percent) to either 100 or 120 percent of area median income (AMI) as outlined in the table below.

| <u>Unit Type</u>                         | <u>AMI Restriction</u>                                                                      |
|------------------------------------------|---------------------------------------------------------------------------------------------|
| Studio units (95 units)                  | 5 units restricted to 100% AMI<br>6 units restricted to 120% AMI                            |
| 1-Bedroom multi-family units (110 units) | 6 units restricted to 100% AMI,<br>6 units restricted to 120% AMI                           |
| 2-Bedroom multi-family units (94 units)  | 5 units restricted to 100% AMI,<br>5 units restricted to 120% AMI                           |
| 3-Bedroom multi-family units (28 units)  | 1 unit restricted to 100% AMI<br>2 units restricted to 120% AMI                             |
| Townhomes (20 units)                     | 2 units restricted to 120% AMI                                                              |
| <b>TOTAL 360 units</b>                   | <b>TOTAL 38 units</b><br>17 units restricted to 100% AMI<br>21 units restricted to 120% AMI |

Similar standards (10 percent restricted to 100% of AMI and 20 percent resident occupancy) are in the process of being codified by the City, but the applicant has been in discussions to provide an affordability facet to the project since initial meetings with staff. Staff prefers the totality of units set aside for restricted rent rates is provided at 100 percent of AMI and resident occupancy for the project is set at 20 percent, as approved by City Council at their March 18 meeting. Housing and affordability are goals outlined by City Council in their strategic planning and in the City's comprehensive plan.

### Bicycle and Pedestrian Facilities

Similar to the traffic discussion above, the proposal is anticipated to have a major increase in bicycle and pedestrian traffic in a neighborhood that is home to two schools (Two River Community School and Glenwood Springs Middle School), existing commercial activity, and significant housing. Related infrastructure surrounding and in the vicinity of the development parcel are either severely lacking (due to location, width, mode capacity, etc.) or completely nonexistent (i.e. along Donegan and Mel Ray Roads).

East of the site, bicycle lanes and sidewalks are provided within the City limits along the Donegan Road right-of-way. A connection thereto, as depicted above and below, would greatly benefit existing west Glenwood residents, especially school-aged children. Similar street sections are proposed for Storm King Road and Center Drive adjacent to the site. Additionally, staff has requested future connectivity to the Glenwood Mall is reserved in anticipation of future redevelopment there.

East of the site, bicycle lanes and sidewalks are provided within the City limits along the Donegan Road right-of-way. A connection thereto, as depicted above and below, would greatly benefit existing west Glenwood residents, especially school-aged children. Similar street sections are proposed for Storm King Road and Center Drive adjacent to the site. Additionally, staff has requested future connectivity to the Glenwood Mall is reserved in anticipation of future redevelopment there.

Proposed Donegan Road typical cross section

### Infrastructure

The City's water and electric service areas already include the property. Demand loads for water and electric have been preliminarily reviewed and determined to be within the City's ability to serve. Specific comments related to these services are outlined by various reviewing agencies, many of which are necessary to address at the time of development review.

Reynolds and Cain Ditch Company water shares are currently used for irrigation of the property. Upon annexation/development of the property, the applicant will be required to transfer its ditch shares to the City and lease back the portion thereof needed for future project landscaping.

The West Glenwood Sanitation District provides sewer service to properties and uses in this area, both within and outside of the municipal limits of the City. The district has provided comments that it can serve the sanitary needs of the proposal develop.

It does not appear that offsite regional stormwater facilities have capacity to the serve the development proposal. Therefore, it is the applicant's responsibility to manage any post development increase in stormwater onsite and release it at a predevelopment rate.

Costs related to new infrastructure required to the serve the development, whether on or offsite, are the responsibility of the applicant. The City of Glenwood Springs has adequate capacity to serve this development. All onsite infrastructure is intended to remain in ownership of the applicant unless determined to be integral to the City's system.

### Parks and Open Space

Residential development proposals are generally required to provide 20 percent common open space, per Section 070.040.040(c)(1) of the Code, for the use and enjoyment of residents. The proposal includes the required space in amenities across the development including a pool, 12,000 square foot clubhouse, 2,000 square foot restaurant (also serves as a public amenity), a tot lot, various lawn play areas, and certain landscape buffers (see snip of Open Space Framework sheet LA2.0 at right).

As discussed above, the applicant proposes many offsite roadway, bicycle, and pedestrian, improvements. The request has been made to allow said road improvements to serve as a portion of the parkland improvements required by Section 070.040.030(g)(2) of the Code. However, staff believes these improvements are necessary to accommodate impacts of the specific development proposal and assume all parkland fees are still applicable to address the recreation needs of residents offsite. City park space in the west Glenwood is currently limited to Gregory Park, however, other recreation space is located nearby at adjacent schools and federal lands. Required park land fees are still needed to allow the City to plan for recreation in the greater neighborhood.

### Visual & Noise Impacts

Potential viewshed impacts associated with the PUD proposal are significant relative to the current seasonal grazing/agricultural use of the property. However, it does not seem appropriate to compare the built environment to what appears today as open space. To better understand the

impact, Staff requested perspective views of from varying angles and adjacent areas as depicted below and on various plan sheets.

Southeast view along Donegan Road at Storm King Road (building E.1 foreground/building D behind)

Outside of construction, the project is not anticipated to create adverse noise impacts. It is also critical to recognize that the current Garfield County Commercial/Limited zoning also allow development of the site which would have associated view and noise impacts.

Southwest view from Donegan Road (building A.2)

## Comprehensive Plan

As shown at right, Map 2.1 Future Land Use – North Portion of City of the 2011 Glenwood Springs Comprehensive Plan (Comp Plan) designates the Glenwood Mall site and subject property (by way of an asterisk) as a “Secondary Commercial Center” targeted for future growth and development. Chapter 2, Page 27 of the Comp Plan states “[W]ithin these commercial nodes, the Comprehensive Plan encourages mixed-use redevelopment. The

*Comprehensive Plan also recommends that the City create sub-area plans for each of these secondary centers in order to determine the mix of uses and the type of development that can be supported in each area.”* Purple identifies the “Mixed Use” classification which Chapter 2, Page 29 explains as allowing “...for a variety of uses including commercial, retail, office, restaurant, entertainment and multi-family housing co-existing through design either in a horizontal or vertical fashion.”

Numerous community goals and related objectives and strategies outlined in the Executive Summary and subsequent chapters of the Comp Plan support the proposal. These goals are outlined in the following table.

| <u>Comprehensive Plan Goal Supported</u>                                                                                                                                                                                                                                 | <u>Objectives and Strategies</u>                                                                                                                                                                                                                                                  |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>-Promote long-term, sustainable, diverse, economic development</b>                                                                                                                                                                                                    | <ul style="list-style-type: none"> <li>-Direct development into a compact form: infill and redevelopment (Chapter 3, Page 34)</li> <li>-Attract diverse businesses and industries (Chapter 4, Page 50)</li> <li>-Retain role as a regional center (Chapter 7, Page 83)</li> </ul> |
| <b>Staff Comment:</b> The goal and related objectives/strategies above are supported by the current proposal which includes infill development, provides a public dining option to west Glenwood, and encourages sales tax revenue and the demand for existing services. |                                                                                                                                                                                                                                                                                   |
| <b>-Maintain Glenwood Springs as the regional tourism, retail, commercial, and governmental center of Garfield County</b>                                                                                                                                                | <ul style="list-style-type: none"> <li>-Attract diverse businesses and industries (Chapter 4, Page 50)</li> <li>-Retain role as a regional center (Chapter 7, Page 83)</li> </ul>                                                                                                 |
| <b>Staff Comment:</b> Additional housing and dining opportunities within the municipal limits strengthens various economic objectives/strategies in support of the City’s role as the regional commercial and governmental center.                                       |                                                                                                                                                                                                                                                                                   |

|                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>-Preserve small town character while maintaining the livability of Glenwood Springs and increasing the vibrancy and commercial success of the downtown</b></p>                                                                                                                                                                                                                             | <ul style="list-style-type: none"> <li>-Develop according to the vision (Chapter 4, Page 34)</li> <li>-Direct development into a compact form: infill and redevelopment (Chapter 3, Page 34)</li> <li>-Enhance pedestrian-friendliness while facilitating traffic (Chapter 3, Page 36)</li> <li>-Provide direction for annexation &amp; land use in the City's area of influence (Chapter 3, Page 45)</li> <li>-Retain role as a regional center (Chapter 7, Page 83)</li> <li>-Direct growth inward (Chapter 9, Page 102)</li> </ul>                                                                                                                    |
| <p><b>Staff Comment:</b> The annexation and mixed-use development of this parcel is a specific goal outlined in the Comp Plan. Infill development where services already exist helps to limit the impacts a development on City systems and makes improvements more cost effective. Pedestrian connectivity is lacking in the neighborhood and improved by features included in the request.</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <p><b>-Address transportation and provide multiple convenient travel choices</b></p>                                                                                                                                                                                                                                                                                                             | <ul style="list-style-type: none"> <li>-Direct development into a compact form: infill and redevelopment (Chapter 3, Page 34)</li> <li>-Improve interconnectivity of the road network to provide alternative routes through and around town (Chapter 5, Page 65)</li> <li>-Encourage reduction of single-occupant vehicles and encourage alternate travel modes through land use planning and community design (Chapter 5, Page 66)</li> <li>-Expand and connect the trail system and other walking and bicycling routes (Chapter 5, Page 67)</li> <li>-Create complete streets to encourage alternative modes of travel (Chapter 5, Page 68)</li> </ul> |
| <p><b>Staff Comment:</b> The bicycle and pedestrian improvements proposed by the applicant with the annexation will have a huge impact in achieving the specific goals/objectives outlined in the Comp Plan above.</p>                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <p><b>-Direct development to locations and building forms that are cost effective to serve</b></p>                                                                                                                                                                                                                                                                                               | <ul style="list-style-type: none"> <li>-Direct development into a compact form: infill and redevelopment (Chapter 3, Page 34)</li> <li>-Direct growth to areas where utilities and services can be provided efficiently (Chapter 7, Page 82)</li> <li>-Retain role as a regional center (Chapter 7, Page 83)</li> <li>-Direct growth inward (Chapter 9, Page 102)</li> </ul>                                                                                                                                                                                                                                                                             |

|                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>-Provide housing opportunities for the entire community</b>                                                                                                                                                                                                                                                                             | -Direct development into a compact form: infill and redevelopment (Chapter 3, Page 34)<br>Increase the supply of housing that is affordable to the workforce (community housing) by implementing the Strategic Housing Plan (Chapter 6, Page 73)<br>-Encourage greater variety in housing types and price (Chapter 6, Page 75)<br>-Encourage housing variety and affordability throughout the community (Chapter 6, Page 75)<br>-Require good design for mixed-use and higher density projects (Chapter 6, Page 76) |
| <b>Staff Comment:</b> This Comp Plan goal is improved upon by adding to the housing stock in a market in need of units. However, the affordability aspect of the current proposal is a direct action which addresses a specific challenge for the region's workforce. Objectives/strategies already disused above again support this goal. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>-Support social diversity</b>                                                                                                                                                                                                                                                                                                           | -Direct development into a compact form: infill and redevelopment (Chapter 3, Page 34)<br>-Retain role as a regional center (Chapter 7, Page 83)<br>-Direct growth inward (Chapter 9, Page 102)                                                                                                                                                                                                                                                                                                                     |
| <b>Staff Comment:</b> The objective/strategy outlined above are supported by the current application as it includes infill development.                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| <b>-Preserve natural resources</b>                                                                                                                                                                                                                                                                                                         | -Direct growth inward (Chapter 9, Page 102)                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

### Rezoning, PUD Rezoning, and Related Approval Criteria

As outlined above, two separate initial zonings are associated with the proposal. Commercial (CO) District is requested for the 3.533-acre portion of the site to accommodate the existing developed business park parcel, whereas Planned Unit Development (PUD) District is anticipated for the 12.285 acres slated for future development. Section 070.060.040(a)(3)f.3 outlines the criteria for the review and approval of a standard Rezoning application. Section 070.060.040(b)(3)f.3 outlines additional criteria for the review and approval of a Rezoning to Planned Unit Development. Both sets of criteria and other Code language is provided in ***bold italics*** below along with supporting information from staff.

#### Rezoning Approval Criteria Section 070.060.040(a)(3)f.3

##### ***i. The rezoning is consistent with the City's comprehensive plan and the purpose of this Code;***

As detailed above, the annexation and related CO and PUD initial zonings/Rezoning are clearly consistent with the future land use designation of the property and numerous goals and objections addressed in the Comp Plan. The propose of this Code as stated in Section 070.010.030 “***...is to protect the public health, safety, and welfare of the city and to implement the policies, goals, and strategies adopted by the City of Glenwood Springs, including those set forth in the Glenwood Springs Comprehensive Plan.***” Annexation allows the City to be directly involved with the implementation of various goals and policies at the site and in the greater west Glenwood neighborhood.

- ii. ***The rezoning is consistent with the proposed purpose statement of the proposed zoning district;***

As per Section 070.020.120(a), “[T]he CO district is intended to accommodate general commercial uses with some limited residential uses. The CO district provides a transition between mixed-use and/or residential districts and more intense industrial districts and allows some typically auto-oriented or major corridor uses.” The CO district accommodates the existing business park uses while providing a smooth transition to the anticipated future residential development and other adjacent uses. Proposed higher intensity uses allowed in the CO district (i.e. fabrication/manufacturing, retail shopping center, gas station, drive-thru restaurant, carwash, etc.) require special review in order to safeguard against and consider the impacts of potential noise, odor, and/or traffic.

Section 070.020.180 of the Code explains, “[P]lanned unit developments (PUDs) are intended to allow for greater flexibility in the application of zoning and development standards than would otherwise be achieved through a base zoning district in exchange for greater benefit to the City of Glenwood Springs.” A PUD allows certain benefits to the City not permitted by other zone districts. Both residential and commercial uses are an integral component of the Mixed-use designation of property per the Comp Plan. However, the City must recognize that well established neighborhoods exist in the area such as Western Hills to the north and single-family homes along Mel Ray Road to the east. Therefore, significant commercial development herein will not necessarily provide a good transition from existing development patterns to more intense development to the west (multiple auto sales and service centers) and south (large regional retail shopping center anticipated for significant redevelopment).

Additionally, the applicant is requesting varying site-specific building types, heights, and setbacks (see graphics above and below) as requested by City staff. Three separate contextual height zones are requested to account for adjacent uses. Townhomes and apartment buildings along Donegan Road are limited to two stories along the street. Internal buildings are taller and incorporate the existing grade which slopes to south towards more intense uses. Increase building setbacks along the project exterior allow for on street parking, improved transportation infrastructure, and landscaping buffering of the project. Exact PUD zone district standards are outlined on sheet C-1.2 of the plan set attached. Included concept renderings help visualize these transitions in various places throughout the development.

Southeast view at Donegan Road project entrance opposite Chapparral Road (buildings A.1 and A.2)

iii. ***Substantial changes in the subject area warrant a zoning change; and/or***

While this criterion is not entirely applicable to an initial zoning, the annexation of the property and future potential development is certainly a substantial change to the subject property and surrounding neighborhood. The proposed CO zone district is quite similar to the current Commercial/Limited County zoning of the entirety of the property. However, the PUD proposed zoning is warranted to help manage the anticipated substantial change.

iv. ***The intensity of development in the new zoning district is not expected to create significantly adverse impacts to surrounding properties or the neighborhood.***

Again, no additional development is expected with the proposed CO initial zoning/rezoning as it simply accommodates the existing business park located at the site. However, significant impacts are anticipated with the development of the PUD as addressed above. The City has outlined corresponding design standards (location of specific housing types, height zones, setbacks) and on and offsite improvements (road construction, bicycle and pedestrian accommodations and connections, parking, increased stormwater capacity, utility extensions) necessary to account for and limit the impacts of the development from having an adverse effect on the neighborhood.

PUD Approval Criteria 070.060.040(b)(3)f.3

**i. Meets the approval criteria for rezonings, per 070.060.040(a)(3)f.3;**

Please see staff commentary above.

**ii. Addresses a unique situation, provides substantial benefit to the City, or incorporates innovative design, layout, or configuration resulting in quality over what could have been accomplished through strict application of a base zoning district or other standards of this Code;**

As already addressed in various sections of this report, the proposed PUD will provide for an innovative design that acknowledges and transitions from the existing developed neighborhood. A mix of housing at this location will compliment and encourage the redevelopment of the Glenwood Mall site. PUD zoning allows a better means of accomplishing the development of site and greater ability to achieve the City's goal in this area.

**iii. Meets all applicable standards of this Code not expressly modified by the PUD application; and**

Any and all development standards not specifically addressed by the proposed PUD are subject to applicable City Code standards.

**iv. If the PUD provides residential uses, includes varied types of housing and densities.**

A mix of housing types and densities is proposed with the PUD including townhomes, multifamily apartments, and live/work units. Affordable components are included for each housing type proposed, excluding live/work.

**Reviewing Agency Comments**

Comments have been received from the referral agencies outlined in the below and are attached for review.

---

## **ACTION ALTERNATIVES AND STAFF RECOMMENDATION:**

Section 070.060.030(g)(1)d outlines the review and decision procedures for applications being considered by the Commission and/or City Council stating, “[T]he applicable review body shall approve, approve with conditions, or deny the application based on the applicable approval criteria listed in the application-specific procedures. The body may also continue the hearing...”

**Action 1 - Annexation** – of a 15.818 acre parcel into the municipal limits of the City of Glenwood Springs.

**Staff recommendation:** Staff recommends **approval (with conditions)** of the Annexation request with the findings and conditions below:

### **Recommended Findings:**

1. The annexation conforms to applicable state statutes.
2. The annexation is consistent with the Comprehensive Plan; and
3. The annexation minimizes potential adverse impacts to the City and does not negatively impact the City’s public health, safety, and welfare.

### **Recommended Conditions:**

1. The applicant shall comply with/address all City staff comments related to the proposal prior to submittal of any future development permit application.
2. Future development shall comply with the various requirements outlined in the PUD, where applicable. The *Glenwood Springs Municipal Code* is otherwise applicable to any standards not addressed therein.
3. The applicant shall comply with all verbal representations made in the public hearings, as outlined in all application materials, and/or as revised per conditions herein and approved by the Community Development Director.
4. Prior to approval of any future development review application, the applicant shall apply for and receive the approval of a CDOT access permit, where applicable.

**Action 2 - Initial Zoning/Rezoning** – of 3.533 acres to Commercial (CO) District and 12.285 acres to Planned Unit Development (PUD) District.

**Staff recommendation:** Staff recommends **approval (with conditions)** of the Initial Zoning/Rezoning request with the findings and conditions below:

### **Recommended Findings:**

1. The rezonings are consistent with the City's comprehensive plan and the purpose of the *Glenwood Springs Municipal Code*;

2. The rezonings are consistent with the purpose statements of the Commercial (CO) and Planned Unit Development (PUD) zoning districts;
3. Substantial changes in the area warrant a zoning change;
4. The intensity of existing and proposed development in the new zoning districts is not expected to create significantly adverse impacts to surrounding properties or the neighborhood.
5. The PUD rezoning will meet any and all applicable standards of this Code not expressly modified by the PUD application; and
6. The PUD provides multiple, varied residential housing types and densities.

**Recommended Conditions:**

1. The applicant shall submit a Minor Subdivision application to create the two lots outlined in the request.
2. Future development shall comply with the various requirements outlined in the PUD, where applicable. The *Glenwood Springs Municipal Code* is otherwise applicable to any aspect not addressed therein.
3. The applicant shall comply with all verbal representations made in the public hearings, as outlined in all application materials, and/or as revised per conditions herein and approved by the Community Development Director.

BEING SITUATED IN SECTION 6, TOWNSHIP 6 SOUTH,  
RANGE 89 WEST OF THE 6TH P.M.  
CITY OF GLENWOOD SPRINGS, COUNTY OF GARFIELD, STATE OF COLORADO.

SHEET 1 OF 2

**NOTES**

- 1) Date of Survey: October 7-28, December 15-18, 2020 & January 5, 8, 14, 2021
- 2) Date of Preparation: October - December 2020 & January 2021.
- 3) Basis of Bearing: A bearing of N 89° 49' 59" E along the south east section line of Section 34, established by the found monuments.
- 4) This survey does not constitute a title search by Sopris Engineering, LLC (SE) to determine ownership or easements of record. For all information regarding easements, rights of way and/or title of record, SE relied upon the Title Report prepared by Land Title Guarantee Company, Order No. AB563014094-2, Effective Date, January 10, 2020 and documents and plats of record as shown in the Source Documents, herein.
- 5) Basis of elevation: Project based on Global Position System (GPS) observations from the Continuous Operating Reference Station (CORS) GSC1 utilizing the Continental United States 2012 geoid model (GEOID 12A) CONUS and based the 1988 North American Vertical Datum (NAVD88) and a vertical shift of -4.22 feet as calculated by the North American Vertical Datum Conversion (VERTCON) an online service provided by a subsidy of the National Oceanic Atmospheric Administration (NOAA). Which established all elevations shown heron. Placement benchmarks to be set as requested.
- 6) The linear unit used in the preparation of this plat is the U.S. survey foot as defined by the United States Department of Commerce, National Institute of Standards and Technology.

NOTES

- 1) Date of Survey: October 7-28, December 15-18, 2020 & January 5, 8, 14, 2021
- 2) Date of Preparation: October - December 2020 & January 2021.
- 3) Basis of Bearing: A bearing of N 89 49'59" E along the south east section line of Section 34, established by the found monuments.
- 4) This survey does not constitute a title search by Sopris Engineering, LLC (SE) to determine ownership or easements of record. For all information regarding easements, rights of way and/or title of record, SE relied upon the Title Report prepared by Land Title Guarantee Company, Order No. AB563014094-2, Effective Date, January 10, 2020 and documents and plats of record as shown in the Source Documents, herein.
- 5) Basis of elevation: Project based on Global Position System (GPS) observations from the Continuous Operating Reference Station (CORS) GSC1 utilizing the Continental United States 2012 geoid model (GEOID 12A) CONUS and based the 1988 North American Vertical Datum (NAVD88) and a vertical shift of -4.22 feet as calculated by the North American Vertical Datum Conversion (VERTCON) an online service provided by a subsidiary of the National Oceanic Atmospheric Administration (NOAA). Which established all elevations shown heron. Placement benchmarks to be set as requested.
- 6) The linear unit used in the preparation of this plat is the U.S. survey foot as defined by the United States Department of Commerce, National Institute of Standards and Technology.

## A photograph of a historic brick building in downtown St. Louis. The building features multiple stories with arched windows and a balcony. A large tree is in the foreground, and a car is parked on the street. The building is made of red brick and has a mix of arched and rectangular windows. A dark awning covers the ground-floor entrance on the left. A street lamp is visible near the entrance. A car is parked on the street in front of the building. The sky is clear and blue.

## 1.0 EXECUTIVE SUMMARY

---

A new residential project named 480 Donegan is proposed to be located on the southeast corner of the intersection of Donegan Road and Storm King Road in Glenwood Springs, Colorado. The 480 Donegan development is anticipated to include 360 multifamily dwelling units and a 2,000 square foot restaurant. The 360 multifamily residences are planned as 20 townhouses, 13 live-work units, and 327 apartments. The live-work units typically cause a reduction in traffic generation by providing a place of employment within the residence. However, no reduction to the traffic volumes were applied for these units. The proposed restaurant is anticipated to primarily be an amenity internal to the site; however, was included for evaluation to provide a conservative analysis. Of note, based on other developments, approximately 80 percent of the business for the restaurant comes from the residents of the property. It is expected that the project will be completed within the next couple of years; therefore, analysis was completed for the 2022 short term and 2040 long term horizons.

The purpose of this study is to identify project traffic generation characteristics, to identify potential project traffic related impacts on the local street system, and to develop mitigation measures required for identified impacts. The following intersections were incorporated into this traffic study in accordance with the City of Glenwood Springs and State of Colorado Department of Transportation (CDOT) standards and requirements:

- Donegan Road and Chapparral Circle
- Donegan Road and Mel Ray Road
- State Highway 6 (SH-6) and Donegan Road
- Center Drive and Storm King Road
- State Highway 6 (SH-6) and Storm King Road
- State Highway 6 (SH-6) and Mel Ray Road
- Donegan Road and Storm King Road

In addition, one full movement project access along the east side of Storm King Road as well as one full movement access along the south side of Donegan Road were also evaluated.

Regional access to the project will be provided by Interstate 70 (I-70), State Highway 82 (SH-82), and State Highway 6 (SH-6). Primary access will be provided by Donegan Road, Storm

King Road and Mel Ray Road. Direct access to the site will be provided by one full movement project access along the east side of Storm King Road as well as one full movement access along the south side of Donegan Road. The access along Donegan Road is proposed to align with Chapparal Circle while the south access along Storm King Road is proposed to align with Center Drive.

480 Donegan is expected to generate approximately 2,188 weekday daily trips, with 144 of these trips occurring during the morning peak hour and 177 of these trips occurring during the afternoon peak hour.

Distribution of project traffic on the street system was based on the area street system characteristics, existing traffic patterns and volumes, demographic information, and the proposed access system for the project. Assignment of project traffic was based upon the trip generation described previously and the distributions developed.

Based on the analysis presented in this report, Kimley-Horn believes 480 Donegan will be successfully incorporated into the existing and future roadway network. The proposed project development resulted in the following recommendations and conclusions:

- Access to the site will be provided by two proposed full movement driveways. One access is proposed on the south side of Donegan Road to align with Chapparal Circle and the other access is proposed along the east side of Storm King Road to align with Center Drive. It is recommended that the access aligning with Chapparal Circle have a single exiting lane to Donegan Road and operate with stop control with a R1-1 "STOP" sign installed for the northbound exiting driveway approach.
- It is recommended that all-way stop control be provided at the intersection of Center Drive/Access and Storm King Road with development of the project. New R1-1 "STOP" signs should be installed on the northbound and southbound Storm King Road approaches of this intersection. Further, R1-3P "ALL WAY" plaques should be placed below the stop signs on all four approaches. It is recommended that orange flags be temporarily affixed to the new STOP signs on northbound and southbound Storm King Road to warn drivers of the change in traffic control.

- The threshold for requiring an access permit along CDOT roadways occurs when project traffic is anticipated to increase the existing access traffic volumes by more than 20 percent. Based on traffic projections, the addition of project traffic on the north leg of the SH-6 and Mel Ray Road intersection is anticipated to increase existing access traffic volumes by more than 20 percent during the peak hour; therefore, it is believed that an access permit will be required by CDOT for this approach at the Mel Ray Road and SH-6 intersection in association with this project. Access permit are not anticipated to be required at the SH-6/Storm King Road or SH-6/Donegan Road intersections based on the traffic volume threshold; although, if improvements are constructed at SH-6/Donegan Road as recommended for the future to include an eastbound left turn lane and an eastbound acceleration lane from the southbound left turn, a CDOT Access Permit will likely be needed.
- Based on an operational need in 2040 with or without the addition of project traffic, it is recommended that an eastbound left turn lane and an eastbound acceleration lane from the southbound left turn be constructed at the State Highway 6 and Donegan Road intersection. Based on CDOT Access Code standards, the eastbound left turn lane should provide a length of 50 feet plus a 145-foot taper while the left turn acceleration lane should provide a length of 235 feet plus a 145-foot taper. The through lane transitions around this new left turn lane should be 320 feet long based on the 40-mph speed limit and a 12-foot wide lane.
- Any on-site improvements should be incorporated into the Civil Drawings and conform to the standards of the City of Glenwood Springs, CDOT, and the Manual on Uniform Traffic Control Devices (MUTCD) – 2009 Edition.

## 2.0 INTRODUCTION

---

Kimley-Horn and Associates, Inc. has prepared this report to document the results of a Traffic Impact Study of future traffic conditions associated with a new residential project named 480 Donegan that is proposed to be located on the southeast corner of the intersection of Donegan Road and Storm King Road in Glenwood Springs, Colorado. A vicinity map illustrating the project site location is shown in **Figure 1**. The 360 multifamily residences are planned as 20 townhouses, 13 live-work units, and 327 apartments. The live-work units typically cause a reduction in traffic generation by providing a place of employment within the residence. However, no reduction to the traffic volumes were applied for these units. The proposed restaurant is anticipated to primarily be an amenity internal to the site; however, was included for evaluation to provide a conservative analysis. Of note, based on other developments, approximately 80 percent of the business for the restaurant comes from the residents of the property. A conceptual site plan illustrating the project and access locations is shown in **Appendix E**. It is expected that the project will be completed within the next couple of years; therefore, analysis was completed for the 2022 short term and 2040 long term horizons.

The purpose of this study is to identify project traffic generation characteristics, to identify potential project traffic related impacts on the local street system, and to develop mitigation measures required for identified impacts. The following intersections were incorporated into this traffic study in accordance with the City of Glenwood Springs and CDOT standards:

- Donegan Road and Chapparral Circle
- Donegan Road and Mel Ray Road
- State Highway 6 (SH-6) and Donegan Road
- Center Drive and Storm King Road
- State Highway 6 (SH-6) and Storm King Road
- State Highway 6 (SH-6) and Mel Ray Road
- Donegan Road and Storm King Road

In addition, one full movement project access along the east side of Storm King Road as well as one full movement access along the south side of Donegan Road were also evaluated.

FIGURE 1

## 3.0 EXISTING AND FUTURE CONDITIONS

---

### 3.1 Existing Study Area

The existing site is currently vacant land. To the east of the site are existing residences, a church, and Glenwood Springs Middle School. To the west of the site are existing residences, auto dealerships, and Two Rivers Community School. The area to the north of the project is primarily residential. To the south of the project is the Glenwood Springs Mall. The land uses and roadway network surrounding the site within the study area are shown in the aerial of **Figure 2**.

### 3.2 Existing Roadway Network and Future Access

Donegan Road is a two-lane roadway with one through lane in each direction, eastbound and westbound within the project limits. The roadway has a posted speed limit of 25 miles per hour in the vicinity of the site. Storm King Road and Mel Ray Road are both two-lane roadways with one through lane in each direction, northbound and southbound, within the project limits. These roadways have a posted speed limit of 25 miles per hour in the vicinity of the site. SH-6 is a two-lane roadway with one through lane in each direction, eastbound and westbound, within the project limits. The roadway has a posted speed limit of 40 miles per hour in the project study area.

The intersection of Donegan Road and Chapparral Circle is an unsignalized three-leg T-intersection with stop control on the southbound Chapparral Circle approach. This intersection currently has one lane for shared movements on all approaches. With construction of this project, a full access is proposed to align with Chapparral Circle.

The intersection of Donegan Road and Mel Ray Road is a four-leg all-way stop controlled intersection. This intersection currently has one lane for all movements at each approach.

The intersection of SH-6 and Donegan Road (approximately 1.2 miles east of the site) is an unsignalized three-leg T-intersection with stop control on the southbound approach. The westbound approach of SH-6 contains a right turn slip lane for traffic continuing west on Donegan Road. All approaches at this intersection have a single lane for shared movements.

480 DONEGAN  
GLENWOOD SPRINGS, COLORADO  
SITE AREA

FIGURE 2

The intersection of Center Drive and Storm King Road is an unsignalized four-leg intersection with stop control on the eastbound and westbound approaches. This intersection currently has a single lane for shared movements at all approaches. With construction of this project, the east leg will also provide shared access to this development area.

The intersection of SH-6 and Storm King Road is an unsignalized three-leg intersection with stop control on the southbound approach. The westbound approach consists of a through lane and a right turn lane. The eastbound and southbound approaches consist of a single lane for shared movements.

The roundabout of SH-6 and Mel Ray Road is a six-leg two-lane roundabout that provides access to SH-6, Mel Ray Road, and the I-70 Westbound Ramps. All legs of this roundabout provide two-lane approaches except for the southbound approach on Mel Ray Road which provides a single lane.

The existing T-intersection of Donegan Road and Storm King Road is unsignalized with stop control on the northbound approach. The three approaches of this intersection all provide a single lane for shared movements. The intersection lane configuration and control for the study area intersections are shown in **Figure 3**.

Regional access to the project will be provided by Interstate 70 (I-70), State Highway 82 (SH-82), and State Highway 6 (SH-6). Primary access will be provided by Donegan Road, Storm King Road and Mel Ray Road. Direct access to the site will be provided by one full movement project access along the east side of Storm King Road as well as one full movement access along the south side of Donegan Road. The access along Donegan Road is proposed to align with Chapparal Circle while the south access along Storm King Road is proposed to align with Center Drive.

FIGURE 3

### 3.3 Existing Traffic Volumes

Existing peak hour turning movement vehicle, pedestrian, and bicycle counts were conducted at key study area intersections on Wednesday, March 3, 2021. The counts were conducted during the morning and afternoon peak hours of adjacent street traffic in 15-minute intervals from 7:00 AM to 9:00 AM and 4:00 PM to 6:00 PM. The intersection of Donegan Road and Chapparral Circle turning movement volumes were derived from the trip generation potential of the surrounding area and the counts derived from the counted intersections due to the current COVID conditions. The existing intersection vehicle traffic volumes are shown in **Figure 4** while existing pedestrian and bicycle counts are illustrated in **Figure 5**. Traffic count sheets are provided in **Appendix A**.

The existing turning movement counts collected on SH-6 for this project from March 2021 were compared with daily traffic volume counts conducted by CDOT in 2018 on SH-6 west of SH-82 to determine an applicable COVID-19 adjustment. The 2018 volumes were grown by 0.13 percent per year based on the CDOT Online Transportation Information System (OTIS) growth rate to reflect 2021 volumes. This roadway segment was chosen to provide a comparison to determine an appropriate COVID-19 adjustment factor since it is near this project study area and the most applicable data available. Based on comparison of the data, the counts conducted in March of 2021 needed to be increased by 35 percent during the morning and afternoon peak hours to represent normal traffic conditions to account for COVID-19. These adjusted turning movement counts are shown in **Figure 6** with COVID-19 calculations located in **Appendix B**.

### 3.4 Unspecified Development Traffic Growth

According to traffic projections provided by CDOT OTIS, SH-6 is expected to have a 20-year growth factor of 1.03. This equates to an annual growth rate of approximately 0.13 percent. To be conservative, an annual growth rate of 0.5 percent was used to calculate short term 2022 and long term 2040 background traffic projections for the key intersections and roadways in the study area. Since the retail center to the south of the project was operating at a reduced capacity at the time of the traffic counts, trip estimates for this retail center were also assigned and included as background traffic in 2022 and 2040. CDOT OTIS traffic information is included in **Appendix B**. Background traffic volumes for 2022 and 2040 are shown in **Figure 7** and **Figure 8**, respectively.

Wednesday, March 3, 2021 7: 45-8: 45AM (2: 00-3: 00PM) Wednesday, March 3, 2021 7: 30-8: 30AM (3: 00-4: 00PM)

Wednesday, March 3, 2021 8: 00-9: 00AM (4: 15-5: 15PM)

Wednesday, March 3, 2021 8: 00-9: 00AM (5: 00-6: 00PM)

Wednesday, March 3, 2021 7: 45-8: 45AM (5: 00-6: 00PM)

Wednesday, March 3, 2021 7: 30-8: 30AM (4: 15-5: 15PM)

## 4.0 PROJECT TRAFFIC CHARACTERISTICS

---

### 4.1 Trip Generation

Site-generated traffic estimates are determined through a process known as trip generation. Rates and equations are applied to the proposed land use to estimate traffic generated by the development during a specific time interval. The acknowledged source for trip generation rates is the *Trip Generation Manual*<sup>1</sup> published by the Institute of Transportation Engineers (ITE). ITE has established trip rates in nationwide studies of similar land uses. For this study, Kimley-Horn used the ITE Trip Generation Report average rates and fitted curve equations that apply to Low-Rise Multifamily Housing (ITE Land Use Code 220), Mid-Rise Multifamily Housing (ITE Code 221), and High Turnover Sit-Down Restaurant (ITE Code 932) for traffic associated with the development.

The 480 Donegan development is anticipated to include 360 multifamily dwelling units and a 2,000 square foot restaurant. The 360 multifamily residences are planned as 20 townhouses, 13 live-work units, and 327 apartments. Differentiation is not provided for the for-sale or for-rent multi-family uses in the 10th Edition of ITE Trip Generation. The live-work units typically cause a reduction in traffic generation by providing a place of employment within the residence. However, no reduction to the traffic volumes were applied for these units. The proposed restaurant is anticipated to primarily be an amenity internal to the site; however, was included for evaluation to provide a conservative analysis. Of note, based on other developments, approximately 80 percent of the business for the restaurant comes from the residents of the property.

As identified in ITE Trip Generation 10<sup>th</sup> Edition, Low-Rise Multifamily Housing (ITE 220) includes apartments, townhouses, and condominiums located within the same building with at least three other dwelling units and that have one or two levels (floors); therefore, the 20 townhouses were evaluated with this land use code. Likewise, Mid-Rise Multifamily Housing (ITE 221) includes apartments, townhouses, and condominiums located within the same building with at least three other dwelling units and that have between three and 10 levels (floors); therefore, the apartments and live-work units were evaluated with this land use code.

---

<sup>1</sup> Institute of Transportation Engineers, *Trip Generation Manual*, Tenth Edition, Washington DC, 2017.

480 Donegan is expected to generate approximately 2,188 weekday daily trips, with 144 of these trips occurring during the morning peak hour and 177 of these trips occurring during the afternoon peak hour. Calculations were based on the procedure and information provided in the *ITE Trip Generation Manual, 10<sup>th</sup> Edition – Volume 1: User's Guide and Handbook*, 2017. **Table 1** summarizes the estimated trip generation for the proposed development. The trip generation worksheets are included in **Appendix C**.

**Table 1 – 480 Donegan Traffic Generation**

| Land Use                                                    | Weekday Vehicle Trips |              |            |            |              |           |            |
|-------------------------------------------------------------|-----------------------|--------------|------------|------------|--------------|-----------|------------|

#### 4.2 Trip Distribution

Distribution of site traffic was based on the area street system characteristics, existing traffic patterns and volumes, existing demographic information, and the proposed access system for the project. The directional distribution of traffic is a means to quantify the percentage of site-generated traffic that approaches the site from a given direction and departs the site back to the original source. The project trip distribution is illustrated in **Figure 9**.

#### 4.3 Traffic Assignment and Total (Background Plus Project Traffic)

Project traffic assignment was obtained by applying the project trip distribution to the estimated traffic generation of the development shown in **Table 1**. Project traffic assignment is shown in **Figure 10** for 480 Donegan. Site traffic volumes were added to the background volumes to represent estimated traffic conditions for the short term 2022 horizon and long term 2040 horizon. These total traffic volumes for the project study area are illustrated for the 2022 and 2040 horizon years in **Figures 11** and **12**, respectively.
